TOTAL WAR EFFORT OF ONTARIO SCHOOL CHILDREN

The pupils of Ontario's provincially-controlled schools have voluntarily subscribed up to the present, toward the general war effort, more than six and one-quarter million dollars in cash alone. Of this sum, two and one-half million dollars was given in the school year just closed. This generous response of the students is quite apart from the contribution of parents and teachers, nor does it include pupil participation in many municipal efforts toward the same objective.

CASH DONATIONS	For School Year 1942-43			From Beginning of War to June, 1943		
	Elementary Schools	Secondary Schools	Total	Elementary Schools	Secondary Schools	Total
1. Red Cross (including Junior Red Cross).....	\$117,389	\$33,829	\$151,218	\$283,348	\$102,148	\$385,496
2. War Savings Stamps and Certificates.....	1,215,127	274,243	1,489,370	3,416,277	1,222,724	4,639,001

REPORT

OF THE

Minister of Education

FOR THE YEAR 1942

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to your Honour the Report of the Department of Education for the year 1942.

During the past year, the schools of Ontario have continued to carry on their regular services in spite of difficulties of various kinds arising from the fact that we are now in the fourth year of the war.

In the Provincial Normal Schools the registration has decreased for the third year in succession. The total enrolment at these schools in 1939 was 1,247. This has decreased in successive years to 1,131 in 1940, to 1,112 in 1941, and during the past year to 938. While this decrease was due to some extent to enlistments and to participation in war work, there is no doubt that many prospective teachers have failed to enter the profession because of the greater opportunities and better remuneration offered elsewhere. Until the teaching profession is made more attractive financially, we shall probably be faced with a shortage of qualified teachers and shall certainly lose the services of many men and women, some of them possessing outstanding qualities, who, under happier conditions, would have been attracted to the profession.

For the same reasons a shortage of qualified teachers also exists in the elementary and secondary schools. Large numbers of teachers, both men and women, have enlisted in the armed services and some have given their lives in defence of freedom. It is probable that, as the war continues and becomes more intensified, the lack of qualified teachers will grow more acute. The positions vacated through enlistment and other causes were filled by the employment of married women, of teachers who were qualified in other provinces, of superannuated teachers, and of others whose qualifications and experience were such as to warrant the granting of temporary permission to teach.

During this year, 93 additional elementary schools were closed temporarily because of low enrolment. This brings the total number of small schools so closed to date to 353. The closing of these schools was usually effected by the action of the local board; in a few cases, where fewer than eight pupils were enrolled, the Minister asked that the schools be closed temporarily as provided for by The Public Schools Act. On the other hand, the number of township

school areas is increasing from year to year and will doubtless increase still further as the advantages to be derived from the larger unit of school administration are more widely realized.

The Correspondence Courses continue to function effectively by bringing to pupils in more isolated areas the opportunity to pursue the regular courses of study by mail. Although the total enrolment in these courses was slightly lower than in 1941, the number of lessons received, corrected and returned by the Correspondence staff considerably exceeded that of the previous year. These courses cover the work of the elementary school in its entirety, as well as most of the subjects in the first two years of the High School course. Through the Correspondence Courses the Department also supervises the recently introduced courses of the Canadian Legion in Introductory English, Social Studies and Elementary Arithmetic.

In the field of secondary education an outstanding contribution to the national war effort has been made in the Vocational Schools through the War Emergency Programme of the Federal Government. This programme, which was begun in 1940, has been extended as the demands of the war have increased from year to year. Of the 60,000 men trained as semi-skilled workers in the pre-employment classes throughout the Dominion of Canada, 40,000 received their training in the Vocational Schools of Ontario; while of the 37,000 who entered the armed services in the Air Force, Army and Navy, 13,000 received part of their training in these schools. This programme has been carried out through the co-operation of Advisory Committees and Boards who placed their accommodations, equipment and staff at the disposal of the Department, as well as through the untiring efforts of the Principals and the teachers in the schools.

In secondary schools there has been a marked decline in the pupil enrolment. In the Collegiate Institutes, High and Continuation Schools there was a decrease of 4,000 pupils; in the Vocational Schools the decline was even more marked because of the greater opportunities afforded to the pupils of these schools, under present conditions, to obtain immediate and lucrative employment.

In 1942 pupils who enlisted for farm service and were employed for at least thirteen weeks on the farm, were, in accordance with the practice previously adopted, granted certificates in those subjects in which they had maintained a satisfactory standard throughout the shortened school year. Many pupils left school about Easter, and the opening of the schools was deferred until late in September. It is estimated that about 20,000 secondary school pupils were employed on farms during 1942. Through the efforts of these boys and girls a valuable contribution was made to our war effort.

Throughout the year there has been in many communities, both urban and rural, a growing interest in the matter of a health programme in our schools. This interest has arisen through the introduction into the schools of courses in Health Education, and also through the rejection for physical reasons of a large number of applicants for admission to the armed services. In some schools a system of medical examination has been in operation for some time. The extension of such a plan is particularly difficult at present because of the lack of trained personnel to carry on the programme. This is one of the many problems it will be necessary to consider after the war.

The adoption of a course in Defence Training for all secondary school pupils as part of the Course in Health and Physical Education was an important

feature of the work of the past year. In order to prepare and equip teachers to carry on this new course efficiently, summer school training was offered during July and August at Geneva Park, Lake Couchiching. Over 900 teachers were in attendance and the staff of nearly every secondary school in Ontario was represented. The summer course met with widespread approval and undoubtedly laid the foundation for the measure of success which has attended the Defence Training programme in our schools.

There has been in recent years a growing demand for the introduction of religious instruction in both the elementary and the secondary schools. The Regulations have for a long time made provision for such instruction but not until recently has advantage been taken of the opportunity. With a growing consciousness of the need for religious instruction in our schools, it is probable that the practice of giving such instruction will be even more widely adopted.

The teachers and pupils of all grades and in all types of schools have made and are continuing to make most valuable contributions to our national war effort. It is difficult to secure even an approximate idea of the extent of these contributions; they have, however, been most commendable and reflect a spirit of loyalty and service on the part of both staffs and students. Through farm service employment, salvage collections, campaigns to promote the sale of War Savings Stamps, War Savings Certificates and War Bonds, through the activities of the Red Cross, the Navy League and other kindred societies, the schools have achieved a record of which we may all be proud.

Respectfully submitted,

D. McARTHUR,

Minister of Education.

Toronto, February 1st, 1943.

Note: The above was prepared on the instructions of Dr. McArthur, who died July 20, 1943, before he had an opportunity of reading the proof.

PUBLIC AND SEPARATE SCHOOLS

The Provincial Inspectoral Staff, 1942

I. IN MEMORIAM:

Mr. John Flower, B.A., Public School Inspector for the City of Welland, tendered his resignation to the Welland Board of Education on January 15th, 1942, owing to ill health, and on February 15th, 1942, he passed away at his Welland home. At the time of his retirement he had completed fifty years of service in the teaching profession, thirty-seven of which were given in the City of Welland. Mr. Flower was born in Dunnville and received his early elementary and secondary school training in the Dunnville Public and High Schools, and his professional training at the Caledonia Model School, the Ottawa Normal School and the Ontario Normal College. While continuing to teach, he completed the requirements for the Arts degree of Queen's University, graduating in 1923. From 1889 to 1903 Mr. Flower taught successfully in rural schools, S.S. No. 10 Gainsboro, S.S. No. 2 Dunn, S.S. No. 2 Moncton, and at Ballantrae and New Sarum. In 1903 and 1904 he had further teaching experience as a principal in the urban centres of Mildmay and Renfrew. On January 1st, 1905, he became principal of Welland's only public school at that time, and continued to serve in Welland as principal until his appointment as Inspector of Public Schools for the city. Mr. Flower was undoubtedly an excellent teacher, principal and inspector, and a man of high ideals and strong Christian character. One leading Welland citizen, in commenting on his work at the time of his retirement, stated: "What John Flower in his forty years of service has been worth to Welland cannot be computed, for thousands upon thousands of boys and girls have gone out into the world with the impress of his character and ideals."

Dr. H. J. Prueter, B.A., Public School Inspector for the City of Kitchener, died suddenly at his home in Kitchener on May 21st, 1942. Dr. Prueter was born in Listowel and received his elementary and secondary education in the schools of his home town. He attended the Faculty of Education in Toronto in the school year 1913-14, and in September, 1914, he was appointed to the staff of Essex Public School, Toronto. He served overseas in the Great War as a Lieutenant from February, 1916, to June, 1919, after which he returned to the Toronto Public School staff as assistant at Essex Public School. In September, 1925, he became principal of Victoria Street Public School, Toronto, where he gave most successful service. In 1928 he became principal of Wellesley Public School, which contained, in addition to the regular classes, the crippled children's classes for the city. Later, in 1928, he left Toronto to become Public School Inspector for the City of Kitchener. Dr. Prueter graduated in Arts from Queen's University, and in 1936 he completed standing with the University of Toronto for the degree of Doctor of Pedagogy, his thesis topic being, "Crippled Children of Ontario." In his earlier work as a principal, and particularly in his work as an inspector, Dr. Prueter proved himself to be an able school administrator and a competent educational leader. The schools of Kitchener advanced rapidly under his guidance, and the success of the fifth classes organized by him in Kitchener gave spendid evidence of the value of special grouping and special

courses in the case of pupils who discontinue attendance at day school at approximately sixteen years of age. He contributed much to the cause of education in Kitchener and throughout the Province.

II. RETIREMENTS:

Dr. J. B. MacDougall, B.A., Assistant Chief Inspector of Public and Separate Schools, retired on August 31st, 1942, after a most successful service in Ontario of more than forty-eight years as teacher, principal, inspector, Normal School master and official of the Department of Education. Dr. MacDougall was born near Stirling in Clackmannanshire, Scotland, and at the early age of two came with his parents to settle in Ramsay Township, Lanark County, near Almonte. On completing his elementary school training in his home rural school he attended the Almonte High School, from which he graduated in 1892, obtaining the Prince of Wales Scholarship in Classics, English and Mathematics. He entered Queen's University, graduating in 1896 with Honours in Classics and English. Before attending University Dr. MacDougall had three years' teaching experience in the rural school in S.S. No. 3 Ramsay. On the completion of his university course he received his call to the North, and in 1897 became principal of the North Bay Model School. Here he gave one year's high school and professional training to his young students, who became teachers in the schools of the rapidly developing Northland. Largely due to his efforts over a period of years, a high school was opened in North Bay in 1902, and he became its first principal. In January, 1904, the Department of Education appointed him as the first resident Inspector of Schools in the North. He has frequently spoken of his early inspectorate as having had as its northern boundary the North Pole, its western boundary the Province of Manitoba, its eastern boundary the Province of Quebec and the southern boundary the area always known as Southern Ontario. With indefatigable zeal and energy he travelled through the Northland on foot, by canoe, snowshoe, dogsled and railroad, helping the settlers to establish schools wherever the number of children would warrant them. When silver was found in 1903 in the Cobalt area, and gold in 1909 in the Porcupine area, Dr. MacDougall went at once into these districts to arrange schools for the children. Cobalt, Elk Lake, Englehart, Latchford, Haileybury, New Liskeard, Golden City, South Porcupine, Timmins, Cochrane and Hearst sprang up "in the night" and the schools followed apace. In 1909 the North Bay Normal School was opened, and in 1911 Dr. MacDougall became the Master in English and Science of Education. He gave splendid service here until 1919, when the Honourable Dr. Cody, then Minister of Education, invited him to become Assistant Chief Inspector of Public and Separate Schools. His territory was again the whole of Northern Ontario, but his duties included the submission of reports upon any special problems in the Province which were referred to him by the Minister. Dr. MacDougall made a major contribution to the advancement of the elementary schools of Ontario during his period of professional service, and everywhere throughout the Province his associates and acquaintances regret the closing of his active career as a leading educator. In 1918 Dr. MacDougall received a Doctor's degree in Pedagogy from the University of Toronto, his thesis topic being "Building the North." Dr. MacDougall was constantly aware, as he travelled over the vast Northland, that the typical ungraded rural school failed to meet the needs of the sparsely settled areas. He advocated, therefore, correspondence courses and railway school cars, and the present great success of these two means of bringing school-training to the children of the hinterland is largely due to the early planning and direction given

by him. High schools and continuation schools in these earlier years were practically unknown in the Far North, and Dr. MacDougall, acting for the Department of Education, organized the Northern Academy at the Monteith Demonstration Farm. This school enabled many students residing in the Districts to receive a very practical high school training. As early as 1922 thirteen purely rural consolidated schools and a number of township boards of trustees were established in Northern Ontario under his guidance. In 1925 Dr. MacDougall was transferred to the Department of Education, Toronto, where, as Assistant Chief Inspector of Public and Separate Schools, he took charge of the general supervision of the elementary schools in Eastern and North-eastern Ontario. He also reorganized the accounting, checking and recording of school attendance, and during his period of work in this connection the average school attendances rose from 70% to 92%, with corresponding improvement in education.

Mr. J. W. Hagan, M.A., retired from his duties as Public School Inspector on August 31st, 1942. He was first appointed in January, 1917, to the Manitoulin inspectorate, with residence at Gore Bay. In March, 1942, he succeeded Mr. R. A. Paterson in Oxford County (South), and Norfolk County (in part), with residence at Ingersoll. Mr. Hagan was born in North Walsingham Township in Norfolk County and received his early elementary and secondary education in S.S. No. 17 North Walsingham, the Simcoe High School and the Brantford Collegiate Institute. He took his professional training at the Norfolk County Model School at Simcoe and at the Ottawa Normal School, and later he completed the examinations of the Ontario School of Pedagogy in Toronto, without attendance. Mr. Hagan had elementary teaching experience in U.S.S. No. 9, 8 Charlotteville and Walsingham South, S.S. No. 19W Walsingham South, and S.S. No. 22 Walsingham North. Later he served as principal of the Cainsville Public School and the Delhi Public School. He had high school teaching experience at Georgetown, Petrolia and Simcoe. He graduated from Queen's University, obtaining the Master of Arts degree and winning the gold medal in Animal Biology of the Honour Science course. Mr. Hagan did much to advance the cause of education during his experience as a teacher, principal and inspector. His kindly manner with his teachers, his high academic training and his highly successful practice as a teacher fitted him naturally for the work of an inspector, and he always had the highest esteem of the ratepayers, trustees, and teachers. In his final year as an inspector Mr. Hagan was successful in bringing about the organization of two township school areas in Dereham Township.

Colonel Walter Joyce, B.A., Public School Inspector for Brant County and Norfolk County (in part), retired from his active duties on August 31st, 1942, after completing a very successful inspection service of ten years and eight months. Colonel Joyce was born in Wentworth County and attended the Bronte Public School and the Oakville High School. His professional training followed at the Ottawa Normal School and the Faculty of Education of Queen's University. In January, 1891, Colonel Joyce began his public school teaching career in S.S. No. 16 Trafalgar, Halton County. Later he filled rural school teaching positions in S.S. No. 22 Burford and S.S. No. 20 Burford. At Easter, 1896, he became principal of the Plattsville Public School; in January, 1899, he became principal at Mount Pleasant, and in September, 1909, he went to Brantford as principal of a city public school. Here he built up for himself an excellent record as a public school principal and a leading citizen. Colonel Joyce secured his Arts degree from Queen's University after a period of extra-mural study and

of attendance at the University summer courses. Colonel Joyce was on active service during the first Great War from March, 1916, to September, 1919. He rendered signal service because he possessed in a high degree those qualities required in an efficient commissioned officer. He was the Officer Commanding the Dufferin Rifles of Canada for a period of four years. In January, 1932, Colonel Joyce was selected by the Department of Education as Public School Inspector to succeed the late Mr. T. W. Standing. During his period of office as an inspector he did much to improve the public schools of Brant County. He gave particular attention, on the material side, to the improvement of the lighting in the older schools. He was one of the first inspectors in the counties to organize a township school area, and at the time of his retirement two township school area boards were functioning very successfully in Brantford and Onondaga Townships. On the academic side Colonel Joyce did much to stimulate better work in Oral Reading and in Social Studies. It can truly be said that he proved himself to be a leading educationist, whether as a city principal, a county inspector, or as an associate of his fellow inspectors in the larger educational problems of the Province.

Mr. J. L. Mitchener, B.A., elected to retire on August 31st, 1942, some two years before reaching the age limit for the retirement of inspectors. He was born in Haldimand County, and received his elementary school training at the Clear Creek Public School, and his secondary school training at the Port Rowan High School and the Aylmer Collegiate Institute. After graduating from the Ottawa Normal School Mr. Mitchener taught in elementary schools at Clear Creek and Selkirk. In 1902 he graduated from McMaster University and the University of Toronto in Honour Science. Later he completed Specialist standing in Art and Agriculture. His teaching experience as an assistant in secondary schools was at Caledonia, and as a principal at Vankleek Hill, Dutton and Ridgetown. In January, 1919, Mr. Mitchener received appointment, through the County Council, as Public School Inspector for the County of Haldimand. The schools made marked progress under his supervision and he was beloved and respected throughout the county, and particularly by the trustees, teachers and pupils. Mr. Mitchener's special interests were the Historical Society of Haldimand, the Children's Aid Society, and the special teaching of Music in his schools. In the field of school welfare, as well as in his other activities, Mr. Mitchener was able to record constant and unusual progress because of his ability as a leader, his quiet determination to improve conditions as he found them, and his tact and genial approach to people.

Mr. J. L. Moore, B.A., retired from his active duties as Public School Inspector for Parry Sound District on August 31st, 1942, after completing the unusually long period of thirty-one years and six months in this field of work. Mr. Moore was born in the vicinity of Acton, Halton County, and obtained his elementary schooling in the Acton Public School. He took his secondary school courses at the Georgetown High School and the Parkdale Collegiate Institute, Toronto, and his professional training at the Ontario Normal College, Hamilton. He obtained his Arts degree at Queen's University, securing Honour and Specialist standing in Modern Languages. Mr. Moore gained elementary teaching experience as principal of Norway Public School, East Toronto, and secondary school teaching experience in the Peterborough Collegiate Institute as assistant, in North Toronto Public and Continuation School as principal, and finally as principal of Parry Sound High School from January 1st, 1907, to December 22nd,

1910. In his inspectorate Mr. Moore had many schools with very low assessment. In addition to the task of arousing local interest in the schools he had constantly to study closely the financing of the schools and to bring to the attention of the Department of Education the needs of the different school sections. No other inspectorate in the Province called for greater versatility on the part of the inspector, and it can truly be said that Mr. Moore met the challenge successfully. His schools progressed rapidly; ratepayers, boards and teachers followed his leadership enthusiastically, and before he completed his tenure of office the whole inspectorate came under township school area administration.

III. RESIGNATION:

Dr. Louis Charbonneau, M.A., B.Paed., became an Inspector of Separate Schools on November 1st, 1927, at the time the reorganization of the elementary schools attended by French-speaking pupils was made, his first inspectorate being in the County of Russell. On February 1st, 1942, he resigned from his work as an inspector to become a member of the Federal Civil Service. Dr. Charbonneau was born at Lefavre, Prescott County. He attended the separate school of S.S. No. 12 Alfred and also the Hawkesbury Separate School; his secondary school and Arts courses were taken at Ste. Therese, Quebec, this school being in affiliation with Laval University. He graduated in Arts from Laval University in 1911, and for some time was engaged in journalism but later prepared for the teaching profession, attending the course for First Class teachers at Saskatoon, Saskatchewan. In 1916 he obtained the First Class certificate and the High School Teacher's certificate for Saskatchewan. From 1923 to 1927 he taught in the University of Ottawa. From 1927 to 1932 he served as a Separate School Inspector, and from 1932 to 1940 he was a Master on the staff of the University of Ottawa Normal School. In October, 1940, Dr. Charbonneau again became a Separate School Inspector, and continued in this capacity in the Sudbury District, with residence at Sudbury, until he made transfer to the Federal Civil Service. Dr. Charbonneau obtained a Master of Arts degree from the University of Ottawa in 1935 and in the following year he completed standing at this University for the Doctor of Philosophy degree; in 1940 he obtained the Bachelor of Pedagogy degree from Montreal University. Dr. Charbonneau was always a keen student and he possessed in a high degree those qualities necessary in a successful teacher and educational leader. Whether teaching in the classroom, supervising the work of the teacher in the classroom, preparing text-books for French-speaking pupils, or serving on committees in educational or community fields, he always rendered splendid service, and the interests of the elementary schools, and particularly of the French-speaking section of the Ontario schools, suffered a distinct loss when he accepted a position in the Federal Civil Service.

IV. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1942:—

1. City of Brantford: Captain Thomas Bingle, B.A., B.Paed., Principal of King George Public School, Brantford, to replace Mr. Russell Reid, B.A., temporarily, while the latter is on active service, duties beginning June 5th.
2. City of Kitchener: M. G. Hughson, B.A., B.Paed., Principal of Aberdeen Public School, London, duties beginning June 28th.

3. Essex (No. 2): G. L. Duffin, B.A., M.Ed., Principal of Amherstburg Public School, duties beginning September 1st.
4. Haldimand: Arthur Archibald, B.S.A., Principal of Whitby High School, duties beginning September 1st.
5. Prescott and Russell: W. J. McLeod, B.A., B.Paed., on the staff of Carlton Public School, Toronto, duties beginning September 1st.
6. Simcoe West; Grey (in part): William Rogers, B.A., B.Paed., Supervising Teacher in Kent County, duties beginning September 1st.
7. District Division IX: R.C. Cassie, B.A., Principal of Wintemute Public School, Fort Erie, duties beginning September 1st.
8. District Division XII: R. H. Macklem, B.A., on the staff of Runnymede Collegiate Institute, York Township, duties beginning September 1st.
9. District Division XV: P. M. Scott, B.A., Principal of S.S. No. 2 Falconbridge, duties beginning September 1st.
10. R.C.S.S. Division IV: F. A. Moreau, B.A., B.Paed., Assistant in office of Chief Inspector of Public and Separate Schools, duties beginning May 1st.

SUPERVISING TEACHER:

11. Kent: Adam McLeod, formerly Headmaster of the Toronto Normal Model School, to assist Inspector G. A. Pearson, duties beginning September 1st.

V. TRANSFERS:

The following transfers were made in the provincial staff of inspectors during the year 1942:—

<i>Inspector</i>	<i>Former Appointment</i>	<i>New Appointment</i>	<i>Date</i>
1. C. F. Cannon, B.A., B.Paed.	York (No. 6)	Department of Education	July 1
2. J. K. Evans, B.A., B.Paed.	Simcoe West, Grey (in part)	Ottawa Normal School	Sept. 1
3. H. A. Halbert, B.A., B.Paed.	Dufferin	York (No. 6)	Sept. 1
4. A. F. Hansuld, B.S.A., B.Paed.	Stratford Normal School	Waterloo (No. 2)	Sept. 1
5. W. F. Hiscocks, B.A.	District Div. IX	Leeds (No. 1)	Sept. 1
6. Charles Howitt, B.A., B.Paed.	Waterloo (No. 2)	Welland (in part)	May 1

7. I. B. Hyde, B.A.....Welland (in part).....Oxford South and Norfolk (in part).Sept. 1
8. W. L. Lovell, B.A.,.....District Div. XII.....Dufferin.....Sept. 1

9. Remi Millette, M.A.,.....R.C.S.S. Div. IV.....R.C.S.S. Div. III..May 1
B.Paed., Ph.D.
10. F. W. Minkler, B.A.,.....Essex (No. 2).....Welland East.....Sept. 1
B.Paed.
11. J. C. Webster, B.A.,.....Prescott and.....Brant and Nor-
B.Paed. Russell folk (in part).....Sept. 1

VI. EXCHANGES BETWEEN INSPECTOR AND NORMAL SCHOOL MASTER, FOR ONE YEAR FROM SEPTEMBER 1ST, 1942:

E. C. Beacom, B.A., Public School Inspector, Huron South, to Stratford Normal School, exchanging with E. H. McKone, M.A., B.Paed., of London Normal School.

R. H. Roberts, M.A., Public School Inspector, Leeds (No. 1), to London Normal School.

VII. MILITARY SERVICE:

Russell Reid, B.A., Public School Inspector, City of Brantford, June 5th.

Z. S. Phimister, B.A., B.Paed., Public School Inspector, Welland East, September 1st.

Legislative Grants

With the exception of a few years in the recent period of depression, larger grants have been given each succeeding year to elementary schools, as is shown by the following amounts:—

1939: \$4,036,195.65

1940: \$4,038,377.06

1941: \$4,718,080.94

1942: \$4,883,146.18

The increase in the amount of the grants in 1942 over the amount in 1939 was \$846,950.53.

Township School Areas

Over the period January to June, 1942, 35 additional township school areas were formed, and in four former areas additions were made. This brought the number of township area units to 165 and the total number of school sections dissolved to 864. Each year the campaign for township school areas is initiated by the local public school inspectors, and much credit is due the inspectors for the success of this policy and for their assistance and guidance in the passing of the by-laws with a minimum of friction.

The list of township school areas formed in 1942 follows:—

Township	No. of School Sections	County or District	Inspector	Date
1. Mattawan.....	2	Nipissing	J. W. Trusler	Jan. 3
2. Strong.....	4	Parry Sound	E. R. Underhill	Jan. 12
3. Armour.....	4	Parry Sound	E. R. Underhill	Feb. 7
4. Sunnidale.....	2	Simcoe	J. K. Evans	May 7
5. Somerville.....	10	Victoria	A. Stouffer	May 7
6. Coleman.....	2	Temiskaming	W. L. Lovell	May 12
7. Wawa (Tp. 29, Range 23) (Unorg.)..	2	Algoma	D. T. Walkom	May 16
8. Sebastopol.....	4	Renfrew	H. Bolingbroke	May 30
9. Nelson.....	14	Halton	L. L. Skuce	June 1
10. Willoughby.....	6	Welland	Z. S. Phimister	June 1
11. Drury, Denison and Graham.....	9	Sudbury	O.M. MacKillop	June 1
12. Mono.....	20	Dufferin	H. A. Halbert	June 5
13. Plantagenet (South).....	2	Prescott	J. C. Webster	June 5
14. Hope (North).....	9	Durham	W. H. Carlton	June 6
15. Tuckersmith.....	3	Huron	E. C. Beacom	June 6
16. Monaghan (North).....	1	Peterborough	D. F. Downey	June 8
17. Dereham "A".....	5	Oxford	J. W. Hagan	June 8
18. Dereham "B".....	5	Oxford	J. W. Hagan	June 8
19. Tay No. 1.....	2	Simcoe	J. A. Gibson	June 9
20. Orillia.....	6	Simcoe	J. A. Gibson	June 13
21. Grattan.....	5	Renfrew	H. Bolingbroke	June 15
22. Camden East No. 3.....	5	Addington	K. O. Birkin	June 17
23. Marysburgh (South).....	7	Prince Edward	A. F. Brown	June 17
24. Marmora and Lake.....	8	Hastings	H. H. Loucks	June 20
25. Crowland.....	3	Welland	N. R. Wightman	June 22
26. Tudor and Cashel.....	6	Hastings	H. H. Loucks	June 27
27. Johnson.....	4	Algoma	S. Geiger	June 27
28. Chandos No. 2.....	3	Peterborough	L. W. Copp	June 27
29. Medonte.....	6	Simcoe	J. A. Gibson	June 29
30. Sydenham (South).....	8	Grey	L. L. Sinclair	June 29
31. Sydenham (North).....	8	Grey	L. L. Sinclair	June 29
32. Vespra.....	2	Simcoe	W. R. McVittie	June 29
33. Innisfil.....	4	Simcoe	W. R. McVittie	June 29
34. Derby.....	8	Grey	L. L. Sinclair	June 30
35. Lancaster.....	3	Glengarry	R. O. Staples	June 30
Additions to existing Township Areas:				
1. McLean.....	1	Muskoka	G. S. Johnson	Mar. 20
2. Stephenson.....	2	Muskoka	G. S. Johnson	May 27
3. Oro.....	2	Simcoe	W. R. McVittie	June 29
4. Clute and Calder (Unorganized).....	1	Cochrane	W. F. Hiscocks	June 29

The summary of township school areas formed to date is as follows:—

	Twp. School Areas	School Sections Involved
Number formed before 1938.....	15	84
Number formed in 1938.....	15	70
Number formed in 1939.....	43	
Additions to existing Areas: 4		213
Number formed in 1940.....	26	
Additions to existing Areas: 7		147
Number formed in 1941.....	31	
Additions to existing Areas: 2		152
Number formed in 1942.....	35	
Additions to existing Areas: 4		198
Totals.....	165	864

Transportation

In accordance with the policies of the Department (i) to close schools of low attendance and (ii) to ensure that all elementary school pupils in the Districts

of the Province may have the opportunity of attending school, a considerable sum was spent on the transportation of elementary school pupils. The amounts given below show the comparative sums spent on this service in the two fiscal years 1940-41 and 1941-42:—

Fiscal year 1940-41: \$25,054.78

Fiscal year 1941-42: \$26,883.34

Increase for 1941-42: \$1,828.56

Another policy of the Department in recent years has been to discourage the organization of fifth classes (Grades IX and X) in ungraded schools. In lieu of fifth classes the Department has encouraged the transportation of fifth class pupils to secondary schools by paying to each section which is a party to a transportation agreement approved by the Department a grant of 50% of the net cost of the transportation to that section. The amounts paid to boards of trustees in grants on transportation to secondary schools for the fiscal years 1940-41 and 1941-42 are given below:—

Fiscal year 1940-41: \$12,296.95

Fiscal year 1941-42: \$24,738.91

Increase for 1941-42: \$12,441.96

The Supply of Teachers

During the year 1942 there was a marked decrease in the supply of qualified teachers for the elementary schools of the Province, largely due to the enlistment of teachers in the Active Services and to the securing by teachers of more lucrative employment. However, no school was closed for more than a month because of a Board's inability to secure a teacher. Many former teachers who are married came to the assistance of the boards of trustees. It is estimated that more than 2,000 married women teachers were engaged in the profession during the year. In one inspectorate as many as 60 of these teachers were employed, and the average number for rural inspectorates reached the level of 25%. These teachers, due to their experience with children of their own and to their maturity of judgment, did excellent work. Their services during a critical time were much appreciated by the Department of Education, as well as by the boards of trustees. In addition, there were employed a considerable number of teachers qualified in other Provinces, also many teachers who hold expired Ontario Third Class certificates, a number of persons who failed at an Ontario Normal School, and a few persons who hold only academic standing in the Province. An unqualified teacher was permitted by the Department to teach in a school only for the school year. On December 5th, 1942, as many as 436 "permits" had been granted for the employment of unqualified teachers for the school year September, 1942, to June, 1943.

The scarcity of qualified teachers will probably continue for the duration of the war.

Salaries of County Rural Public School Teachers

A questionnaire was submitted to the rural county public school inspectors early in the autumn term of 1942. The following are the categories in which these salaries as reported have been classified:—

Salary Range	Counties		Districts		Total		Grand Total
	Male	Female	Male	Female	Male	Female	Male and Female
Less than \$600.....				1		1	1
\$600 but less than \$650.....		4				4	4
\$650 " " " \$700.....		4		4		8	8
\$700 " " " \$750.....		37	1	4	1	41	42
\$750 " " " \$800.....	4	63	1	14	5	77	82
\$800 " " " \$850.....	11	356	2	86	13	442	455
\$850 " " " \$900.....	20	471	3	66	23	537	560
\$900 " " " \$950.....	72	1,348	12	234	84	1,582	1,666
\$950 " " " \$1,000.....	44	635	9	76	53	711	764
\$1,000.....	141	1,210	25	265	166	1,475	1,641
Greater than \$1,000.....	500	1,135	169	310	669	1,445	2,114

The Temporary Closing of Small Schools

At the close of the school year in June, 1942, the number of schools closed temporarily, because of low enrolment, stood as listed below. In most cases these schools have been closed by the action of the local board of trustees, but in a few cases the Minister of Education asked that the school be closed temporarily, as provided for under Section 87(1) of The Public Schools Act, which reads as follows:—

“Where in any rural school section there are for two consecutive years less than eight persons between the ages of five and fourteen years residing therein, the Minister may direct that the public school of such section shall no longer remain open, and the same shall thereupon be closed until the Minister otherwise directs.”

The following schools were closed temporarily during the year 1942:—

Inspectorate	Inspector	School	Enrolment
Carlton.....	T. P. Maxwell...	No. 3 Torbolton.....	3
Carlton.....	T. P. Maxwell...	No. 7 Marlborough.....	4

Teachers' Library

Beginning in February, 1938, the Department of Education opened for circulation in the Travelling Libraries Branch a reference reading library for teachers. It was expected that large numbers of teachers would make use of this library, but during the first year of operation of the library only 749 teachers were registered and the book circulation was only 1,199. In the calendar year 1941 some 1,596 teachers were registered, and the book circulation was 2,067; in the calendar year 1942, 2,019 teachers were registered and the book circulation was 2,354. The Teachers' Library now contains 1,043 books relating to teaching and to the work of the schools; others are being added from time to time. A book is loaned to a teacher for a period of three weeks and the postage both ways is paid by the Department of Education. Any teacher may secure membership in the Teachers' Library by making application to the Teachers' Library, Travelling Libraries Branch, Department of Education, Parliament Buildings, Toronto.

Correspondence Courses

The records of the correspondence courses conducted by the Department of Education during 1941-42 indicate that this was one of the most successful years since the courses were established. While the total enrolment of pupils, 2,249, was somewhat less than that of the previous school year, the number of lessons received, corrected and returned, viz. 63,703, exceeded that of the previous year by over 2,000. Wherever His Majesty's mails could reach by rail or air these courses have been made available to children of the isolated areas. For instance, these lessons have reached pupils who live as far north as Port Harrison, on the east coast of Hudson Bay.

As in former years, courses were also provided for bedfast patients in practically all the Sanatoria and Preventoria of the Province.

The war had its effect, too, on the personnel of the pupils. In many families in Northern Ontario the father and older sons have enlisted or have become employed in war industries. The families, left alone, have moved for the duration of the war into the nearest village where the children may go to school. In other cases, many boys and girls between the ages of fourteen and sixteen

were compelled to forego school attendance in order to help out on the farm. A number of families became domiciled temporarily outside the Province due to the fact that their men folk had secured lucrative employment in war factories or on the Alaskan Highway. In these instances the enrolment of their children in the correspondence courses was continued for a limited period of time.

Ontario missionaries in Trinidad, Venezuela, Paraguay, Bolivia and the Belgian Congo are also provided with the courses in order that their children may follow the Ontario course of study. This service is greatly appreciated by them and they voluntarily pay for the text-books and supplies. The two children of Rev. G. P. Near, Kandale, District of Kuango, Belgian Congo, have received all their education by correspondence. One is now in Grade X and the younger one in Grade VI.

The results of the High School Entrance examinations last June, in respect of pupils taking the correspondence courses, were equally satisfactory. Thirty-seven candidates were recommended to the various Entrance Boards. Thirty-five were successful in receiving their Entrance standing.

Six hundred and fifteen pupils received promotion to a higher grade. Many pupils who were enrolled late in the school year, or who failed to complete their grade by the end of June, continued their courses in the following September. The results in Grades IX and X were the most satisfactory since the courses were begun, as is shown by the following tabulations:—

Subjects completed in Grades IX and X:

2	completed	8	subjects	
2	"	7	"	
5	"	6	"	
12	"	5	"	(an average year's work)
20	"	4	"	
12	"	3	"	
20	"	2	"	
12	"	1	subject	

Pupils completing fewer than four subjects were either completing the grade in which they were enrolled or were enrolled later in the school year and failed to complete all the subjects they had undertaken.

The staff of the correspondence courses consists of twenty full-time teachers, who read, correct, explain and grade the lessons.

The Department, through the correspondence courses, also supervises the recently introduced courses of the Canadian Legion for enlisted men in Introductory English, Social Studies and Elementary Arithmetic.

Railway School Cars

There has been no change in the teaching staff of the Railway School Cars, with the exception of the car on the T. & N.O. Railway where Mrs. McKay is taking the place of her husband, who has enlisted in the Army. In 1926 these schools came into being to meet a long-felt need in the northern districts. Mr. McNally, on the C.P.R. School Car running from Cartier to Chapleau, and Mr. Sloman on the C.N.R. School Car whose route extends from Capreol to Foleyet, are the pioneer teachers on these cars. Now there are seven cars. Not only do they provide education from Grades I to X for the children, but in other ways

these schools are an asset to the districts through which they travel. The percentage attendance is high in spite of many unfavourable circumstances; one teacher, in explaining the absence of three pupils (aged 9, 9 and 10 years), wrote that "in a blinding snow storm at a lonely spot, ten o'clock at night, the engineer failed to see the children trying to flag his train to take them to the school car." This illustrates quite well the spirit of the children of the North.

Health Teaching and School Medical Inspection

The campaign for school health supervision in the smaller urban and rural municipalities has produced unexpected support during the year 1942. While welcomed, this manifestation of popular interest in what must be considered to be an essential part of any community health programme comes at a time when trained personnel to meet these demands is not easy to obtain. However, while the situation can and will be met, it may be necessary to give serious consideration to the co-ordination of public health nursing services in those centres in which such services are carried on under the auspices of two different departments of local government. Where we are vitally concerned with a proportionate distribution of suitable personnel trained in public health between the Armed Forces and the civilian population, adjustments heretofore not considered may be necessary.

Radio Receiving Sets in Schools

There are 432 urban public and separate school buildings and 248 rural public and separate school buildings in the Province which have radio receiving sets. In addition to the above, there are many schools where the teachers and pupils bring their own sets to school to listen to special programmes, and several schools have loud speaker attachments. The Department of Education has co-operated with the Canadian Broadcasting Corporation in the sponsoring of musical and other educational programmes.

Interchange of Teachers

The following exchanges were arranged for the school year 1942-43:—

ELEMENTARY SCHOOLS:

Ontario Teacher

Thelma F. Dixon

106 Ferguson St., North Bay,
(Dr. Carruthers P.S.)

Mildred V. Palmer

17 Chesterhill Rd., Toronto
(Toronto P.S.)

Marjorie L. Reed

102 Tyndall Ave., Toronto
(Toronto P.S.)

Exchange Teacher

Josie B. Geldart

112 Oxford St., Halifax, N.S.
(Halifax P.S.)

Laurel M. Rowntree

5710 Willingdon Place, Vancouver,
(Vancouver P.S.) B.C.

Margaret Davies

5596 Fleming St., Vancouver, B.C.
(Vancouver P.S.)

SECONDARY SCHOOLS:

Ontario Teacher:

Wilma B. Murray

1666 Queen St. W., Toronto
(York Memorial C.I.)

Exchange Teacher:

Esther Harrop

93 Isabella St., Toronto
(Vancouver High Schools)

Visual Education

In the Visual Education Branch of the Department a library of lantern slides and 16 m.m. moving picture films, both silent and sound, is maintained. These instructional films and lantern slides are used exclusively for educational purposes in connection with schools, and are supplied on the application of school principals. No covering or rental charge is made for this service, the borrower being required to pay only the express charges on the receipt of the shipment.

At present there are upwards of 200 sound films, 60 silent films and 80 sets of lantern slides for distribution. Over three hundred schools have obtained films and slides for instructional use this past year. It has been ascertained recently that there are 140 sound projectors, 116 silent projectors, as well as many projection lanterns in the schools of the Province. Due to priorities it is not possible for school boards to purchase projection machines at the present time.

Religious Instruction in the Public Schools

During the past three years there has been an increasing demand in all parts of the Province for a greater measure of religious instruction in the public schools. Clergymen have made much greater use of the regulation which permits them to give religious instruction to the pupils in the schools before and after school hours. A survey made in 1942 showed that 852 clergymen were giving religious instruction in the public schools under Regulation 13(3) of the General Regulations; that 788 public school boards were making provision for this instruction, and that pupils of 1,909 classrooms were receiving such instruction.

The War Effort of Ontario Schools

If the sum total of war effort of the elementary and secondary schools were known accurately it would doubtless reach a surprising amount in money value, and a huge total in the numbers of articles sent overseas and donated to the various war organizations in the Province and the Dominion. Some local publicity is given to the war work of the schools in each community, but because of the various methods used in different localities it is very difficult to make a survey for the Province as a whole, and to estimate a grand total.

In the early salvage campaigns for paper, bones, grease, rubber, metals and all forms of scrap under the direction and urge of the inspectors the schools were very largely responsible for the successful results. No body of persons gives a more willing and more thorough type of voluntary service than the teachers and pupils. In the recent intensified campaigns for the sale of Victory Bonds, War Savings Stamps and War Savings Certificates the schools assisted greatly in the publicity for the campaigns and in the actual purchase and sale of bonds and certificates.

The Statistician of the Ontario Department of Education, after an exhaustive survey, gives below a very close approximation of the war effort of the elementary schools of Ontario from the beginning of the war to the end of June, 1942:—

CASH DONATIONS:

1. Red Cross (including Junior Red Cross)	\$165,959.00
2. War Savings (Stamps, Certificates and Victory Bonds).....	2,201,150.00
3. Purchase of Equipment.....	19,405.00
4. Purchase of Clothing, Medical Supplies, etc. (ready-made or for processing).....	18,407.00
5. Donations for Special Funds (B.W.V.F., Queen's Fund, etc.).....	161,101.00
6. Any other purchases or donations of money.....	47,429.00
Total.....	\$2,613,451.00

NON-CASH DONATIONS:

1. Clothing donated or made (number of articles).....	125,581
2. Food donated (estimated money value).....	\$8,828.00
3. Salvage collected and turned in, not sold (weight in tons).....	3,642
4. Any other donations (estimated money value).....	\$28,506.00

During the closing four months of 1941 the pupils of the elementary schools of Ontario were purchasing War Savings Stamps at the rate of \$125,000.00 per month. Better organization since that time leads to the estimate that the rate of purchase is now considerably above \$160,000.00 per month; it is hoped that this rate will be greatly exceeded in 1943.

Conclusion

The year was a very busy one for all connected with the elementary schools. In addition to the regular programme a number of special activities occupied the attention of all the public and separate schools. In February and March the first Junior Red Cross campaign resulted in the contribution of \$29,781.60 for war and health purposes.

A programme of more than usual significance was prepared and given on Empire Day, May 23rd, the Minister having provided for the use of the teachers a most attractive and helpful booklet programme related closely to the successful conduct of the war and the great part being played by the Empire in general and by Canada in particular.

Early in the autumn term a Navy League campaign through the schools produced \$32,532.14 for use in providing comforts and necessities for those in our Navy and Merchant Marine services. It is further estimated that the pupils of the elementary schools averaged more than \$125,000.00 per month in the purchase of War Savings Stamps and War Savings Certificates. Constantly throughout the year the schools were playing their part in many ways in the successful prosecution of the war. The inspectors and teachers responded willingly and effectively in all the additional activities of the schools and, at the same time, maintained the high standards of the classroom programme.

Contributions to this review of the year's work in the elementary schools have been made by a number of officials. Their assistance and co-operation throughout the year and their valuable contributions to this report are gratefully acknowledged.

V. K. Greer,

Chief Inspector of Public and Separate Schools.

Toronto, Jan. 25th, 1943.

SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1941-42.

G. F. ROGERS,
Chief Inspector of Secondary Schools.

Toronto, January 25th, 1943.

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

In the school year 1941-42 the total number of teachers in the Collegiate Institutes, High Schools and Continuation Schools of Ontario was 3,355, which is 87 fewer than that of the previous year. The total enrolment of pupils dropped from 76,632 in May, 1941 to 72,568 in the same month of 1942. It will be seen that the average number of pupils for each teacher is slightly lower in the latter year.

The decrease in the number of pupils is probably attributable in part to the economic conditions of a number of years ago and in part to the greater opportunities for employment during the war years. The withdrawal of teachers for service in the armed forces accounts for the major portion of the decrease in their number; by the end of June, 1942 approximately 559, including 26 women, had enlisted. Of these, five had been killed on active service and one is a prisoner of war.

According to the provisions of Circular 27, pupils were again granted Departmental certificates if they enlisted for active service or were employed for a period of at least thirteen weeks on a farm or in a plant engaged in processing food; 4,421 thus obtained Middle School and 3,628 Upper School standing. These numbers are respectively 14% and 30% of the total number of candidates. The Department of Labour estimated that 20,000 secondary school pupils, half of them girls, were employed on farms during the 1942 season.

As in the previous year, the secondary schools responded generously to appeals on behalf of the war effort. In many schools pupils made ingenious displays to set forth the needs of each fund and to indicate the progress of the particular campaign. From the beginning of the war, until June 1942, the cash donations to such causes as Red Cross, War Savings, purchase of medical supplies and other equipment, and War Relief reached a total of \$1,159,979.00. In addition to this, large quantities of clothing and of food were donated and a large amount of salvage was collected.

In a number of schools, initiative was displayed in the introduction of courses connected with Civilian Protection and other phases of Defence Training. Lessons in these were held either during the school day or after the regular hour of closing. In many schools the matter of the safe accommodation of pupils during air raids was considered and drills were held. It is recalled that in one school, at least, an air raid shelter showing the details of construction was successfully completed in the school yard.

During the year the growing interest of communities in Medical Inspection was evidenced in discussions held during meetings of the Inspectors with School Boards. This interest is probably in part traceable to the introduction of the Health course in Grades IX and X and in part to the results of the medical examination of applicants for service in the armed forces. In several centres, a more or less comprehensive form of medical examination was introduced into the secondary schools. This examination by a local doctor was, as a rule, followed up by health guidance given by a qualified public health nurse who spends a portion of each week in the school.

2. VOCATIONAL EDUCATION

Last year my report dealt largely with the war activities of the vocational schools, and emphasized the important contribution made by these schools in connection with the pre-employment industrial war classes and the special courses provided for the Navy, Army and Air Force. The story was outlined in considerable detail as a permanent record of the remarkable invasion of the schools by adult workers, sailors, soldiers and airmen. For the first time in their history, the vocational schools of the Province had been called upon to play a direct and important part in training men and women industrial workers and the technical personnel for carrying on a great war. That the experiment was considered to be a success is attested by the fact that the Dominion Government has urged the Department to continue the services so long as the need exists. It is also significant that vocational training is regarded as an indispensable part of all plans for post-war re-establishment and rehabilitation.

It will be recalled that under the Dominion-Provincial War Emergency Programme Ontario contributed (chiefly through vocational schools) over 50% of all the categories of trainees registered. This is naturally a cause for keen satisfaction to all concerned. A brief summary of the contribution of the vocational schools to the Armed Services follows.

Training of Service Personnel

Early in the summer of 1940, when the War Emergency Programme was inaugurated, requests were made to the Dominion Government by widely separated sections of the country to provide facilities for training certain types of tradesmen for the local units of the active army. The Provinces readily undertook the work, and in Ontario the vocational schools were immediately called upon to expand their programme to include this service. The training at first was on a comparatively small scale, and up to the end of 1940 only a few hundred

men had participated. Towards the end of the year a formal request was made by Military Headquarters, through the Department of Labour at Ottawa, for an extension of the training facilities, and in January, 1941, arrangements were made by which larger groups were admitted to classes for training as blacksmiths, carpenters, artificers, stokers, draughtsmen, electricians, fitters, tin-smiths and welders. Up to the end of March, 1941, 3,193 enlisted men had received instruction, of whom 1,285 (or 40%) were trained in Ontario. For the year ending March, 1942, 33,312 were trained for the Navy, Army and Air Force; 11,811 (or 35%) were from Ontario. By this time the classes included instruction, not only in trade skills, but also in higher mathematics and physics. Out of a total of 37,038 men trained for the three Armed Services from the commencement of the scheme in 1940 to March, 1942, 13,096 (again 35%) were trained in the vocational schools of Ontario or under Provincial auspices. A summary is given below which shows the comparative cumulative enrolment, including those from the Armed Services, in industrial war classes, as between the Dominion and Ontario, to the end of March, 1942.

Enrolment in War Emergency Classes to March 31, 1942

	Dominion	Ontario	Ontario Percentage
Pre-Employment Classes.....	60,777	39,909	66
Classes for Employed Persons.....	3,924	1,835	47
R.C.A.F.....	15,407	4,412	29
Army and Navy.....	21,631	8,684	40
	101,739	54,840	54

Other War Activities

The contributions of the pupils and the teachers towards every form of war endeavour have been most praiseworthy, and a lively interest is sustained in all matters related to the prosecution of the war. With the encouragement of the Department girls' classes have participated in sewing and knitting for the Red Cross and other war organizations, and (at the time of writing this report) the school workshops throughout the Province are engaged in turning out thousands of model aeroplanes to be used for aircraft recognition purposes in the three Armed Services. War funds have been collected in many schools, and the pupils also donate clothing and other articles for the Red Cross, the I.O.D.E., war refugees and bombed victims. While figures are not available regarding the total war contribution it is gratifying to report that war savings campaigns and drives for the salvage of rubber, metal, newspapers, books, magazines, etc., have been organized in all vocational schools.

THE DAY VOCATIONAL CLASSES

Notwithstanding the heavy demands of the war programme the day school curriculum has been carried on with marked success. In vocational schools the general course of the first year is followed by specialized training during the three subsequent years in five different departments—industrial, commercial, agricultural, art and home economics. For students wishing to matriculate into Faculties of Engineering, Commerce or Household Science, Grade XIII general courses are also provided. The graduation diploma granted by the Department of Education at the end of Grade XII fulfils the Middle School requirements for

admission to these faculties, and the courses of study in Grade XIII include those Upper School subjects which must be taken by prospective matriculants in addition to the diploma courses. Pupils in all courses are required to take English, social studies and the new course in defence training, health and physical education.

The Industrial Course for Boys

This course is concerned with practical preparation of young men for employment as tradesmen in industry. As already pointed out it has been invaluable as a nucleus from which war workers have been obtained. The course extends over four years, and successful graduates are automatically awarded the Ontario Secondary School Graduation Diploma. The purpose of the course is to provide the pupil in the first year with a broad academic background and also with an introduction to a variety of trades, in order that he may be in a position subsequently to choose a particular field in which to specialize. The second year comprises a combination of the practical work of the first year with extra time devoted to the selected trade. In the third and fourth years the pupil specializes in his particular field and devotes from 50% to 60% of his time to practical subjects.

The courses in the larger schools include carpentry and cabinet making, mechanical draughting, machine shop practice, motor mechanics, architecture and building construction, industrial chemistry, practical electricity, electrical construction, printing and press work, pattern making and foundry practice, plumbing and sheet metal work. The smaller schools select the subjects best suited to meet local needs. The Central Technical School, Toronto, offers special courses in aircraft mechanics, fine-instrument work, watchmaking, food administration, etc., which are not financially practicable in the smaller schools.

The Vocational Course for Girls

Quite apart from employment in war industries, a wide range of occupations is opening up for girls who have training in what is generally known as home economics. A four-year course in home economics which parallels the industrial course for boys has been developed. It provides the usual foundation of a broad general education and at the same time affords an opportunity for specialization in such work as cooking, housekeeping, cafeteria management, institutional cooking, institutional management, food administration, dressmaking, millinery, machine operating, costume designing and industrial design. Girls graduating from this course are also awarded the Ontario Secondary School Graduation Diploma, which is recognized as the equivalent of junior matriculation.

The Commercial Course

Commercial departments are planned in most of the schools to meet the needs of those looking forward to employment in business occupations. The commercial programme includes a general academic education and special training in the subjects directly related to commercial pursuits, such as typewriting, stenography, bookkeeping, penmanship and business practice. Pupils specialize as accountants, secretaries or salesmen, or prepare for matriculation into University Faculties of Commerce and Finance. Those who successfully complete the four-year commercial course receive the Secondary School Graduation diploma. The course is strong in commercial mathematics. Many graduates

Courtesy Toronto Board of Education

Home Economics

subsequently receive degrees in Commerce and Finance, and are in demand for the actuarial departments of insurance, banking and other financial institutions.

The Agricultural Course

For students who expect to be engaged in farming, dairying, stock raising, fruit growing or gardening, a number of vocational schools and high schools in semi-rural areas have provided special vocational agricultural departments, in which the study of scientific and practical agriculture takes the place, largely, of the industrial course which is offered in strictly urban centres. These courses are also accepted by the Department for diploma standing. Schools or departments of this type are established at Beamsville, Renfrew, Ridgetown, Kemptville, Simcoe and Stamford. The curriculum provides a sound general education and special instruction in the processes and operations which are fundamental to all agricultural occupations. In many cases pupils are prepared for admission to the Ontario Agricultural College.

The Art Course

Courses in practical art extending over four years are provided in only the larger centres. The training in art is not intended to be purely cultural, but is designed for pupils who have shown a special talent in this line and who desire, in addition to completing a diploma course, to obtain employment in the field of art. Apart from a general academic training the pupils receive an extensive education in art appreciation, painting and sculpture, and instruction in many commercial branches of art such as illustrating, lettering, designing, modelling, fashion drawing, figure drawing and textile design. Careers are thus made possible, not only in the limited sphere of painting and sculpture, but also in the wider field of industrial art and design.

GENERAL SHOP AND HOME ECONOMICS IN SECONDARY SCHOOLS

General Shop

As was mentioned in last year's report a serious shortage of general shop teachers is developing, due to the competition of war industry and to enlistment in the Armed Forces. Industrial concerns are offering considerably higher salaries than school boards are in a position to pay, and, as a consequence, the profession has been deprived of many of its best teachers. With the handicap of inexperienced and insufficiently trained instructors the standard of work has naturally suffered. Certain centres will not be able to continue shop courses during the school year 1942-43; others have decided to carry on next year with the assistance of local carpenters for whom temporary "permits" have been granted. It is, nevertheless, gratifying to record that enthusiasm runs high in the schools which have not been deprived of their teachers, and that a high standard of work has been maintained. Boys graduating from these schools and entering industries are being given credit for their skills and advanced training, and the employment of such boys is, in many cases, of decided advantage to the industries themselves. Industrial organizations all over the Province are taking an active interest in the content of the course of study, and in some instances are offering suggestions of practical value. In consequence of the demand for workers, boys who exhibit a natural aptitude in manual skills are being trained with the definite object of entering industrial employment. Manual training is thus justifying itself as an important factor in vocational guidance.

Home Economics

Although the shortage of teachers in home economics during the past year has not been so pronounced as in the case of general shop work the outlook for the future is not bright in view of probable marriages of teachers of this subject and of the increasing number of enlistments in His Majesty's Forces. Losses through withdrawal of teachers who have married constitute a perennial problem; but the situation has been further complicated by the call of the Services for educated women to act as dietitians and technicians of all kinds.

In general home economics staffs are to be commended for the work performed during the year. The standard of instruction has been maintained at quite a high level. In some schools where the subject has been introduced for the first time there is a marked tendency on the part of pupils to ask for the home economics option in the higher grades of the general course. Your inspectors look forward to the time when there will be a definite demand for classes in home economics in all secondary school grades. One of the drawbacks in promoting this subject during the war is the difficulty of obtaining the necessary equipment. Heavy items, such as stoves, washing machines, refrigerators and sewing machines, have been "frozen" for the "duration" and are practically unobtainable.

During the school year 1941-42, 105 boards provided instruction in general shop work in 112 schools, and in home economics in 122 centres.

Manual Training and Home Economics in Public and Separate Schools

Local inspectors report the same difficulty as the secondary schools have experienced in obtaining qualified teachers to carry on these subjects in the elementary schools, but the quality of the work performed under adverse circumstances is quite commendable.

The following table shows that the number of schools offering these courses has slightly increased over the previous year.

	Number of Centres		
	Manual Training	Home Economics	Total
1940-41 Urban Scheme.....	148	168	316

General Remarks

The record of graduates from Ontario vocational schools substantiates the view of those who believe that technical training prepares young people for a life of worth-while service. Evidence is available in proof of the contention that pupils who have received a practical education meet with remarkable success, not only in the world of industry, but in many other activities of life. A number of graduates from one well-known Ontario school, in which a record was kept over a number of years, rose to positions of the highest responsibility. These graduates included several types of professional engineer; a university professor; business and personnel managers; technical salesmen; tool and die makers; as well as skilled craftsmen in almost every conceivable trade. Such a record is not uncommon in the field of vocational education. The training given in the school, supplemented by practical experience, produces citizens of the highest character, technical skill and general capacity. These citizens constitute one of our greatest national assets.

F. S. RUTHERFORD,
Director of Vocational Education.

Toronto, January 20th, 1943.

In September, 1940, 104 applicants who held but eight of the required nine Upper School papers were permitted by special regulation to enter Normal School. In September, 1941, 76 applicants, and in September, 1942, 185 applicants were thus admitted. These wartime entrance requirements are being continued for the school year 1943-44. Provision has also been made whereby applicants who hold seven of the required nine Upper School papers may enter for that session; on successfully completing the course these students will be granted a deferred First Class certificate, which will become an Interim First Class certificate when the requirements for either wartime or regular admission have been fulfilled.

Medical Inspection of Training Schools

All applicants to Training Schools are required to submit to a medical examination before they are finally accepted. In 1937-38 seventeen applicants were rejected; in 1938-39 twenty-seven; in 1939-40 twenty-six; in 1940-41 thirteen; in 1941-42 seventeen; in 1942-43 nine. Applicants suffering from physical handicaps of a less aggravated nature are permitted to enter on signing a "consent," waiving claim to a disability pension under The Teachers' and Inspectors' Superannuation Act. In 1939-40, two signed waivers; in 1940-41, seven; in 1941-42, thirty-eight; in 1942-43, forty-nine.

Exchange

In September, 1942, Mr. A. F. Hansuld, exchange Inspector at the Stratford Normal School, was appointed Public School Inspector, Waterloo No. 2. Mr. E. C. Beacom, Inspector, Huron South, was transferred on exchange to replace Mr. Hansuld. Mr. E. H. McKone, of the London Normal School, was placed on exchange as Acting Inspector, Huron South. In September, 1941, Mr W. K. F. Kendrick, of the staff of the Toronto Normal School, was placed on exchange as Inspector, Simcoe South, and was continued in that position for the following year. In September, 1942, Mr. R. H. Roberts, Inspector, Leeds, was transferred to the staff of the London Normal School, replacing Mr. McKone. The policy of exchanging Normal School Masters and Inspectors is working to the decided advantage of both branches of service.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the Province:—

Frank Arthur Jones, B.A., M.A., D.Paed., retired August 31st, 1942. Dr. Jones was born in Northumberland County. He graduated from the Ottawa Normal School, winning the Governor General's Gold Medal; obtained B.A. and D.Paed. degrees from Queen's University, and an M.A. degree from the University of Chicago. After serving for three years as Principal of Smith's Falls Public Schools he was appointed, in 1900, to the staff of the Normal-Model School, Ottawa, and was connected with that institution for the next forty-three years—seven years as teacher in the Model School, seven years as Headmaster of the the Model School, twelve years as Master in the Normal School, and sixteen years as Acting Principal or Principal of the Normal School. During these forty years of teacher-training service Dr. Jones has exercised a profound influence on the development of elementary education in Ontario and more particularly in the Eastern Counties. The high esteem in which he is held by the members of the profession throughout the Province is evidenced by the fact that he was elected to the Presidency of the Ontario Education Association for the current year.

On September 1st, 1942, F. Stanley Rivers, B.A., B.Paed., was appointed to the Principalship of the Ottawa Normal School. Mr. Rivers is a native of Bruce County. He gained his B.A. degree at Victoria College, University of Toronto, winning the Prince of Wales Silver Medal, and his professional certificates and B.Paed. degree at the College of Education, following which he was on an exchange scholarship at the University of Edinburgh. He served on the staff of the Owen Sound Collegiate Institute for three years, as Principal of Victoria Public School, Owen Sound, for four years, as Master in the North Bay Normal School for nine years, as Inspector of Public Schools, Kirkland Lake, for one year, and as Executive Secretary to the Canadian Council of Education for Citizenship for two years.

In September, 1942, Miss M. L. McCready, who had rendered valuable service as Librarian in the Hamilton Normal School for thirteen years, resigned and was succeeded by Miss Elizabeth St. John, Assistant Librarian of the Toronto Normal School.

In September, 1942, Miss Isabel Davidson resigned from the staff of the London Normal School, where for eight years she had effectively conducted the

department of Home Economics. She was succeeded by Miss Grace Conover from the staff of the Toronto Normal School.

In September, 1942, Mr. M. H. Park, of the Peterborough Normal School, and Mr. F. B. Smitheram, of the Toronto Normal School, exchanged duties.

In January, 1943, Miss M. Clifford, of the Ottawa Normal School, was granted sick-leave. Miss M. G. N. Irving, of the Hamilton Normal School, was asked to undertake the duties of Miss Clifford during her absence.

In January, 1943, Col. Stanley Watson was, on account of ill health, released from service with the Military Forces, and returned to the staff of the Toronto Normal School.

In January, 1943, Miss H. B. Mitchell, after ten years of service as Instructor-Librarian on the staff of the North Bay Normal School, retired. Her place was taken by Miss Elizabeth Mitchell from the staff of the Toronto Normal School.

Ottawa Normal School

In September, 1942, the Department of National Defence made urgent request for the use of the Elgin Street School in which the Ottawa Normal School had been housed following the taking over of the regular Normal School building by the Dominion Government in 1940. Through the co-operation extended by the Ottawa Public School Board quarters were secured in the Mutchmor Public School, and the Normal School was transferred to its new location for the session of 1942-43.

H. E. AMOSS,
Director of Professional Training

Toronto, January 28th, 1943.

FRENCH INSTRUCTION

The French-speaking Inspectoral Staff

RESIGNATION:

Dr. Louis Charbonneau, M.A., B.Paed., Ph.D., tendered his resignation as Inspector of Public and Separate Schools for the District of Sudbury, in February, 1942, to enter the Federal Civil Service at Ottawa. Dr. Charbonneau, a native of Prescott County, Ontario, began his teaching career in 1916 in the Province of Saskatchewan, where he was successively assistant and principal of both elementary and secondary schools. From 1923 to 1927 he acted as Master in the University of Ottawa School of Pedagogy. In 1927 he was appointed Inspector of Public and Separate schools in Russell County and later served the Department of Education as Normal School Master, Editor of French Text-books, and again as School Inspector. Dr. Charbonneau has given the best years of his life to the cause of education and is held in high esteem by a large circle of friends. His former colleagues wish him continued success in his new field of endeavour.

TRANSFER:

Dr. Rémi Millette, M.A., B.Paed., Ph.D., was transferred in May, 1942, from Cochrane to Sudbury, to succeed Dr. Charbonneau.

APPOINTMENTS:

Mr. François Moreau, B.A., B.Paed., Assistant in the Office of the Chief Inspector, was appointed in April, 1942, Inspector of Public and Separate Schools, with residence at Cochrane.

Mr. Joseph Beaulieu, Mus. Bac., of Ottawa, was appointed in November, 1942, Assistant Supervisor of Music in the Department of Education.

Teachers' Training and Qualifications

In 1941-42 there were 144 teachers-in-training at the University at Ottawa Normal School, 28 of whom were enrolled in the First Class course, and 116 in the Second Class course. As a result of the term and final examinations 26 students were awarded First Class teachers' certificates, and 105 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1942, and the progress made in this regard since 1929:—

	1929	1938	1939	1940	1941	1942
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,316	1,390	1,416	1,438	1,441
Number of above teachers holding I or II Class certificates.....	273	1,135	1,271	1,311	1,307	1,274
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	86.24	91.43	92.58	90.89	88.41

Grade-Enrolment Distribution of Pupils in Elementary Schools

The following comparative table for the years 1938, 1939, 1941, and 1942, shows the marked progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking classes in all elementary schools:—

Separate and Public Schools

Grade	1938		1939		1941		1942	
	Num- ber	Per cent	Num- ber	Per cent	Num- ber	Per cent	Num- ber	Per cent
I.....	11,216	23.66	8,955	18.16	8,676	17.25	7,648	17.39
II.....	6,992	14.75	7,148	14.49	7,021	13.96	6,245	14.20
III.....	4,974	10.49	6,631	13.45	6,938	13.80	5,979	13.59
IV.....	5,548	11.71	6,364	12.90	6,454	12.84	5,842	13.28
V.....	5,828	12.30	5,883	11.93	6,166	12.26	5,275	11.99
VI.....	4,775	10.07	5,136	10.41	5,226	10.39	4,528	10.30
VII.....	3,764	7.95	4,018	8.15	4,141	8.23	3,747	8.52
VIII.....	2,913	6.15	3,436	6.97	3,902	7.75	3,191	7.25
IX.....	727	1.52	893	1.81	915	1.82	795	1.81
X.....	443	.93	587	1.19	605	1.20	471	1.07
Auxiliary Classes.....	217	.46	268	.54	252	.50	265	.60
Totals.....	47,397	100.00	49,319	100.00	50,296	100.00	43,986	100.00

The drop in the total enrolment from 50,296 in 1941, to 43,986 in 1942, is due to two causes: (1) The setting up in 1940-41 of an additional English-speaking separate school inspectorate in Northern Ontario, into which were transferred English-speaking sections of mixed schools, which, prior to 1942, were included in the French-speaking inspectors' Annual Age-Grade reports; (2) The movement of a large number of French-speaking families from mining and other centres to wartime industrial places where French-speaking classes were not yet organized.

It is encouraging to note in the above statistics that: (1) The many repeaters, who, before 1939, swelled considerably the enrolment of the Grade I classes, have gradually disappeared. This improvement was made possible by revising the programme of studies for the Grade I classes and by urging school boards to place these classes under well-qualified and experienced teachers. (2) The enrolment in each of the first six grades of the elementary schools is now almost normal. (3) The percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.25, in 1942.

Although the present war period may render the task more difficult, it is confidently expected that, through a continued effort on the part of teachers and inspectors, the enrolment in the Grade VIII classes will attain approximately 10 per cent of the total school enrolment within the next few years.

Note: The usual statistical tables have been omitted this year.

Secondary School Classes

The following table shows the number of French-speaking students enrolled in December, 1942, in the advanced French courses of Collegiate Institutes.

High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

SCHOOL	GRADE					
	IX	X	XI	XII	XIII	Total
Alexandria High.....	18	10	14	42
Cochrane High.....	6	4	1	2	13
Cornwall Collegiate and Vocational.....	66	32	12	1	1	112
Embrun High.....	21	14	14	9	4	62
Espanola Continuation.....	2	3	5
Hawkesbury High (for French-speaking Pupils).....	46	25	31	14	116
Hearst High.....	6	2	1	9
Kapuskasing High.....	26	12	8	7	53
Kirkland Lake Collegiate and Vocational...	20	15	5	3	1	44
Mattawa High.....	8	8	3	4	23
Ottawa Technical.....	53	50	103
Paincourt Continuation.....	10	8	8	8	34
Penetanguishene High.....	25	10	13	4	52
Plantagenet High.....	23	19	17	15	7	81
Rockland High.....	26	18	12	5	1	62
Smooth Rock Falls Continuation.....	17	5	2	24
Sturgeon Falls High.....	32	36	16	11	7	102
Sudbury High and Technical.....	35	15	13	10	6	79
Tilbury High.....	6	2	8
Timmins High and Vocational.....	70	39	16	6	3	134
Vankleek Hill Collegiate.....	15	9	3	2	29
Totals.....	531	336	189	101	30	1,187

NOTE:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were just recently established in those schools.

Two High Schools were added during the year to the list of secondary schools attended by French-speaking pupils: Alexandria High School and Hearst High School. In Alexandria a French-speaking section, comprising to date Grades IX, X, and XI, was organized in September, 1942. The new High School in the Town of Hearst was established at midsummer, 1942. It is hoped that similar action will be taken in the near future in some other French-speaking centres of the province, in order that all pupils may enjoy equal opportunity in the matter of secondary school education.

The total enrolment of 1,187 French-speaking students in the secondary schools, although slightly lower than in 1941 (1,249), compares favourably with the totals reported for 1938 (839), for 1939 (1,027), and for 1940 (1,102). There are, besides, some 2,500 French-speaking students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, and in private schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting, the teachers' recommendation in respect to pupils who are candidates for middle school certificates.

The following paragraph, which appeared in last year's report, stands repetition:

"Although much satisfaction is derived from the progress made so far, it is yet evident that much remains to be done throughout the province in order to raise the percentage of the French-speaking secondary school enrolment from the present 6 or 7 per cent to at least 18 or 20 per cent of the total French-speaking school enrolment. Of course, as was stated in previous

reports, the main cause of this low and rapidly decreasing enrolment from grade to grade in the secondary schools is to be found and eradicated in the elementary classes. Once the problem is solved in the elementary department of the school—and according to present indications this task will be completed within two or three years—there should be an automatic improvement in the secondary school enrolment and age-grade distribution of pupils.”

In these times of apparent prosperity, when employment is bountiful, many students are tempted to abandon their studies before having completed their secondary school education. They should be warned that by thwarting the full development of their talents they would be doing themselves and the nation a grave injustice. It is indeed easy to foresee that in the post-war period much disillusionment will await those young men and women who do not possess sufficient academic or technical education.

Mr. Henri Lemieux, B.A., B.Paed., High School Inspector, states in his reports on French-speaking classes that on the whole the work is carried on satisfactorily. Marked progress is noted in the amount of supplementary reading being done by the students. This is especially commendable in view of the present difficulty of securing French books for the school libraries.

Provincial Contest

The finals of the fifth annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 9th, 1942. Twenty-four contestants—the winning boy and the winning girl from each of the twelve French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships, were as follows:

- 1st boy: Fernand Fontaine, 14, St. Joseph School, Sturgeon Falls;
- 1st girl: Yolande Laviolette, 13, Sacré-Coeur School, Hawkesbury;
- 2nd boy: Jean-Marie Déry, 14, Brébeuf School, Ottawa;
- 2nd girl: Denise Tremblay, 13, Assomption School, Kirkland Lake.

It may be noted with much satisfaction that, as in previous years, the winners of major prizes represented widely scattered localities in the province.

This annual contest, which was first organized in 1937-38, has become the main event of the year in the annals of French education in Ontario. Besides drawing parents and teachers in closer co-operation, it encourages the talented pupils to undertake and complete their secondary school education.

Inspectoral District Enterprises

Since 1939 the French-speaking school inspectors have been asked to undertake each year, in their respective inspectorates, one special enterprise bearing on some particular phase of education. It was suggested that these enterprises, which should aim at correcting a general weakness throughout the inspectorate or at fostering a new and valuable idea in education, be carried on in a scientific manner by taking note of essential data, such as existing conditions at the outset, means employed, difficulties encountered, and results obtained.

During 1942 some of the topics for special research in French-speaking inspectorates were as follows: history and topography of local school sections;

how to improve the teaching of literature in Grades VII and VIII; how to interest gifted pupils in completing their elementary and secondary education; how to secure an ideal classification of elementary school pupils; how to improve the pupils' handwriting; the beautification of school properties; the replacement of out-dated school accommodations, such as desks, blackboards, etc.,; group meetings of school trustees and secretaries; how to improve the teaching of arithmetic in Grades V and VI.

The following excerpts are taken from the report submitted by Inspector François Moreau, B.A., B.Paed., of Cochrane, on: "*History and Topography of Local School Sections*":—

"A discussion on the general weakness of the teaching of social studies in this Northern Inspectorate, held at a group meeting of the teachers, revealed as one major cause the scarcity of source material on hand, resulting in a lack of interest in that part of the social studies programme which deals with the home locality.

As a remedial measure, the teachers undertook a project bearing on the history of their respective school sections. It was felt that efficient teaching of this topic would serve as a model and an incentive to go discovering.

All the pupils took part in the project. The girls were assigned the history, the boys the topography. Interviews and correspondence with old-timers, frequent references to survey maps, to parochial archives, to school registers, etc., overcame the many difficulties encountered and elicited the required information. The data was presented in the form of oral and written compositions. Each pupil made his own map, completing it as the required information was discovered. Finally the material was written up as an article and copies were sent to each teacher of the inspectorate.

The results obtained have been outstanding, and the knowledge and experience acquired have made it possible to go further afield with corresponding success."

The excellent enterprise described above by Inspector Moreau will doubtless inspire teachers in some of the other inspectorates.

"L'Association de l'Enseignement français de l'Ontario"

The provincial association of French-speaking teachers and inspectors held its third annual convention in Ottawa, on April 9th, 10th and 11th, 1942. Mr. Roland Bériault, B.A., of the Ottawa Separate School staff, was elected president for the year 1942-43. Mr. Paul-Eudore Piché, B.A., B.Paed., Principal of Garneau School, Ottawa, succeeded Mr. Bériault to the presidency when the latter retired from the teaching profession in November, 1942.

This association, which holds a provincial charter, comprises three sections and is composed of French-speaking elementary and secondary school teachers, inspectors and normal school masters of Ontario. Outstanding among its achievements of the year are: the preparation of an excellent school report-card for French-speaking pupils; a survey on the teaching of written composition in a large number of graded and ungraded schools; the development, in conformity with the new Programme of Studies, of a suitable and detailed method of teaching writing to junior grade pupils.

Correspondence Courses

In the autumn of 1941, the Minister decided to expand the Departmental correspondence school and to offer to French-speaking children living in isolated

parts of Ontario the same courses and examinations which are provided for French-speaking pupils in the public and separate schools of the province. An experienced and successful French-speaking teacher, Miss Hélène Lacasse, was appointed to the correspondence school staff in the Department and the preparation of these new courses was undertaken.

In September, 1942, the Grade I courses for French-speaking pupils were ready for distribution. The great usefulness of this service was evidenced by the large enrolment of beginners—152 Grade I French-speaking pupils—and by the satisfaction expressed by many parents regarding their children's progress during the year. As a mark of appreciation some parents sent in the photographs of the children enrolled in the courses.

Due to the expanding duties of the teacher, Inspector Adélarde Gascon, M.A., B.Paed., of Ottawa, was asked to prepare the courses for the other grades in collaboration with the teaching staff of the University of Ottawa Normal School. The lessons for French-speaking pupils of Grade II will be ready for distribution in September, 1943.

Besides rendering invaluable service to a large number of isolated families and to sick or crippled children, the development of these correspondence courses will prove of great value in revising the programme of studies and helping to prepare the necessary text-books for elementary schools attended by French-speaking pupils.

Music

In view of the fact that a very low percentage of French-speaking classes were given regular teaching in Music, the Minister gave his approval to a joint recommendation submitted by the Provincial Supervisor of Music and the Director of French Instruction to appoint a French-speaking Assistant Supervisor of Music. The appointment of Mr. Joseph Beaulieu, Mus.Bac., in the autumn of 1942, was well received by French-speaking teachers and inspectors. Mr. Beaulieu, who has had 27 years of teaching experience in Ontario and who is recognized as a specialist in the training of children's voices and choral singing, will doubtless give new impetus to this important branch of education.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, January 18th, 1943.

AGRICULTURAL CLASSES

Interest in agricultural instruction is being reasonably well maintained in elementary schools in spite of a scarcity of certificated teachers due to enlistment and to discontinuance of summer courses. The total number of reports received for 1941-42 is less than that for the previous year, but the number of reports from urban schools is greater. Agricultural topics of the Natural Science and Science courses are being taken in many schools where the optional courses for Grades VII and VIII are not offered. In many rural schools outdoor activities are receiving greater attention as a part of the programme of "Improvement of Rural School Grounds". School garden activities are carried on in many urban schools and are particularly stressed in Hamilton, Kitchener, Ottawa and Windsor. Public and Separate School Inspectors are consistently encouraging instruction in Agriculture. New regulations effective from September 1st, 1942, provide for a fixed grant to boards based on gradings by inspectors, and for a refund of fifty per cent (50%) of approved expenditure for agricultural instruction. Previously, grants to boards were refunds of expenditures only.

There were a great many changes of teachers in secondary schools in September, 1942, due to enlistments. Permission to teach Agricultural Science was granted to Science teachers in twenty-one schools, but lack of certificated teachers resulted in temporary discontinuance of the courses in eleven other schools. Schools in which there are Departments of Agriculture have not yet been affected by the scarcity of qualified teachers. It is interesting to note that during the past three years, when vacancies occurred, boards for the most part have advertised for teachers qualified to teach Agricultural Science. This indicates that the courses, as taught at present, are meeting with approval. Most secondary schools have now secured the recommended books, magazines and special equipment for instruction in agricultural topics. School gardens are maintained at nearly all schools. Practical activities related to dairying, poultry, beekeeping and other topics are being stressed in the instruction at school. Greater emphasis is being given in the home project programme to projects of an economic value. There is every indication that a marked increase in the number of schools offering Agricultural Science will take place after the war when a normal supply of qualified teachers is available.

Agriculture as a subject of the curriculum must be regarded as of general educational value to both urban and rural pupils. This must be kept in mind by trustees, parents and teachers. The elementary school programme and, to a large extent, that of the secondary school, is one of general education. During this period pupils, to a greater or a lesser degree, may decide on what they want to do after leaving school. The attitude towards farming as an occupation is generally decided by factors outside the school, such as home conditions and requirements, early economic returns and desires of pupils or parents. Pupils who have taken the courses in Agriculture in the elementary or secondary school and who later engage in farming have secured a background of knowledge which may be of considerable value. Because of scarcity of farm help during the past three years, many students from urban schools have secured summer

BEAUTIFICATION OF RURAL SCHOOL GROUNDS

The four leaders for 1942-43 in the annual school ground improvement contest, conducted by the Ontario Horticultural Association.

The awards are given, not for present beauty alone, but for improvements made during the year. These include clean-up, repairs, paint, lawns and playgrounds, new planting, weeding and general care.

First Prize—S.S. 9 Hope, Durham County.

Second Prize—S.S. 3 Harvey, Peterborough County.

Third Prize—S.S. 5 Percy, Northumberland County.

Fourth Prize—S.S. 8 Bertie, Welland County.

employment on farms through the Farm Service Force. The experience thus gained will be of value to the pupils as well as an aid to the war effort. For the most part, however, these activities are specialized and are unlikely to lead to a permanent desire to engage in farming as a vocation.

Elementary Schools

Information received for the school year ending June 30th, 1942, shows that agricultural courses for Grades VII and VIII were taught in 3,472 schools of which 473 were urban. Reports claiming grants as refunds of expenditures were received from 2,566 schools. The courses for Grades IX and X were taught in 211 schools. School gardens were conducted in 978 schools. The number of certificated teachers was 1,851, as compared with 2,303 for 1941-42.

School Fairs were conducted in a number of inspectorates either as separate fairs under local committees or in conjunction with fall fairs. In several northern inspectorates the school fair programme is being carried on very successfully.

Secondary Schools

In the fall of 1942 Agricultural Science was taught in 27 Collegiate Institutes, 81 High Schools and 51 Continuation Schools, a total of 159. The subject was introduced in 2 High Schools and was discontinued in 4 High Schools and 7 Continuation Schools. Both Lower and Middle School courses were taken in 116 schools. The number of teachers employed was 204, of whom 103 held the Specialist certificate in Agriculture and 75 were graduates of the Ontario Agricultural College. Permission to teach Agricultural Science was granted to Science teachers in 21 schools. To September, 1942, 27 teachers of Agricultural Science had enlisted, 20 of whom were graduates of the Ontario Agricultural College.

Agricultural Departments under The High Schools Act are maintained at Drayton, Elmira, Listowel, Port Perry, Whitby and Wheatley, and under The Vocational Education Act at Beamsville, Kemptville, Simcoe, Stamford, Renfrew and Ridgeway. The courses in Agricultural Science are taught in these schools, but additional time is provided for Agriculture and greater stress given to practical applications than in other schools. Good work is being done in all these departments.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools and the Normal Schools.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1914.....	264	208	56
1928.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1940.....	3,879	1,446	2,433
1942.....	3,472	978	(indefinite)

Figures prior to 1942 are based on the number of schools qualifying for grants. For 1942 the figure covers the schools where the courses were taught. Grants were claimed for 2,566 of these schools.

The following table shows the certificates held by teachers engaged in the work for the years given.

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1940.....	2,508	112	307	16	2,943
1941.....	1,956	94	236	17	2,303
1942.....	1,603	80	159	9	1,851

In addition to the courses for Grades VII and VIII, Agriculture of the Lower School course was taken in Fifth Classes of 211 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate certificate are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; Mono Mills Public School; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: Brown, General Mercer, McMurrich, Perth Avenue.

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal School Entrance or Matriculation.
2. Department of Agriculture under The High Schools Act.
3. Department of Agriculture under The Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Seaforth, York Memorial, Vaughan Road. Total 10.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

High Schools

(a) Bracebridge, Cobalt, Durham, *Elora, Englehart, Essex, Markham, Maxville, Meaford, Merriton, Mount Forest, Niagara, Orangeville, Port Credit, *Port Hope, Tilbury. Total 16.

(b) Alexandria, Alliston, Amherstburg, Arthur, Athens, Beamsville, Blenheim, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville, Dundas, Dunnville, Elmira, Fergus, Fort Frances, Grimsby, Hagersville, Haileybury, Harrow, Havelock, Iroquois, Kemptville, Kincardine, Kingsville, Lakefield, Leamington, Listowel, Lucan, Madoc, Markdale, Midland, Milton, Mitchell, Morewood, Nepean, Newburgh, Newcastle, New Liskeard, Norwich, Norwood, Oakville, Petrolia, Port Elgin, Port Perry, Ridgeway, Saltfleet,

Shelburne, Simcoe, Smithville, Stirling, Streetsville, Sydenham, Trenton, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Williamstown, Winchester. Total 65.

Continuation Schools

(a) Ailsa Craig, Arkona, Bothwell, Chatsworth, Coldwater, Eganville, Elgin, Forest Hill Village, Grand Valley, Minesing, Seeley's Bay. Total 11.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton, Drumbo, Embro, Florence, Fordwich, Ilderton, Inglewood, Lobo, Lynden, Lyndhurst, Merrickville, Milverton, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, Port McNicoll, Princeton, St. George, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley, Woodville. Total 40.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913, and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1940.....	27	84	59	170
1941.....	27	82	59	168
1942.....	27	81	51	159

*Introduced Agriculture in September, 1942.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under The Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford and Simcoe. In all, provision is made for instruction in Shop Work and in all except Stamford for Home Economics. The regular courses in these subjects, with special emphasis on agricultural applications, are being followed. In all centres practical applications of agricultural topics are stressed, a regular programme of home project activities is conducted and the teachers visit the homes of pupils to inspect the projects undertaken.

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Students who have taken four years of Agriculture in an approved school during their secondary school course are granted an Interim Elementary certificate on

successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

NORMAN DAVIES,
Inspector of Agricultural Classes.

Toronto, January 15th, 1943.

AUXILIARY CLASSES

Teachers on War Service

Enlistment in the active army has taken the following teachers from their classrooms and in some cases has resulted in closing the class:—Miss Eva Black, Brant Street School, Toronto; Mr. J. Connell, Central School, Sault Ste. Marie; Mr. M. D. Baldwin, Alexandra School, London; Mr. Herve Lemieux, Jacques Cartier School, Timmins; Mr. W. L. Remmer, Victoria School, Brockville; Mr. Chas. Parr, Harry Guppy School, Windsor; Mr. Gordon McBride, Hiawatha School, St. Thomas; Mr. Donald Peat, Church Street School, Toronto. Five others have secured employment in the Civil Service.

Urban Organization

Auxiliary classes are for the most part located in cities, towns and villages where there are sufficient numbers of academically or physically handicapped pupils to organize a class.

Inspection service was provided for the following classes:—

Advancement Classes.....	2
Handicraft Classes.....	73
Hard of Hearing Classes.....	4
Home Instruction Classes.....	14
Hospital Classes.....	8
Open Air Classes.....	13
Opportunity.....	164
Oral Classes.....	4
Orthopaedic Classes.....	7
Partial Classes.....	4
Sanatorium Classes.....	17
Sight Saving Classes.....	8
Speech Correction Classes.....	12
Special Industrial Classes.....	66
Total.....	396

Surveys were conducted in accordance with your instructions and at the request of the Boards concerned in Brantford, Brockville, Long Branch, North York Township, Peterborough and Welland. As a result of these surveys and those conducted in previous years, new classes were opened in September 1942 as follows:—

Opportunity Classes:	Hamilton.....	2
	Kirkland Lake.....	1
	Kitchener.....	1
	London.....	1
	Port Arthur.....	1
	Smith's Falls.....	1
	Toronto.....	1
	Toronto Sep.....	1
Handicraft Classes:	Brantford.....	1
	Niagara Falls.....	1
	Peterborough.....	1
Partial Classes:	South Porcupine.....	1
Speech Correction Classes:	Ottawa.....	1
Sanatorium Classes:	Mountain.....	1
	Byron.....	1

Hard of Hearing Class, Ogden School, Toronto

Two 6-year olds broadcasting to their class.

The following classes were closed during the year for various reasons, as indicated below:—

Teacher on War Service	St. Thomas.....	1
	Sault Ste. Marie.....	1
Classroom required due to increased enrolment	Sault Ste. Marie.....	1
Teacher resigned or secured another position	Lindsay.....	1
	Hawkesbury.....	1
	Ottawa Separate.....	2

Rural Organization

Opportunity, Sight Saving, Home Instruction Units are provided for areas where there is not a sufficient number of pupils to organize a partial class. These auxiliary units are an administrative device whereby the Department of Education contributes towards the cost of special equipment in Opportunity and Sight Saving Units, additional salary in Home Instruction Units and expenses in Transportation Units. Instruction in Opportunity, Sight Saving and Home Instruction Units is carried on by regularly qualified teachers who have not had any special training. Special advisements for each pupil are prepared by inspectors in the Auxiliary Classes Branch after a survey has been conducted at the request of the inspector.

The following table shows the survey work completed during the year by Miss DeLaporte and myself with the assistance of the inspectors concerned:

Inspectorate	Inspector	Number of pupils
Durham.....	T. R. McEwen.....	44
Grey and Bruce.....	J. J. Wilson.....	128
Halton.....	L. L. Skuce.....	33
Huron North.....	J. H. Kinkead.....	38
Leeds No. 1.....	R. H. Roberts.....	94
Peterborough West and Victoria East.....	E. R. F. Downey.....	51
Welland East.....	F. Minkler.....	23
York No. 1.....	C. A. Lapp.....	159
Total.....		570

Habilitation of Cripples

Since 1939 seven crippled pupils who have completed their education to Grade VIII or Grade X levels, have been in receipt of habilitation training under the direction of the Auxiliary Class Branch.

Six have completed courses in typing, dressmaking, shoe-repairing and manual training. One is enrolled in the Horology Department at the Central Technical School, Toronto.

Of the six who have been trained four are earning their own living and one is contributing to her own support. The other one is ready to give stenographic service but thus far has not been able to secure work.

The plan set up to explore the problem of training cripples in arts and crafts embraces training which will enable the trainee to earn his livelihood or contribute to his own support in his home area where he is well known. The

maximum expenditure of two hundred dollars per annum has in all but one case been supplemented by funds from service clubs and benevolent societies.

Rehabilitation Training in Sanatoria

The educational courses offered tubercular patients in the Sanatorium Schools provide therapeutic and rehabilitation training. The hospitals recognize the difficulty caused by the re-admission of patients who have been discharged and returned to their previous occupations. Frequently these occupations subject the ex-patient to exposure, or muscular fatigue and wear down his resistance to the point where he is re-admitted.

For this reason many of the tubercular patients are continuing their education with the hope of securing employment on discharge in some occupation which does not require heavy manual labour and where they work under shelter.

Indirect rehabilitation training is given through courses in reading and writing English for New Canadians, instruction by which patients acquire High School Entrance certificates, and matriculation and university courses.

Direct rehabilitation is carried on by business and craft courses with the following results:—

- (1) *Mountain Sanatorium School*—Twenty-five men are reported as having secured employment in the radio repair field. This is a direct result of a Radiotelegraphy Course conducted by a patient, who conducts the operations from his bed, plans the lessons which are broadcast over the local sound system, and directs the practical demonstrations given by two part-time instructors.
- (2) *Queen Alexandra Sanatorium School*—Ten ex-patients have secured positions as stenographers and bookkeepers as a result of training in the Sanatorium School. In this Sanatorium, the bookkeeping course has been organized to permit ex-patients to send in exercises for correction after their discharge.
Instruction in clock repairing is also given in this hospital. Three men have found this craft useful as a preliminary phase of training in watch-repairing.
- (3) *Muskoka Hospital School*—Arrangements have been made with the British Columbia Department of Education to enroll patients in the correspondence course in bookkeeping. This has the advantage of providing for the continuance of the course after discharge.
One patient has developed competent skills in watch-repairing.
A history of each student's education and employment is kept by the instructional staff on a specially designed record card.
- (4) *Toronto Hospital School*—Rehabilitation is carried on by means of business courses.

Employment of Graduates of Auxiliary Classes.

The occupations of 1009 graduates of special classes have been reported from the following schools:

- (1) Opportunity Classes in Brantford, East York, Fort Frances, Fort William, Galt, Guelph, Hamilton, Kingston, Napanee, North York, Orillia, Owen Sound, Peterborough, Port Arthur, Timmins, Toronto.

- (2) Handicraft Classes in North Bay, Ottawa, Port Arthur, St. Thomas and Windsor.
 - (3) Special Industrial Classes in Hamilton and Toronto.
 - (4) Sight Saving and Orthopaedic Classes in Toronto, London and Hamilton.
- The purpose of this investigation is to provide data on:
- (1) The efficiency of the special training given to pupils who had been failures in the academic classes.
 - (2) The adjustment of the graduates to the problem of earning their living.
 - (3) The number who required corrective or institutional care.

A summary of the data showed that most of the individuals reported were the class which graduated in 1942, who were taking their first employment at age 16, 17 or 18. The individuals reported vary in age from 16 to 32 years and of the males of military age a very high percentage is in the army. Wages vary from approximately seven dollars per week to over forty dollars per week. The records show that at age 16-18 two or three changes of employment occur before the graduate settles down to a particular job and that a low percentage of graduates have been in need of corrective or institutional care. The record seems to show that failures in the academic courses can become foremen, straw bosses and leadermen in factories, and that they can perform their national and economic functions.

Multiple Handicaps

In the 1941 report data were reported to show that educational handicaps tend to be multiple instead of single, and that the failure in school of retarded, slow-learning, average, and even superior pupils, will likely be due to more than one single mental, academic, physical, emotional or environmental handicap.

New data have been secured on 2,974 pupils from 181 teachers from the personnel of the classes in September, 1942. The ability classification is based on the results of individual examinations by trained examiners, using the Canadian Intelligence Tests, or the Stanford Revision of the Binet Simon Test. The academic levels are based on teacher judgment of the performance of pupils. The physical handicaps noted are mainly from A.D.P. Cards, and where these are not available the information was obtained from nurses and doctors. Data on emotional and environmental handicaps come out of the teacher's observation of the pupil in school and at home. The 1942 group reported is three times as

large as the 1941 group, and the percentages are therefore much more reliable. Table I indicates that over half of the pupils enrolled will have Grade VI as their academic ceiling; and that almost half of the pupils are admitted for academic adjustment. Table II shows the numbers and percentages of the pupils who are recorded under each handicap, and Table III shows the distribution of the pupils according to number of handicaps.

TABLE I
Classification of 2,974 Pupils In 181 Special Classes

School Ability	Number	Per cent.
Superior.....	37	1.24
Average.....	249	8.37

6.....	239	8.04
Total.....	2,974	100.00

N.B. 90.28% of the pupils are listed as having more than one handicap.

Speech Records

The phonographic record is most valuable in assessing the improvement of speech of pupils and the efficiency of the teacher. Miss Clara Binnie, Senior Speech teacher, Toronto Board of Education and Miss Bertha Hamilton, Speech Teacher in the York Township Schools, have made records which show the effects

of instruction in correcting stuttering, lisps and letter substitutions. They report that the record is also useful in motivating pupils needing speech correction. Mr. Bruce Adams, Assistant Master at Church Street School, made some of these speech records on his own equipment.

Miss Ruth Miller, teacher of the Hard-of-Hearing Class, Ogden Public School, recorded the voices of her pupils in March 1941, and again in March 1942. With her permission these were blended on a permanent record at the expense of the Department of Education, to show the progress made by pupils during one year of instruction.

The existence of a collection of records makes it possible to demonstrate speech and hearing difficulties to Normal School and Auxiliary Summer School students.

Sight Saving Books

A total of approximately 250 pupils are enrolled in Sight Saving Classes in the large cities and Sight Saving Units in small cities, towns, villages and in rural schools. Until the war, Boards purchased freely the publications in 24-point type issued by the Clear-Type Publishing Committee, Upper Montclair, New Jersey, to provide suitable reading materials for pupils with very defective vision. Since the war the cost of these books has increased approximately twenty-five per cent, and sight saving pupils have had to depend to an increasing extent on what is available free of charge from the Department of Education and commercially through Canadian publishers.

A list of over 700 books available through Canadian Publishers in large type for Grades I—VI was prepared for inspectors, principals and teachers under the title "List of Sight Saving Books". In September 1942, this list with books indicated for particular grades was sent to all inspectors who had reported sight saving pupils in June, to aid them in selecting large-type books. This is an attempt to make supplementary books readily available for teachers of sight saving pupils.

Teachers of sight saving units in small schools find it difficult enough to attend to the written work and sight saving requirements of one pupil without having to supervise reading from texts which are different to those used by the remainder of the class. For this reason teachers are constantly requesting copies of the authorized texts in magnatype.

To meet the demands of teachers and to furnish magnatyped materials for pupils who would otherwise have no relief in reading, the Department has provided the following authorized texts printed in 24-point type for elementary school pupils:

1937—Ontario Speller—Books I and II

1938—Life and Literature, Book II

1941—About Susan (a Primer).

1942—Junior Mathematics—Grade VII and VIII.

In addition to the printed texts, portions of the readers for Grades III, IV and V have been duplicated in 24-point type and are available on the same basis as the printed books.

For a complete sight saving service all authorized books should be available to pupils who require them in elementary or secondary schools. On the basis of

one sight saving pupil for each thousand pupils enrolled an edition of 500 copies would provide a ten-year supply.

Organization

Brief courses were given in each of the Normal Schools to acquaint teachers-in-training with methods of dealing with Auxiliary-type pupils, especially in rural schools. The many inquiries received by the Department from recently graduated teachers concerning the educational welfare of exceptional children in their charge is evidence of interest aroused by these Normal School talks.

No summer courses in auxiliary education were given in 1942. To prepare teachers who have not the special qualifications required for auxiliary work, a Reading Course was put into operation in September, 1942. By December twenty-five teachers of Opportunity, Handicraft, Sight Saving, Speech Correction and Sanatorium Classes had enrolled in the course. Provision has been made for a basic course for all teachers with special assignments for each of the required types of instruction.

The Special Class Teachers' Section of the O.E.A. secured Dr. Gertrude Hildreth of Columbia University as their principal speaker for the Easter programme. Dr. Hildreth dealt with methods in Arithmetic. Approximately one hundred teachers attended.

Due to war conditions only two teachers were able to attend the February meeting of the International Council for Exceptional Children at Milwaukee.

Eight groups of special class teachers have been organized. Of these seven are active and promote the professional training of their members by regular meetings and programmes.

Statistical tables will be found on succeeding pages.

C. E. STOTHERS,

Inspector of Auxiliary Classes.

Toronto, Jan. 11th, 1943.

OPPORTUNITY CLASSES

For backward and psychopathic children and those who have not successfully pursued the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

SCHOOL ATTENDANCE

It has been estimated that a 70% attendance represents a 50% school efficiency and a 90% attendance a 95% efficiency. As a rule the class must lag until the loiterer catches up or the teacher leaves him to his fate. In order that a school may do its best work, the attendance must be the first consideration. The hearty co-operation of the teacher with the parents and the Attendance Officer will bring about the best results. The percentage attendance for the elementary schools during the year was 91.69 while the secondary schools reached 93.4.

Table No. 1—Enrolment

	1939-40	1940-41	1941-42	Increase or Decrease
Public Schools.....	441,143	433,597	426,183	7,414 decr.
Separate Schools.....	102,180	100,317	99,258	1,059 decr.
High Schools and Collegiate Institutes.....	73,102	67,301	63,582	3,719 decr.
Continuation Schools.....	10,048	9,202	8,986	216 decr.
Vocational and Special Industrial Schools—				
Day Classes.....	37,900	33,082	28,793	4,289 decr.
Night Classes.....	34,983	31,848	33,388	1,540 incr.
	699,356	675,347	660,190	15,157 decr.

Again the enrolment for the Province has fallen, this time partly due to the years of depression when the birth rate was lower and partly to the older pupils leaving school at an earlier date for occupation in agriculture or essential industry. The number of official permissions to leave school exceeded the previous year by 5,573. The decrease was common to all types of schools. The number availing themselves of the opportunities provided by Evening Vocational Schools has increased by 1,540 over last year. At the present time there are 7,436 elementary schools with 17,584 teachers and 496 secondary schools with 4,933 teachers.

Table No. 2—Percentage Attendance

Class of School	1937-38	1938-39	1939-40	1940-41	1941-42
City Schools.....	92.96	91.5	92.8	92.5	92.7
Town Schools.....	93.08	92.2	93.3	92.5	94.7
Village Schools.....	91.95	91.0	92.7		
County Rural Schools.....	88.77	89.6	90.3	89.3	89.6
District Rural Schools.....	86.85	87.4	89.9		
All Urban Schools.....	92.92	91.6	93.0	92.5	92.8
All Rural Schools.....	89.13	88.0	90.2	89.3	89.8
All Elementary Schools.....	91.51	90.3	91.9	91.3	91.69

From the above table it will be seen that there was a general increase in percentage attendance in all types of schools during the past year.

Table No. 3—Public School Attendance

	1940-41		Days Lost per pupil	1941-42		Days Lost per pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural	154,654	89.1	20.5	156,149	89.7	19.6
Urban	231,064	92.3	14.6	228,367	93.1	13.3

Table No. 4—Separate School Attendance

	1940-41		Days Lost per pupil	1941-42		Days Lost per pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural	21,510	91.0	16.7	21,382	91.4	16.4
Urban	71,398	93.2	13.1	70,815	94.3	10.8

Table No. 5—Totals
(Tables 3 and 4 combined)

	1940-41		Days Lost per pupil	1941-42		Days Lost per pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural	176,164	89.3	20.1	177,531	89.8	17.0
Urban	302,462	92.5	14.3	299,182	93.4	12.7

Table No. 6—All Elementary Schools

	1940-41		Days Lost per pupil	1941-42		Days Lost per pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Public	385,718	91.0	17.0	384,516	91.7	15.9
Separate	92,908	92.7	13.9	92,197	93.8	12.1

The percentage attendance for all elementary schools was 91.69 and the average loss per pupil was 15.1 days.

Table No. 7—Absence in Elementary Schools

Days lost through	1941-42	Percentage Loss			
		1938-39	1939-40	1940-41	1941-42
Illness	5,266,314	66.99	65.85	65.20	63.15
Home Help	961,978	7.79	9.86	10.76	11.54
Parental Neglect	662,770	6.06	6.98	7.14	7.95
Physical Obstacles	333,386	4.56	3.75	3.93	4.00
Truancy	37,517	.24	.32	.35	.45
Privation	43,376	1.04	1.06	.77	.52
Irregular Closing	571,559	6.67	6.06	6.23	6.85
Other Reasons	461,986	6.65	6.12	5.62	5.54
Total days lost		9,983,079	8,403,488	8,754,858	8,338,886
The above losses are classified—					
Lawful		7,680,348	6,327,689	6,529,268	6,111,368
Unlawful		2,302,731	2,075,799	2,225,590	2,227,518
Percentage Attendance		90.3	91.9	91.3	91.69

In the above table present social conditions are reflected in the schools. The need of home help is seen in the gradual increase of the loss for this factor, rising as it does from 7.79% in 1938-39 to 11.54 in 1941-42. Many parents are engaged in various kinds of war activities, fathers are overseas and with less time for parental supervision over the children, parental neglect has risen from 6.06% to 7.95. Truancy for the same reason has been rising for the last three years. Most of this increase has been in the larger centres where relaxed supervision on the part of the parents has made it possible.

Table No. 8—Summary of Attendance Officers' Reports

	1938	1939	1940	1941
School Children's Employment Certificates Issued.....	350	710	1,343	1,318
Home Permits Issued.....	1,730	1,389	1,885	2,938
Employment Certificates Issued.....	1,907	2,146	4,871	9,416
Cases brought before Magistrates.....	527	528	614	709

Table No. 9—Secondary Schools

Schools	No. of schools	No. of teachers	Enrolment		Percentage Attendance	
			1940-41	1941-42	1940-41	1941-42
High Schools and Collegiates	233	2,749	67,391	63,582	93.5	94.0
Continuation Schools.....	198	507	9,202	8,986	92.3	93.0
Vocational and Special Industrial Schools.....	65	1,677			*92.1	*92.5
Day.....			33,082	29,894		
Night.....			31,848	33,388		
			64,930	63,282		
	496	4,933	141,523	135,850		

*Day Classes only.

Although the total enrolment of the Secondary Schools is 5,673 less than last year, yet it is gratifying to learn that 1,540 more pupils are taking advantage of the facilities afforded by the night schools to obtain further education.

R. D. KEEFE,
Director of School Attendance.

Toronto, January 15th, 1943.

THE SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the financial year ending March 31st, 1943.

Attendance

O.S.D. residential school, Belleville:—

Teaching Staff

Having given many years of service, Miss Irma Panter resigned in August, 1942, owing to ill-health and home responsibilities. Her successor is Miss Grace Harris, a former member of our staff, who had taught in the British Columbia School during 1941-42.

Miss Mary O'Sullivan resigned to accept a position with the British Purchasing Commission in Washington, and Messrs. H. Vaughan and C. Stratton, having joined the armed services, were granted leave of absence for the duration of the war. These vacancies were filled by transferring teachers from department to department within the school and by the appointment of Misses M. E. Nichol, M. E. Meagher and R. Hanley, successful teachers of hearing children.

Mrs. Florence Lovering was appointed to the temporary staff as successor to Miss Mildred Leacock, who is now teaching household science in the public schools of the City of Kingston. The retention of three married women, Mesdames Simpson, Davidson and Molyneux, experienced teachers of the deaf, has helped to maintain an efficient staff.

The Day Classes

The day classes in Toronto, Hamilton, London and Windsor, operated as part of the Ontario School for the Deaf, are taught by competent, trained instructors. Owing to my responsibilities in Belleville it is possible for me to visit these classes only once a year. I visited them in May and am pleased to report that satisfactory work is being done in all classes. Those in charge have received the co-operation of inspectors, principals and teachers in their respective areas. In all centres the senior pupils go to the local vocational schools for shop work, and the intermediates to the regular public school manual training and household science classes.

In Windsor the older boys are able to participate with hearing boys in games and exercises in the gymnasium.

There is some difficulty in these cities in getting very young children to and from school. However, the very young children may attend school in Belleville if the parents so wish. In some cases children have been transferred to Belleville on account of daily transportation difficulties.

Residences and School Buildings

When the school was taken over by the R.C.A.F., during the summer of 1941, six houses were rented to be used as residences. At the close of school in June, 1942, it was realized that more accommodation was required. It was found possible to rent another large house, which was fitted up as a residence for the intermediate boys. This property has sufficient grounds for a rink in winter and a baseball diamond in summer.

The children in all the residences have ample space in the houses and outside grounds for play and recreation.

For most of the year the girls have been taken by a teacher to the Y.M.C.A. for games. Boys and girls have gone to the city skating rink twice a week for free skating, when the rink was available.

The three buildings used for school purposes are close together, which makes it possible for them to be operated as one unit.

The swings and other play equipment transferred from our former property to grounds in Belleville are used constantly by the children.

Care of Children

Housing, feeding and educating deaf children as young as five years of age require great care and devotion on the part of many employees. It is a satisfaction that letters received from parents express appreciation and thanks not only for the education of their children but for their care as well.

We have been fortunate in being able to engage and retain experienced supervisors, kitchen and dining-room staff who are anxious to care for and help the children in every way.

By moving some of the laundry equipment from the former laundry and by purchasing small washing machines it has been possible to wash and iron the children's clothing in our own laundry. This has been a valuable service as it enables us to assure parents that articles are not lost or destroyed.

Respectfully submitted,

W. J. MORRISON,
Superintendent.

G. C. CALDWELL,
Dentist.

Medical Report for the School Year 1942-43

Owing to two epidemics of mumps and an epidemic of influenza we have had 275 admissions to the hospital this session. Unfortunately these three epidemics were unavoidable. The children all made uneventful recoveries.

All the new pupils were given scarlet fever toxin and diphtheria toxoid. All pupils not vaccinated against smallpox were vaccinated.

The entire school was tuberculin tested. No active cases were discovered. Several minor injuries (none of a serious nature) required attention.

The general health of the children is good.

R. W. TENNENT,
Physician.

School and Student Honours

At the Stratford Musical Festival this year the O.S.B. madrigal ensemble choir won first place. This, being the third consecutive win, the Stratford-Beacon-Herald Trophy becomes the permanent possession of the school. The O.S.B. male chorus tied for first place with the Listowel High School chorus, which gives each group six months' possession of the Pounder Trophy.

Louise Cowan of Princeton, Ont., who has been an under-graduate at McMaster University for the past four years as a Bursary student of this school, graduated from McMaster in June.

The Ethel Charlton Memorial Scholarship for general proficiency in the graduating year was won by Joyce Burrows of Toronto.

The Character Cups for senior students were won by Enna Buchkowsky of Yellow Creek, Sask., and Oscar Amyotte of Bonfield, Ont.

Staff Changes

Mr. John MacKellar, porter at the Ontario School for the Blind, passed away June 26th, 1943. Mr. MacKellar has been a faithful and co-operative worker for the past six years.

Miss Mildred Howell, nurse at the Ontario School for the Blind from 1934 to November last, married and resigned her position. For the past nine years, Miss Howell has been a very capable, painstaking and efficient nurse.

Miss Isobel Draper, literary teacher, who has been a member of the staff for the past nineteen years, is leaving this summer to get married. Throughout her life at the school, she has given exceptional service, both in her classroom and in the extra curricular activities and life of the school.

War Work

The staff, student body and the two senior clubs contributed \$35.00 to Russian Relief, \$41.10 to Chinese Relief, \$231.40 to the Red Cross and some 70 knitted and sewn articles were contributed to war work by the girls of the School.

Grades 2 and 3 have purchased war savings stamps representing the value of \$86.00.

Many of the staff and fifteen of the senior students have been regular blood donors. The help and teaching staff have qualified as bronze medal purchasers of war bonds and war savings certificates.

Library Report

During the year, the library has been decorated, the stacks varnished and many books repaired.

There has been an addition of 100 volumes of Braille books, mostly for senior reading, and a set of Primers for the Primer Class.

Junior Girls' Playroom

Through the efforts of the members of the staff assisted by donations from friends of the school the Junior Girls' Playroom was completely refitted this year. The large room was painted, decorated with murals of the Pied Piper, equipped with a "life size" playhouse and a reading nook and furnished with a games table and many books and toys.

Medical Report

A physical examination, diphtheria toxoid, whooping cough serum and where necessary vaccination were given to new students and the usual health services to all students. Cod liver oil was given to a great number of the students during the fall and winter months.

J. A. MARQUIS, M.D.

Report of the Ophthalmologist

Thirty-one new pupils were examined as follows:

Condition of Sight	Male	Female	Total
1. Limited vision in both eyes.....	7	5	12
2. Limited vision in one eye.....		2	2
3. Quantitative light perception in both eyes.....	4	2	6
4. Quantitative light perception in one eye only.....	6	3	9
5. Without light perception in either eye.....	1	1	2
6. Untested for sight.....	1	1
Totals.....	19	13	32

Diseases Causing Blindness	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	3	2	5
2. Congenital Cataract.....	6	2	8
3. Myopia.....	2	2	4
4. Optic Atrophy.....	1	1	2
5. Congenital Buphthalmus and Congenital Malformation..	4	1	5
6. Fundus Lesions, Diseases of Retina and Choroid.....	1	2	3
7. Sympathetic Ophthalmia, Plastic Uveitis.....	1	3	4
8. Untested for sight.....	1	1
Totals.....	19	13	32

The four cases of sympathetic ophthalmia (group 7) might have been prevented had the injured eye been removed earlier. It is evident that there is still much to be done by way of public, parental and professional education before this unfortunate type of case can be eliminated.

A complete ocular examination of the entire school population was carried out during the fall months. Considerable improvement both in regard to the present eye condition and to the less frequent occurrence of eye disorders was noted.

It is felt that improved living conditions and better diets are largely responsible in conserving and improving the sight of the children coming to this school.

NORMAN BRAGG, M.D., F.A.C.S.

Dentist's Report

All pupils were examined and the necessary work completed.

G. H. RYERSON, Bursar.

I should like to express my personal appreciation of the faithfulness to duty of the work staff and of the splendid co-operation and unflagging zeal of the teaching staff in the interest of the blind students of this Province.

I have the honour to be, your obedient servant,

(Signed) H. J. VALLENTYNE,
Superintendent.

PUBLIC LIBRARIES

I have the honour to submit the following report of the Public Libraries Branch for the year 1942, which includes statistics of the public libraries of the province for the year 1941, together with a statement of the Legislative Grants paid in 1942.

During the year, the work of the Branch was carried on under the supervision of the Acting Inspector.

Public Libraries of the Province

There is a slight reduction in the number of libraries in the Province. Twelve Association Libraries were removed from the list of active libraries, and one Free library. The Association libraries concerned have, in almost every instance, been on the down grade for a long time, and has not submitted an annual report to the Department for two years or more; accordingly, no Legislative Grants were paid recently to these libraries. The Free library removed from the list had not reported, or received a Legislative Grant for two years, but it is still in operation.

Although the number of public libraries in the Province shows a decrease this year, the expenditure on books, and the total expenditure of the libraries, show an increase. On the other hand, the circulation figures are less. This latter feature may be accounted for by the fact that many of the men and women who were once regular library patrons, are now on active service. However, if it were possible to procure the book circulation figures from camps and other centres where these people are now stationed, it is probable that these statistics would indicate a heavier demand for books.

Change in Status of Libraries

One County Library Association was organized. The standing of one library was changed from that of an Association to a Free library, and three Association libraries were organized. The latter are; Merlin, Ripley and Selkirk. Kent County organized as a County Library Association, and Blenheim changed from an Association to a Free library under Part 1 of The Public Libraries Act.

The Association Libraries removed from the Departmental list are as follows; Badjeros, Belwood, Cookstown, Kars, Mildmay, Millbank, Nanticoke, Palermo, Port Dalhousie, Rockland, Victoria Road, Williamstown, and the Free Public Library at Arnprior.

The Legislative Grant to Training Centre 102 at Fort William was not renewed in 1942, and the grant given to the Ontario Library Association was increased from \$50.00 to \$200.00, due to the fact that no general meeting will be held in 1943, but a series of eight smaller groups in different parts of the Province.

Statistical Tables

The tables of statistics show there are 231 Free, and 260 Association libraries in the Province, and that the sum of \$43,849.80 was paid in Legislative Grants. The amount expended by these libraries on books was \$280,292.73, and the total expenditure of the libraries was \$1,394,335.68. The number of volumes were 3,566,726, and the book circulation 13,357,639.

Library Positions

A complete change has taken place within the last year in connection with library positions. At one time we had a list of names of librarians and others who wished to secure better positions. Owing to the fact that many library boards have not realized they must pay salaries commensurate with the qualifications and status of the librarians, a number of these boards now find themselves faced with the problem of endeavouring to supply library service with very limited staffs. Many large organizations, knowing the high standard librarians must attain, have been ready and anxious to pay salaries that would make it worth while for the librarians to change their positions.

County Library Associations

Gradually the County Library idea is spreading throughout Ontario. About eleven years ago the Lambton County Library Association held its first meeting. As time went on this organization learned a great deal by experience, and this knowledge has proved so valuable that to-day the Association might well be taken as a pattern for County Library work in Ontario. Later on, Elgin, Essex, Huron, Middlesex, Oxford, and Simcoe Counties organized, and in May of 1942, Kent County came into line. This completes a solid block in the western part of old Ontario, and with Simcoe County Library Association nearer the centre of the province, it is hoped the influence will spread, especially towards the east, as at present there are no County Library Associations between Toronto and Ottawa—a section in which there is undoubtedly a need for such organizations.

Travelling Libraries

This section of the Branch continues to show an increase in book circulation over preceding years. To December 31st, 1942, 1,285 Travelling Libraries were sent out, and 4,692 books were added to the collection. The number of volumes at present is 42,491. The increased circulation over the previous year is over 1,600 volumes

Appended herewith are the statistical tables for the year 1941.

S. B. HERBERT,
Acting Inspector of Public Libraries.

MUSIC

The standard of music teaching in the schools was maintained reasonably well until June 30th, 1942. Since September it has been seriously affected by the shortage of qualified teachers and by transportation difficulties. The schools generally have shown resource in meeting the situation and there is no evidence of any loss of interest, in spite of the many special demands upon teachers and pupils.

The number of music festivals of various types was about the same as last year (approximately 120).

The response of the schools to the request for musical programmes in aid of the second and third Victory Loans was the subject of much favourable comment.

The Easter Concert of the O.E.A. successfully showed a cross section of the music carried on in the schools. Every music activity on the elementary and secondary levels was demonstrated by pupils from the following centres—Barrie, Beeton, Hamilton, Harrow, Kingston, London, Meaford, Niagara Falls, Perth County, Port Perry, Scarboro, Simcoe, Toronto, Whitby, East York.

The sound films from the Departmental library continue in demand and are proving of great assistance to the teachers.

Literature prepared by the Provincial Supervisor of Music—

- A pageant, "Cavalcade of Canada"
- A song, "My Pledge to Canada"
- A song book containing 46 "Hymns for Schools"
- "Twenty Reasons for Music in Education"
- List of available books on music in the Teachers' Library
- A proposed New Course in Music for Secondary Schools.

Statistics—The following statistical information concerns the school year ending June 30th, 1942, and includes all schools providing a course in Music under properly certificated Music teachers:

G. R. FENWICK,
Provincial Supervisor of Music.

Toronto, January 5th, 1943.

TRADE-SCHOOLS

I beg leave to present the report of the operations of the Trade-Schools Regulation Act for the year 1942.

The continuance of the war, with the accompanying restrictions of Selective Service, in so far as the shifting of occupations is concerned, has created a most difficult condition for most of the schools coming under the direction of the Trade-Schools Regulation Act. In addition to this difficulty, the employment ratio of both men and women in industry, is at the highest record in history, with much of it on a time rotating shift principle. Such conditions leave little opportunity for large scale enrolment and attendance in educational courses, and therefore practically all schools show reduced attendance. The demand for graduates trained in various essential lines of war activity is still very keen and students are not available to meet the demand. Some schools have had to discontinue operations during the year, as reduced registration has created a financial liability which they have been unable to meet.

When the demand for rehabilitation courses, now being planned to meet conditions following the termination of the war, becomes active, many of these schools will be able to render valuable assistance in supplying much needed training. Such privately operated schools as have shown merit, while working under the regulations of the Trade-Schools Regulation Act, will undoubtedly be most important and valuable factors in meeting such post war demands.

The enforcement of the Trade-Schools Regulation Act has, without doubt, given much needed protection to the citizens of this Province. Very large monetary savings have been the result and many are expressing their appreciation for such protection and the surety of the guidance now being offered.

A fine group of privately operated schools, with improved ethical standards, has been developed. The school which may still persist in acts not in conformity with the Trade-Schools Regulation Act is refused registration to operate in this Province. The protection given to the public is much appreciated and they are making full use of the services available by consulting the Department before making commitments.

The work of this Department has rapidly expanded into an important vocational guidance activity. Many are seeking information as to the reliability and dependability of the school with which they are planning registration, before signing the contract offered. Information is also sought as to the character of the work given by these schools and the advantages to be gained by the student, as a result of the training offered, after its completion.

Frequently appeals are made to this Department for advice and assistance in estimating the fees which may be collected by the school if the student desires

to discontinue the course for any reason. The schools do not hesitate to make refunds or defer payments where the course is discontinued on account of enlistment.

On the other hand, the status of the school which is registered is raised through the confidence which has been created in the public mind by the approval given by this Department through the registration certificate granted. Such registration has a most uplifting effect on the methods of operation of these schools when they realize that they must measure up to the confidence placed in them by such governmental recognition. They appreciate being classified in a respectable and dependable group of schools.

We value highly our close co-operation with Better Business Bureaus of Canada and the United States. These Bureaus immediately refer to this Department all appeals made to them when such appeals relate to matters which may come under the administration of the Trade-Schools Regulation Act of Ontario.

This Department also appreciates the co-operation given by the press, through their Advertising Departments, in refusing to publish advertising matter relating to any trade-school which is not registered under the Act. All advertising manuscript must be stamped with the approval of this Department before being accepted for publication. Such control eliminates the evils which have arisen in the past through non-supervised advertising.

The required registration of all Salesmen for Trade-School Courses is instrumental in eliminating undesirable factors connected with sales methods. Salesmen must operate in conformity with the Act.

The Foreign Exchange Control Board continues to ask for the assistance of this Department when they receive applications from parties desiring to be allowed to take Canadian funds to other countries for the purpose of enrolling in educational courses given outside Canada. Funds are refused if similar courses may be obtained in Canada.

In the enforcement of the Act this Department receives the fullest co-operation from the Departments of Provincial Secretary, Attorney General and the Provincial Police and the Department of Labour, for which it is most grateful.

W. S. KIRKLAND,
Registrar of Trade-Schools.

Toronto, January 15th, 1943.

PART II

STATISTICS

of

The Provincially-Controlled
Schools of Ontario

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 80% of these pupils live in Northern Ontario, and half of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—Is a subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

(a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.

(b) **R.C. Separate**—For the children of Roman Catholics.

(c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

1. **Collegiate Institutes.**

2. **High Schools.**

3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High School.**

2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are 7 of these cars at present, each with a definite route of about 175 miles, which is covered in a month or six weeks. Each stop is from 4 to 6 days. Problems are solved, work is outlined and assigned. Parents come to night classes, where English, spelling, writing and arithmetic are taught them, and where daily problems of life are discussed. Ninety per cent of the pupils are non-English speaking. The Department supplies all school needs free. The enrolment is about 275.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—Is the area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

SCHOOL YEAR AND HOLIDAYS

Sept. 2nd, 1941, to June 27th, 1942

1. The following changes in the marking of the register should be carefully noted:

- (1) A pupil who, during the summer months, has been engaged in any type of farm work and who continues in such employment after the opening of school, may be credited with attendance for September upon production of a statement from the employer to that effect. A memo should be made in the register when such credit is given.
- (2) If a pupil does not appear in September, a check should be made immediately to find out whether or not he is engaged in farm work.

HOLIDAYS

2. The following are the holidays in the schools during the school year 1941-42:

- (1) Thanksgiving Day—October 13th.
- (2) Remembrance Day—November 11th.
- (3) December 20th - 31st, inclusive—part of Christmas vacation.
- (4) The first four days of January—part of Christmas vacation.
- (5) Easter holidays—April 3rd - April 12th, inclusive.
- (6) Victoria Day—celebrated May 25th.
- (7) The King's Birthday.
- (8) Summer vacation—June 27th - September 7th, inclusive.

DATES OF OPENING AND CLOSING OF SCHOOLS

3. The following are the dates of the opening and closing of the High, Continuation, Public and Separate Schools:

Open.....	September 2nd	Close.....	December 19th
Reopen.....	January 5th	Close.....	April 2nd
Reopen.....	April 13th	Close.....	June 26th

NUMBER OF TEACHING DAYS

4. In the High, Continuation, Public and Separate Schools, the number of teaching days is as follows:

September.....	21	January.....	20
October.....	22	February.....	20
November.....	19	March.....	22
December.....	15	April.....	16
		May.....	20
		June.....	20
	<hr/>		<hr/>
	77		118
		Total.....	195

P.S.: As the exact date of the Anniversary of the King's Birthday has not yet been proclaimed, the deduction has not been made from the above. The total number of teaching days for the academic year will be 194.

Number of teaching days for *calendar year* 1941—195; for *calendar year* 1942—191.

SCHOOL YEAR AND HOLIDAYS

1942 - 1943

Revised in keeping with the announcement of the Federal Government concerning statutory Holidays

PROVISIONS OF THE SCHOOLS ACTS

The school year shall consist of two terms, the first of which shall begin on the first Tuesday of September following Labour Day and shall end on the 22nd day of December, and the second of which shall begin on the 3rd day of January and end on the 29th day of June.

When the 3rd day of January is a Friday, the schools shall not be opened until the following Monday, and when the 29th day of June or the 22nd day of December is a Monday, the schools shall be closed on the preceding Friday.

Every Saturday, every public holiday, the week following Easter Day, and every day proclaimed a holiday by the authorities of the municipality in which the teacher is engaged and every day upon which a school is closed under the provisions of The Public Health Act, or the regulations of the Department of Education shall be a school holiday.

HOLIDAYS

The following are the holidays in the schools during the school year 1942-43:

- (1) Thanksgiving Day.
- (2) December 23rd to 31st—part of Christmas vacation.
- (3) The first three days in January—part of Christmas vacation.
- (4) Easter Holidays—April 23rd to May 2nd, both days included.
- (5) Summer vacation—June 30th to September 6th, both days included.

The Minister suggests that Remembrance Day, Victoria Day and the King's Birthday, although not now statutory holidays, be appropriately observed by suitable exercises in the schools.

DATES OF OPENING AND CLOSING OF SCHOOLS

The following are the dates of the opening and closing of Secondary and Elementary Schools except the opening of the Secondary Schools which is September 22nd:

Open.....	September 8th	Close.....	December 22nd
Reopen.....	January 4th	Close.....	April 22nd
Reopen.....	May 3rd	Close.....	June 29th

NUMBER OF TEACHING DAYS

*In the Secondary and Elementary Schools, the number of teaching days is as follows:

September.....	17	January.....	20
October.....	21	February.....	20
November.....	21	March.....	23
December.....	16	April.....	16
		May.....	21
		June.....	21
	75		
			121
		Total.....	196

P.S.: The total number of teaching days for the academic year will be 196 and the teaching days for the calendar year 1942, 193. These figures are for the Elementary Schools.

*As the Secondary Schools did not open until September 22nd, the number of teaching days in September were 7; in the fall term 65; in the academic year 186 and in the calendar year 1942, 183.

A Of all pupils leaving student life from Elementary Schools, 49.2% left without obtaining High School Entrance standing.
Main classes are expressed as a percentage of Grand Total; subdivisions as a percentage of the class to which they belong.

TEACHERS—SUPPLY AND DEMAND

V—STATISTICS OF TEACHING STAFF, AND SUPPLY AND DEMAND FOR TEACHERS, SEPTEMBER, 1943

A. Elementary Schools

(As reported by the Public and Separate School Inspectors.)

	Public Schools				Roman Catholic Separate Schools	All Elementary Schools	Corresponding figures September, 1941
	City Inspect-orates	County Inspect-orates	District Inspect-orates	Total			
1. Total number of teaching positions.....	3,817	8,612	1,753	14,182	3,141	17,323	17,164
2. Total Number of Teachers by Certificates:							
(a) Regular Classroom Teachers—							
First Class.....	2,274	5,248	940	8,462	1,502	9,964	9,868
Second Class.....	859	2,729	484	4,072	1,348	5,420	5,607
Temporary.....		307	260	567	197	764	522
On Exchange from outside Ontario.....	1			1		1	3
Total.....	3,134	8,284	1,684	13,102	3,047	16,149	16,000
(b) Special Full-Time Teachers—							
Music.....	18	41	8	67	21	88	81
Art.....	11	3	3	17	3	20	12
Manual Training.....	83	32	5	120	10	130	130
Home Economics.....	81	28	2	111	15	126	125
Kindergarten (K.D., K.P., and K.).....	296	152	8	456	3	459	489
Auxiliary (all types).....	181	52	16	249	35	284	249
Physical Training.....	10	1		11	2	13	10
Others.....	3	1		4		4	14
Total.....	683	310	42	1,035	89	1,124	1,110
(c) Unfilled Positions.....		18	27	45	5	50	54
3. Number of Vacancies at Midsummer, 1943.....	233	2,641	615	3,897	685	4,582	4,490
4. Turnover (Vacancies as a percentage of teaching positions)—1943.....	6.1	30.7	35.1	27.5	21.8	26.5
1942.....	6.8	36.6	38.7	27.3	21.1	26.2
1941.....	5.5	30.4	35.6	24.4	17.7	23.1
1940.....	4.0	23.5	26.9	18.5	11.3	17.3
5. On Leave of Absence—numbers of teachers on leave for at least one year on account of:							
Active Service.....	96	71	23	190	13	203	379
Other War Work.....	13	9	3	25	7	32	31
Other Reasons.....	19	11	1	31	12	43	47
Total.....	128	91	27	246	32	278	457
6. Teachers leaving the profession during, or at the end of, the school year 1942-43:							
1. To teach in—							
(a) Private Schools.....	1	4		5	12	17	25
(b) Ontario Secondary Schools.....	12	29	6	47	7	54	57
2. To further training in—							
(a) Teacher Training Schools.....		3	8	11	2	13	2
(b) Universities.....	1	17	4	22	4	26	37
(c) Other Schools.....		7	4	11		11	8
3. To non-teaching occupations—							
(a) Civil Service.....	2	9	2	13	12	25	124
(b) War Work.....	1	12	6	19	12	31	135
(c) Other occupations.....	24	169	58	251	16	267	236
4. Armed Forces.....	19	83	24	126	10	136	287
5. Superannuated (a) on account of age.....	44	23	2	69	9	77	72
(b) on disability.....	11	6		17		17	22
6. Married.....	102	257	37	396	57	453	652
7. Left the Province.....	2	4	2	8	11	19	21
8. Poor Health.....	9	24	4	37	24	61	56
9. Died.....	7	8	2	17	6	23	31
10. Unemployed.....		15		15	3	18	35
11. Others.....	5	104	36	145	15	160	55
Totals.....	240	774	195	1,209	200	1,409	1,855
7. Demand—total withdrawing and on leave—	368	865	222	1,455	232	1,687	2,312
increase in number of positions.....	39	168	*75	132	27	159
Total.....	407	1,033	147	1,587	259	1,846
8. Replacements—Beginners to profession..	72	497	66	635	154	789	915
Married women re-entering the profession.....	38	420	89	547	36	583	742
From other provinces.....	8	30	20	58	11	69	71
From other sources.....	289	86	†	347	58	405	347
9. Number known unemployed in September.....	22	34	6	62	14	76	137
10. Number of married women still available for full-time teaching.....	277	152	8	437	49	486	648
11. Number qualifying as teachers in June.....						867	1,035

*Decrease.

†Some of the teachers in the Districts moved to positions in the Counties or City inspectorates thus accounting for the excess of replacements over demand.

B. Secondary Schools

(As reported by the Secondary School Principals.)

	Continuation Schools	High Schools and Collegiate Institutes			Vocational Schools (including Senior Auxiliary)*	All Secondary Schools
		In Cities	All Others	Total		
1. Total number of teaching positions—full time only.	469	1,015	1,425	2,440	1,267	4,176
2. (a) Full-time teachers—						
Net number of full-time secondary school teachers (no duplications).....	463	1,015	1,425	2,440	1,267	4,170
Academic teachers also teaching in vocational departments.....					332	332
Vocational teachers also teaching in academic departments.....		127	56	183		183
Gross number of full-time secondary school teachers (including duplications).....	463	1,142	1,481	2,623	1,599	
(b) Part-time teachers						
Elementary school teachers also teaching in secondary schools.....	32	10	29	39	6	77
Other part-time teachers.....	90	19	50	69	25	184

(d) Unfilled positions.....	6					6
3. Number of vacancies at midsummer, 1943.....	216	84	308	392	69	461
4. Turnover (vacancies as a percentage of teaching positions).....	46.2	8.3	21.6	16.1	5.4	11.3
5. On leave of absence—number of teachers on leave for at least one year on account of:						
Active Service.....	9	56	111	167	50	226
Other War Work.....	1	5	6	11	8	20
Other reasons.....		2		2	2	4
Total.....	10	63	117	180	60	250
6. Teachers leaving the profession during, or at the end of, the school year, 1942-43:						
1. To teach in—						
(a) Private schools.....	1		1	1		2
(b) Elementary schools.....	11		1	1		12
(c) Universities or Normal schools.....	1		1	1	1	3
2. To further training in—						
(a) Teacher training schools.....						
(b) Universities.....	3		4	4		7
(c) Other schools.....	1		2	2		3
3. To non-teaching occupations—						
(a) Civil Service.....	2	4	4	8		10
(b) War Work.....	1	1	7	8	3	12
(c) Other occupations.....	14	4	16	20	7	41
4. To the Armed Forces.....	8	20	27	47	8	63
5. Superannuated (a) on account of age.....		7	2	9	9	18
(b) on disability.....	1		3	3		4
6. Married.....	19	10	34	44	11	74
7. Left the Province.....	2		2	2		4
8. Poor health.....			7	7	2	9
9. Died.....		2	1	3	2	5
10. Unemployed.....	1		8	8		9
11. Others.....	4		3	3	1	36
Total.....	69	48	123	171	45	313
7. Demand—Total withdrawing and on leave.....	79	111	240	351	105	535
Increase in number of positions.....		1		1		1
Total.....	79	112	240	352	105	536
8. Replacements—Beginners to profession.....	41	11	55	66	11	118
Married women re-entering the profession.....	15	7	17	24	3	42
Former teachers re-entering the profession.....	4	3	12	15	1	20
Persons teaching on a permit.....	33	1	50	51	40	124
From other Provinces—						
(a) on Ontario certificate.....			2	2	2	4
(b) on permit.....			3	3		3
From other sources.....		190	157	147	34	153
Decrease in number of positions.....	14		44	44	14	72
9. Number known unemployed in September.....	15	43	33	76	1	92
10. Number of married women still available for full-time teaching.....	19	46	31	77	3	80
11. Number qualifying as teachers, midsummer, 1943.....				318		1318

*Included in this column will be those teachers of academic subjects teaching in pure vocational schools. In the case of the composite schools, all teachers of academic subjects are classified as academic.

†Some of these came from continuation schools, which accounts for an excess of replacements over demand in the continuation schools.

‡These were all academic teachers who could teach in continuation, high schools and collegiate institutes or might teach academic subjects in vocational schools. No vocational school teachers have been graduated since 1940.

VI—SCHOOL ADMINISTRATIVE UNITS, NUMBER AND TYPE
(as of September 1, 1942)

	Schools in Operation	Adminis- trative Units	Types of Boards						Total Boards
			Local Trustee Boards	Township Area Boards	Boards of Education	Continuation School Boards	High School Boards	Collegiate Institute Boards	
Elementary Schools:

Middlesex Library Trailer

This trailer, accommodating 1,200 books, was purchased in 1940 by the Middlesex County Library Association. It exchanges books among the member libraries. By this means the school children have the use of a much wider range of supplementary reading books than would be possible otherwise.

A In all Provincially-Controlled Schools.

B Commencing with 1929-30 the enrollment is that of the last school day in May. The former figures, covering the entire calendar year, contain a percentage of duplication.

C Covers the school year.

D This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture.

E This includes Third Class, District, Permanent Ungraded, and Temporary.

F Included with Public Schools.

A Includes extra-mural Students.

B 52 of these previously held District Certificates.

C Located at Hamilton, London, North Bay, Ottawa, Peterborough, Stratford and Toronto.

D Discontinued.

XIV—DEPARTMENTAL SUMMER COURSES
ENROLMENT BY SUBJECTS IN RECENT YEARS

(The Summer Courses are conducted by the Department of Education for the benefit of Teachers, who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing, and thus to become more efficient in carrying on with a modernized curriculum.)

In the interests of economy summer courses have been discontinued for the duration of the war. See 1940 Report for enrolment in recent years.

M.—Male.

F.—Female.

P.—Public.

S.—Separate.

*Special certificates are listed only where teacher devotes whole time to that subject.

†Music Teachers—Excludes many regular classroom teachers who also teach music.

In cities and towns only full-time teachers are indicated. All part-time and itinerant teachers are classified according to county of domicile, and, since they may teach in both Public and Separate schools, no distinction is made.

Note: 1. The section "Academic-Vocational" gives those teachers who teach in both the academic and vocational departments.

2. "Elementary" under "Part Time" gives those teachers whose time is divided between the elementary schools and the secondary. They are already counted as elementary teachers, hence are omitted from the full-time teachers here to avoid duplication.

3. Itinerant music teachers are not included.

4. For brevity, degrees are counted in the order given. Dr. includes all doctor degrees except the D. Paed.; M.A. includes M.Ed. and M.A., B. Paed.; B.A. includes all bachelor degrees except B. Paed.

THE SCHOOL CHILDREN SPEED UP THEIR SHARE TOWARD VICTORY

Since the commencement of World War II, Ontario school children of the provincial system have donated \$9,600,000 toward victory, \$6,600,000 of which has purchased war savings stamps and certificates and another \$1,500,000 has bought bonds.

Their tenacity of purpose is shown in the fact that one-third of this total effort was made in the school year 1943-44. Purchases have been as high as \$250,000 per month.

Their donations toward war relief cover a wide field of organizations, such as the British War Victims Fund, Malta Relief, The Soldiers' Comfort Fund, Aid to Russia, The Navy League, Chinese Relief, The Queen's Fund, The Merchant Seamen's Clothing Fund, The Milk to Britain Fund.

Many schools have adopted corvettes or frigates named after their town and regularly supply them with reading matter and cigarettes. Examples are the corvettes "Napanee", "Tillsonburg", "Parry Sound", "Runnymede" and the frigates "Fort Erie" and "Stone Town". Oakville pupils have adopted the destroyer "Niagara" and the corvette "Rimouski".

The school children of other areas have contributed in whole or in part during the past year toward the purchase of Fleet Cornell and Anson training planes and also "Hurricane" bombers. In this connection may be named the pupils of Peterborough, Victoria, Haliburton and Simcoe Counties, Cities of Sarnia and Sault Ste. Marie, Forest Hill Village, Lansdowne and Williamson Road Public Schools, Toronto.

REPORT

OF THE

Minister of Education

FOR THE YEAR 1943

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education for the year 1943.

As was to be expected, the war continued to exert an influence on every aspect of education in the province, but the effect varied considerably in different parts of the system. It was therefore possible to achieve considerable progress in some directions while in others changes were of necessity deferred because of war conditions. For this reason, the intelligent planning of reforms for the educational system in the post-war period continues to be a most important part of the work of the Department.

In the interest of economy and efficiency, the closing of schools with an enrolment of less than nine pupils has been encouraged, and sixty-five small schools were closed during the year. Rural boards of trustees have been helped to set up systems of transportation for pupils to attend secondary schools, with the Department paying fifty per cent. of the cost. The movement toward the township area as a unit of administration has also been fostered, and there were, at the end of 1943, 187 such areas involving 1,009 former school sections.

Legislative grants have shown an annual increase for many years. For elementary education the grants for the 1942-43 fiscal year were \$5,561,381; for secondary academic schools they were \$1,000,663, and for vocational schools \$1,902,764. It is expected that the figures for 1943-44 will show substantial increases in all these amounts.

The Department has continued to foster and extend a number of special services which have proved of great value in the school system. The Correspondence Branch furnished lessons for 2,371 pupils who would otherwise have had no formal teaching. This branch has also assisted the work of the Canadian Legion in supervising lessons for Service personnel. The scope of the auxiliary and opportunity classes has been extended and the needs of a special group of pupils are being met in this way. The Railway School Cars have continued to perform a most useful service in the north country. The Travelling Library extended its facilities to include all Continuation Schools of the province, providing both curricular and recreational reading material. For visual education the circulation of slides and films was continued, and the Provincial Archivist set up a travelling exhibit of historical source material which aroused enthusiasm

in all the schools it reached. The Department co-operated with the Canadian Broadcasting Corporation in educational and musical programmes for the schools.

The difficulty in maintaining adequate forces of trained teachers has continued. Of 529 persons to whom permits for elementary schools were issued, 311 had had some professional training; all but 9 had Middle School academic standing or better. The academic secondary schools with 4,000 more pupils than the previous year operated with 99 fewer teachers, because of enlistments and the difference in the normal balance of new certificates and retirements. Similarly in the Vocational Schools there has been a movement of teachers into the Forces, the war emergency programme, and war industry. The supply of teachers entering the profession through the Normal Schools and the College of Education has shown a decrease through the past three years.

The total school enrolment for the province for the school year 1942-43 was 664,637, an increase of 4,447 over the previous year. The Public School population changed only slightly, with a decrease of 848; there was an increase in both vocational and academic secondary school attendance but a decrease in the night classes of the vocational schools. Daily attendance was well maintained, with the elementary schools achieving an average of 89.6% and the secondary schools 92%. Employment certificates were issued under the regulations and after investigation, to 12,792 pupils, but some of these were for holiday periods. Large numbers of secondary school pupils were enabled by the regulations to shorten their school year and assist on farms or in food-producing plants. It is worth noting that pupils who leave in May and return in October will in four years lose the equivalent of a full year in school. To maintain their standing under these conditions requires a real effort. Provision has been made for granting certificates of academic standing without departmental examination to pupils who, having successfully completed a reasonable portion of the year's work, enlist in any of the Services or complete a period of useful farm service. It is felt that generally speaking the co-operation of principals, teachers and pupils has made it possible to grant these certificates without serious lowering of academic standards.

The war effort of the schools has been magnificent. Facing the difficulties already mentioned,—the larger number of pupils, the smaller number of teachers, and the shortened school year,—the teachers have responded nobly. The pupils too have had difficulties to overcome, consciously or unconsciously. The nervous strain of war-days, the absence of parents in the Forces or in war-industry, the opportunities for work outside school hours, have all had their effect and yet the pupils have in general continued to strive for and achieve success in their school work. Pupil activities in the Red Cross, War Savings, War Relief and Salvage campaigns have been directly useful in the war effort of the country. By correspondence and the despatch of comforts to former students, most schools have done good work in maintaining morale. In all these ways they have also taught themselves useful lessons, and caught something of the spirit of those former pupils now serving their country on distant battlefields.

Respectfully submitted,

G. A. DREW,

Minister of Education.

Toronto, January 5, 1945.

ELEMENTARY EDUCATION

Legislative Grants

Over a period of years it has been the policy of the Department of Education to recommend annually to the Legislature the making of a larger appropriation than that of the preceding year for educational purposes. The elementary schools have shared in these larger appropriations. In the fiscal year 1943-44 the amount expended on elementary education was \$5,750,606.60, an increase of \$193,648 over the similar expenditure for the fiscal year 1942-43. It is expected that the expenditure on elementary schools for the fiscal year 1944-45 will show a still larger increase. Of this expenditure for the fiscal year 1943-44 the amount of \$4,904,262.40 went to pay the regular legislative grants to public and separate schools, \$66,897.52 was paid in assisted grants, and \$48,990.11 was spent on the transportation of pupils resident in rural municipalities.

Township School Areas

Each year the larger unit of administration for rural elementary schools gains greater acceptance. Twenty-two Township School Areas were formed between January 1st and July 1st, 1943, involving the dissolution of 146 school sections. Each year also the movement becomes more widespread. Heretofore few areas had been formed in South-western Ontario, but during the past two years a number of these larger units have been formed in this part of the province and there is evidence that accelerated progress will be made within the next two or three years.

The following list gives the location of the new areas formed in 1943:—

Township	No. of School Sections	County or Districts	Inspector	Date
1. Pembroke.....	2	Renfrew	N. Campbell	Jan. 11

The Temporary Closing of Small Schools

A rural ungraded school with fewer than twelve pupils seldom functions as efficiently as one with twenty to thirty pupils. Where there are fewer than five pupils in a class-group or grade there is lacking the stimulus needed for healthy competition, co-operation and that individual contribution to the class obtained through free discussions. Again, the play-life on the school grounds loses its zest and interest when, because of small numbers, organized games cannot be carried on successfully. Thus, for the welfare of the pupils, the Department of Education has encouraged the temporary closing of schools with an enrolment of eight or fewer.

The following schools were closed temporarily during the year 1943:—

Inspectorate	Inspector	School	Enrolment
Bruce East.....	J. M. Game.....	No. 10 Carrick.....	9

Transportation of Pupils to Secondary Schools

During the past few years many rural boards of trustees of elementary schools have co-operated in providing transportation for pupils of their sections and areas to secondary schools, and the Department has paid a grant of 50% of the net cost of transportation under approved schemes. This has meant that the opportunity of attending a secondary school has been made available to a greater number of rural pupils. In the statistical portion of this report a detailed table is given showing the particulars of this service which is becoming more widely extended each year in the rural areas of the province.

The Supply of Teachers

There was a slight decrease in the number of unqualified teachers for elementary schools during the calendar year 1943. Although there were further enlistments of both men and women teachers in the Armed Forces, the decrease in unqualified teachers was probably due to the Federal Order-in-Council which prevented teachers from leaving their positions to engage in other types of remunerative employment, and to the general increase in the salaries of teachers.

During the school year 1942-43, 534 unqualified teachers were employed by the boards through permission given to them by the Department. An analysis of these permits is given below for the school years 1942-43 and 1943-44.

Correspondence Courses

The correspondence courses are meeting in a very effective manner the purpose for which they were established. Their success is evidenced by the large enrolment from year to year. As a direct result of the war many young boys and girls have had to shoulder heavier home responsibilities and are unable to devote as much time to home study as they otherwise might. Nevertheless, the response to the opportunity given by the correspondence courses has been most gratifying. No part of Ontario is too isolated for the correspondence lessons to reach. Anyone in the province between six and twenty-one years of age, who is eligible, may further his education by home study while living at home or carrying on his regular work. In addition, lessons are sent to pupils temporarily domiciled outside the province and to children of Ontario missionaries and others in far-away lands. Inmates of Sanatoria and Preventoria are included, as well as those who are ill or physically handicapped, regardless of their distance from a school.

The courses cover all grades from I to X inclusive. Lessons in French are given in Grades I and II to French-speaking pupils. Carefully prepared lessons, based on the authorized text books, are sent out at regular intervals, and the answers returned are examined by a staff of twenty-four qualified teachers who make all necessary corrections and submit explanations to the pupils.

During the year 1943, 2,371 pupils were enrolled; 542 promotions were made; and 57,654 lessons were completed. Thirty-four pupils obtained High School Entrance standing, and the work in Grade IX and Grade X was completed in an equally satisfactory manner.

The Correspondence Branch also supervises the courses in English, Social Studies and Elementary Arithmetic introduced by the Canadian Legion for Active Service men.

Railway School Cars

In 1926 the Railway School Car project was first launched, and since that time the number of cars has increased to seven, all of which are serving the educational and community interests in the various parts of Northern Ontario. There have been no changes in staff personnel, although on some railway lines stops have been added or deleted according to the increase or decrease in population in surrounding areas.

For many of the cars Saturday is a regular teaching day, as time is often lost moving the car from place to place. Usually one week is spent at each stop, and the number of circuits made in a school year averages about nine. Besides doing the regular school work, the cars are usually community centres, and various activities are carried out under the guidance of the teachers. One teacher employed in a Railway School Car recently wrote as follows:—

"Sixteen trackmen, representing nine different countries in Europe, were delayed from six p.m. until after dark in a downpour of rain, and we gave them shelter. An Indian woman came to ask me to cable \$10.00 to her son in Sicily, who is there running a Canadian army tank in order that Ontario may continue as Ontario. To make matters more vivid to her, I outlined a map of Italy on the blackboard, leaving out all confusing marks and names. Sixteen trackmen smoking vile pipes, and an obese Indian woman all squeezed into juvenile school seats, together with five children looked and listened for two hours while I held up bits of pictures from newspapers, magazines and school books."

The foregoing paragraph relates but another of those incidents of the work performed by the School Cars in a land which can be reached only by the "ribbon of steel."

Health Teaching and School Medical Inspection

An increasing interest in the health of school-age children, which is a natural corollary to four years of war, has resulted in official action at the county level in a significant number of instances. Legislation introduced some four years ago, whereby the County Council may, by agreement with the local school boards, establish and pay for an acceptable type of school health supervision, has been utilized during the year 1943 by four additional counties, while evidence of interest in this type of health service has been exhibited by four others. A similar extension of community concern in the health of the secondary school age-group has been evident throughout the year. These tangible signs of concern in health matters augur well for the time when it will be possible to extend to every town, village and township all of the advantages of an acceptable type of health service.

Religious Instruction

During the past several years there has been a noticeably increasing demand from all parts of the province for a greater measure of religious instruction in the public schools. The records show that before and after school hours the pupils of some 2,000 classrooms in our public schools are receiving religious instruction from the clergymen of the locality. More and more of the clergy have been taking advantage of the regulations which, under certain conditions, permit them to give religious instruction to pupils, and more and more public school boards of trustees have arranged for this instruction to be provided.

A careful study has been made of religious instruction as an essential subject of the school curriculum, and consideration is being given to the possibility of having this important work incorporated as an integral part of the programme of studies in all public schools.

Visual Education

The Visual Education Branch of the Department of Education maintains a library of lantern slides and 16 mm. instructional motion picture films, both sound and silent. These films and lantern slides are available to the schools of the province and no covering or rental charge is made, the borrower being required to pay only the express charges one way. Over 300 users have taken advantage of this service during the year, resulting in 6,932 screenings of the slides and films of the Visual Education Branch in our schools. In this same period many additional sound films have been secured and listed in the film library.

Projectionists of the National Film Board serving rural areas have screened instructional films provided by the Department of Education. This has meant

that many pupils attending rural schools have had an opportunity to view these films, an educational aid which would not have been available but for the combined services of the Department of Education and the National Film Board.

Because of priorities it has not been possible for school boards to purchase motion picture projection machines, but an increasing interest has been shown in this field, and when machines and colour film are once more available, there is every reason to believe that visual aids of this nature will play an increasing role in assisting teachers in the instruction of pupils.

Radio in the Schools

There are more than 700 public and separate school buildings in the province equipped with radio receiving sets. In addition, there are many schools where the teacher or pupils bring their own sets to hear special programmes, and several schools have loud-speaker attachments. Undoubtedly, as soon as restrictions are removed and receiving sets become available for school use, a greatly increased number of schools will be equipped with modern radios.

The Department of Education has co-operated with the Canadian Broadcasting Corporation in sponsoring musical and other educational programmes for school listeners. A study of the whole field of radio as an aid in education is being made, and to this end an official of the Department has been appointed a member of the National Advisory Council on School Broadcasting to the Canadian Broadcasting Corporation.

The Department of Education has further co-operated with the Canadian Broadcasting Corporation in providing for schools and teachers a booklet on school broadcasts entitled "Young Canada Listens," which contains particulars of school broadcasts available over the C.B.C. network in each province of Canada.

Interchange of Teachers

The following exchanges were arranged for the school-year 1943-44:—

Miss Doris J. Railton, of the Toronto Public School staff, with Miss Margaret Davies, of the Vancouver Public School staff.

Miss Wilma B. Murray, of the York Memorial Collegiate Institute staff, with Miss Esther Harrop, of the Vancouver High School staff.

War Effort of the Schools

To all those who were actively interested in education throughout the year, it was apparent that pupil activity in relation to the war effort was carried forward with unabated vigour. This was made possible only as a result of the co-operation of teachers, inspectors, boards of trustees and many organizations which assumed responsibility for special phases of war service. Considered as a whole, war activities have constituted a widespread enterprise within the schools, and in many ways have formed an integral part of the regular programme. As in past years, good citizens, old and young, under the direction of the Junior Red Cross, the Navy League of Canada, the Imperial Order Daughters of the Empire, the Home and School Associations, and Women's Institutes, have given freely of their time and talent to further war endeavours on the home front. In addition, however, pupils in our schools have served through the acceptance of farm employment, through the purchase of War Savings Stamps and Certifi-

cates and through energetic efforts in support of scrap drives to conserve essential supplies. Participation of pupils throughout the province in the presentation of a most acceptable Empire Day programme, authorized for use by the Minister, reaffirmed loyalty to the King and Empire, and to our democratic way of life.

The Provincial Inspectoral Staff, 1943

I. IN MEMORIAM:

Mr. James Colling, B.A., who retired from service as inspector of public schools in Hastings North on December 31st, 1933, died at his home in Bancroft in the spring of 1943. Mr. Colling was born at Port Dalhousie on November 9th, 1862. He received his elementary education at the Port Dalhousie and St. Catharines Public Schools, and his secondary education at the St. Catharines Collegiate Institute, and upon his graduation won the Governor-General's medal. After teaching public school for three years near St. Catharines he entered the University of Toronto, from which he graduated in 1890 with the degree of Bachelor of Arts with honours, and was awarded the Gold Medal in Classics. Mr. Colling served as Classics teacher in Napanee and Lindsay Collegiate Institutes. In 1906 he was appointed principal of the Cobourg Collegiate Institute, and in 1908 principal of Belleville Collegiate Institute. Chosen public school inspector of Hastings North in 1912 by the Hastings County Council, Mr. Colling served in this capacity until his retirement in 1933. After his retirement he continued to live in Bancroft among the hills, lakes and woodlands of the area, for which he had a most ardent admiration. Mr. Colling was indeed a kind, scholarly gentleman and was particularly helpful to the younger teachers who came to serve in the schools of his inspectoral area. He was held in highest esteem by his teachers as well as by a large circle of friends and associates.

Mr. Robert Galbraith, B.A., was a native of Guelph, where he attended public school. At a later date his family moved to Morrison to reside, and he attended the Galt Collegiate Institute and later Queen's University, from which he graduated, specializing in Mathematics. He also attended the Mount Forest Model School and the School of Pedagogy, Toronto. Mr. Galbraith taught in public schools in Puslinch Township, and afterwards in the high schools in Fergus, Port Hope, Almonte and Simcoe. He was appointed public school inspector in Wellington North in 1905, and continued to perform his duties efficiently and acceptably until his retirement in 1929. Mr. Galbraith took an active interest in community activities. He was a member of the Mount Forest Utilities Commission, a member of the Hospital Board, President of the Patriotic Society, a member of the Agricultural and Horticultural Society and an enthusiastic member of the bowling and curling clubs. A man of strong and genial personality, Mr. Galbraith was a lover of clean sport, a person of good judgment and a community man as well as an educationist. He died on April 26th, 1943.

Mr. Robert Gillies, B.A., was born near Bethany in Durham County, and received his elementary and secondary school education in the schools of Bethany and Port Hope. His training as a teacher was obtained at the Port Hope Model School and the Ottawa Normal School. Mr. Gillies taught in the Pontypool Public School in Durham County for five years, in the Havelock Public School for three years, and in Port Hope as assistant and later as principal of the public

school for a period of twenty years. From Port Hope Mr. Gillies took a position on the Toronto Public School staff, where he served for eight years. In 1916 he graduated with the degree of Bachelor of Arts from Queen's University, and in 1917 obtained his Permanent First Class certificate and the High School Assistant's certificate. In 1925 he completed the requirements for the Public School Inspector's certificate and received appointment to a district inspectorate with residence at Sudbury. In 1930 Mr. Gillies was transferred to the inspectorate of York No. 1, with residence at Aurora, and in 1934 he was again transferred, this time to the inspectorate of York No. 6 with residence in Toronto. On August 31st, 1939, Mr. Gillies retired from his duties as inspector and enjoyed a well-earned leisure to the time of his death on February 17th, 1943. Mr. Gillies combined in fine balance those qualities of personality necessary for a good teacher, a firm, tactful and efficient principal, and a sympathetic and inspirational inspector. He was esteemed and beloved by pupils, teachers, trustees and parents, and the schools under his supervision made splendid advancement during his period of service.

Mr. J. L. Mitchener, B.A., died suddenly at his home in Cayuga on April 9th, 1943. He was born at Clear Creek, Norfolk County, and received his early education in the Clear Creek Public School, Port Rowan High School, and the Aylmer Collegiate Institute. Subsequently he graduated from McMaster University with honours in Science. Mr. Mitchener attended the Simcoe Model School and the Ottawa Normal School. His first teaching experience was in public schools in Norfolk County. As a high school teacher he was principal of the Caledonia High School, the Vankleek Hill Collegiate Institute, the Dutton High School and the Ridgetown Collegiate Institute. He became public school inspector of Haldimand County in January, 1919, a position which he held to the time of his retirement in August, 1942. Mr. Mitchener was especially well fitted for the position of inspector, and was held in very high esteem and respect. Before his retirement the teachers of his inspectorate presented him with an illustrated scroll on which was inscribed the following complimentary reference:—"For a generation of service, faithfully and unstintingly given that the course of education might be advanced and the standards of the teaching profession elevated." Mr. Mitchener took a keen interest in community and church affairs, and his passing was a distinct loss to his community as well as to the cause of education.

Mr. R. A. Paterson, B.A., was a native of Oxford County. He obtained his elementary education in a rural school at Dickson's Corners in his native county, and his high school education in the Ingersoll High School. He graduated with first class honours in Mathematics and Physics from the University of Toronto. In addition he was a graduate and medallist of Osgoode Hall. Mr. Paterson taught in the public schools of Oxford County and in the high schools in Gananoque, Whitby, Strathroy, Ingersoll, Woodstock and Simcoe, and for seven years was principal of the Perth Collegiate Institute. Appointed public school inspector of Oxford South in January, 1910, Mr. Paterson served his area efficiently until his retirement in 1932. As an educationist Mr. Paterson's work was always outstanding. He was a scholar of ability and an excellent teacher. A fondness for literature, especially for the writings of Robert Burns, was a noteworthy characteristic. As a successful inspector, Mr. Paterson was a man of high integrity, and his influence was always for good. He was a resident of Ingersoll for forty years. He died on June 28th, 1943.

Mr. J. E. Wilkinson, B.A., B.Paed., was born in the village of Morpeth, Kent County, receiving his elementary education in the Morpeth Public School and his secondary education in the Ridgetown Collegiate Institute. He was a graduate of the University of Toronto with specialist standing in the department of Mathematics and Physics. He also held the Bachelor of Pedagogy degree from his Alma Mater. In addition, Mr. Wilkinson was the holder of an Art Specialist's and High School Principal's certificates. Mr. Wilkinson obtained his professional training in the Chatham Model School and the Ontario Normal College, Hamilton. As a teacher he began his career in a public school in the Township of Harwich, Kent County. Subsequently he became principal of Elgin Public School, Smith's Falls, and later taught as commercial master in the Ryerson Public School and Orde Street Public School, Toronto, in Paris High School, St. Mary's Collegiate Institute, and as Master in Mathematics in St. Thomas Collegiate Institute, Windsor Collegiate Institute and Harbord Collegiate Institute, Toronto. In 1927 Mr. Wilkinson was appointed public school inspector in York County and served most acceptably for sixteen years in the inspectorates of York No. 2, No. 5 and No. 6. As a tribute to his educational services he was elected President of the Supervising and Training Department of the Ontario Educational Association in 1934-35. Over a period of forty years Mr. Wilkinson made a worthy contribution to the cause of education in the province. Genial and courteous, he had a host of devoted friends among whom were the teachers and children, who will not soon forget him. He died while still in active service on April 6th, 1943.

II. RETIREMENTS:

Mr. D. M. Eagle is a native of Puslinch Township, in the County of Wellington. He was educated in S.S. No. 11 Puslinch and in the Galt and Hamilton Collegiate Institutes. Mr. Eagle received his professional training in the Galt Model School and the Ontario Normal College. His outstanding services as teacher, Model School principal, high school teacher and inspector cover a period of forty-six years. He began his teaching career in a rural school in Waterloo County in 1896, and later taught in Galt, the Windsor Model School, Windsor Collegiate Institute and the English-French Training School at Sandwich. He inspected the English-French Separate Schools in Essex and Kent Counties before being appointed as inspector of public schools in the inspectorate of Essex No. 1. Mr. Eagle was a most efficient inspector and had many interests outside of educational affairs. Before he became inspector he was reeve of Sandwich for seven years, and was also warden of Essex County in 1926. He has travelled abroad extensively. He retired on December 31st, 1943, two years under the retiring age.

Mr. T. R. Ferguson, M.A., retired from his duties as public school inspector for Ontario County (North), on December 31st, 1943, owing to poor health. Mr. Ferguson was born at Black Horse, near Kincardine, on October 30th, 1878, and received his elementary and secondary education in the town of Wiarton. In 1904 he graduated from Queen's University, where he obtained his Master of Arts degree in Honour Mathematics and Physics, and during the session of 1906-07 attended and completed successfully the course at the Ontario Normal College, Hamilton. Mr. Ferguson taught in rural schools and was later principal of the Oil Springs Public School. He served also in the secondary schools of Wiarton, Georgetown, Midland and Cornwall, and at the time of his appointment as public school inspector for Ontario North, in 1913, was principal of the

Uxbridge High School. In addition to Mr. Ferguson's work as an inspector in Ontario North, he inspected schools for a time in Muskoka District and York County. For thirty years he served as inspector in Ontario North, and during that time gave splendid service and contributed greatly to the advancement of education in his own county and throughout the province.

Mr. R. A. Hutchison, B.A., public school inspector for Ontario South retired from active duty on August 31st, 1943, after completing a most successful inspection service of 33 years in the County of Ontario. Mr. Hutchison was born in Norfolk County and received his elementary education at the Walsingham Public School and his secondary education in the Port Rowan High School and the Aylmer Collegiate Institute. He attended Simcoe Model School in the year 1894 and taught in rural schools in Norfolk and Victoria Counties for a period of six years. In 1904 Mr. Hutchison graduated from Queen's University with honour standing in Mathematics, and attended the Ontario Normal College in Hamilton during the term 1904-05. His secondary teaching experience was obtained at the Georgetown, Simcoe and Uxbridge High Schools. In 1910, while principal of the Uxbridge High School, he was appointed public school inspector for Ontario North, and in 1913 was transferred to the inspectorate of Ontario South by the County Council, to succeed the late Dr. John Waugh who had been appointed Chief Inspector of Public and Separate Schools. Mr. Hutchison served as inspector in Ontario South from 1913 until his retirement in 1943. During that period there was a great increase in the number of classrooms, particularly in the City of Oshawa and its suburban area. That Mr. Hutchison gave splendid advice to boards of trustees is now evidenced by the splendid schools of this district. In 1921 Mr. Hutchison and the late Mr. J. E. Benson, who was public school inspector for the City of Windsor, were sent by the Department of Education to study the rural schools of the State of Wisconsin. The report of their visit and investigations made a valuable contribution to the cause of education in Ontario, particularly with respect to rural schools. Mr. Hutchison's genial personality, his scholarship, and his ability to get things done aided materially in educational progress, not alone in his own inspectorate but in the broader provincial field.

Mr. R. A. A. McConnell, B.A., retired from his duties as public school inspector for Grenville County on August 31st, 1943, before reaching the age limit for the retirement of inspectors, because of impaired health. Mr. McConnell is a graduate of Queen's University. He had experience as a teacher and principal in the public schools of Madoc, Meaford and Sudbury, and also served as a Model School principal at these centres. He was principal of the Palmerston Continuation School when he received his appointment as public school inspector for District Division XI on September 1st, 1928, with residence at Haileybury. Mr. McConnell served this area as inspector until 1935, when he was transferred to Lanark County with residence at Perth, where he was inspector until 1939, when he was again transferred to Northumberland and Durham Counties with residence at Port Hope. On January 1st, 1941, he was transferred to Grenville County, with residence at Prescott. Mr. McConnell was an efficient teacher and principal, a very conscientious inspector, and advanced appreciably the cause of education in the different areas where he had inspectoral supervision.

III. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1943:—

1. City of Fort William: E. J. Transom, M.A., B.Paed., Principal of Central Public School, Timmins, duties beginning September 1st. This is a new city inspectorate, Fort William formerly being included in District Division III.
2. Glengarry: Howard Robertson, B.A., B.Paed., Principal of Victoria Public School and Supervising Principal, Brockville, duties beginning September 1st.
3. Grenville: H. W. Knight, B.A., Principal of Ritson Public School, Oshawa, duties beginning September 1st.
4. District Division II: D. A. Lapp, B.A., Principal of Rideau Public School, Kingston, duties beginning September 1st.
5. District Division VI: A. P. Silcox, B.A., B.Paed., Principal of Ryerson Public School, London, duties beginning September 1st.
6. R.C.S.S. Division III: J. E. A. Godbout, B.A., B.Paed., a member of the staff of the University of Ottawa Normal School, duties beginning September 1st.

HELPING TEACHER:

7. Welland (in part) and Lincoln (in part): C. R. MacLeod, B.A., Principal of Elmira Public School, to assist Inspector Charles Howitt, duties beginning September 1st.

IV. TRANSFERS:

The following transfers were made in the provincial staff of inspectors during the year 1943:—

<i>Inspector</i>	<i>Former Inspectorate</i>	<i>New Inspectorate</i>	<i>Date</i>
1. Arthur Archibald, B.S.A.....	Haldimand.....	Ontario South.....	Sept. 1
2. Laurier Carriere, B.A.....	R.C.S.S. Div. II.....	R.C.S.S. Div. XXIV.....	Sept. 1

6. O. M. MacKillop, B.A., B.Paed.	District Div. VII.....	York No. 1.....	Sept. 1
7. William MacMillan, B.A., B.Paed.	District Div. VI.....	District Div. VII.....	Sept. 1
8. Remi Millette, M.A., B.Paed., Ph.D.	R.C.S.S. Div. III.....	R.C.S.S. Div. II.....	Sept. 1
9. R. O. Staples, B.A., B. Paed.	Glengarry.....	Huron South.....	Sept. 1

V. EXCHANGES BETWEEN INSPECTORS AND NORMAL SCHOOL MASTERS, FOR ONE YEAR FROM SEPTEMBER 1st, 1943:

S. A. Watson, B.A., of the Department of Education, to replace W. K. F. Kendrick, B.A., B.Paed., returning to the Toronto Normal School from Simcoe South and York (in part).

G. H. Dobrindt, B.A., Public School Inspector for Waterloo (No. 1), with F. C. Biehl, B.A., B.Paed., of the Stratford Normal School.

E. H. McKone, M.A., B.Paed., returned to Peterborough Normal School as Principal, after one year in Huron South.

Conclusion

The staffing of our elementary schools has become increasingly difficult as the war years pass in slow succession. Continued enlistments in the armed services, by both men and women teachers, and the transfer of teaching personnel to other positions, have forced upon local boards and inspectors a major problem in filling vacancies in the profession. In this connection, tribute is here paid to those unqualified teachers who volunteered their services, and particularly to many certificated teachers who returned to the profession, often at great personal sacrifice after a period of some years.

Worthy of note in 1943 was the increasing interest in audio-visual education as an aid to the teacher in her classroom procedure. Films available from the Department secured a wide distribution on a loan basis, and many teachers have offered commendation for the service. Of particular value in the field of radio was the inauguration of a series of music broadcasts sponsored by the Department, with the approval of the Minister, and heard by the pupils on Friday afternoons. Reports from the Travelling Libraries Branch, from Public Libraries, and from teachers have given sufficient proof of the ever-increasing circulation of all children's books. Our world to-day is so full of a number of things that the younger generation is availing itself of every means possible to strengthen and enrich its store of knowledge.

The publication of the report and recommendations of a special committee of The Canada and Newfoundland Education Association, appointed to survey educational needs in the Dominion, submits a new venture in the national field. It suggests progressive plans and ideals in all phases of educational activity, but gives large emphasis to the need for equal educational opportunity. To the teacher and administrator, it may well become the book of the year as a directive in present and post-war planning.

Educational progress in time of war, even more than in days of peace, is possible only with the whole-hearted co-operation of boards of trustees, teachers and inspectors. To all of them, but to the inspectors in particular, recognition is gratefully acknowledged of services rendered beyond the call of duty, so that our boys and girls may not be deprived of their educational birthright, despite full participation in the war effort.

A number of fellow officials have contributed to this report, and sincere appreciation is here expressed for this assistance, and still further for their close co-operation throughout the year.

V. K. GREER,

Superintendent of Elementary Education.

Toronto, March 31st, 1944.

SECONDARY EDUCATION

I have the honour to submit herewith the reports of the High School Inspectors and the Director of Vocational Education for the school year 1942-43.

A. G. HOOPER,
Superintendent of Secondary Education.

July 3rd, 1944.

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

During the school year 1942-43 the 72 Collegiate Institutes, 161 High Schools, and 198 Continuation Schools in Ontario operated with 99 fewer teachers although there was an increase of 4,110 pupils over the enrolment of the previous year. It would appear that since the outbreak of the war the total enrolment reached its lowest point in 1941-42 and it is to be hoped that when the teacher supply permits, the increase in staff personnel will keep pace with the increase in attendance. Otherwise, in many of our schools, exceedingly large classes will again have an adverse effect on teaching conditions and pupil progress.

In the course of this school year 107 secondary school teachers enlisted for service in the Armed Forces bringing the total enlistments to 678. Married women, many of them the wives of service men and many of them excellent teachers, have come to the rescue. The province owes a great deal to these married women teachers. Without them some of our smaller schools would have been forced to close and many of our schools would not have been able to operate efficiently.

It would be difficult to estimate the value of the contribution to the national war effort made by our secondary school students during this fourth year of the war. The records show that 2,717 from the academic secondary schools alone enlisted in the Navy, the Army or the Air Force. The students were extremely active in the Red Cross organizations within their schools. They maintained their interest in War Savings. They rendered real assistance in salvage campaigns. They raised funds for medical supplies and other equipment. They participated in drives for money and clothes for War Relief. Senior students donated blood to the various blood banks throughout the Province. They wrote thousands of letters and sent hundreds of boxes overseas to former students of their schools who only a short time before were taking classes with them. Moreover, the Department of Agriculture estimates that approximately 30,000 secondary school students were employed on farms or in plants engaged in processing food during the 1943 season. The records show that 3,816 students obtained Middle School standing and 3,209 obtained Upper School standing under the provision of Circular 27 as a result of this employment.

Participation in these activities has cost our students much in the way of time and effort. Since many students who engage in farm employment leave school about the 1st of May and do not return until the 1st of October, it follows that in the course of four years they have sacrificed one year in actual attendance.

This is especially true in the case of students in our rural communities. Added to this, there is a feeling of unrest, of uncertainty, and of anxiety caused in many cases by the enlistment of members of the family, of relatives, or of intimate friends. The adverse effects of the war on our schools have been cumulative but the students have carried on exceedingly well. The province may well be proud of the record of its secondary school pupils.

After details had been worked out in co-operation with representatives of the three branches of the Armed Services the course in Defence Training was introduced in September, 1942, and during that summer 923 secondary school teachers attended the summer course conducted by the Department at Geneva Park. The teachers worked hard to make the course a success. However, early experience indicated that a downward revision in content was necessary. The scarcity of teachers of Physical Education added to the difficulty of rounding out suitable programmes in many of our schools and it became increasingly apparent that a permanent problem existed with regard to the teaching of this course in our small High Schools and Continuation Schools. Since this was so and particularly in view of the rapidly growing interest in Health Education it was felt that the work required more supervision than the Inspectors could possibly give and Mr. F. L. Bartlett, Director of Physical Education for the City of Toronto, was appointed part-time Director of Defence Training and Physical Education.

During the school year 1942-43 Mr. Robb was on loan to the Vocational branch of the Department and Mr. Rendall's services were loaned to National Selective Service, Department of Labour, Ottawa, from June until the end of December. Nevertheless, the Inspectors visited all of the Collegiate Institutes and High and Continuation Schools mentioned above and they also inspected the work of the Middle School classes in 91 private secondary schools. It is evident that Boards of Trustees are becoming more keenly interested in the work of the schools. They are anxious to know whether or not their schools are meeting the needs of their communities and they are particularly concerned with the possibility of introducing a more definite guidance programme which might be of assistance to the young people in planning their life work.

It is with considerable pride that the Inspectors refer to the work of the teachers. During these years of national stress they have done much more than teach school. Their willingness to work and their ability to organize have enabled them to prove their worth in their various communities. They have kept the schools running as normally as possible and despite increased strain and obvious handicaps they have continued to make an outstanding contribution.

2. VOCATIONAL SCHOOLS

Attendance

An almost continuous drop has been shown in day enrolment in vocational schools since the outbreak of war, due mainly to the exodus of senior pupils to enlist in the armed forces or to enter industrial employment. Statistics for 1942-43 show a slight increase in day school enrolment and a decrease in night school enrolment over the previous year. It is perhaps inevitable that school enrolment and attendance should suffer in wartime, when not only the armed forces but industrial plants all over the Province have been anxious to attract young people, with even the slightest training of a practical character, to assist in essential war work. The slight increase during the past year may have little significance but, on the other hand, it may be the turn in the tide. The reason for the decline in night school enrolment is not clear, but is probably caused by the increasing difficulty experienced by adults in attending classes while engaged on war work; it will be seen that the enrolment was fairly well sustained until last year. Comparative statistics are given below.

	1939-40	1940-41	1941-42	1942-43
Number of Schools—Day.....	62	62	62	62
Number of Schools—Evening.....	48	49	50	49
Number of Pupils—Day.....	36,502	30,967	28,632	29,889
Number of Pupils—Evening.....	34,983	32,135	33,388	28,391
Number of Teachers—Day.....	1,632	1,684	1,614	1,614
Number of Teachers—Evening.....	1,081	1,045	1,043	943
Government Grants*.....	\$1,185,220	\$1,362,313	\$1,341,499	\$1,308,637
Municipal Expenditure (Net)**.....	4,595,902	5,283,589	5,170,205	5,152,200

**Previous Calendar Year.

Shop Records, Organization, Unit Lessons

An attempt is being made to establish a uniform policy in the vocational schools throughout the Province with regard to shop records, the improvement of shop organization, and the general adoption of the lesson unit plan. This policy aims to encourage shop directors to take a greater interest in the supervision of shop organization and teaching methods. During the past year inspectors have given considerable attention to developing collaboration with and among heads of departments in order to ensure that the prescribed courses of study are presented to advantage. With the addition of Mr. T. O. W. Fowler and Mr. E. J. Davies to the inspectorial staff, it is hoped that still more time may be devoted in future to these important objectives, as inspectors will be able to stay sufficiently long in the schools to give worthwhile assistance to all members of the staff.

Definite advances have been made in most schools, particularly in the development of unit lesson courses for shop work. This phase of shop organization is progressing favourably and has proved a great help to pupils taking industrial courses. The unit lesson plan makes it possible for pupils to progress according to their individual ability instead of being restricted to the speed and capacity of the least efficient member of the class. Its introduction has the effect of removing irksome restrictions for pupils of outstanding merit, resulting in the acquirement of maximum skills with minimum supervision. Incidentally, the teacher is freed to devote his time as a consultant and confidant of the pupils instead of being confined to the drab process of turning each one out of the same mould.

Collaboration with Boards and Advisory Committees

Another gratifying feature of the past year has been the extent to which the inspectors have found time to confer with school boards and advisory committees. The opportunities which have been afforded by board members to meet with them and with the employer and employee representatives of local business and industry, have been greatly appreciated. Such conferences provide a splendid opportunity for the inspectors and board members to discuss freely the organization and management of the school as well as the school curriculum and the progress of the classes. It is also apparent that individual members of boards and committees appreciate these opportunities to become more familiar with the schools over which they have jurisdiction and the many problems with which principals and teachers are confronted. Regular conferences and the exchange of ideas form a far more effective method of developing a school programme than the submission of written reports which necessarily must be restricted in character and content.

Scarcity of Teachers

Owing to the necessity of employing a large number of substitute instructors to fill the positions of qualified teachers absorbed by the forces, by the war emergency programme and by war industry, the usual high standard of instruction in the day schools has been difficult to maintain. Pupils have undoubtedly suffered from the absence of experienced teachers who have gone into service, and unfortunately, because of the necessity of closing down the Ontario Training College for Technical Teachers, there has been no reservoir from which new teachers might be drawn. The College has been used for some time for training R.C.A.F. and Army personnel.

It is hoped that the drain on the teaching profession will diminish considerably during the coming year, in view of the gradual disappearance of civilian war emergency classes through the exhaustion of available sources of adult material.

War Activities

Details of the original war programme have been given in previous reports. A recent development seeks to utilize the vocational schools to some extent to provide rehabilitation training for ex-members of the forces and persons discharged from war occupations. The Dominion Vocational Training Co-ordination Act makes provision for carrying on a wide variety of such training, and includes financial assistance to the Provinces in respect of vocational schools operating under provincial jurisdiction.

The war has brought the vocational school closer to industry than ever before. Many industrialists have learned for the first time that the schools are ready to function in the training of employees in a way which they had not previously believed possible. They have discovered that competent instructors with a broad background of trade experience are available to assist them in their problems. Unfortunately for the schools some have been only too ready to induce these specialists to desert the schools and re-enter industrial employment.

That the vocational school has profited from this close association with employers and industrial workers is freely admitted. We have learned that the school needs the guidance of industry as much as industry needs the assistance of the school. Industry has shown a keen interest in courses in inspection and foremanship training inaugurated by the war emergency branch, and is displaying

an unusual willingness to co-operate with the schools in a scheme for part-time training of workers. It is apparent that technical training in industrial pursuits is becoming imperative, and that industry is beginning to recognize the importance of vocational schools as a possible means of solving their production and organization problems.

Survey of Successful Vocational Students

A survey of the achievements of Ontario vocational school graduates and ex-students conducted by the Vocational Branch is illustrative of the fine type of citizen which the system has produced. The war has claimed a majority of the more recent graduates, and these are at present serving their country in all parts of the world. Apart from war services the survey discloses that many ex-pupils have risen to considerable eminence and today are occupying positions of importance in business and industry. That their vocational training has been invaluable in attaining success in their chosen occupations is enthusiastically acknowledged. The list which follows includes craftsmen, foremen and executives. This record is ample proof that vocational training constitutes a real preparation for successful personal achievement and the development of able and worthy citizens.

Partial List of Positions Occupied

Accountants	Estimators	Private Secretaries
Architects	Foremen (all trades)	Production Engineer
Artists	Inspectors (Shop)	Professor (Maths.)
Carpenters	Machinists	Sales Managers
Cashiers	Managers (Business, Shop)	Statisticians
Contractors	Motor Mechanics	Superintendents
Draftsmen	Nurses	(Plant, Office)
(Architectural, Mechanical, Machine-Design)	Pattern Makers	Teachers
Electricians	Paymasters	Tool and Die Makers and Designers
Engineers (many fields)	Personnel Director	Turbine Operator
	Plasterers	

THE TREND OF VOCATIONAL EDUCATION

Polytechnical Schools

The demand for practical and technical training which will arise in the post-war period to cope with the rehabilitation of service personnel and workers from war industry, together with the fact that 95% of our total elementary school population does not proceed beyond the secondary school, presents a broad opportunity for service at the present time. It is felt that the establishment of Provincial Technical Schools at strategic points throughout the Province would serve the double purpose of bridging the gap between present vocational schools and the engineering faculties of universities, and of providing technical training for those not served with such facilities locally. It is suggested that because of the recognized responsibility of the Federal Government for re-establishment projects, schools of this type should be developed by the Province with Dominion financial assistance, and that after the rehabilitation period the schools could revert to the Province. They could then provide advanced vocational training for graduates of existing schools, and specialized courses in such technical subjects as tool and die-making, jig and fixture design, printing and lithography, industrial chemistry, electronics, plastics, textiles and synthetics. Such a programme would help to create a body of highly-skilled practical technicians to meet post-war competition in what will undoubtedly be a highly mechanized and industrial era.

Fort William Vocational School

Classes in Co-operation with Industry

Another desirable development now being explored is the promotion of a plan under which pupils in vocational schools would spend part time in some industry or business and part time in the school classrooms and workshops. The project envisages a class with an even number of pupils, the class being divided into two groups, each group alternating for a given period between school activities and business or industry. Education of this type has been in operation successfully in the United States for some time, and is probably the most fruitful in employment placement of any method yet devised. The Boards of Education of both Toronto and Hamilton are planning to introduce this scheme of co-operative training during the coming year, the former through the Danforth Technical School, and the latter in connection with the Hamilton Technical Institute.

The pivot of the plan is that the boys shall receive remuneration for the time spent on the job and be recognized as part of the organization. One of the main objectives is that they shall be self-supporting in order to encourage them to remain at school until the completion of their courses. It is felt that considerable motivation will result from such an arrangement and that the pupils will realize the importance of obtaining good standing in Mathematics, Science and English if they are to make progress in the trade selected. Another important factor in favour of the co-operative plan is that industry, in its competitive production methods, has much to teach the student which cannot be learned at school. This feature is of paramount importance to the success of any school, inasmuch as it conduces to bringing the vocational programme into closer relationship with the business life of the community and its varied interests and occupations. The training on the job anticipates official recognition as part of the course, and eligibility on the part of graduates to receive the Ontario Secondary School Graduation Diploma. This would place them on a parity with their fellow-students who follow the normal curriculum.

This conception of co-operative education is receiving strong support from many industrialists and business executives in Ontario who feel that a scheme of this nature is essential to the production of trained Canadian workers for post-war development. There is reason to believe that once such a scheme became operative it would develop rapidly; its many educational and economic advantages over the full-time vocational school would quickly popularize it, and its adoption would benefit both employers and employed and result in the provision of a pool of workers trained in accordance with the requirements of modern industry and commerce.

Apprenticeship

Under the Ontario Apprenticeship Act, apprenticeship is being provided in a wide variety of trades connected chiefly with the building industry. In view of the anticipated shortage of mechanics after the war, this phase of instruction is being fostered in every possible way. The Federal Government has passed an order-in-council offering financial assistance to the Provinces in the development of apprenticeship training. School boards are being encouraged to take advantage of these provisions in co-operation with the Apprenticeship Branch of the Ontario Department of Labour, which is conducting a campaign throughout the schools to interest pupils in the advantages of becoming indentured to some particular trade. Such a far-sighted plan of seeking to produce our own skilled mechanics is dependent upon the training facilities provided in vocational

schools. The trend of apprenticeship preparation leans more and more towards a balanced combination of theoretical instruction in the classrooms and shops and practical experience on the job.

F. S. RUTHERFORD,

Director of Vocational Education.

Toronto, June 15, 1944.

Change from 1942-43.....	-26	-68	-94

Since 1940 applicants with eight of the nine required Upper School papers have been admitted to Normal Schools by special wartime regulations. The numbers so admitted have been: 1940, 101; 1941, 75; 1942, 185; 1943, 166. In 1943, 71 applicants were admitted on seven Upper School papers on condition that if successful they would be granted a deferred certificate until the additional Upper School paper had been completed. The Normal School records and the reports of the Inspectors' surveys would indicate that these candidates are only slightly less efficient than regularly admitted students.

Medical Inspection of Training Schools

All applicants to Training Schools are required to submit to a medical examination before they are finally accepted. In 1937 seventeen applicants were rejected; in 1938 twenty-seven; in 1939 twenty-six; in 1940 thirteen; in 1941 seventeen; in 1942 eight; in 1943 nine. Applicants suffering from physical handicaps of a less aggravated nature are permitted to enter on signing a waiver to claims for disability pension under the Teachers' and Inspectors' Superannuation Act. In 1939-40 two signed waivers; in 1940-41 seven; in 1941-42 thirty-eight; in 1942-43 forty-six; in 1943-44 forty.

Cost of Medical Inspection

Amount paid physicians for medical examinations: 1,118 at \$4.00.....	\$4,472.00
Amount paid for consultants obtained by the Medical Board.....	245.00

Exchange

In September, 1943, Mr. F. C. Biehl, Master in the Stratford Normal School, exchanged duties for one year with Mr. G. H. Dobrindt, Inspector, Waterloo No. 1. Mr. J. E. A. Godbout, Master in the University of Ottawa Normal School, was placed in charge of R.C. Separate School Division III. Mr. W. K. F. Kendrick, who had been on exchange for two years as Inspector, Simcoe South, returned to his duties as Master in the Toronto Normal School.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the Province:

J. A. Bannister, B.A., D.Paed., Principal of the Peterborough Normal School, retired August 31st, 1943. Dr. Bannister was born in Norfolk County where he received his early academic and professional training. After teaching in this vicinity for several years he graduated from Queen's University and the Ontario Normal College. After spending three years in educational work in Chicago he became Master in the Cobourg Collegiate Institute and Principal of the Chesley High School. In 1917 he was appointed Public School Inspector for the district of Temiskaming, in 1920 English Master in the North Bay Normal School and in 1929 Principal of the Peterborough Normal School. He will long be remembered throughout the Province for his kindly interest in the welfare of teachers and for his humanitarian interpretation of the aim and purposes of education.

H. E. Ricker, M.A., B.Paed., Principal of the North Bay Normal School, retired August 31st, 1943. Mr. Ricker was born in the County of Halton and received his early academic and professional education and teaching experience in that vicinity. In 1913 he obtained his M.A. degree at Queen's University. After several years' experience in rural and continuation schools in southern Ontario he entered the secondary school field as Master in Waterdown High School and Guelph Collegiate and Principal of Wingham High School. In 1915 he was appointed to the staff of the North Bay Normal School and in 1932 became Principal of that institution. Mr. Ricker will live long in the minds of teachers throughout the Province as the man who taught them to appreciate the beauties of both nature and childhood.

On September 1st, 1943, E. H. McKone, B.A.; B.Paed., succeeded Dr. Bannister as Principal of the Peterborough Normal School. Mr. McKone had charge of the departments of Mathematics and English in the London Normal School for nineteen years, served as Principal of Kindergarten Primary Summer Courses in both London and Toronto and as Instructor in Summer Courses in Education given by the Department of Education in Nova Scotia. During the preceding year he had been on exchange acting as Public School Inspector, Huron South.

On September 1st, 1943, J. A. Partridge, M.A., B.Paed., was appointed Principal of the North Bay Normal School in succession to Mr. Ricker. Mr. Partridge was in charge of Science at the Hamilton Normal School for thirteen years. He is the author of several works on the teaching of Science which are highly regarded by Inspectors and Teachers throughout the Province. He was connected with the Summer Courses in Education since their inception and has had practical field experience as Public School Inspector, Halton County.

Mr. J. K. Evans was transferred from the Ottawa to the Hamilton Normal School as successor to Mr. Partridge. In February, 1944, Mr. F. S. Rivers, Principal of the Ottawa Normal School, was transferred to the Department as Assistant Superintendent of Elementary Education. Mr. R. A. Johnston, Master in the Toronto Normal School, was appointed Acting Principal in his place.

In September, 1943, Colonel Stanley Watson, who had been on leave of absence from the Toronto Normal School for the purpose of serving with His Majesty's Forces, returned to the Department and was appointed Acting Inspector of Simcoe South. In February, 1944, he returned to the Toronto Normal School to assume the duties of Mr. Johnston during the absence of the latter in Ottawa. In November, 1943, Miss Mabel E. Hay, Instructor in Home Economics at the Toronto Normal School, was granted sick leave of absence during the remainder of the Normal School session. Miss O. I. Johnston of the Peterborough Normal School supplied part-time each week for Miss Hay.

H. E. AMOSS,

Director of Professional Training.

Toronto, July 7th, 1944.

SCHOOLS ATTENDED BY FRENCH SPEAKING PUPILS

The French-speaking Inspectoral Staff

TRANSFERS:

The following transfers were made at midsummer 1943:

1. Mr. Adélard Gascon, M.A., B.Paed., of Ottawa, was relieved of his inspection duties and was asked to devote his whole time to the preparation of correspondence courses and the revision of text-books for French-speaking pupils.
2. Mr. Falconio Choquette, B.A., of Ottawa was transferred from R.C. Separate Division XXII to R.C. Separate Division XXI.
3. Mr. Laurier Carrière, B.A., B.Paed., was transferred from R.C. Separate Division II, P.S. Simcoe North (No. 1), and P.S. District Division VII (2), Sudbury, to R.C. Separate Division XXIV and P.S. Glengarry (No. 2), with residence at Cornwall.

The establishment of a new French-speaking inspectoral centre at Cornwall permitted a redistribution of the Eastern Ontario French-speaking inspectorates into more compact units.

4. Dr. Rémi Millette, M.A., B. Paed., Ph.D., was transferred from R.C. Separate Division III and Public School District VII (3) to R.C. Separate Division II, Public School Simcoe North (No. 1). and P.S. Division VII (2), to succeed Mr. Carrière.
5. Mr. Arthur Godbout, B.A., B.Paed., was transferred from the staff of the University of Ottawa Normal School to R.C. Separate Division III and Public School District VII (3) with residence at Sudbury.

Teachers' Training and Qualifications

In 1942-43 there were 113 teachers-in-training at the University of Ottawa Normal School, 20 of whom were enrolled in the First Class course, and 93 in the Second Class course. As a result of the term and final examinations 16 students were awarded First Class certificates, and 92 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1943, and the progress made in this regard since 1929:—

	1929	1939	1940	1941	1942	1943
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,390	1,416	1,438	1,441	1,448
Number of above teachers holding I or II Class certificates.....	273	1,271	1,311	1,307	1,274	1,272
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	91.43	92.58	90.89	88.41	87.85

The slight decrease since 1941 in the number of First and Second Class certificated teachers is due to the abnormal situation caused by the war.

Secondary School Classes

The following table shows the number of French-speaking students enrolled in December, 1943, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

SCHOOL	GRADE					
	IX	X	XI	XII	XIII	Total
Alexandria High.....	17	8	8	1	34
Cochrane High.....	6	3	1	10
Cornwall Collegiate and Vocational.....	23	27	18	2	3	73
Embrun High.....	24	17	12	12	65
Espanola Continuation.....	6	2	3	11
Hawkesbury High (for French-speaking Pupils).....	54	27	27	18	126
Hearst High.....	10	3	2	1	16
Kapuskasing High.....	20	14	8	3	45
Kirkland Lake Collegiate and Vocational.....	28	9	2	39
Mattawa High.....	8	5	6	19
Ottawa Technical.....	53	35	27	115
Paincourt Continuation.....	6	6	6	6	24
Penetanguishene High.....	27	15	9	8	59
Plantagenet High.....	23	22	14	17	11	87
Rockland High.....	18	14	11	10	53
Smooth Rock Falls Continuation.....	7	6	4	1	18
Sturgeon Falls High.....	32	35	24	8	3	102
Sudbury High and Technical.....	60	15	10	12	5	102
Tilbury High.....	6	2	3	11
Timmins High and Vocational.....	75	40	9	9	133
Vankleek Hill Collegiate.....	13	7	6	1	27
Totals.....	516	312	205	114	22	1,169

NOTE:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were just recently established in those schools.

In the following table are shown the enrolment totals of French-speaking students in the secondary schools of the provincial system for the period 1938-1943:

Year	Grade					
	IX	X	XI	XII	XIII	Total
1938.....	327	182	155	143	32	839
1939.....	392	235	203	130	67	1,027
1940.....	440	310	172	132	48	1,102
1941.....	584	336	168	119	32	1,249
1942.....	531	336	189	101	30	1,187
1943.....	516	312	205	114	22	1,169

It will be noted that good progress was made in the total enrolment until 1941. The slight decrease since 1942 is due to the war situation.

There are, besides the 1,169 students reported above, some 2,500 Ontario French-speaking students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, [Table No. 00 (A), page 00, of this report], and in private schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting the teachers' recommendations in respects to pupils who are candidates for Middle School certificates.

The following are excerpts taken from a report on the Advanced French classes of the secondary schools submitted by Mr. Henri Lemieux, B.A., B.Paed., High School Inspector:

"Satisfactory general progress may be reported in the Advanced French classes in the Secondary Schools.

In order to obtain more uniform standards of achievement in the different schools throughout the province, it has been found desirable to aim at a certain degree of uniformity in the methods of teaching used by the different teachers. Satisfactory results have already been attained in this direction and efforts will be continued.

In the teaching of French Literature a gradual shift of emphasis from the "explanatory" type of approach to the "appreciative" treatment of literary pieces is being encouraged. In French Composition a need is felt for more suitable text-books which would help to introduce in the teaching a greater degree of continuity, integration and uniformity.

A gratifying feature of the work of the Advanced French classes is the increased interest which is being developed in supplementary and general reading. As a result of a "mot d'ordre" given last year, a campaign is in progress with a twofold aim: (1) to increase the number of French books in the school libraries where needed and (2) to encourage the students to read more, to acquire a love of books and a desire for self-information. Commendable results in this line are attained at the Timmins High and Vocational School, in particular, which has over 300 French books in its library, and where the pupils also take advantage of an excellent French section of over 5,000 books in the Public Library.

During the months of May and June, return visits were paid to most of the Advanced French classes in the province. On the occasion of those second visits, and on other occasions, in several localities, public meetings were arranged with the parents and efforts were made to promote a greater desire for higher education among the French-speaking population.

The French contest which has been held in the Primary Schools since 1938 has been extended this year to the Advanced French classes of the Secondary Schools. Regional contests were held in the Spring at Hawkesbury, Ottawa, Sudbury and Timmins, and the final provincial contest was held at Ottawa during the Easter Week. The winners, one boy and one girl, were awarded scholarships at the Ottawa University and at the Rideau Street Convent, respectively.

Four teachers of the Advanced French classes resigned their positions during the year in order to enlist in the Armed Forces: Roch Cadieux, Vankleek Hill Collegiate; Marcel Bellehumeur, Mattawa High School; Sylvio Régimbal, Sturgeon Falls High School; M. Cataford, Kapuskasing High School."

Elementary Schools

Age-Grade Distribution of Pupils

The tables on pp. 31-39, present a compilation of the French-speaking School Inspectors' Annual Age-Grade Reports for May, 1943.

X.....	443	.93	587	1.19	471	1.07	398	.93
Auxiliary Classes.....	217	.46	268	.54	265	.60	171	.40
Totals.....	47,397	100.00	49,319	100.00	43,986	100.00	42,828	100.00

The decrease in the total enrolment since 1942 is due largely to the movement of a great number of French-speaking families from mining and other places to wartime industrial centres where French-speaking classes were not yet organized.

While the enrolment in each of the first six grades is now almost normal and the percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.27, in 1943, it is evident that the successful effort made in recent years by teachers and inspectors should be relentless until the enrolment in each of Grade VII and Grade VIII classes has reached at least 10 per cent of the total school enrolment.

Auxiliary.....	217	.46	268	.54	252	.50	171	.40

Provincial Contest**ELEMENTARY SCHOOL SECTION**

The finals of the sixth annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 29th, 1943. After winning preliminary tests in their own schools and inspectorates, twenty-four contestants—one boy and one girl from each of the twelve French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships, were as follows:—

1st boy: Jean-Marcel Touchette, 13, Garneau School, Ottawa;

1st girl: Marie Corbeil, 12, St. Charles School, Timmins;

2nd boy: Jean-Yves Gougeon, 12, St. Jean-Baptiste School, Ottawa;

2nd girl: Jeannine Lascelle, 13, Sacré-Cœur School, Hawkesbury.

Since 1938, when the first provincial contest was held, the scholarships awarded each year have been generously given by private educational institutions of Ontario and Quebec. So far, sixteen talented boys and girls have been thus enabled to pursue their studies beyond the elementary school level, and, from the regular reports received on their school work, give good promise of becoming leading citizens.

In view of the manifest advantages of this annual competition and the ever-increasing interest it arouses among the French-speaking population of this province, L'Association Canadienne-Française d'Éducation d'Ontario decided in 1940 to establish a scholarship fund for the benefit of the most deserving contestants. It is hoped that, with the assistance being offered by the Department of Education, gifted French-speaking students of Ontario will seize in ever greater numbers these splendid opportunities to complete their secondary and university education.

SECONDARY SCHOOL SECTION

The first province-wide contest among the Grade XII and Grade XIII French-speaking students was held during the year. It proved quite successful. Preliminary contests were held in four regional centres and were followed by the final competition in Ottawa at the same time as the elementary school contest, on April 29th. The two provincial winners, who were awarded valuable scholarships by the University of Ottawa and the Bruyère College, Ottawa, were the following:

François Morisset, 17, University of Ottawa High School;
Yvette Laviolette, 18, Rockland High School.

A Successful Experiment

As in previous years the French-speaking school inspectors submitted interesting reports on special enterprises undertaken in their respective inspectorates. The following is a résumé of the report received from Dr. Rémi Millette, of Sudbury:

The Kindergarten-Primary Class, Sault Ste. Marie

"St. Ignace school, Sault Ste. Marie, Ontario, caters to 240 pupils of French-speaking parents.

In September, 1940, a Kindergarten-Primary class with an average enrolment of 30 pupils was established in this school. Pupils 5 years of age were thus given an opportunity of acquiring, through conversation, work and play, a basic vocabulary in the French language as a preparation for more formal work in the grades.

Experience has now proven that the pupils concerned have benefited by frequent opportunities to speak French and have acquired a more extensive vocabulary adapted to their intellectual level. The authorized Pre-Primer, "Frou-Frou et Fin-Fin" has been the basis for interesting conversation lessons in the mother-tongue, which take the greatest part of the day's programme. Yet, time is allotted to number-work, to singing, rhythmic, recitation, simple exercises in physical training, games, manual work in cutting, pasting and colouring. The sandtable serves frequently for modelling and various kinds of constructive work. Pupils learn happy confidence in themselves from these rightly directed activities. Smoothly, without cleavage or shock, the young child is conditioned to a certain mode of behaviour in this special class, which mode of behaviour is continued in the grades. Thus, school is an entity with "progress from ingress to egress" along a smoothly constructed gradient.

Approach to the studies as begun in Grade I is made in the incidental informal method. Group routines of the grades are learned gradually. Pupils spend three hours per day in the classroom for a full day's programme.

It is now noted, after four years of experience with this special class, that the pupils concerned, now in the first three grades, have benefited greatly by this course. They are up to and above standard in the French subjects of Grade I to Grade III inclusive, and also in English and in the other subjects of the Programme of Studies".

It is hoped that the successful experiment reported above by Dr. Millette will set an example to be followed in many other inspectorates. School boards, in urban centres especially, would be well advised to establish kindergarten-primary classes, which eventually would mean both a saving in school costs and a betterment in educational results.

"L'Association de l'Enseignement Français de l'Ontario"

The provincial association of French-speaking teachers and inspectors held its fourth annual convention in Ottawa, on April 29th and 30th, 1943. Mr. Adélarde Gascon, M.A., B.Paed., of Ottawa, was elected president for the year 1943-44.

Outstanding among the Association's achievements of the year was the publication in December, 1943, of a school magazine entitled "L'Ecole ontarienne". This 140-page magazine, the first of its kind to be published in Ontario, contains articles in French and in English which are of interest to both the elementary and the secondary school teachers. The articles were contributed by teachers actually engaged in teaching in schools attended by French-speaking pupils. In his foreword, the President of the Association expresses the hope that "L'Ecole ontarienne" may continue to be published at least annually.

Correspondence Courses

In June, 1943, ended the first school year in which correspondence courses were given to French-speaking children of Ontario. The great usefulness of this service was evidenced by the large enrolment of beginners—152 Grade I French-speaking pupils—and by the satisfaction expressed by many parents regarding their children's progress during the year. As a mark of appreciation some parents sent in the photographs of the children enrolled in the courses. One mother wrote in June: "I am quite satisfied with the Grade I studies. — has done very well. She recognises all the words and reads fluently. She completed her French primer a month ago. I thank you." Another parent, writing at the end of the school year, said: "I am happy to tell you that — and — understand what they read and that they are now able to read the whole book. I am perfectly satisfied with the results obtained and I wish to thank you."

In September, 1943, the courses for French-speaking pupils of Grade II were ready for distribution. The total enrolment during the school year 1943-44 was as follows: Grade I, 101; Grade II, 110. It is evident from the reports received that this service is highly appreciated by the French-speaking population of Ontario.

The lessons for French-speaking pupils of Grade III and Grade IV, which have been prepared by Inspector Adélarde Gascon, M.A., B.Paed., will be available in September, 1944.

Music

Notable progress was made in this field of French education during 1943. Under the able guidance of Mr. G. Roy Fenwick, Mus. B., Provincial Supervisor of Music, Mr. Joseph Beaulieu, Mus. B., Assistant Supervisor of Music, was successful in giving much impetus to the teaching of music in the schools attended by French-speaking pupils.

Besides paying regular visits to the schools and meeting with school boards and inspectors, Mr. Beaulieu fostered the organization of pupil choirs and gave several demonstration lectures to groups of teachers and to the students of the University of Ottawa Normal School.

A series of seven song books for classes of Grade II to Grade VIII was developed during the year. These books each containing 24 selected songs in French and in English were well received by the teachers and have contributed

in a large measure to the progress of vocal music in schools attended by French-speaking pupils.

Junior Red Cross

In September, 1943, the Junior Red Cross Society of Ontario appointed a French-speaking field-secretary, Miss Juliette Fortin, R.N., of Sudbury.

As shown by the following figures, marked progress in the Junior Red Cross activities was achieved in schools attended by French-speaking pupils during the last four months of the year:

ENROLMENT

June, 1943,	323 branches with 11,100 members;
December, 1943,	604 " " 19,368 "

It is anticipated that at the end of 1944 there will be approximately 1,000 branches of the Junior Red Cross with some 30,000 French-speaking members.

Teachers and inspectors are to be highly commended for their successful effort in bringing within reach of their pupils the wonderful advantages offered by the Junior Red Cross Society.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, June 27th, 1944.

AGRICULTURAL CLASSES

Elementary Schools

Agriculture in the elementary school is an optional subject which, under present Regulations, may be taken in Grades VII and VIII. Introduction and continuance of instruction in the individual school depends upon the attitude of the trustees and the qualifications and interest of the teacher. In many schools a permanent programme has been established while in others there is lack of continuity as trustees or teachers change. There is still a tendency to assume that the subject matter of the courses which is more or less common knowledge to adults is also a part of the experience of pupils. This is not correct and rarely do pupils outside of school gain experience or knowledge of the subject matter covered in these courses.

The present programme for rural schools includes improvement of school grounds; school gardening, when conditions are suitable; consideration and discussion of many topics related to farm activities and products; the use of reference books and magazines on agricultural topics; and in some areas displays of work at the school fair or at the fall fair. When Agriculture is taught these activities become a part of the school programme in which pupils find a real interest and from which they learn important facts.

The programme in urban schools includes care of lawns, shrubs and flowers; use of vacant city lots or other areas for school gardens; classroom instruction on the nature and production of farm crops; recognition of important features of common breeds of poultry and live stock; and consideration of the movement of farm products from the producer to the consumer. In this programme, valuable experience and knowledge is gained by all pupils, which, for many would not be available if the subject were not taught in the school. Agriculture with practical applications in gardening and care of grounds is taught in the schools of Hamilton, Kitchener, Ottawa and Windsor. A good programme with less stress on outdoor activities is carried on in schools of London and Toronto.

Under present Regulations agricultural topics are included in the Natural Science and Science courses for Grades IV to VIII and a special course in Agriculture for the two senior Grades. The decrease in qualified teachers during the war period has reduced the number of schools reporting the special course in Agriculture. A revision of the courses of study to provide a compulsory minimum course in Science and Agriculture in Grades V, VI, VII and VIII and a maximum course for those wishing to qualify for special grants would be an improvement on the present programme.

Public and Separate School Inspectors are consistently encouraging instruction in Agriculture and in several areas the number of schools reporting has shown little decrease. The revised Regulations, Circular 56E, 1943, effective from September 1st, 1942, provided for increased grants to Boards and also allowed for payment of grants when the teacher held no special certificate in Agriculture but was doing good work. As a result the number of schools reporting for the school year ending June 30th, 1943, was 2,596 as compared with 2,566 in the previous year.

Secondary Schools

In the fall of 1943 Agricultural Science was taught in 26 Collegiate Institutes, 78 High Schools and 49 Continuation Schools. The subject was introduced in one Collegiate Institute. Because of changes in teachers, and scarcity of teachers with special certificates in Agriculture, the subject was discontinued in 2 Collegiate Institutes, 3 High Schools and 2 Continuation Schools. Lower and Middle School courses were taken in 109 schools. The number of teachers employed was 196 of whom 91 held the Specialist Certificate in Agriculture and 63 were graduates of the Ontario Agricultural College. Thirty-three teachers of Science were granted permission to teach Agricultural Science for 1943-44. Since 1939, 41 male teachers, 26 of whom were graduates of the Ontario Agricultural College have joined the armed forces. Enlistment, coupled with the discontinuance of summer courses, has materially reduced the number of teachers qualified to teach Agricultural Science in secondary schools. The courses in Agricultural Science have met with general approval in the schools where they have been introduced. Before 1939 the subject was being introduced in several new schools each year. Since 1939 the subject has been introduced in one or more schools each year, but has been discontinued in other schools so that the total number of schools has been reduced each year.

Agricultural Departments under the High School Regulations are maintained at Drayton, Elmira, Listowel, Port Perry, Whitby and Wheatley. Regulations concerning the organization and conduct of such departments were included in Circular Agric. 6 issued in September 1943. The Board of St. Mary's Collegiate Institute introduced Agricultural Science in Grade IX in September 1943 with the intention of introducing work under the Department scheme in September 1944. Other schools are also interested in the introduction of courses under this plan. Agricultural Departments under Vocational Regulations are maintained at Beamsville, Kemptville, Simcoe, Stamford, Renfrew and Ridgetown. The courses in Agricultural Science are taught in these schools but additional time is provided for Agriculture and greater stress is given to practical applications. In schools with Departments under High School Regulations all pupils take additional practical work in Grades IX and X and those who have not discontinued French and Latin may proceed with Middle and Upper School work without any loss of time. In schools under Vocational Regulations all pupils of Grade IX take the same course with the extra time on practical subjects. In Grade X a choice must be made. Those who take the Vocational course discontinue the study of French and Latin. The former scheme is best for schools of 200 or less enrolment, the latter can only operate effectively in larger schools.

Practical activities are stressed as far as possible in schools where Agricultural Science is taught, as well as in those with departments. All schools are well equipped for instruction in agricultural topics. School gardens are maintained at 130 schools. Fruit trees and small fruits have been planted in many gardens and on larger areas a three-year crop rotation is followed. Small poultry houses have been provided at 15 schools. Chicks are raised in the spring, fowl fattened in the fall, and laying birds kept through the winter months in most of these buildings. One or more colonies of bees are kept at 13 schools. Frequently pupils start beekeeping at home as a result of practical instruction at school. Continued attention is being given to productive home projects. Students in many schools are rearing chickens, keeping records of egg and milk production and growing farm crops, at home. Many students are members of

various Clubs conducted by Agricultural Representatives and frequently secure high standing. Two students of Pelham Continuation School, Kelvin Crossley and Barbara Armbrust, were the Championship team in the Dominion of Canada Potato Club award for 1943.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools and the normal schools.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1914.....	264	208	56
1926.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1942.....	3,472	978	(indefinite)
1943.....	3,299	871	(indefinite)

Figures prior to 1942 are based on the number of schools qualifying for grants. For 1943 the figure covers the schools where the courses were taught. Grants were claimed for 2,596 of these schools.

The following table shows the certificates held by teachers engaged in the work for the years given.

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1941.....	1,956	94	236	17	2,303
1942.....	1,603	80	159	9	1,851
1943.....	1,362	49	124	7	1,542

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 154 schools under the Regulations for Public and Separate Schools. The Lower School courses are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; St. Andrew's West Separate School; St. Rapheal's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: General Mercer, McMurrich, Perth Avenue.

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal School Entrance or Matriculation.
2. Department of Agriculture under the High School Regulations.
3. Department of Agriculture under the Vocational Regulations.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, *St. Mary's, Seaforth, Runnymede, York Memorial. Total 11.

(b) Barrie, Belleville, Brockville, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Scarborough, Smith's Falls, Stamford, Strathroy. Total 15.

High Schools

(a) Bracebridge, Cobalt, Durham, Essex, Markham, Maxville, Meaford, Merritton, Mount Forest, Niagara, Orangeville, Port Credit, Tilbury. Total 13.

(b) Alexandria, Alliston, Amherstburg, Arthur, Athens, Beamsville, Blenheim, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville, Dundas, Dunnville, Elmira, Fergus, Fort Frances, Grimsby, Hagersville, Haileybury, Harrow, Havelock, Iroquois, Kemptville, Kincardine, Kingsville, Lakefield, Leamington, Listowel, Lucan, Madoc, Markdale, Midland, Milton, Mitchell, Morewood, Nepean, Newburgh, Newcastle, New Liskeard, Norwich, Norwood, Oakville, Petrolia, Port Elgin, Port Perry, Ridgetown, Saltfleet, Shelburne, Simcoe, Smithville, Stirling, Streetsville, Sydenham, Trenton, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Williamstown, Winchester. Total 65.

Continuation Schools

(a) Ailsa Craig, Arkona, Bothwell, Chatsworth, Eganville, Elgin, Forest Hill Village, Grand Valley, Minesing, Seeley's Bay. Total 10.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton, Drumbo, Embro, Florence, Fordwich, Ilderton, Inglewood, Lynden, Lyndhurst, Merrickville, Milverton, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, Port McNicoll, Princeton, St. George, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley, Woodville. Total 39.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1941.....	27	82	59	168
1942.....	27	81	51	159
1943.....	26	78	49	153

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under the Vocational Regulations: Beamsville, Kemptville, Renfrew, Ridgetown, Stam-

*Introduced Agriculture in September, 1943.

ford and Simcoe. In all, provision is made for instruction in Shop Work and in all except Stamford for Home Economics. The regular courses in these subjects, with special emphasis on agricultural applications, are being followed. In all centres practical applications of agricultural topics are stressed, a regular programme of home project activities is conducted and the teachers visit the homes of pupils to inspect the projects undertaken.

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Some time is now being given to Science and Agriculture at the University of Ottawa Normal School. Students who have taken four years of Agriculture in an approved school during their Secondary School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

Summer Schools

As mentioned in different places in this report the discontinuance of summer schools has greatly reduced the number of teachers with special certificates in Agriculture, with a resultant reduction in the number of schools teaching the subject. Resumption of summer school activities is desirable at the earliest possible date.

NORMAN DAVIES,
Inspector of Agricultural Classes.

Toronto, July 24th, 1944.

AUXILIARY CLASSES

Teachers' War Service

Three teachers enlisted in the Army and the Air Force in 1943. Miss Ida M. Lutton, Governor Simcoe School, London joined the Royal Canadian Army Medical Corps; Miss Jane Simpson, Prince of Wales School, Barrie joined the Canadian Women's Army Corp; and Mr. Edward Monkman, Church St. School for Boys, Toronto joined the Royal Canadian Air Force.

A summary of teacher enlistment shows that approximately forty per cent. of the male assistants required to staff existing classes have enlisted.

Urban Organization

Surveys were conducted in accordance with instructions and at the request of the School Boards concerned in Cobourg, Dundas, Huntsville, Kingston, Leaside, Port Colborne and Port Hope. As a result of these surveys and those conducted in previous years new classes were opened in September 1943 as follows:—

Opportunity Classes:	Alexandria.....	1
	Dundas.....	1
	Hamilton.....	1
	North York.....	1
Handicraft Classes:	Kingston.....	1
	Kirkland Lake.....	1
	St. Catharines.....	1
	Sault Ste. Marie.....	2
	Toronto.....	3
	Toronto Separate.....	1
	Welland.....	1
Hard of Hearing Classes:	East York.....	1
Partial Classes:	Huntsville.....	2
Sanatorium Classes:	Mountain.....	1
Sight Saving Classes	East York.....	1
Speech Correction Classes:	East York.....	1
	York Twp.....	1

The following classes were closed during the year for various reasons, one of which was the shortage of specially trained teachers:—

Opportunity Classes:	Hamilton Separate.....	1
	Port Arthur.....	1
Institutional Classes:	Tarentorus.....	1
Partial Classes:	Pembroke.....	1
Handicraft Classes:	Windsor.....	1

Rural Organization

Opportunity, Sight Saving, Speech Correction, Home Instruction and Transportation Units are available, under the Regulations for Auxiliary Classes, for areas where there is not a sufficient number of pupils to warrant the establishment of a special class. These auxiliary units are set up in the small schools after a special examination has shown that academic or physical handicaps exist. Individual advisements for each such pupil are prepared in the Auxiliary Classes Branch to indicate books, materials, methods and techniques by which the pupil may be readjusted to grade work or to his individual capacities.

Courtesy Toronto Board of Education

Orthopaedic Class

The Department of Education provides reimbursement grants to boards to cover the cost of any special equipment needed in any auxiliary unit; salary grants to provide instruction for home-bound pupils; and transportation grants towards the cost of transporting crippled children who would otherwise be unable to attend school.

Auxiliary units are established usually after a survey of an inspectorate has been conducted at the request of the resident inspector. Pupils in Grades I-IV who are one and one half years retarded, pupils in Grades V-VIII who are two or more years retarded and pupils who are physically handicapped are examined if they have been reported by the teacher. Over ninety per cent. of the pupils examined are retarded in Reading and Arithmetic and show maladjustment in other ways.

The results of giving individual instruction to pupils located in small schools are reviewed annually by means of Progress Reports collected by inspectorates. The Progress Report provides a means by which the resident inspector and the auxiliary class inspectors can follow up pupils in need of remedial work. These reports over the years show that 60% of the pupils are definitely readjusted, 20% of the pupils remove to other schools and the remainder appear to make little progress.

Reports for grant purposes and to show pupil progress are most numerous in the year immediately following a survey. In each succeeding year the number is reduced by pupils adjusting to grade work, by graduation or by removal. The use of individual materials for special pupils goes on because the school authorities continue to provide these aids without making application for equipment grants.

In 1943 there were no complete surveys made, due to transportation difficulties which prevent visitation of every one-roomed school in an inspectorate. The following table shows the survey work conducted during the year by Miss DeLaporte and myself with the assistance of the inspectors concerned.

Organization

Brief courses were given in each of the Normal Schools to acquaint teachers-in-training with methods of dealing with academically and physically handi-

capped pupils, especially with those in the rural schools. The fact that over one hundred communications are received annually from recently graduated teachers describing the educational problems created by the presence of exceptional children is proof of the usefulness of these Normal School lectures.

The Special Class Section of the 1941 O. E. A. was well attended. One representative of the Ontario Auxiliary Class Teachers attended the 1943 Convention of the International Council For Exceptional Children held in Indianapolis.

The "Special Class Teacher", a magazine devoted to the interests of special education and published by the Special Class Section of the O. E. A. continues successfully to publish and distribute interesting articles and valuable suggestions contributed by auxiliary class teachers throughout the province.

The Summer Courses in Auxiliary Education were not given this year. As a substitute which would provide some help to teachers who had been granted temporary certificates valid in special classes, a Reading Course was organized. Fifty teachers were enrolled during the year.

Seven teachers' groups are organized for discussion of the problem of educating exceptional children. The teachers of Speech Correction and Lip Reading met monthly during the school year for lectures by Miss MacDonald. A group in London met weekly to attend a course in Intelligence Testing given by Miss E. McCallum B.Sc. Each of these groups meets at least twice annually and four groups hold a monthly meeting.

Employment of Graduates of Special Classes

Since the 1942 report, principals and teachers have shown increased interest in the employment or vocational destinations of the graduates of classes for the academically and physically handicapped. They have assembled complete lists showing the present employment of all boys and men who attended three separate classes. In one school of four rooms there is now a list showing the present occupations of about two hundred graduates and plans have been made for the collection of data on approximately two hundred others. Most of the senior schools annually collect information which shows the employment entered immediately after graduation.

All reports show a very high percentage of employment and a very low percentage of delinquency or mental illness among graduates. The percentage of pupils who subsequently choose factory employment is well over fifty per cent. A study of the collected data shows that pupils who have spent two or more years in a special class are adjusting themselves in industrial work.

A similar general conclusion was derived from employment statistics gathered during a depression. It was discovered at that time that so-called non-academic pupils were successful in securing jobs.

Physically Handicapped Pupils

New problems were created by the enrolment of two girls who are both deaf and blind. One of these is six years of age and the other is two years old. A teacher residing in the same village as the six-year-old undertook to carry out an instructional programme which has progressed to the stage where the pupil recognizes and executes requests spoken by the teacher into the pupil's hand. There has been a marked development in the child's awareness of vibrations

particularly through the hands and feet as her attention can be attracted by music in a radio programme and by tapping on the floor.

The education of two home-bound crippled children in the subjects of Grades 11 and 12 has been arranged by having competent teachers visit the home for periods longer than are given in the usual Home Instruction Units. This development was made necessary by the fact that there are no correspondence courses available for these particular grades. The courses which are most like those required by Ontario pupils are given by the British Columbia Department of Education.

The Muskoka Sanatorium Classes use the British Columbia Correspondence Courses for teaching French and Bookkeeping. This enables their students to carry on after discharge the courses they began while in hospital. This kind of educational therapy is approved by the medical staff and more such courses are needed.

There was a great increase in the number of applications for sight saving units during the year. One hundred and eighty new pupils were enrolled in units and one new class was formed. A special magnatyped edition of Life and Literature Book I, the reader authorized for Grade VII was prepared for the use of partially-sighted pupils enrolled in classes and units. Letters from the teachers concerned indicate that this book is a welcome addition to their class libraries.

The following pamphlets on the education of the physically handicapped were prepared in the Auxiliary Classes Branch with the voluntary help of selected teachers and have been distributed to the inspectors, principals and teachers concerned.

1. The Organization and Operation of Sight Saving Units In Ontario Schools.
2. Recognizing and Recording Common Speech Defects.
3. Data on Stuttering.
4. Supplementary Book List For Sight Saving Classes.

It is planned to supplement this series with other pamphlets dealing with habilitation of cripples, home instruction, teaching the hard-of-hearing in the small school, instruction of the paralytic and other aspects of speech training and speech correction.

A sharp increase has been noted in the demand for habilitation training of cripples who have completed their formal academic education. Seven pupils who have completed the training planned by the resident inspector in association with the Auxiliary Classes Branch have been vocationally successful. Four are completely self-supporting, two contribute materially to their own support and one is irregularly employed. Training programmes for seven pupils have been under consideration this year. This is as many as were given training in the previous four years.

C. E. STOTHERS,

Inspector of Auxiliary Classes.

Toronto 2, June 30th, 1944.

SCHOOL ATTENDANCE

Every child in the Province of Ontario has the moral right to the best education he can receive consistent with his ability and it is the moral obligation of those charged with his care to see that this is provided. For his own good, and the good of the state as a whole, compulsory school attendance is necessary. This has been in force in this province for nearly sixty years and the result is that the parents, teachers and pupils are now most co-operative in this respect. The percentage attendance for all schools for a number of years past has been over 90.

Table No. 1—Enrolment

	1940-41	1941-42	1942-43	Increase or Decrease
Public Schools.	433,597	426,183	425,335	848 decr.
Separate Schools.	100,317	99,258	102,182	2,924 incr.
High Schools and Collegiate Institutes.	67,301	63,582	67,563	3,981 incr.
Continuation Schools.	9,202	8,986	9,115	129 incr.
Vocational and Special Industrial Schools—				
Day Classes.	33,082	28,793	31,801	3,008 incr.
Night Classes.	31,848	33,388	28,641	4,747 decr.
	675,347	660,190	664,637	4,447 incr.

Again the enrolment in the Public schools has decreased, this year by 848, the effect of the decreased birth rate during the depression days and the period immediately following not having been completely eradicated. In all other types of schools except night classes in the Vocational schools, the enrolment shows a total increase of 4,447 pupils.

Table No. 2—Percentage Attendance

Class of School	1938-39	1939-40	1940-41	1941-42	1942-43
City Schools.	91.5	92.8	92.5	92.7	91.6
Town Schools.	92.2	93.3			
Village Schools.	91.0	92.7	92.5	94.7	91.4
County Rural Schools.	89.6	90.3			
District Rural Schools.	87.4	89.9	89.3	89.6	89.6
All Urban Schools.	91.6	93.0	92.5	92.8	91.5
All Suburban Schools.					87.9
All Rural Schools.	88.0	90.2	89.3	89.8	85.9
All Elementary Schools.	90.3	91.9	91.3	91.7	89.6

Although the percentage attendance is not quite as high as in the former years yet the average of over 90 is, on the whole, quite satisfactory.

Table No. 3—Public School Attendance

	1941-42		Days Lost per pupil	1942-43		Days Lost per pupil

Other Reasons.....	448,307	6.12	5.62	5.54	4.50
Total days lost.....		8,403,488	8,754,858	8,338,886	9,961,625
The above losses are classified—					
Lawful.....		6,327,689	6,529,268	6,111,368	7,442,875
Unlawful.....		2,075,799	2,225,590	2,227,518	2,518,750
Percentage Attendance.....		91.9	91.3	91.7	89.9

The above table shows the number of pupil-days lost in 1942-43 and the percentage attendance for the last four years. The total of days lost in 1942-43 was 1,622,739 more than in the previous year. Of this loss, illness accounted for 838,307 days as epidemics were prevalent in several parts of the Province. The winter was exceptionally severe and in many places roads were blocked for several days. This accounted for an increase of 277,624 lost days. Many schools were closed for this reason, the loss due to this factor amounting to 405,772 days. These three factors alone accounted for a total loss of 1,521,703 days. Due to the shortage of man power, particularly in the rural areas, the loss for Home Help increased by 50,121. An increase of 75,432 days is a natural result of the present-day conditions. The father's absence in the armed service, the mother's interests in war work, the lack of supervised play activities for the children, and the attendance at movie shows not of the best type, all have had a tendency to weaken parental discipline. The result has been an increase in losses due to Parental Neglect and Truancy.

Table No. 8—Summary of Attendance Officers' Reports

	1939	1940	1941	1942
School Children's Employment Certificates issued.....	710	1,343	1,318	1,382
Home Permits Issued.....	1,389	1,885	2,938	2,717
Employment Certificates Issued.....	2,146	4,871	9,416	12,792
Cases Brought Before Magistrates.....	528	614	709	820

In the above table many of the certificates issued were for short periods only. The School Children's Employment Certificates are good for not more than six weeks in a term, are issued only in cases of emergency and cannot be renewed during the term. Home Permits are often for short periods only, to cover emergencies in the home. In the number of Employment Certificates issued there are many duplicates as a change in employment means a new certificate. No certificates are needed during the holidays but many are issued as a convenience to the employer as the Attendance Officer is often in a better position to know a pupil's age. Many students granted Home Permits or Employment Certificates are required to attend part-time classes, and many who are given full time certificates return to school.

Table No. 9—Secondary Schools

Schools	No. of schools	No. of teachers	Enrolment		Percentage Attendance

			63,282	60,751		
	496	4,933	135,850	137,429		

*Day Classes only.

R. D. KEEFE,
Director of Attendance.

THE SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the financial year ending March 31st, 1944.

Attendance

O.S.D. residential school, Belleville:—

	Boys	Girls	Total
April, 1943.....	99	117	216
May.....	99	117	216
June.....	99	117	216
September.....	111	124	235
October.....	109	126	235
November.....	110	124	234
December.....	110	124	234
January, 1944.....	109	124	233
February.....	109	124	233
March.....	109	122	231

Average attendance for the year—228

O.S.D. day classes, Toronto, Hamilton and London:—

	Boys	Girls	Total
April, 1943.....	34	27	61
May.....	34	27	61
June.....	34	27	61
September.....	33	27	60
October.....	33	27	60
November.....	33	27	60
December.....	33	27	60
January, 1944.....	33	27	60
February.....	33	26	59
March.....	33	26	59

Average attendance for the year—60

Average attendance for the whole school for the year—288

Twenty-five pupils left the Belleville residential school during the year. Of these nine entered other schools and thirteen are working.

A total of 43 new pupils were admitted to the Belleville residential school. Of these 14 had attended other schools and 6 returned to their homes on account of ill-health, or immaturity, or to attend other schools. The ages at the time of admission of the 23 pupils now attending school for the first time were:

4 years—	2 pupils
5 " —	10 "
6 " —	5 "
7 " —	4 "
8 " —	1 pupil
9 " —	1 "

Eight pupils left school from the O.S.D. day classes in Toronto, Hamilton and London and five new pupils were admitted.

The War Years

The school vacated the Ontario School for the Deaf buildings during the summer of 1941 and moved to temporary quarters in Belleville. Members of the teaching staff and other employees are to be commended for the services they have rendered during these war years. Parents and children, also, have co-operated to the fullest extent.

It is a great satisfaction to know that the education of deaf children in this province has not been seriously interrupted by the war and that the pupils can look forward to continuing their education in their own buildings at the Ontario School for the Deaf next year.

Respectfully submitted,

W. J. MORRISON,

Superintendent.

Belleville, May 19th, 1944.

Dental Report for the School Year 1943-44

Boys: Fillings—(a) Amalgam, 62; (b) Porcelain, 14.

Prophylaxis, 44.

Extractions—(a) Permanent, 9; (b) Deciduous, 45.

Girls: Fillings—(a) Amalgam, 65; (b) Porcelain, 17.

Prophylaxis, 41.

Extractions—(a) Permanent, 7; (b) Deciduous, 41.

G. E. CALDWELL,

Dentist.

Medical Report for the School Year 1943-44

From April 1, 1943, to March 31, 1944, there were 286 admissions to the School Hospital, including one case of acute uraemia, one of chronic kidney trouble and one of pneumonia. Epidemics of measles, chickenpox and influenza occurred, each patient requiring a longer period of hospitalization than usual.

All children who had not received immunization for scarlet fever, diphtheria and smallpox were immunized.

All children requiring attention for eyes and ears were given treatment by Dr. Chant.

It is hoped that in the future parents will not send children to the school from homes in which there has recently been any contagious or infectious disease.

R. W. TENNENT,

Physician.

		Total.....	33

Of the above list of 33 pupils, 24 are gainfully employed; one eighteen-year-old boy is in a mental hospital; one eight-year-old boy was excluded because he was not sufficiently matured to begin school; one seven-year-old lad, through an operation, regained sufficient sight to carry on in a school for the seeing, and another seven-year-old lad had sufficient sight to return to a school for the seeing. (He should never have come to us). An eight-year-old boy was taken home by his mother because she was lonesome for him.

There remain four from whom we have had no definite report. I have reason to believe that 3 of these are working. The fourth boy of this group is a low grade mental, has the further handicap of a troublesome heart condition, and might be classed as unemployable.

The Canadian National Institute for the Blind, through their Field Officers, have placed these graduates, for the most part, in industry. Over the past two years, 14 of them have served in Brantford factories. I herewith submit extracts from letters of report on five of these cases:

A and B "The last two named boys are working at present in our wings department of the aircraft division doing a very fine job of filing, dressing and in forming of both Anson and Mosquito Bomber parts. These two boys are doing a very fine job for us, and are very co-operative in every way."

C "This boy has worked for us for two years now, and we have always found him to be a diligent and conscientious employee. He performs much useful work about the factory, and there is very little limitation in the use of his services due to his handicap."

D "————— has now been working with us for almost a year. I have pleasure in advising you that we are perfectly satisfied with the manner in which this young man is performing his work. He has been assembling nuts and bolts in aircraft fuel tank stiffening rings, filing and reburrring aluminum plates, operating a sanding machine, and also a drilling machine. I have no doubt that we will be able to find a place for this young man when we again return to peace time operations."

E "Miss B . . . has been making a bonus on wrapping from the term of her training period. She has found herself a steady job on our packing conveyor."

New Pupils

Age	No. Pupils	Age	No. Pupils
7.....	3	14.....	1
8.....	5	15.....	1
9.....	2	16.....	2
10.....	2	17.....	3
11.....	1	18.....	2
13.....	4	21.....	1
		Total.....	27

Of the 27 new students listed above, those in the age groups of 13 to 21 are largely made up of partially sighted pupils who have been able to complete their work in elementary school by means of special help and sight saving devices. With their limited vision, they could not do High School work in a seeing school, and so they came to us.

Mental Ratings of New Students

Intelligence Quotient	No. Pupils	Intelligence Quotient	No. Pupils

80 to 90.....	4	130 to 140.....	1
90 to 110.....	5	Untested.....	10
		Total.....	27

Of the ten untested in this group, five of them withdrew for various reasons before the tests were made. Two were French students who would have had

language difficulty with the tests, and so their tests have been postponed. The remaining three were rather low-grade for a satisfactory test, and their tests have been postponed for a year.

The over-age students in Grade I are low mentals, who entered school late. The 13-year-old has already repeated the grade, and the 12-year-old will repeat next year. The twelve-year-old in Grade II was promoted in mid-year, after this report was drawn up. The 14-year-old in Grade III is withdrawing this year, having reached his academic peak. In Grade IV, the 19-year-old is an Indian lad who came to us from Montreal, and has been excluded this year having reached his academic peak. One 16-year-old entered for the first time this year, after having been out of primary school for several years, due to his eye condition. The other two 16-year-olds are low-grade mentals. In Grade V, the 21-year-old is a boy of very low I.Q., but he has made real progress over the past four years, and his reading is quite up to his grade. The 17-year-olds are a French lad and an Indian lad, who entered school in their teen-age years, and are making progress. Eleven of Grade VI pupils are of the auxiliary type. One 17-year-old lad began school 2 years ago, and in that time, has covered six grades. A 16-year-old French girl came to us from Montreal a year ago. She is of good average intelligence, and has taken her place well, even in her English class, at the end of the school year. The 17- and 18-year-old students in grade VII are of low-grade mentality.

We shall make an effort this year to give the approximately 20 pupils of low-grade mentality special hand work. I suggest that it would be better to remove these students from the regular classes and form an auxiliary class for them.

School and Student Honours

Our Madrigal Choir again took first honours at the Stratford Musical Festival, winning the Stratford Beacon-Herald Trophy. Our male chorus again tied for first place with the Listowel High School Chorus, for the possession of the Pounder Trophy.

The Ethel Charlton Memorial Scholarship for general proficiency was won this year by Leonard Morin of Earlton, Ont., and Oscar Amyotte of Bonfield, Ont., and the character cup was won by Gloria Mortimer of Toronto. This young lady also won the Girls' Public Speaking prize, the boy winner being Oscar Amyotte. Our Athletic cup winners were as follows: Senior, Germaine Normandin and Peter Lipnicki; Intermediate, Ruth Beal, and Kenneth Gill; Junior, Rita Rathwell and Tedouce Lipnicki.

Staff Changes

Miss Anna Cook was appointed School Nurse, to replace Miss Mildred Howell, who left to get married during the last school year. Miss Marie Butler, Literary teacher, was appointed to replace Miss Isobel Draper, who left last year to get married. Both Miss Cook and Miss Butler give promise of being valuable staff members.

The School at War

Our pupils, large and small, have endeavoured throughout the year to be constantly doing something to help our national war effort.

We have made and sent off 222 articles to members of the armed services and also to civilian war victims in Britain. These articles range from wash cloths and handkerchiefs to panties, dresses, quilts and afghans. Cigarettes and chocolate bars were also sent overseas. The major part of this work has been done in our sewing and knitting departments. The Junior Red Cross members have contributed the small articles.

We have raised in cash \$113.36. Of this amount, \$57.25 was sent to China through Dr. Robert McClure. Dr. McClure visited us in the mid-war period and told us a thrilling story of China's stupendous efforts. Since his visit, our people have enthusiastically supported his work in aid of the Chinese soldiers and civilians.

Thirty-four members of our student and teacher group have made 94 donations of blood to the Red Cross.

Mr. Joseph Hyde, a member of our academic staff is serving overseas in a theatre of war.

Library Report

During the school year, 160 volumes of Braille reading were added to our library. These consisted mostly of fiction, some for seniors and some for junior readers. The number of readers showed an increase over the previous year. As most of our Braille books come from the National Institute for the Blind in London, England, we have been unable to obtain some on order, owing to the fact that they are out of print for the duration of the war.

W. H. LITTLE,

Librarian.

Report of the Ophthalmologist

Condition of Sight, New Pupils	Male	Female	Total
1. Limited vision in both eyes.....	6	7	13
2. Limited vision in one eye.....	4	4
3. Quantitative light perception in both eyes.....	1	3	4
4. Quantitative light perception in one eye.....
5. Without light perception in either eye.....	1	1
Total	11	11	22

In considering the degree of sight as revealed by our examination of this year's class, we find that it compares favourably with that noted in former years. The majority of the pupils fall into the group that has some vision, either little or considerable sight in each eye. Four others have reasonably good vision in one eye. These two groups make a total of 17 out of 22 that have sufficient sight to be of some use to them in everyday living. Of the remaining five, four have light perception only, while one represents the unfortunate group that is sightless in both eyes.

Diseases Causing Blindness	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	1	1	2
2. Congenital Diseases of the Lens.....	5	3	8
3. Myopia.....	2	2
4. Optic Strophy.....	1	4	5
5. Fundus Lesions, Diseases of Retina and Choroid.....	2	3	5
Totals.....	11	11	22

In connection with this table, we find a marked similarity to the diseases found responsible in former years. The types and numbers are so similar that we feel no special reference is necessary.

Following an examination of the 1943-44 pupils, we made a complete ocular survey of all the other pupils in the school. Suggestion and advice was given as to the use and care of the eyes, and in a number of cases it was found necessary to make a change in the glass correction worn.

It was very encouraging to note in a great many of the pupils that there was a definite improvement in their vision; also, there was a corresponding decrease in the number of minor ocular affections usually found throughout the school year.

All of which is respectfully submitted,

NORMAN W. BRAGG, M.D., F.A.C.S.

(Note: In the above report, five students entered as new pupils, had withdrawn before Dr. Bragg's examinations were made.)

Dental Report

I have pleasure in submitting my report for the term 1943-44.

	Boys	Girls
Fillings inserted.....	121	91
Pupils having no fillings.....	27	24
Pupils having one filling.....	17	16
Extraction of permanent teeth.....	12	10
Extraction of deciduous teeth.....	22	26

At the close of the term it is a pleasure to know that the above work was accomplished with so little trouble. One thing was quite noticeable, the new pupils required much less attention than usual.

Respectfully submitted,

J. R. WILL,

Dentist.

PUBLIC LIBRARIES

I have the honour to submit the following report of the Public Libraries Branch for the year 1943, with statistics of the public libraries of the province for the year 1942, and a statement of the Legislative Grants paid in 1943.

Public Libraries of the Province

At the end of the year 1943 there were on our official list 232 free libraries, 255 association public libraries, 9 county library associations, and 1 township library association. No association libraries were removed from the list in 1943, but four were added. There are a few association libraries that have not reported for two years. These have been written to, and as far as possible, visited, and final action is pending.

The sum of \$44,192.69 was paid in Legislative Grants to the free, association, and county library associations of Ontario in 1943. The population served by the free public libraries was 2,160,278, and by the association public libraries 199,335. The total number of volumes in the free libraries was 2,787,372 and in the association libraries 667,027. The circulation of these throughout the Province was 13,388,953.

The Ontario Library Review

Judging by the widespread and steadily increasing subscription list and the letters of commendation received, this publication, which is edited by the Public Libraries Branch, is finding favour throughout the library world. Several of the well-known American journals and library periodicals have quoted and reprinted editorials and articles from it. Some of the articles have been made required reading in the Ontario Library School course.

County Library Associations

A library association for Bruce County was added to the list in 1943, making the ninth of these associations in the Province. After organization, the Bruce county council gave a grant of six hundred dollars, to which was added a legislative grant of the same amount, and an additional grant of seventy dollars to cover initial expenses. With these two amounts and payments by the member libraries, the association will have about fifteen hundred dollars for the purchase of new books, and these will be the means of helping many of the small libraries in this county.

In further reference to the county library problem, may I suggest for consideration the following post-war programme for the extension of library work throughout the Province? The cost of this programme would be from \$25,000 to \$30,000 annually, but this expenditure would be well worth while in raising the standard of library work, and in extending its facilities to the rural portions of the Province. My suggestion is that a county librarian be appointed for each of the counties where there are a given number of libraries, and that one be appointed for two or more counties where the number of libraries is smaller. The duty of the librarian would be to visit each library in the county or counties at least three times in each year, spending possibly a day or more in each community, giving instruction in library work, and helping to raise, as far as possible, the standard of each library. The librarian could also arrange the circulation of books through distributing stations and other means from each library so that communities and schools in remote or isolated rural areas might also have library privileges. Such a county librarian would be directly responsible to the Minister

or his Inspector for instruction and guidance. County councils would be requested to pay a proportion of the maintenance cost of the county librarian in addition to any grant given where a county library association is in operation. For districts, it might be necessary for the Province to assume the whole cost of a district or regional librarian, but the need for library service in these districts is very great. This roughly outlined scheme might well be given careful consideration. It would be a distinct forward movement in provincial library work.

Certified Librarians

For some years a special grant of fifty dollars has been paid to libraries and branch libraries in municipalities of less than 100,000 population, where a librarian or assistant was employed holding a certificate of qualification from the Ontario Library School, or its equivalent as recognized by the Minister. In 1943, the sum of \$2,600 was included in the legislative grants paid to fifty-two libraries qualifying under this ruling.

Ontario has about one hundred and sixty libraries in places with a population of five hundred or less and in these the librarian either serves voluntarily or for very small salary and there are frequent changes. In these cases care is needed to determine whether the qualifications of the librarian should be officially recognized.

New Libraries Added In 1943

Five association public libraries were added to the list in 1943:—Casselman, Leaside, Long Branch, Smooth Rock Falls, and Wawa.

The Leaside library is perhaps the most outstanding. Before the library was opened, a grant of fifteen hundred dollars was given by the town council, the Leaside Rotary Club donated eight hundred dollars with the proviso that the money be spent exclusively on books for children, and one hundred and seventy-five memberships were secured at one dollar each. On December 6, 1943, a by-law, under the Public Libraries Act, Part 1, was submitted by the council to the electors, and carried by a vote of 2,253 to 159. This is a remarkable record of library progress. The members of the library board, and the town of Leaside are to be congratulated.

Library Inspection

Under the restrictions governing tires, gasoline, and railway travel and because of the extra duties of the office, only those libraries were visited during the year for which an inspection was absolutely necessary. This meant an increase in correspondence, but it has worked out satisfactorily as the library boards and members co-operated, and no library has been seriously neglected.

Travelling Libraries

This section of the branch is increasing its usefulness each year. During 1943 the travelling library service was extended to all continuation schools in the province, and well over two thousand cases of books were applied for and delivered. The only cost to the schools was the freight charge one way. The books sent out were modern and up-to-date, of recreational as well as curricular value, and have been appreciated by the teachers. The rural and sparsely settled sections of the province are also being taken care of as far as possible by this section of the Public Libraries Branch.

Tables giving statistics for the year 1942, and the legislative grants paid thereon in 1943, are appended.

S. B. HERBERT,

Acting Inspector of Public Libraries.

PUBLIC RECORDS AND ARCHIVES

The war has, of course, reduced the number of graduate students wishing to use the material in the Archives but many other researchers have called on the Department for information. This has been given personally, by telephone, and also by mail to all parts of Canada as well as to many States of the Union.

Historical Exhibit

Our historical exhibit, prepared as an aid in teaching Canadian History and sent free of expense to any school, has been kept active throughout the school year. The following comments from various teachers show that this service is greatly appreciated:

From London South Collegiate Institute.

Students and teachers alike found the exhibit of value as well as of interest: in fact, when the package was sent up to me at 4.15 p.m. in the detention room, keeper and inmates alike forgot for the rest of the period the purpose for which they were there. The teachers of Canadian history found the papers of value in bringing to their students the realization that names of people in the text books were names of real people, not merely words in the text.

You ask for suggestions for the furthering of this department of your work—or, at least, you say that comments will be welcome. I realize that many of your papers cannot safely be sent out indiscriminately but it is possible that among those of less importance you might find others to make up a second collection which I am sure would be welcomed by all who have had the first. Could you provide a set of pictures of others of greater value, or of persons or places of historical interest?

From Beamsville High and Vocational School.

Our Canadian history teacher was very much pleased with the exhibit and found it quite useful. I think such concrete material makes history more real—the newspapers and deed we thought particularly interesting.

From Elora High School.

We wish to thank you for the loan of the travelling historical exhibit which Elora High School was privileged to have this week.

While on display at the school, it proved of interest to the students, not merely from the point of view of idle curiosity but also for its value as research material. It so happened that in our Upper School class we were this week studying the social reforms of the 1830's in England. The copy of the Colonial Advocate included in the exhibit contained proceedings of the Reformed Parliament which most pertinently recorded notices of motion to introduce legislation for the abolition of slavery and for the regulation of employment in factories.

It was our good fortune to be able to make the Archives Exhibit a part of our display for our "Open House" in Education Week. The parents and ratepayers who saw the display were quite interested. One item which caused comment was the notice of a marriage in the neighbouring township of Eramosa. One lady observed that the *Buell* mentioned in the P.S. of W. L. Mackenzie's letter from exile was an ancestor of her mother. A retired weekly newspaper editor who lives in this village was especially interested in the old newspapers, and next day brought to the school an 1852 copy of "The Elora Backwoodsman" and a photostatic copy of the London Times (Eng.) of 1815 which contains an account of the Battle of Waterloo.

We feel that the exhibit has been a real value in creating and sustaining interest in our own early history and further in arousing the interest of students in historical research. We hope that we may be able to have another such exhibit visit our school next year.

From Waterdown High School.

On behalf of Waterdown High School, I wish to thank you for the fine historical exhibit. Our pupils found it very interesting and I trust instructive.

From Westport R.C. Continuation School.

The exhibit was of great interest to both teachers and pupils—the latter took pleasure in reading the *Colonial Advocate* which they found differed greatly from the newspapers of to-day.

The documents relating to the Rebellion of 1837-38 were of particular interest to the pupils of grades IX and X who are reading *The Forging of the Pikes* as part of their English course.

From Teeswater Continuation School.

The students of the Continuation School, particularly those studying Canadian and Modern history, found the exhibit of considerable interest. The principal of the Public School had the exhibit for a day, too, for his entrance class. It has helped make the nineteenth century story of Canada more real to us. Thank you for the service your department has rendered.

From Alexandria High School.

I should like to thank you most heartily for lending our High School your very interesting collection of documents. The copy of the *Colonial Advocate* was the most popular article in the collection. Our pupils would appreciate seeing other source materials related to Glengarry County but we can readily appreciate the difficulty of packing and of transportation.

From Owen Sound Collegiate Institute.

It awakened considerable interest around the school and we hope that this service may be extended into other fields of our history.

From Mimico High School.

I was amazed at the interest displayed by the students. I had intended the exhibit for my Canadian History students in the Grades X, but the other Grades were so interested I tried to arrange so that as many as possible could see them.

Now that I know the nature of the display, I could make better arrangements for the student inspection next term, if we are fortunate enough to have the display again.

Acquisitions

Two collections of manuscripts have been acquired during the past year, the Papers and Letters of the Hon. Alexander Morris, which are in the process of being calendared, and a larger group consisting of the correspondence of Sir Alexander Campbell, covering the years 1870-1890. These promise to be of great value when made available to the public.

We are indebted to Miss C. Jean Walker for a volume of the *Grand River Sachem*, 1866-68; to Mr. S. D. Holmes for a copy of *The Traveller*, or, *Prince Edward Gazette*, August 19, 1836, and one of the *Prince Edward Gazette and Bay of Quinte Advertiser*, January 16, 1846; and to Miss Mary Macdougall for a copy of *Picturesque Canada*; all welcome additions to our collections.

H. McCLUNG,
Provincial Archivist.

July 14, 1944.

MUSIC

The following statistics show for a period of years the percentage of classrooms in the Elementary schools of Ontario providing a regular course in music, under the supervision of qualified music teachers. The figures of the first column are based upon reports from schools applying for the special music grants on June 30th, 1943.

	1943	1942	1941	1940	1939	1938	1937	1936
Cities.....	98.3	98.3	98.7	100.0	100.0	97.7	95.0	95.0
Counties.....	69.8	72.6	78.0	77.4	73.0	64.7	51.5	40.0
Districts.....	47.5	51.2	52.7	52.0	45.0	41.7	28.6	21.0
Separate (English).....	35.0	39.0	35.0	27.7	26.3	21.0	30.0	24.0
Total.....	69.0	71.3	71.8	71.0	68.0	62.2	55.5	48.2

NOTE: The remainder of the Elementary schools offer some music instruction under the direction of the regular teachers.

The number of Secondary schools offering a course in music is as follows:—

	1943	1942	1941	1940	1939	1938
Collegiate Institutes.....	64	66	67	57	52	17
High Schools.....	113	115	120	112	94	51
Continuation Schools.....	115	126	134	123	115	53
Total.....	292	307	321	292	261	121
Percentages.....	68	71	74	68	60	28

NOTE: Several Vocational schools also offer a music course. No special music grant is provided for this type of school.

The slight loss shown above is caused by the shortage of teachers and the difficulties of transportation, both due to war conditions. Interest in music on the part of parents, pupils and teachers is increasing, and credit is due to all for the resource and enthusiasm shown by the schools in attempting to provide an adequate course in music under very difficult circumstances.

Temporary Permits

Fifty-five Elementary and 26 Secondary school teachers are teaching or supervising music by reason of special temporary permits issued by the Department. Many more hold a lower certificate than is required by the regulations. This situation will tend to become worse, and no remedy is possible until the Departmental Summer Courses are re-established.

French-Speaking Schools

Previous to 1943 the French-speaking schools received no special supervision in music. On January 1st, 1943, Mr. Joseph Beaulieu, Mus. B., was appointed Assistant Provincial Supervisor of Music for these schools. During the year Mr. Beaulieu has devoted his time to the following activities—visiting rural, urban and normal schools; meeting inspectors, teachers and school boards; lecturing and demonstrating with children; organizing boys' choirs; giving

concerts with specially trained boys; compiling books containing French and English songs suitable to the various grades. The French-speaking children generally possess superior musical talent, and are responding with enthusiasm. Satisfactory progress has been made and the outlook for music in the French-speaking schools is most encouraging.

Music In The War Effort

The children have been encouraged to find in music an expression of their loyalty and devotion to Canada and the Empire. Not only in connection with Empire Day observance, but throughout the year, special emphasis has been placed on the singing of patriotic and Empire songs. Music has also been actively employed in the pupils' efforts in behalf of the Victory Loan Campaigns.

Normal Schools

Continued improvement is noted in the ability and the attitude towards music of students in the Normal schools and the Ontario College of Education. As music gradually develops in the Elementary and Secondary schools, students enter the teacher-training institutes with a better understanding of the subject and, as a result, more attention can be given to methodology and the specific problems which they will meet in the schools of the Province.

Matriculation Music

Music has been added to the list of optional subjects in Grade XIII. This consists of either a school course or extramural music represented by certificates from certain accredited music schools and conservatories. Since Secondary school music has been for the most part confined to Grades IX and X it will be some time before any considerable number of pupils will be prepared to choose this option, but three schools have signified their intention to present candidates for Grade XIII school music in June, 1944.

Music Festivals

A large number of music festivals were held in 1943. Transportation problems caused the temporary dropping of some rural festivals where children had to be brought to a central hall from long distances, but most festivals were continued on a reduced scale, and several new ones introduced to serve smaller areas.

Sound Films

Eight music sound films were added to the Department Library which now contains seventeen subjects dealing with music. Music lends itself to presentation by visual as well as aural means and the music films are among the most useful in the library. The aggregate number of screenings for the seventeen films during 1943 was 514, seen by 7,805 adults and 74,622 children.

Radio

During January, February and March many schools listened to a series of ten weekly broadcasts "Music for Young Folk" sponsored by the Canadian Broadcasting Corporation. These programmes were carried on a network of five stations between Toronto and Windsor, and featured the Toronto Symphony Orchestra and smaller instrumental groups. Many valuable comments and

suggestions were received from the participating schools, and embodied in plans for a similar series in 1944 to be sponsored by the Department of Education.

Publications

The following literature was prepared by the office of the Provincial Supervisor of Music—

High Road Music Series, Teacher's Manual
 High Road to Sight Singing, Books 1 and 2
 High Road Music Assignment Book
 High Road Staff Paper
 Empire Day Booklet
 Course of Study, Grades IX and XIII
 Suggestions for Teachers, Grade IX
 Seven Song Books for French-Speaking Schools
 A patriotic song "Between Midnight and Morning".

Toronto, February 10th, 1944.

TRADE-SCHOOLS

I beg leave to present the report of the operations of the Trade-Schools Regulation Act for the year 1943.

This Act has been in force since 1938 and has proved its protective value to the citizens of the Province of Ontario as desired by the Legislature when it was enacted. Not only has it saved our citizens many thousands of dollars by furnishing guidance and protection in intended investments for courses of study which might have brought nothing more than discouragement and disappointment; it has put an end to the fantastic stories of high-pressure salesmen regarding the Utopia which awaited all who followed the course which they offered and had made the necessary and binding financial contract. Instead of this type of salesmanship the Act has encouraged the development of a fine ethical type of school which offers a desirable and worthwhile course fitting into the needs of the business and industrial life of the community and at a cost which is fair to all concerned. The Act has encouraged and promoted the best efforts of these reputable schools, which are furnishing a distinct contribution to the educational status of the Province. These reputable schools, which have been granted registration under the Act, are unanimous in their praises of the protection offered, since it freed them from the unpleasant reputation which a few individuals had brought on the whole group of private schools. These registered schools are rendering a very useful service. Such schools value highly the recognition given to them by the Department of Education and are most anxious to co-operate in every way. Courses are being improved and revised and cordial relations are being maintained between the school management and the students. Student complaints are now very rare and are readily adjusted.

The continuance of the war has affected the enrolment in most Trade-Schools. The call for an all-out effort to successfully end this world-wide conflict permits little time for serious application to educational courses. However, there is evidence that many, now engaged in war-work, are thinking seriously as to what steps they should take to ensure post-war employment and economic safety when the present opportunities in war industry have ended. Such a trend is shown by the ever-increasing correspondence received from men and women seeking information regarding the reliability and dependability of various trade-schools and the prospects in the employment field after the completion of such courses of study as are offered by these schools.

It is still necessary to be alert in seeing that organizations, which have little or nothing of value to offer to the public, are not permitted to enter the field controlled by the Trade-Schools Regulation Act. Such organizations frequently make glowing representations regarding their work and its value but all must be subjected to the closest scrutiny. Advertising appearing in the local press and other periodicals is subject to analysis and approval before being published. The Press is rendering every co-operation possible, the value of which we fully appreciate.

From information supplied by reputable business schools, and other sources, it would appear that early steps should be taken to include all privately-operated Business Schools and Colleges under the supervision of the Act. Such business schools were not included at the time of the passing of the Act but it now appears that some Departmental supervision is necessary in order to protect the reliable school from adverse criticism as a result of the entrance of fly-by-night organizations into this field. It is also desirable to have greater uniformity in the courses offered by these schools so that students who graduate may be able to present more nearly standard qualifications.

These schools should also be required to furnish such accommodations as will guarantee a full measure of safety, fire protection and decent sanitary conditions for the students attending. No school should be allowed to operate where such hazards exist. We must admit that serious conditions in these respects do exist in many unsupervised schools.

It is not often that court action has to be taken in connection with the administration of the Trade-School Regulation Act but, where such action has been necessary, the Act has proved to have considerable restraining power. Heavy fines and imprisonment have been levied for serious violations of the Act.

The greatest value which has come from the administration of this Act is the almost universal desire of the management of registered schools to operate in conformity with the requirements of the Act and to even go beyond the letter of the law to render improved services to the student. This cements a closer bond of friendship and greater loyalty of the student to his Alma Mater.

There is no doubt but that these registered schools are rendering a most valuable service to the citizens of this Province. This Department appreciates this very evident co-operation and the existing cordial relations which have been established. Much excellent work is being done. Under such conditions there should be no fear or misgivings on the part of either the management of the schools or with those whom they endeavor to serve. The Trade-Schools Regulation Act controls, but with very little friction and with an abundance of good will being developed amongst all concerned.

W. S. KIRKLAND,
Registrar of Trade-Schools

Toronto, March 15, 1944.

PART II

GENERAL STATISTICS

of

THE PROVINCIAL
SCHOOL SYSTEM

A. M. CAMPBELL,
Statistician.

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 80% of these pupils live in Northern Ontario, and half of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—Is a subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are 7 of these cars at present, each with a definite route of about 175 miles, which is covered in a month or six weeks. Each stop is from 4 to 6 days. Problems are solved, work is outlined and assigned. Parents come to night classes, where English, spelling, writing and arithmetic are taught them, and where daily problems of life are discussed. Ninety per cent of the pupils are non-English speaking. The Department supplies all school needs free. The enrolment is about 275.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—Is the area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

SCHOOL YEAR AND HOLIDAYS

1943 - 1944

PROVISIONS OF THE SCHOOL ACTS

The school year shall consist of two terms, the first of which shall begin on the first Tuesday of September following Labour Day and shall end on the 22nd day of December, and the second of which shall begin on the 3rd day of January and end on the 29th day of June.

When the 3rd day of January is a Friday, the schools shall not be opened until the following Monday, and when the 29th day of June or the 22nd day of December is a Monday, the schools shall be closed on the preceding Friday.

Every Saturday, every public holiday, the week following Easter Day, and every day proclaimed a holiday by the authorities of the municipality in which the teacher is engaged and every day upon which a school closed under the provisions of The Public Health Act, or the regulations of the Department of Education shall be a school holiday.

HOLIDAYS

The following are the holidays in the schools during the school year 1943-44:

- (1) Thanksgiving Day.
- (2) December 23rd to 31st—part of Christmas vacation.
- (3) The first two days in January—part of Christmas vacation.
- (4) Easter Holidays—April 7th to April 16th, both days included.
- (5) Summer vacation—June 30th to September 4th, both days included.

The Minister suggests that Remembrance Day, Victoria Day and the King's Birthday, although not now statutory holidays, be appropriately observed by suitable exercises in the schools.

DATES OF OPENING AND CLOSING OF SCHOOLS

The following are the dates of the opening and closing of Secondary and Elementary Schools:

Open.....	September 7th	Close.....	December 22nd
Reopen.....	January 3rd	Close.....	April 6th
Reopen.....	April 17th	Close.....	June 29th

NUMBER OF TEACHING DAYS

In the Secondary and Elementary Schools, the number of teaching days is as follows:

September.....	18	January.....	21
October.....	20	February.....	21
November.....	22	March.....	23
December.....	16	April.....	14
	—	May.....	23
	76	June.....	21
			123
		Total.....	199

The date for Thanksgiving Day has not been announced. In the above computation it has been assumed that it will be celebrated in October. Should this not be the case, the teacher will make the necessary adjustments.

The total number of teaching days for the academic year will be 199 and the teaching days for the calendar year 1943, 197.

¹Department of Agriculture in 1942-43 spent \$784,700 on Education, of which \$637,666 went to the Ontario Agricultural College, Guelph. War Emergency Classes cost the Province \$678,345. An additional \$49,468 was spent on Education by other Departments.

²Gross Municipal Expenditure less Provincial Grants.

³Five Month Period.

⁴The original estimate for 1940 was 3,775,000 but as this was larger than the actual Census figure, 1941, the 1939 estimate was used.

⁵Includes Capital Outlays paid out of Current Revenue. In previous years no Capital Outlays are included.

⁶1941 Census—3,787,655 (final)

*Special teachers are listed only where teacher devotes whole time to that subject.

Music Teachers—Includes full-time teachers of music only. In addition there are many regular classroom teachers who also teach music and 300 add itinerant music teachers serving rural areas and smaller urban centres.

	5,545	582	1,737	1,036	4,702	13,602			

The upward trend in teachers' salaries is most evident in the group \$1,051 to \$1,550 which has increased from 25.2% to 40.8% of all teachers. The ordinary rural school again shows the most marked increase. The most common salary here was \$700 in 1940-41. In the next three years it rose \$100 a year, becoming \$1000 in 1943-44. Returns already received for 1944-45 show that it has reached \$1,200 now. A table of average salaries for different types of schools may be found in the comparative section of the book.

TABLE 32—NIGHT SCHOOLS—Classification of Students by Subjects of Study, 1943-44

I. ACADEMIC

A—CULTURAL

1. English for New Canadians.....	352	7. Public Speaking.....	103
2. Conversational English.....	17	8. French.....	450
3. Reading.....	317	9. Spanish.....	165
4. Literature.....	231	10. Russian.....	51
5. Composition and Spelling.....	554	11. German.....	27
6. Grammar.....	366	12. Music Appreciation.....	22

B—PRACTICAL

1. Arithmetic.....	662	4. Trigonometry.....	162
2. Algebra.....	472	5. General Mathematics.....	36
3. Geometry.....	291	6. Shop Mathematics.....	903

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Home Nursing.....	170	7. Tailoring.....	46
2. Cooking.....	308	8. Pattern Making and Design.....	164
3. Meal Preparation and Serving.....	1,006	9. Millinery.....	161
4. Nutrition and Dietetics.....	338	10. Embroidery.....	27
5. Children's Clothing.....	15	11. Household Accessories.....	63
6. Dressmaking.....	5,309	12. Antiques.....	39

B—COMMERCE

1. Writing.....	108	7. Business Machines.....	574
2. Stenography.....	4,006	8. Business Forms.....	196
3. Typewriting.....	6,182	9. Office Routine.....	293
4. Transcription.....	148	10. Book-keeping.....	1,478
5. Business Correspondence.....	117	11. Advertising.....	28
6. Journalism.....	76		

C—ART, DRAFTING, AND DESIGN

(a) Pure Art:			
1. Painting and Drawing.....	45	3. Still Life Drawing.....	101
2. Colour Study.....	138	4. Life Drawing.....	194
		5. Teachers' Art Course.....	25
(b) Applied Art:			
1. Lettering and Show Cards.....	133	4. Fashion Drawing and Design.....	27
2. Commercial Art.....	16	5. Photography.....	47
3. Illustrating.....	225	6. Interior Decorating.....	137
(c) Industrial Drafting and Design:			
1. Drafting (General).....	1,190	5. Tool Design.....	20
2. Blue Print Reading.....	181	6. Sheet Metal Drawing.....	67
3. Architectural Drawing.....	136	7. Electrical Drawing.....	32
4. Machine Drawing and Design.....	372	8. Aircraft Drafting.....	76

D—CRAFTS

1. Arts and Crafts.....	18	6. Pottery.....	61
2. Leather Working.....	60	7. Printing.....	127
3. Wood Carving.....	17	8. Watchmaking.....	22
4. Cabinet Making.....	228	9. Glass Blowing.....	14
5. Pattern Making.....	1		

E—SCIENCE AND ENGINEERING

(a) Science			
1. Physics.....	45	4. Chemistry for Nurses.....	100
2. Chemistry.....	362	5. Electricity.....	794
3. Industrial Chemistry.....	123	6. Metallurgy and Assaying.....	6
(b) Engineering			
1. Applied Mechanics.....	36	4. Diesel Engines.....	30
2. Power Plant Operation.....	169	5. Refrigeration and Air Conditioning.....	31
3. Steam Engineering.....	79	6. Applied Electricity.....	104
		7. Wireless.....	14

F—TRADES AND INDUSTRY

1. General Woodworking.....	1,121	9. Sheet Metal Work.....	24
2. Carpentry.....	335	10. Plumbing.....	41
3. Machine Shop Work.....	1,624	11. Shoe Repairing.....	24
4. Acetylene Welding.....	1,011	12. Hairdressing.....	17
5. Electric Welding.....	549	13. Forge Work.....	8
6. Radio.....	306	14. Electric Wiring.....	303
7. Auto Mechanics.....	1,173	15. Plastics.....	47
8. Aircraft Mechanics.....	66		

III. MISCELLANEOUS

1. First Aid.....	73	3. Lip Reading.....	14
2. Physical Education.....	402

THE PUPIL WAR EFFORT

Throughout World War II the Ontario school children have consistently played their part. While their elders were serving on the active or home front in war effort, purchasing Victory bonds and contributing to the Red Cross, the pupils were performing parallel service by assisting on the farm, buying War Savings Stamps and Certificates, and donating to the Navy League. Cash donations of the juniors amounted to thirteen and one-quarter million dollars. Almost nine million of this took the form of War Stamp purchases while two and one-half million was invested in Victory bonds. Special war funds also claimed their support.

War equipment donated took the form of ambulances, mobile canteens, Red Cross wagons, utility cars, and machine guns, for the front, and wheel chairs, hospital cots, moving picture machines, magazines and cigarettes for the injured.

In addition, the pupils gave generously of their time in the collection of thousands of tons of salvage, and freely donated great quantities of food and clothing.

The following table provides an analysis of the pupil effort during the entire war period.

REPORT

OF THE

Minister of Education

FOR THE YEAR 1944

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education for the year 1944.

With a view to the progressive improvement of the educational system of the Province of Ontario, a number of important changes have been instituted during 1944, and plans have been made which it is hoped will lead to further improvements.

Provision has been made for increased legislative grants for educational purposes, amounting to fifty per cent. of the cost of elementary and secondary education over the whole province. These increases have been designed with a three-fold purpose,—to relieve the burden of local taxation on real property, to equalize educational opportunities between larger and smaller urban centres as well as between more and less affluent rural communities, and to stimulate the improvement of schools where local interest is feeble.

Attention has been paid to the special problems of education in rural communities. Encouragement has been given to the formation of Township school areas so that now approximately one-quarter of the old school sections have been merged into the larger units, giving the children concerned the advantages of improved teaching, enriched courses, and a better chance of continuing their education on the secondary school level. For similar reasons the policy of temporarily closing schools in which the enrolment is below eight pupils has been continued. The transfer of pupils from the 425 schools now closed has assured these pupils improved instruction and the stimulus provided by larger class-groups. Special grants have been offered to rural high schools to encourage them to serve more fully the needs of their communities, by introducing courses in practical agriculture, shop work and home economics, by serving hot lunches for pupils, and by opening the schools for use as community centres.

To provide a further measure of equality of educational opportunity the Provincial scholarship scheme has been expanded, and has been augmented by a Dominion-Provincial Student-Aid scheme for able but needy students. More than five hundred winners of scholarships and bursaries have been enabled in this way to continue their education in universities, normal schools and other institutions of higher learning, as well as in Grade XIII classes of secondary schools.

In the field of advanced technical training the Provincial Institute of Mining has been organized at Haileybury, with an advisory committee repre-

sentative of all phases of mining activities in Northern Ontario. On the recommendation of this committee, Mr. O. E. Walli has been appointed principal, and it is expected that this school will make a valuable contribution to the needs of the area which it serves.

The Department of Education has established, in full co-operation with the Dominion Government, its first centre for the rehabilitation and training of ex-service personnel. A number of occupational courses are in operation and others are being added as the need arises. In addition, tutorial help in academic courses is being provided to prepare demobilized men and women for university courses and vocational training. This service has been in great demand. Other similar centres will be established as the need for them arises.

Since the efficiency of any system of education depends mainly upon the quality and training of the teachers, the Department of Education has instituted a number of changes designed to improve the teaching staff.

- (a) To attract better candidates into teaching, the minimum salary on which township grants might be paid was raised to \$1,000.
- (b) As a further inducement to able persons to enter teaching and to give to teachers in service a sense of the solidarity, dignity, and importance of their occupation, The Teaching Profession Act was passed. Specific responsibilities are thereby placed upon the teachers for their professional conduct and for the attainment of the ultimate aim of all education, the full and wholesome development of the child.
- (c) To give greater permanency and stability to the teaching profession, an amendment to The Teachers' and Inspectors' Superannuation Act was passed, raising the annual contribution of the Province from $2\frac{1}{2}$ to $3\frac{1}{2}$ per cent. of salaries. This additional contribution cancels the accrued liability with which the Fund began and will assist in improving the superannuation benefits payable under the Act.
- (d) Special summer sessions in two Normal Schools and in the Ontario College of Education were held to meet an emergency arising from a shortage of teachers. Since these courses were only of six weeks' duration in the Normal Schools and eleven weeks at the College of Education, their graduates will be required to attend a second summer session before securing regular interim certificates.
- (e) Plans were made for re-opening the Ontario Training College for Technical Teachers in 1945, and for the resumption of a number of summer schools for special professional certificates.

During the year six counties adopted the county plan for medical and dental inspection of school as provided by The Public Health Act. Three other counties have voted to put the plan into operation.

The wide-spread interest in guidance has been given focus and direction by the appointment of a Director of Guidance and by an amendment to The High Schools Act to permit a board to employ a guidance officer. The co-ordination of the work of the Vocational Guidance Centre with the work of the Ontario College of Education will give greater assistance to teachers in this field.

Although a thorough revision of the school courses has been deferred pending the completion of negotiations with the Universities, nevertheless a number of steps in this direction have already been taken.

- (a) Religious education has been introduced in the public school course of studies. With the valued co-operation of the Inter-Church Committee on Week-day Religious Education, a teachers' manual has been prepared and a number of guide books have been edited, covering the work of the elementary grades.
- (b) The Physical and Health Education courses have been revised and extended and a Provincial Director appointed to supervise the work.
- (c) Cadet Training has been introduced as an essential part of the high school programme. The Director of Cadet Training has undertaken the task of integrating this work with the Cadet branches of the Services, and with the courses in Physical and Health Education.
- (d) The secondary school history courses have been revised and strengthened. A booklet outlining the history and significance of British and Canadian democratic institutions has been prepared and distributed to the schools.
- (e) A Provincial Supervisor of Art has been appointed to encourage the development of arts and crafts, with particular reference to local materials.

A Committee on the Planning, Construction and Equipment of Schools has been appointed with a dual purpose,—to make schools more effective for their task of training young people, and to reduce the cost of school building to a point at which it is possible to begin a much-needed programme of renovation and construction.

A Royal Commission has been appointed under the Chairmanship of Mr. Justice Hope to study all phases of education in the province. This Commission has begun its deliberations and has received representations from a wide variety of sources. It is expected that when the report of this Commission is received it will form the basis of an extensive revision of many parts of our educational system.

Respectfully submitted,

GEORGE A. DREW,
Minister of Education.

Toronto, October 20, 1945.

ELEMENTARY EDUCATION

Legislative Grants

On December 13th, 1944, the Minister of Education announced a new scheme for the apportionment of legislative grants on behalf of elementary and secondary schools. Under the scheme the Ontario Government will give to boards of school trustees in 1945 a sum equivalent to 50% of the total operating costs of the elementary and secondary schools of the province for the calendar year 1944. The urban elementary school boards will receive 30% to 60% of their approved school costs, depending upon the population of the urban centre, the highest percentage going to urban centres with population below 2,500. The rural boards will receive 50% to 90% of school costs, depending upon the assessment per classroom, the highest grants going to rural boards having the lowest assessment per classroom.

The momentous nature of the increase in grants may be seen when it is realized that in 1944 the amount required to pay the general legislative grants to elementary school boards was \$5,887,127.29, while in 1945, under the new scheme, the amount required will be approximately \$17,000,000.00.

Township School Areas

Under the terms set forth in The Public Schools Act a township council may form a township school area by a by-law passed between January 1st and July 1st of any year, the new area organization going into effect on December 25th of the same year. The number of areas organized in 1944 set a record for any year since the movement began in 1938. Sixty-one new areas were formed, involving the dissolution of 396 school sections. In 13 township school areas formed before 1944, the areas were further enlarged in 1944 by adding, in all, 18 school sections.

The success of this movement may be attributed to two factors,—(1) the tactful leadership and indefatigable efforts of the public school inspectors, and (2) the growing conviction of the people in rural areas that better administration and more efficient schools result when all the rural schools of a community having common social, educational, and economic interests are brought under unit administration.

The list of these larger units organized in 1944 follows:—

Township	No. of School Sections	County or District	Inspector	Date
1. Phelps (Un.)	2	Nipissing	J. W. Trusler	Jan. 27
2. Pelham No. 1	3	Welland	C. Howitt	May 2
3. Saltfleet	5	Wentworth	C. B. Routley	May 4
4. West Oxford	8	Oxford	L. B. Hyde	May 8
5. Rainham	7	Haldimand	W. E. Eade	May 11
6. Wainfleet	13	Welland	C. Howitt	May 25
7. Westminster No. 1	5	Middlesex	D. G. Smith	May 29
8. South Nissouri	4	Middlesex	D. G. Smith	June 2
9. St. Vincent	5	Grey	L. L. Sinclair	June 3
10. Thessalon	4	Algoma	S. Geiger	June 3
11. South Dumfries No. 1	8	Brant	J. C. Webster	June 5
12. Evanturel	2	Temiskaming	R. H. Macklem	June 5
13. East Howick	9	Huron	J. M. Game	June 5

Totals.....	248	1,423

The Temporary Closing of Small Schools

The policy of recommending the temporary closing of schools with low enrolment was continued in 1944. The number of schools closed was not as great as in earlier years. This, however, was probably due to the fact that after some six years of intensive effort a point has been reached where the remaining schools of low enrolment cannot be closed advantageously. Where winter roads do not permit daily transportation of pupils to other schools, or where the school of low enrolment is isolated, it becomes advisable to keep the school open.

It is estimated that, in recent years, there have been about 650 rural one-teacher schools with enrolment below eight. More than 425 of this number are now closed temporarily. Each year a few additional schools are closed, and each year also a few schools are reopened due to an increase in the number of pupils of school age resident within the school section. Every teacher and every inspector of schools is aware that the best work cannot be done in a rural school when the class groups are too small for zestful and healthy group activities and competition, either within the classroom or on the playground. The list of schools closed in 1944 follows:—

Inspectorate	Inspector	School
Dufferin.....	W. L. Lovell.....	No. 16 Mulmur.
Durham.....	T. R. McEwen.....	No. 17 Darlington.
Frontenac North.....	M. Hallman.....	No. 8 Barrie.
Frontenac North.....	M. Hallman.....	No. 8 Denbigh.
Frontenac South (1).....	S. A. Truscott.....	No. 10 Bedford.
Frontenac South (2).....	F. P. Smith.....	No. 10 Storrington.
Frontenac South (2).....	F. P. Smith.....	No. 13 Storrington.
Haldimand.....	W. E. Eade.....	No. 6 Cayuga North.
Haliburton.....	A. Stouffer.....	No. 1 Lutterworth.
Haliburton.....	A. Stouffer.....	No. 4 Lutterworth.
Huron North.....	J. H. Kinkead.....	No. 2 Grey
Leeds (No. 2).....	E. Oakes.....	No. 7 Yonge and Escott Rear.
Middlesex West.....	G. Young.....	No. 9 Adelaide.
Middlesex West.....	G. Young.....	No. 1 Williams East.
Northumberland and Durham.....	W. H. Carlton.....	No. 19 Cavan.
Ontario North.....	J. R. Pickering.....	No. 8 Georgina.
Perth North.....	A. E. Nelson.....	No. 11 Ellice.
Prescott and Russell.....	J. C. Wilker.....	No. 12 Cumberland.
Prescott and Russell.....	J. C. Wilker.....	No. U13 Plantagenet South.

Inspectorate	Inspector	School
Renfrew South	H. Bolingbroke	No. 9 Admaston.
District Division II	D. A. Lapp	No. 6 Dilke.
District Division III	L. J. Williams	No. 1 Grahams.
District Division III	L. J. Williams	No. 1 Jellicoe.
District Division III	L. J. Williams	No. 1 Magnet.
District Division V	D. T. Walkom	No. 1 Laird.
District Division VI	A. P. Silcox	No. U2 Hutton and Parkin.
District Division IX	R. C. Cassie	No. U2 Casgrain and Kendall.
District Division X	H. W. Brown	No. U2 Taylor and Carr.
District Division XII	R. H. Macklem	No. U1 Bryce and Beauchamp.
District Division XII	R. H. Macklem	No. 3 Pense.
District Division XIV	E. R. Underhill	No. 1 Hunter.
District Division XIV	E. R. Underhill	No. 1 Laurier.
District Division XIV	E. R. Underhill	No. 1 Peck.
District Division XIV	E. R. Underhill	No. 4 Stisted.
District Division XV	P. M. Scott	No. 2 Carling.
District Division XV	P. M. Scott	No. 1 Monteith.
District Division XVI	G. S. Johnson	No. 6 Monck.
District Division XVI	G. S. Johnson	No. 4 Stephenson.
District Division XVI	G. S. Johnson	No. 10 Stephenson.

Transportation of Pupils to Secondary Schools

For a number of years the Department of Education has been discouraging the organization of classes for Grades IX and X in the one-teacher rural school. It is felt that the present courses for these classes, which include agriculture, business practice, shop work, and home economics, are too comprehensive for the teacher of a one-roomed school to do justice to Grades I to VIII inclusive and, at the same time, give adequate instruction in the work of Grades IX and X. In lieu, therefore, of making provision for these senior grades in the one-teacher school, the Department has for six years encouraged the transportation of high

school pupils to a secondary school by paying 50% of the cost of such transportation. The Department, however, requires that, with the exception of township school areas, two or more school sections make a joint arrangement for the transportation. In the case of township school areas, as well as school sections, the contract must be approved by the Department.

A large number of township school areas are making splendid provision for the education of high school pupils residing within the area, by arranging for their transportation to secondary schools where these pupils may have the choice of academic, commercial, or technical education. Many unit school sections are doing likewise. Under the new scheme of grants the costs of transportation for high school pupils will be included in the operating costs in the school budget, and the same percentage of grant will be payable as on the other items of the budget. This means that in the poorer school sections as high as 75% to 90% of the costs of transportation will be paid to the boards. Splendid opportunity is given, therefore, to the pupils in a financially poor community to obtain an education in a secondary school. The new system of grants thus favours the principle of equal educational opportunity for all.

The Supply of Teachers

The supply of qualified teachers for the elementary schools in Ontario was larger in the calendar year 1944 than in the previous year, when it was necessary to employ more than 700 unqualified teachers. This improvement was due to the training of approximately 600 teachers in summer courses given in the Normal Schools at Toronto and London. All of these teachers were employed in the school year 1944-45. However, even with the additional supply it was necessary to issue 495 letters of permission to boards of trustees of elementary schools to employ persons without complete Ontario qualifications. The summary below indicates the number of letters of permission, together with the academic and professional standing of the persons who were employed in this way, as teachers in the elementary schools for the calendar year 1944.

A. PROFESSIONAL QUALIFICATIONS

Holders of Expired Ontario Third Class Certificates.....	127
Persons who failed at Ontario College of Education.....	1
Persons who failed at Ontario Normal Schools.....	65
Certificates from other Provinces.....	108
Holders of H.S. Assistants' Certificates.....	2
	— 303

B. ACADEMIC QUALIFICATIONS

University graduates.....	6
Some University work.....	7
Persons of Upper School standing.....	78
Persons of part Upper School standing.....	22
Persons of Middle School standing.....	64
Persons of part Middle School standing.....	8
Persons of Lower School standing.....	7
	— 192
Total.....	495

Correspondence Courses

The records of the correspondence courses conducted by the Department of Education during the school year 1943-44 show that it was one of the most successful years to date. Because of the war, however, the enrolment was not

as large as it otherwise might have been. Many boys and girls who under ordinary circumstances might have been enrolled in the correspondence courses have been busy on the farms or have been drawn into industry. The total enrolment for the year was 2,594. Of this total, 2,353 were enrolled in the English and 211 in the English and French courses. This number exceeded by 71 the number enrolled the previous year. The total number of lessons received, corrected and returned was 55,716.

No part of Ontario is too isolated for the correspondence courses to reach. Anyone in the province between six and twenty-one years of age, to whom ordinary school facilities are not available, is eligible for enrolment. In addition, lessons are sent to pupils temporarily domiciled outside the province, and to children of missionaries and others in far-away lands. At the present time pupils are enrolled from Port Harrison on Hudson Bay and Fort McPherson at the mouth of the Mackenzie River. Children of missionaries are enrolled from the Congo, Trinidad, Paraguay, Bolivia and Venezuela. As in former years, courses were provided for bedfast patients in practically all the Sanatoria and Preventoria of the province.

During the year 556 promotions were made to a higher grade, exclusive of Grades IX and X. Of the 32 High School Entrance candidates 28 were recommended to the various Entrance Boards. Two of the four who wrote on the Departmental High School Entrance examinations were successful. The results in Grades IX and X were equally satisfactory, as is shown in the following tabulations:—

Subjects completed in Grades IX and X:

5 completed 8 subjects			
1	"	7	"
5	"	6	"
5	"	5	"
6	"	4	"
17	"	3	"
37	"	2	"
9	"	1	"

Many of the pupils who were successful in fewer than four subjects were enrolled late in the school year and failed to complete all the subjects undertaken.

The Correspondence School staff consists of a Director and 23 full-time teachers who read, correct, explain and grade the lessons. A number of the staff are graduates of a university.

The Department, through this Branch, also supervises the Correspondence courses in English, Social Studies and Elementary Arithmetic introduced by the Canadian Legion for members of the Active Services.

Railway School Cars

During the year 1944 the school car personnel lost one of its most valued members in the sudden death of Walter McNally, who was appointed when school cars were first organized in 1926. He was taken suddenly ill on Friday, August 31st, had an emergency operation in the Hotel Dieu Hospital, Kingston, on Sunday, September 2nd, and passed away that same day. Mr. McNally's teaching experience was gained entirely in the one C.P.R. school car. He has left behind his wife and two sons, as well as a host of friends among pupils, parents and railway officials, to mourn his loss.

In October, Mr. Cameron A. Bell was appointed to take over Mr. McNally's work. Mr. Bell has had several years of successful teaching experience, including time spent as the Acting Principal of the Chapleau Public School. Mrs. Bell has also had experience as a teacher, and both are eminently qualified for their work.

The school cars are more than schools, and are doing a type of community social service and educational work which could be done in no other way. The teacher of the school car assists the people in such matters as writing letters, advice on ordinary business matters, and the teaching of English conversation to those of foreign birth. The people come to the school car to read library books, to discuss current events, to satisfy their hunger for knowledge, to overcome their loneliness, and to have their fears and worries dispelled by one in whom they have complete confidence—the school-car teacher. School days, as well as many evenings, are used by the school-car teacher to help both the pupils and the "grown-ups."

School Health Supervision

School health supervision in the rural and smaller urban municipalities is continuing to meet with popular approval. Oxford County led the way by appealing to the Government for permissive legislation to allow the expenditure of county funds for the employment of school nurses. When this was granted, the establishment of a programme which proved very acceptable, set a precedent which has had far-reaching effects. Seven counties are now actively participating in this very essential part of a community health programme and at least four other counties have moved to set up similar organizations. The supplying of personnel to meet the demand in this expansion has been a serious tax on all the resources; but up to the present the problem has been met and there is every indication that the future outlook will be more hopeful.

Concern for the well-being of the secondary school group is also increasing and similar action is being strongly commended. This concern evidences a quickening of public thought on school affairs generally and a realization that the development of healthy responsible young citizens is essential, particularly in these days of national crisis.

Religious Education in the Public Schools

In accordance with the regulations of the Department in effect prior to September, 1944, clergymen of all denominations have had, for some years, the right to give religious instruction in the public schools of the province before or after school hours. The number of clergymen who availed themselves of this opportunity increased rapidly after the outbreak of war. During the same period the Ontario Educational Association urged that more adequate provision for the teaching of Religious Education be made, as a large proportion of pupils was known to be without Sunday school or church association, and it was manifestly impossible for the clergy to meet all school situations. As a result of these representations, and others of a similar nature, Religious Education was introduced as a subject of study in the public schools of the province in September, 1944.

It was early realized that help would be required by teachers for the effective presentation of Religious Education. Accordingly, a booklet entitled "Programme for Religious Education in the Public Schools of Ontario" was prepared. In its content instructional aid is suggested, and approved prayers and Bible

selections for memorization are submitted. The regulations governing the teaching of the subject are also included. In addition to the time allowed for religious exercises, two half-hour periods per week are to be devoted to Religious Education. A school board is required to submit to the Department reasons in writing if exemption for the school is desired; individual pupils may be exempted on application of parent or guardian; and teachers may also secure exemption by giving notice in writing to the board of trustees. Much forethought and care were exercised in drawing the regulations, and the number of boards of trustees seeking exemption for schools in their charge has been small.

In addition to a publication under the title of "Hymns for Schools," the Department has outlined specific help in methodology and content in "Guide Books for Teachers." By December, 1944, the Guides for the first three grades were in the hands of the teachers. The co-operation of the Inter-Church Committee on Week-day Religious Education is gratefully acknowledged. The members gave valuable assistance and advice in the preparation of the course and the revision of the guide books.

According to reports submitted by inspectors, the course in Religious Education has been accepted by teachers, trustees and the general public as a worthwhile contribution to the programme of the public schools.

Visual Education

The Visual Education branch of the Department of Education maintains a library of lantern slides and 16 mm. instructional motion-picture films, both sound and silent, and 14,860 screenings of these films and slides were made in the schools of Ontario during the calendar year 1944. This is more than double the number of screenings made in 1943. There are 97 sets of lantern slides and over 400 films in the library available to school users in Ontario. No covering or rental charge is made for the service, the borrower being required to pay only the express charges one way. Films have also been sent to the projectionists of the National Film Board employed in rural areas, and this has meant that many pupils attending rural schools have had an opportunity to view educational films through the co-operation of the Department of Education and the National Film Board.

Projection machines, due to priorities, have not been readily available for purchase during the present war period; but when machines and more films are procurable, visual aids of this nature will play an ever-increasing part in assisting teachers in classroom instruction.

School Radio Broadcasts

There are more than 900 public and separate schools in Ontario where radio sets are installed. In these schools there are 1,015 radios and, in addition, a number of public address systems which may be used for radio reception. There are also in the province 1,150 public and separate schools which frequently borrow or rent radios for the purpose of receiving educational broadcasts. As soon as restrictions on the purchase of radio sets are removed, many more school authorities undoubtedly will purchase radios for educational use.

In the year 1944 the Department of Education co-operated with the Canadian Broadcasting Corporation in the production of school radio broadcasts related to the following:— Music, Social Studies, Junior English, and Guidance.

An official of the Department of Education is a member of the National Advisory Council on School Broadcasting of the Canadian Broadcasting Corporation, and, through the efforts of this Council, national educational broadcasts were prepared and beamed to schools. This national series of broadcasts, together with the programmes of the American School of the Air, have been available to school listeners in Ontario. Continued study has been made by the Department of Education as to the whole field of radio in education.

Interchange of Teachers

The following exchanges were arranged for the school year 1944-45:—

Ontario Teacher

Miss Mary Callaghan
Winchester Street P.S.
Toronto, Ontario

Miss Mary Clendening
Humbercrest P.S.
York Township (Toronto 9)

Miss Rhea Minshall
Simcoe, Ontario

Miss Hazel Morris
Allenby P.S.
Toronto, Ontario

Exchange Teacher

Miss Evelyn Grassie
Woodland School
Vancouver, B.C.

Miss Jessie Manning
Port Alberni, B.C.

Miss Esther Larmour
Victoria School
Saskatoon, Sask.

Miss Mary Gillis
General Gordon School
Vancouver, B.C.

War Effort in the Elementary Schools

The pupils in the elementary schools have continued to show a genuine interest in many phases of war work and have endeavoured to do their part in helping to win the war. They have purchased a very large number of War Savings Stamps and War Savings Certificates. They have contributed considerable sums to the Junior Red Cross and to the Navy League of Canada. They have responded energetically in salvage drives and have assisted in the collection of milkweed leaves for use in experiments on synthetic rubber. The pupils, too, have entered heartily into the presentation of Empire Day programmes in the schools and have made a day-to-day study of the progress of the war.

In this splendid work which has been done in and through the schools, the inspectors and the teachers have given direction and enthusiastic support. Home and School Associations, Junior Red Cross, Women's Institutes and the Imperial Order, Daughters of the Empire have all given their hearty co-operation in the war work effected through the schools. We have reason to be proud of these efforts of our boys and girls.

The Provincial Inspectoral Staff, 1944

I. IN MEMORIAM:

Mr. D. C. Hetherington, B.A., was a native of Perth County. He attended St. Catharines Collegiate Institute during the years 1879 and 1880 and then attended the Toronto Normal School. In 1881 he was appointed to the staff of the St. Catharines Collegiate Institute and served efficiently there for two and

one-half years. He was then appointed Supervising Principal of St. Catharines Public Schools, serving in this capacity for twenty-one years, when he became Public School Inspector in St. Catharines. Mr. Hetherington gave over fifty-five years of devoted service to the cause of education. He retired from his educational work on August 31st, 1933, but retained his keen interest in education. He attended regularly, as long as he was physically able to do so, the Inspectors' and Normal School Masters' conferences held in the Hamilton district. Mr. Hetherington, who died in 1944, will live in the memory of those with whom he was associated.

Dr. Peter F. Munro was born in Chateaugay, Quebec, but received his elementary and secondary education at Williamstown, Ontario. He entered Queen's University in 1894 on a scholarship and specialized in Classics. He obtained his Bachelor of Pedagogy degree from the University of Toronto in 1904, his M.A. degree from Queen's University in 1905, and his Doctor of Pedagogy degree from the University of Toronto in 1926. Dr. Munro taught in the high schools at Iroquois, Harriston, Aylmer and Aurora previous to his appointment as a Classical Master at Jarvis Collegiate Institute in 1907. Six years later he was promoted to the head of the Classical Department in Riverdale Collegiate. In 1919 he was appointed principal of the Ryerson Public School, Toronto, and in 1925 he became one of the Public School Inspectors for the City of Toronto. He resigned from this position in 1941 and died in January, 1944. Dr. Munro was an ardent lover of good sport. He was a good lacrosse player as well as an enthusiastic lawn bowler. He also held important positions in teaching organizations.

Mr. R. C. Rose, B.A., who retired from service as Public School Inspector in Carleton County in 1934, died at his residence, 247 Powell Avenue, Ottawa, on November 20th, 1944. Mr. Rose, who graduated from the University of Toronto in 1891, is well remembered by his former pupils as a splendid mathematician, an able teacher and a warm friend. He was principal of Prescott High School for eleven years, and from 1907 to 1919 he was principal and mathematics master of the Smith's Falls Collegiate Institute. In 1919 Mr. Rose was appointed Public School Inspector for Lanark County, and until his retirement in 1934 served with distinction as Inspector in Lanark and Carleton Counties. He was a scholarly gentleman of genial personality, and the teachers who served under his leadership will ever remember his sympathetic and tactful guidance and direction. Mr. Rose took a keen interest in church, fraternal and community affairs, and his passing was a distinct loss to his community as well as to the cause of education.

II. RETIREMENTS:

Mr. J. J. Edwards, B.A., belongs to the Old Boys' Association of Lanark County, having been born in the Village of Pakenham. His elementary and secondary education were received in the rural schools and in the Lanark Continuation School. He attended the Renfrew Model School and began his teaching career in the public schools in the counties of Lanark and Peterborough. He graduated from Queen's University in 1906. In 1908 he was appointed principal of a public school in Port Arthur and subsequently was principal of Tavistock Continuation School and English Master in the Hamilton Collegiate Institute. He resigned this latter position in June, 1922, to become Public School Inspector in Lambton East, a position he held until his retirement in December, 1944. Mr.

Edwards has maintained an enthusiastic interest in golf, hockey, bowling and curling, as well as a keen interest in the work of a number of fraternal societies, of which he has been a member, and in which he has held important positions. He has also been interested in the work of charitable societies.

Mr. T. P. Maxwell, B.A., retired from his duties as Public School Inspector for Carleton County on August 31st, 1944, after completing a most successful inspection service from the time of his appointment by the County Council of Carleton County in 1921. Mr. Maxwell was born in Glasgow, Scotland, and came to Canada in 1886. He obtained his High School Entrance certificate in 1892 and his Public School Leaving certificate in 1893 at the Sydenham Public School, and graduated from the Kingston Model School in 1893. Mr. Maxwell taught public school for a number of years and then completed his secondary school education at Sydenham High School. In 1901 he graduated from the Ottawa Normal School. He taught in the public schools in the villages of Sydenham, Inverary and Cataraqui, and in 1911 was appointed principal of Victoria Public School, Kingston. In 1913 Mr. Maxwell graduated from Queen's University and in 1914 was appointed Science Master in the School for Higher English and Applied Arts, Ottawa, where he taught until the time of his appointment as Public School Inspector in Carleton County. For twenty-two years Mr. Maxwell gave splendid leadership in education in Carleton County, and his sound scholarship, kindly frankness, good judgment and, above all, his finely balanced sense of humour have made him respected and revered by all those associated with him.

Mr. G. E. Pentland, M.A., was born in Thornbury, in Grey County. He attended public school at Heathcote, in the Beaver Valley, and also Collingwood Collegiate Institute from which he obtained his Third, Second and First Class certificates. After attending Model School he began teaching in Collingwood Township at the age of sixteen. After a course at the Normal College at Hamilton he taught for a number of years in continuation schools at Plattsville and Norwich, after which he was appointed to the staff of the Stratford Collegiate Institute. After obtaining his B.A. degree extramurally, he attended Queen's University and graduated with his M.A. degree, obtaining First Class honours in Mathematics. Subsequently he was principal of the Thorold, Beamsville, and Williamstown High Schools, and the Vankleek Collegiate Institute. In 1920, after returning from overseas, he was appointed inspector in Haliburton County. In 1932 he was transferred to the inspectorate of Frontenac North, and in 1934 to South Grey. Mr. Pentland was not only an inspector of schools. He was interested in the personal health and welfare of children as well as in their education. Through his efforts children in need were provided with food and warm clothing, and others were taken into his home that they might have access to a school. He organized a number of excursions by which boys and girls from Haliburton County were enabled to spend a day or more at the Toronto Exhibition. He retired on August 31st, 1944.

Mr. F. E. Perney, B.A., B.Paed., Superintendent of Public and Secondary Schools in the City of Hamilton from 1932 to 1944, was born of United Empire Loyalist parentage in the Township of Townsend, Norfolk County, where he received his elementary education. Later he attended the Port Dover High School and the Hamilton Collegiate Institute for his secondary education, completing Senior Leaving standing in 1892. He attended the Simcoe Model School

and the Ottawa Normal School, and was successful in obtaining a First Class Public School certificate in December, 1892. Mr. Perney is a graduate of Queen's University, securing the degree of Bachelor of Arts in 1902 and the degree of Bachelor of Pedagogy in 1909. He began his career as a teacher in a rural school in Wentworth County. Subsequently he was principal of the following public schools:— Stoney Creek, Norwood, County Model School, and Mutchmor, Creighton and Glashan Public Schools, Ottawa. He was Master in English and Geography in the Hamilton Normal School from 1917 to 1920, when he was appointed Assistant Inspector of Public Schools for Hamilton. In 1925 he became Chief Inspector of Public Schools for the City of Hamilton, and in 1932 he was further honoured by being made Superintendent of Schools, elementary and secondary, for the city. Mr. Perney always took a keen interest in athletics,—tennis, golf and hockey. He held many important positions in the community life of Ottawa and Hamilton, having served as President of the Rotary Club, of the Canadian Club, and as Chairman of the Library Board. He was also a member of the Supreme Council of the Scottish Rite for the Dominion of Canada. The schools of Ottawa and Hamilton and the educational system of the province generally have benefited greatly from the services of Mr. Perney, and his colleagues over the province regret his retirement from active service on December 31st, 1944.

Mr. W. F. Smith, B.A., B.Paed., is a native of Elgin County. He attended public school in S.S. No. 10 Bayham, and secondary schools in Vienna and St. Thomas. His first professional training was received in the St. Thomas Model School, after which he taught in the public schools in Toronto, St. Thomas and Tillsonburg and completed his public school experience with five years in the schools of Saskatchewan. As a high school teacher he taught in the schools of Tillsonburg, Brampton and St. Marys, and served as principal of the Trenton High School for a period of four years. He was appointed Public School Inspector in 1933 for Simcoe North, with residence at Collingwood. In 1938 he was transferred to Peel County, with residence in Brampton. As an Inspector Mr. Smith was very popular with all his teachers, and loved by the pupils, and he enjoyed the confidence of his boards to a very high degree. He was active in the interests of the schools. Through his efforts schools were equipped with better libraries, with sanitary conveniences, with artificial lighting and with nursing services. Teaching was greatly improved in his inspectorate by the encouragement given to the teachers, and by the inspiration of the lessons which he himself taught. Mr. Smith did excellent work in the inspectorates of which he had charge until his retirement on August 31st, 1944. His great service to education extends over a period of forty-eight years.

III. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1944:—

1. Department of Education: Mr. F. S. Rivers, B.A., B.Paed., Principal of Ottawa Normal School, was appointed Assistant Superintendent of Elementary Education, duties beginning February 28th.
2. Department of Education: Mr. J. C. Walsh, B.A., B.Paed., Separate School Inspector for R.C.S.S. Division XII, was appointed Assistant Superintendent of Elementary Education, duties beginning September 1st.

3. Department of Education: Mr. C. D. Gaitskell, M.A., of British Columbia, was appointed Provincial Supervisor of Art, duties beginning September 1st.
4. Department of Education: Mr. Adam McLeod, B.A., Supervising Teacher in Kent County, was appointed Director of Correspondence Courses, duties beginning January 1st.
5. City of Belleville: Mr. L. A. Kells, B.A., B.Paed., Supervising Principal and Secretary-Treasurer of the Belleville Board of Education, duties beginning January 1st. This is a new city inspectorate, Belleville formerly being in the inspectorate of Hastings South.
6. Bruce: Mr. A. A. Gilroy, B.A., Supervising Teacher in Kent County, appointed as Assistant Inspector, duties beginning September 1st.
7. Frontenac North: Mr. Maynard Hallam, B.A., B.Paed., Principal of Victoria Public School, Kitchener, duties beginning February 1st.
8. Grey South: Mr. W. G. Rae, B.A., Principal of Central Public School, Waterloo, duties beginning September 1st.
9. Prescott & Russell (No. 1): Mr. J. C. Wilker, B.A., B.Paed., Principal of Hopewell Avenue Public School, Ottawa, duties beginning September 1st.
10. Simcoe West: Grey (in part): Mr. A. E. Gillies, B.A., Principal of J. F. Carmichael Public School, Kitchener, duties beginning September 1st.
11. Welland East: Mr. T. C. White, B.A., B.Paed., Public School Inspector for the City of Sarnia, duties beginning September 1st.
12. Welland (in part): Lincoln (in part): Mr. C. R. MacLeod, B.A., Supervising Teacher in this inspectorate, appointed Inspector September 1st.
13. District Division XI: Mr. J. H. Kennedy, B.A., Supervising Teacher in District Divisions X and XI, appointed inspector September 1st.
14. District Division XII (1): Mr. J. L. Runnalls, B.A., Principal of Dr. Carruthers Public School, North Bay, duties beginning September 1st.
15. District Division XIV: Mr. G. E. Tait, B.A., B.Paed., Principal of British-American School, Bogota, Colombia, South America, duties beginning September 1st.
16. R.C.S.S. Division VII: Mr. C. P. O'Neill, M.A., of the staff of the Cathedral School for Boys, Hamilton, duties beginning September 1st.

SUPERVISING TEACHERS:

17. Essex: Mr. G. A. Noble, B.A., Principal of Durham Public School, duties beginning February 1st.
18. Kent: Mr. A. A. Gilroy, B.A., Principal of Watford Public School, duties beginning February 1st.
19. District Divisions X, XI: Mr. J. H. Kennedy, B.A., of Lochiel Street School, Sarnia, duties beginning March 16th.

Sunnylea Public School—S.S. 14 Etobicoke, York County

Courtesy J. B. Parkin, Architect

Sunnylea School—Interior of Classroom

Some Features of Sunnylea School

Sunnylea School, S.S. 14 Etobicoke, is a sample of the one-story, elementary school type building recommended by the special committee on planning, construction and equipment, appointed by the Drew Government in November, 1944.

This type of architecture has the advantages of easy extension, greater flexibility of arrangement and speedy construction.

Some of the features to be found in this particular school are:

1. Heating is by steam (concealed radiators) and conditioned warm air.
2. The ventilating system provides fresh, filtered, humidified air, with separate exhaust systems for wardrobes, toilets and auditorium.
3. The school is insulated with rock wool at the roof and fibre board at outside walls.
4. Floor is asphalt tile generally; Linoleum in teachers' rooms and kitchens; Birch floor in auditorium.
5. School has, in addition to regular classrooms, a kindergarten, a music and art room, a health room and an auditorium.
6. Connected to each classroom is a project room and wardrobe.
7. A separate outside exit for each classroom provides the best possible fire escape, and permits any teacher to take her class outside for study or recreation with the least possible disturbance to the rest of the school.
8. In the case of the kindergarten, separate toilet room is provided adjoining the cloakroom.
9. The basement, in addition to toilets, boiler, meter and storage rooms, contains two large playgrounds, one for each sex.
10. The school has a public address system, also separate fire alarm and bell systems.

IV. TRANSFERS:

The following transfers were made in the provincial staff of inspectors during the year 1944:—

1. Mr. G. C. Dobson, B.A., B.Paed.,
From Bruce West to Kent, September 1st.
2. Mr. J. E. Horton, B.A.,
From District Division XI to Simcoe South, March 1st.
3. Mr. Charles Howitt, B.A., B.Paed.,
From Welland (in part), Lincoln (in part) to Halton, September 1st.
4. Mr. L. J. Langan, B.A.,
From R.C.S.S. Division VIII to R.C.S.S. Division XII, September 1st.
5. Mr. R. H. Macklem, B.A.,
From District Division XII to Hastings South, September 1st.
6. Mr. W. J. McLeod, B.A., B.Paed.,
From Prescott & Russell (No. 1) to Carleton, September 1st.
7. Mr. A. M. McNamara, B.A.,
From R.C.S.S. Division VII to R.C.S.S. Division VIII, September 1st.
8. Mr. F. W. Minkler, B.A., B.Paed.,
From Welland East to York (No. 7), September 1st.
9. Mr. J. R. Pickering, B.A., B.Paed.,
From Hastings South to Ontario North, January 1st.
10. Mr. William Rogers, B.A., B.Paed.,
From Simcoe West to Lambton (No. 3), September 1st.
11. Mr. T. J. Thompson, B.A., B.Paed.,
From Frontenac North to Lambton (No. 2), February 1st.
12. Mr. E. R. Underhill, B.A.,
From District Division XIV to Peel, September 1st.

V. EXCHANGES BETWEEN INSPECTORS AND NORMAL SCHOOL MASTERS, FOR ONE YEAR FROM SEPTEMBER 1ST, 1943:

Mr. L. W. Copp, B.A., B.Paed., Peterborough East, exchanged with Mr. F. B. Smitheram, B.A., of the Peterborough Normal School, September 1st.

Mr. L. L. Skuce, B.A., B.Paed., Halton, went to the Ottawa Normal School, beginning September 1st.

Mr. K. O. Birkin, M.A., B.Paed., Lennox & Hastings South, went to the Peterborough Normal School, beginning September 1st.

Mr. F. C. Biehl, B.A., B.Paed., returned to the Stratford Normal School and Mr. G. H. Dobrindt, B.A., returned to Waterloo (No. 1), September 1st.

Conclusion

Despite the difficulties of securing teachers for the schools, and the large amount of time devoted to Victory Loan, Junior Red Cross and Navy League campaigns, and to making an unusual number of surveys and reports, the inspectorial staff rendered excellent service and the work of the schools was kept at a high point of efficiency in the year 1944.

In further commendation of the work of the inspectors it may be stated that a research committee of the Ontario School Inspectors' Association produced in 1944 its first Year Book, a valuable study and contribution to educational progress in Ontario schools.

The campaign to improve and beautify school grounds, which has been carried on for some years by the Department of Education in co-operation with the Department of Agriculture, had noticeable and pleasing results during the year in many parts of rural Ontario.

The system of Travelling Libraries, carried on in many areas through the schools, gave a fine service.

A sincere expression of appreciation for their fine co-operation throughout the year, and for their contributions to this report, is tendered to colleagues and to members of other branches of the Department.

V. K. GREER,

Superintendent of Elementary Education.

Toronto, March 31st, 1945.

SECONDARY EDUCATION

I have the honour to submit herewith the reports of the High School Inspectors and the Director of Vocational Education for the school year 1943-44.

A. G. HOOPER,
Superintendent of Secondary Education.

July 18, 1945.

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

The total enrolment of pupils in the Collegiate Institutes, High Schools, and Continuation Schools of Ontario in the school year 1943-44 was 74,512, a decrease of 2,455 from the enrolment in the preceding school year. The staffs of these schools in all numbered 3,261, an increase of five since 1942-43.

No new schools were established and one continuation school, that at Denbigh, was temporarily discontinued. On account of the war Boards undertook only necessary maintenance and repairs of school buildings and postponed plans to provide accommodation for General Shop Work and Home Economics or otherwise to add to the facilities of the schools.

In Simcoe County the whole of the Township of Flos was organized as a high school district and the Grade B continuation school which had been carried on at Elmvale in this township was raised to the status of a high school. In Kent County enlarged secondary school areas were established at Merlin and Tilbury and considerable study was given to the question of organizing the whole of this county into high school districts. In all three of these new high school districts the Boards have plans in mind for the improvement of the school accommodations and the enlargement of the programme of studies with special emphasis upon the teaching of Agriculture.

The courses of study, with three exceptions, remained the same as during the preceding school year. To the course in Upper School Trigonometry was added the Statics which was formerly part of the Physics Course, while the Physics course itself was extended and modernized. In the prescribed course in Upper School English Literature provision was made for teachers to select for study by their classes one from a list of nine plays of Shakespeare. The new course in Music for Grade XIII was offered for the first time and was studied for departmental credit by classes in four of the larger secondary schools. In the Upper School course in Modern History emphasis was placed upon the study of the conditions leading to the Second World War and a special booklet relating to this topic was prepared under the direction of the Department and issued to the schools. The instruction in Defence Training showed the benefit of the experience gained by the teachers since it was introduced the year before and in many of the schools arrangements were made whereby nearly all the members of the staff shared in the teaching of this course.

The Dominion-Provincial Scholarships, which had been provided to afford financial aid to pupils of proved ability and character who would otherwise be

unable to complete their Upper School courses or to enter the normal schools or universities, were available for the first time at the close of the school year 1943-44. One hundred and eighty-seven of these scholarships were awarded and it may be expected that the educational opportunities which they have created will enable the recipients to make a fuller contribution to the future welfare of the country.

The manner in which both pupils and teachers in the secondary schools continued to carry on under the stress of wartime conditions was highly creditable. By the end of June, 1944, 650 teachers from the provincial secondary schools had joined the army, the navy, or the air force. During this school year, 1,377 Departmental certificates were issued under the provisions of Circular 27 to pupils who had enlisted for service in the armed forces. For the third successive school year pupils were allowed to leave school before the close of the spring term in order to assist in the production of food. Altogether 7,014 Departmental certificates were issued in accordance with Circular 27 to pupils who had rendered service to agriculture at a time when shortage of labour made particularly difficult the problem of maintaining a food supply sufficient for the added needs of wartime. In raising funds for the Red Cross Society, in salvage campaigns, and in the purchase of war savings certificates, the pupils upheld their very worthy record of the preceding war years.

During this school year Mr. A. G. Hooper, M.A., who had been a member of the high school inspection staff since 1930 and previously the supervising principal of the Windsor collegiate institutes, was appointed to the position of Superintendent of Secondary Education for Ontario.

Dr. A. J. Husband retired from his position as high school inspector in June, 1943. For many years he had rendered service of a very high order to this province as a teacher, as the principal of Brockville Collegiate Institute, and as inspector. His broad and thorough scholarship, his intimate knowledge of the problems of teaching and administration in the secondary schools, and his sincerity and sympathy in the discharge of his duties enabled him to make a far-reaching contribution to the welfare of the young people of this province.

Mr. G. E. Johnson, Specialist in Science and principal of the Welland High and Vocational School, and Mr. W. R. Stewart, Specialist in Modern Languages on the staff of the University of Toronto Schools, were appointed high school inspectors and assumed their duties in September, 1943. Their scholarship and special experience qualify them to render a valuable service to the secondary schools.

The inspectors feel that the conferences with members of Boards which they have had at nearly every visit of inspection have enabled them to be of added service to the schools. They have been glad to have these opportunities to discuss both matters of particular concern to the schools and questions of general educational importance. Among these have been the development of programmes of study that will permit schools to meet best the needs of all the pupils and to be of wider service to the whole community. The Boards have shown a growing interest in medical, dental and nursing services for secondary school pupils and in the educational guidance programme. There has also been an increased interest in agricultural instruction. The establishment of departments of agriculture in eighteen additional schools brought to thirty the number in which special emphasis is placed upon practical subjects in Grades IX and X.

In some of the towns and cities conferences relating to their work are now arranged between the staffs of the secondary and the elementary schools. These have proved of definite value and it is desirable that the practice should be adopted more generally.

We should like to record our appreciation of the courtesy shown us by the elementary school inspectors who in these times of restricted motoring have frequently adjusted their plans so that we might accompany them when we wished to inspect schools in the smaller communities.

In order to help meet the growing shortage of teachers qualified for the secondary schools a short course of training leading to a Limited Interim High school Assistant's Certificate was given in the summer of 1943. In all 80 such certificates were granted and as a group these young teachers, most of whom had just graduated from the universities, have done work of creditable quality in the schools.

The war years have brought a cumulative strain for both the teachers and the pupils of the secondary schools. The teachers have met worthily the special responsibilities towards their pupils which fall upon them in these times. The pupils have shown by their steadfastness and sense of duty that they recognize the important part which they shortly must assume as members of our Canadian democracy.

2. VOCATIONAL SCHOOLS

Attendance

In general, a satisfactory standard of work has been maintained throughout the vocational schools during the past year despite the continuing drain on pupils and teachers by the demands of the Services and war industry. The hopeful rise in day school enrolment indicated by last year's statistics was unfortunately not sustained, enrolment declining from 29,889 in 1942-43 to 29,815 in 1943-44. It will be recalled that last year's report showed a slight increase in 1943 over the previous year's figures; but with this single exception, there has been a steady decline since the outbreak of war from a peak in 1939-40 of 36,502 pupils to 29,815 in 1943-44. The teacher situation has been similarly adversely affected, the number of day school teachers having been reduced from 1,684 in 1940-41 to 1,591 in 1943-44. In the evening classes, the picture is brighter. After declining from 35,000 to 28,000, registration has increased to 29,546, necessitating the employment of additional teachers. The number of schools decreased from 62 to 60. Haileybury School of Mines was closed and will possibly open next year as a provincial institute of mining; navigation classes in Collingwood were not reported. Comparative statistics are given below.

	1941-42	1942-43	1943-44
Number of Schools—Day.....	62	62	60
Number of Schools—Evening.....	50	49	45
Number of Pupils—Day.....	28,632	29,889	29,815
Number of Pupils—Evening.....	33,388	28,391	29,546
Number of Teachers—Day.....	1,614	1,614	1,591
Number of Teachers—Evening.....	1,043	943	957
Government Grants, Fiscal Year.....	\$1,341,499	\$1,308,637	\$1,263,758
Net Municipal Expenditures, Previous Calendar Year...	5,170,205	5,152,200	5,202,663

General

Although, where required, the vocational schools continue to co-operate with the federal authorities in the war programme, the necessity for training partially-skilled workers for industry is no longer pressing. The classes now in operation are chiefly for the purpose of preparing selected groups of war personnel for special duties; and the major activities of Canadian Vocational Training (formerly War Emergency Classes) have been directed to giving instruction and upgrading in plant schools and to providing training in foremanship duties.

Vocational schools are also being used to a small extent in the rehabilitation of ex-service men and women. It is expected that this feature will develop rapidly, as demobilization becomes general, by virtue of a proposed agreement to be entered into by the Dominion Government with each of the Provinces under the provisions of The Vocational Training Co-ordination Act, 1942.

Co-operation Between Boards and Staff

By regulation, the principal is made responsible to the Advisory Vocational Committee and the Department for the organization, management and control of the school under his charge. Co-operation of staff and principal is the key-note of the setup. The principal must seek advice of heads of departments respecting the development, maintenance and improvement of their departments. By means of committee-work and conferences, he is expected to secure co-ordination of plans and effort, with the aim of maintaining a high standard of teaching and the most satisfactory correlation of the subject matter of instruction.

Assistance is being given to the schools in organizing courses of study. Shop directors and other heads of departments are asked to co-operate with each other and to assist the principal in the general organization and management of the school. They have been made responsible, under the principal, for the organization of the departments over which they have control, for supervising the preparation of courses of study in each department, and for the preparation of the annual budget for supplies and equipment. An up-to-date inventory of shop and other equipment is required, and each director is held responsible for the maintenance of this equipment and the proper storage of tools and materials under his charge. Academic teachers and shop instructors are expected to co-operate in maintaining discipline and fostering a wholesome school spirit, and to prepare, in time for the annual inspection, an enlargement of the course of study being followed.

At all times the desirability of co-operation on the part of inspectors, principals and boards is emphasized, so that the board members may receive the necessary information to enable them to make effective the suggestions of the inspectors.

Trends in Commercial Education

One of the noticeable trends in Commercial High Schools and departments is the decided increase in Grade 12 enrolment. This upswing is due partly to the fact that supply and demand in office employment is approaching equilibrium, and partly to effective counselling by principals, guidance officers and teachers. If schools endeavour to adjust their curricula so as to adapt the courses to the varying abilities and interests of the pupils, a larger number of girls and boys will continue at school, and the enrolment in the senior grades will form a much larger percentage of those who enter the commercial course.

During the year there have been encouraging signs of closer co-ordination between the schools and business. Many commercial teachers were employed during the summer vacations and this contact with business has had an effect upon their courses and methods. Several schools have completed surveys of the work done by graduates who are now employed and reports of these have been published in educational journals. A thorough survey of commercial education in the City of Toronto was made by a joint committee of business men and educators and was made available to teachers in a report entitled "Education for Business".

In order to serve the needs of certain pupils who are not adapted to either secretarial or accountancy subjects, several schools are introducing a General Clerical course with emphasis upon typing, record-keeping, and machine work. Schools which have carried the course long enough to follow these pupils into employment are gratified with their success both in obtaining and holding office positions. The next few years will probably show the wisdom of specializing much smaller groups in the honour Secretarial and Accountancy courses, and of providing a more general pass course which will stress the clerical skills rather than the advanced work of the special subjects.

The Merchandising department of the Eastern High School of Commerce, Toronto, which had not been operating during the war years, has been re-organized with a promising class in Grade XI. The Department, in co-operation with the Distributive and Retail Trades, is encouraging merchandising courses and departments in the High Schools of Commerce and larger commercial departments.

Manual Training

The number of Manual Training and General Shop centres in Ontario is making it impossible for one person to inspect all the schools each year, and eventually consideration will need to be given to the appointment of another inspector. Generally speaking, the standard of student work is showing improvement in these classes. In spite of war conditions, General Shop work is expanding throughout the Ontario school system. Local inspectors have been urged to include the Manual Training centres in their tours of inspection, and this has done much to co-ordinate Manual Training with the other subjects of the curriculum. Due to scarcity of metals, it has been found necessary to increase instruction in woodwork and to introduce the extensive use of plastics. While it is always desirable to explore new fields, it is definitely not the intention to abandon metal work entirely. The departmental inspector has made it a habit to meet with the various groups of Manual Training instructors on the occasion of his annual visits. This has had the desirable effect of helping to unify the work throughout the Province.

During the past year, the Manual Training Bulletin, which is published twice a year, has shown great improvement and is rendering a needed service in this field.

Home Economics

A growing interest in the subject of Home Economics is noted in the urgent appeals of school boards for direction in introducing the course into their schools. In spite of curtailment in necessary equipment and the difficulty of obtaining qualified teachers, an attempt is being made to meet these requests. Home Economics rooms which have been equipped in the last five years as general-purpose homemaking rooms have been so homelike in their arrangements and attractive in colour harmony that principals and school boards have been inspired to extend the principle of more attractive surroundings to classrooms and corridors.

The shortage of teachers has continued to be felt during the past year. This has been due partly to marriage of teachers, to enlistment in the armed services, and to the small number of Home Economics teachers in training. Large salaries offered in industry have greater appeal than the small salaries of teachers. However, it is gratifying to note that an increased number of young women are preparing to teach Home Economics. The supply may soon be sufficient to meet the demand.

The Home Economics staffs are to be commended for their work during the year. The standard of instruction and the contribution of teachers and pupils to the war effort have been exceedingly well maintained.

In the organization of Home Economics classes in schools, a feature which has been overlooked is the provision of some instruction for boys in nutrition, the preparation of food, selection and care of clothing, and family relations. Several very successful classes have shown the desirability of offering this type of instruction.

Improvement in the practice of good nutritional habits of school pupils is noted. Attention to this is being encouraged through instruction and more emphasis on the school lunch. In a number of schools either a complete noon lunch or a supplement to that brought from home is being provided.

Handicrafts

For some time public opinion has been expressed in favour of the provision of training in handicrafts in both urban and rural centres with the object of occupying the leisure time and perhaps supplementing the income of local residents. It is apparent that any programme of this kind which would result in developing Ontario crafts of a distinctive nature would be worthwhile. Efforts are being made to encourage boards to extend the activities of the schools to provide leadership for adults, particularly in evening classes, in this growing occupational field.

Classes are favoured in the preparation, dyeing, designing and manufacturing of textile fibres; the preparation, cutting, designing and fabrication of leather goods; the designing and construction of wood and metal articles; and any other occupational activity which might be considered under the heading of handicrafts.

The Vocational Regulations make provision for the extension of courses of this nature, and it is suggested that the High School Regulations be amended to permit boards to introduce such courses and to employ uncertificated persons under temporary permits for this special type of instruction. Any classroom, library, shop or laboratory would provide suitable accommodation; and additional equipment could be purchased for either high schools or vocational schools under the provisions of the proposed new grant scheme.

School boards and Advisory Vocational Committees are asked to give consideration to the needs of their respective school districts, and to make investigations with the object of learning what assistance may be given in this growing field of community service.

Part-time Training in Industry

As indicated in previous reports, industry is interested in the possibilities of training pupils in their plants concurrently with school attendance. In my last report, particulars were given of an experiment which is being tried in Toronto and Hamilton whereby one-half of a class of boys alternates during a given period between the school and certain plant shops. This method of training has shown considerable promise in the United States and is being watched with keen interest by both educationists and industrial management in this country. In my next report, I hope to be able to determine in some measure the potential value of the experiment and to make recommendations regarding the provision of wider facilities or otherwise as the situation may require.

Provincial Institute of Mining

Progress is being made in the acquirement of the Haileybury School of Mines for the purpose of establishing the first Provincially-owned technical institute in the Province. Plans are being evolved and regulations prepared to set up the necessary organization under the provisions of The Vocational Education Act. At present it is proposed that the facilities of the institute be made available to regularly enrolled residents of the community and also for discharged members of the armed forces provided a sufficient number to form a class apply for admission. Information to this effect has already been conveyed to the Federal authorities. It is proposed that the management and control of the Institute be in the hands of a board representing the Provincial departments of education and mining, with the assistance of an Advisory Committee composed of members representing every branch of the mining industry. It is hoped that

this school, which is designed to provide instruction for foremen and technicians in the mining industry below University Engineering standards but in advance of the training given in existing vocational schools, will be the precursor of similar institutions offering courses in such projects as textiles, plastics, electronics, tool-and-die making, radiography, a variety of synthetics, industrial chemistry, printing and lithography, and other scientific and engineering studies which are bound to come into considerable prominence in post-war world trade and commerce.

The Training of Teachers

The dearth of teachers has made it increasingly necessary that additional teacher-training facilities be provided for the practical subjects of the curriculum. With the closing of hostilities, it is felt that a wide demand will arise for the extension of General Shop Work for boys and Home Economics for girls in many of the secondary schools of the Province. The plans recently approved for re-opening the training college for technical teachers in Hamilton next fall to provide facilities for obtaining the vocational ordinary certificate and the Intermediate Manual Training certificate, together with summer courses to allow teachers to qualify for the Elementary Manual Training and Vocational Principals' certificates, will go far to remedy a situation which is now causing grave concern.

With the reopening of the college, an attempt will be made to re-organize the methods of training in such a manner that members of the provincial inspection staff will assist from time to time in the training programme. A co-operative plan, as between the schools and the training college, is envisaged whereby teachers-in-training will spend more time in practice teaching in different types of schools, and outstanding teachers within reach of the college will assume a greater responsibility in the scheme of teacher-training.

Equipment From Crown Industries

Efforts are being made to secure for the use of vocational schools some of the equipment of Crown industries which is no longer required for war purposes. The replacement of machines and bench-tool equipment placed at the disposal of the Federal Government for the training of war workers has become extremely necessary, and there would seem to be no good reason why schools should not be given a measure of priority in the acquirement of such equipment. Lists of usable items have been forwarded to Ottawa, but up to the present no satisfactory progress has been made in forwarding a plan that would enable schools to participate in the distribution of Federal War Assets without charge.

After-War Trends

In addition to the plans being made to co-operate with the Dominion Government in the rehabilitation of service personnel and persons discharged from war occupations, greater efforts will be necessary to provide training for the 95 per cent. of our elementary and secondary school population which, for various reasons, fails to reach higher institutions of learning. Instruction in citizenship must be ensured through the medium of Social Studies, Cadet work, and training in Physical and Health Education; trade apprenticeship must be extended; technological training must be expanded to meet the needs of a definitely scientific post-war world. School buildings and equipment should be utilized more freely to serve the community in which they are situated. It is obvious that in the new world that is shaping more and more time will be available for self-

improvement and recreation. This leisure will provide opportunity for adults and young people to take advantage of any programme which may be undertaken by the local educational authorities. The schools might well take the lead in providing study groups, handicraft classes and recreational facilities which would have the affect of enriching the lives of young and old alike.

F. S. RUTHERFORD,
Director of Vocational Education.

To meet the problem caused by wartime shortage of teachers:

- (1) in 1940 and thereafter applicants were regularly admitted to Normal School on eight of the required nine Upper School papers. 641 have so entered during the past five years.
- (2) in 1943 applicants were admitted on seven, and in 1944 on five Upper School papers on condition that if successful they would be granted Deferred First Class certificates until the additional Upper School papers had been completed. 205 have so entered during the past two years.
- (3) in 1944 a First Year Normal School Summer Session of six weeks was established to which were admitted applicants holding at least full Middle School standing. 620 attended the London and Toronto centres of whom 572 were granted Deferred Second Class certificates valid for one year. Attendance at the Second Year Normal School Summer Session in 1945 or at a January to June session of the Normal School will enable the holder of a Deferred Second Class certificate to obtain a regular Interim Second Class certificate.

At the present time (Feb. 9th) 346 Letters of Permission have been issued to unqualified teachers of whom 222 had teacher training in other provinces or in earlier times. Last year at this time 589 Letters of Standing had been issued.

Medical Inspection of Training Schools

All applicants to Training Schools are required to undergo a medical examination before they are finally accepted. In 1937 seventeen applicants were rejected; in 1938 twenty-seven; in 1939 twenty-six; in 1940 thirteen; in 1941 seventeen; in 1942 eight; in 1943 nine; in 1944 fifteen. Applicants suffering from physical handicap of a less aggravated nature are permitted to enter on signing waiver to claims for disability pension under the Teachers' and Inspectors' Superannuation. In 1939-40 two signed waivers; in 1940-41 seven; in 1941-42 thirty-eight; in 1942-43 forty-six; in 1943-44 fifty; in 1944-45 sixty.

Practice Teaching—Normal Schools

In the Normal Schools practice teaching is carried on according to three methods: (1) Each student teaches a minimum of 20 lessons in graded and ungraded schools under competent and experienced critic teachers. The first five are prepared under supervision of the Normal School Masters in order that a reasonable degree of success may be obtained and confidence inspired. The remaining fifteen constitute the basis upon which the students' practice teaching is judged. (2) In the regular rural practice schools a student teacher takes charge of the whole school for one hour instead of teaching a single lesson to a single class. (3) During the latter half of the term students are assigned four weeks of continuous observation and practice teaching, two in rural schools and two in graded schools taking full charge of the school for half of each week under the supervision of the teacher.

The average cost of practice teaching per student is \$80 per annum. This constitutes the major variable cost since it increases or decreases directly with the enrolment.

Exchange

In September, 1944, Mr. F. Smitheram, Master in the Peterborough Normal School, exchanged duties for one year with Mr. O. Birkin, Inspector, Lennox and Hastings South; Mr. F. C. Biehl, Master in the Stratford Normal School and Mr. G. H. Dobrindt, Inspector, Waterloo No. 1, returned to their respective duties after one year of exchange.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the Province:

H. G. Martyn, B.A., D.Paed., Principal of the Stratford Normal School retired August 31st, 1944. Dr. Martyn was born in Durham County where he

received his early academic and professional training. After teaching in that vicinity for three years he graduated from the University of Toronto and the Ontario Normal College, Hamilton. Previous to his appointment to the staff of the Stratford Normal School in 1915 he served as master in Forest High School and as Head of the English Department in the Kitchener and Waterloo Collegiate. In 1934 he was appointed Acting Principal and in 1938 Principal of the Stratford Normal School. Dr. Martyn is the author of several treatises on English Grammar, one of which constituted his thesis for the degree of Doctor of Pedagogy.

T. E. Clarke, B.A., B.Paed., Master in the London Normal School retired in October, 1944. Mr. Clarke was born and received his early education in Toronto. After graduating as gold medalist from the Ottawa Normal School he taught in Manitoba and was appointed to Ottawa Public School staff in 1898. He graduated from Queen's University in 1906 and received the B.Paed. degree in 1908. After serving as principal of two Ottawa schools he was appointed to the staff of the London Normal School in 1918.

A. J. Madill, B.A., D.Paed., Master in the Peterborough Normal School retired August 31st, 1944. Dr. Madill was born in Pickering Township. He received his early academic education in the Springfield Public School and the Aylmer and Woodstock Collegiates and his professional training at the Ingersoll Model School and the Normal College, Hamilton. Later he graduated from McMaster and Toronto Universities. After teaching in the Secondary Schools of Paris, Orillia, Niagara Falls and Fort William he was appointed to the staff of the Peterborough Normal School in 1918. Dr. Madill is the author of "Nature Study", and "The History of Agricultural Education in Ontario".

A. L. Lakie, B.A., B.Paed., Master in the Ottawa Normal School was appointed to the High School Inspection staff, July 1, 1944. L. L. Skuce, B.A., B.Paed., Inspector, Halton, was transferred on exchange for one year to succeed Mr. Lakie.

Miss Dorothy Ryan, B.A., B.Paed., was appointed to the staff of the Ottawa Normal School September 1, 1944 in succession to Miss Clifford.

Mr. Leo Copp, B.A., B.Paed., Public School Inspector, Peterborough East, was appointed to the staff of the Peterborough Normal School September 1st, 1944, in succession to Dr. Madill.

On September 1, 1944, Lt.-Col. S. A. Watson, B.A., was appointed Principal of the Ottawa Normal School in succession to Mr. F. S. Rivers. Previous to his appointment Mr. Watson had served on the staff of the Toronto Normal School and as Public School Inspector for Simcoe South. He was associated with the late Thornton Mustard in the preparation of the Programme of Studies for Public and Separate Schools, is a veteran of the first World War and during the present war was second in command of Army Personnel.

On September 1, 1944, Flight-Lieutenant Henry Bowers, M.A., D.Paed., was appointed Principal of the Stratford Normal School in succession to Dr. Martyn. Previous to his appointment Dr. Bowers had served as Principal of Fergus High School, Master in the Ottawa Normal School, Principal of four Summer Courses in Education and before his present appointment was serving as Education Officer with the R.C.A.F. Dr. Bowers is author of the textbooks General Science I and II, which are widely used in Ontario and other provinces.

Survey

In 1941-42-43-44 inspectors of elementary schools throughout the Province were requested to report on the teaching efficiency of Normal school graduates during the first year of service. In 1944 they were also asked to report on the efficiency of 1940 graduates during the fourth year of service. Altogether 2,769 reports on first year experience and 265 on fourth year experience were received.

The body of the questionnaire form was identical with that of the cut with the addition of six grading columns headed respectively—Outstanding, Good, Average Plus, Average Minus, Poor, Bad. In summarizing returns each item on the questionnaire graded as outstanding was valued 3; graded as good, 2; as average plus, 1; as average minus, -1; as poor, -2; as bad, -3. The sum of the gradings on a sheet was taken to represent the relative efficiency of the teacher concerned. Of the 2,769 beginners 2,064 or 74.5 per cent. were graded plus; 32 or 1.2 per cent. neutral; 673 or 24.3 per cent. minus. Of the 265 fourth year teachers 227 or 85.6 per cent. had positive scores; 2 or .18 per cent. neutral, and 36 or 13.6 per cent. negative.

Each year graphs of the results were compiled. Scores for each item on the form were totalled for each school and again for all schools and divided by the numbers reported on respectively for that item, the number varying from item to item according to the grade or grades of which teachers had charge. The range of quotients so obtained is indicated by the decimal numbers at the top of the cut. Because of a slight change in the form of the questionnaire during the final two years it was found necessary in compiling the general four year graph to mathematically equate the findings of the first two years with those of the last two.

Numbers at the head of the table and distances among graphs do not purport to measure anything in mathematically defined units. Relative positions and spacings and more particularly the conformity existing among the five graphic profiles are significant.

Some years back the inability of Normal school graduates to handle and manage their schools was a matter of common criticism. The superior score obtained on the three managerial items is attributed to (i) the system of exchanging services between Normal school Masters and Inspectors, (ii) the four weeks of continuous observation and practice teaching in the field, (iii) the substitution in rural schools of the "hour in charge" for the single practice-teaching lesson, (iv) the study of school management from directed observations of actual situations rather than from a text or texts.

In all five graphs social studies are conspicuously and consistently represented as the best-taught course on the school programme. The repeated and practically consentient judgments of Inspectors throughout the Province cannot easily be ignored. In social studies more than in any other subject the teacher is free to select subject matter and to contrive method according to the real needs of the pupils and circumstances of the school rather than according to the rigid artificial requirements of text-books, examinations and scrappy information tests. Obviously teachers have responded to the trust. Slave-mindedness can only beget slave-mindedness. The keystone in any system of education for democracy must be the free assumption of responsibility by adequately trained teachers.

In 1939-40 the Otis Self-Administering Test of Mental Ability (Higher Examination, Form A) was given in all schools. The median I.Q. for all students

was 113. The Dominion Group Test of Intelligence (Advanced Form A) was used during the remaining three years. This gave median I.Q.'s of 110, 111 and 110 respectively. The Mathematical Ability Examination was administered during all four years and gave a constant median M.A.Q. of 111. Ruling out of consideration second class candidates of the University of Ottawa Normal School and certain candidates admitted to all schools on lower requirements of entrance during the years '40-'41, '41-'42 and '42-'43 both the median I.Q. and the median M.A.Q. of candidates regularly admitted to the First Class course is approximately 113.

Through the co-operation extended by Professors Long and Jackson, Department of Educational Research, Ontario College of Education, each year tables were calculated of correlations existing among the items: Intelligence Quotient, Mathematical Ability Quotient, Examination Mark, Practice-teaching Mark, and Teaching Efficiency during the first year (in case of graduates of 1939-40 also the Teaching Efficiency during the fourth year).

TABLE OF CORRELATIONS OF 1942-43 GRADUATES FROM ALL SCHOOLS.

Normal School students as a body are a highly selected group with intelligence quotients ranging closely about a median of 113. Within that narrow band, however, intelligence would not appear to be a major factor of success either in the school or in the field, either during the first year of teaching or during the fourth. The following suggestions have been advanced to account for this lack of correlation: (i) since bright and mediocre students are alike required to spend five years in completing the secondary school course, the more highly intelligent pupils because of the easy load placed upon them fail to develop good work habits. In this respect it is noted that a pupil with an I.Q. of 130 has a higher mental age on entering secondary school than a pupil with an I.Q. of 100 has on leaving, (ii) all pupils but particularly bright students in both secondary and normal schools are over-conditioned to book-learning and word-thinking and on graduation find themselves powerless to deal with real situations or to make sound judgments on factual evidence, (iii) the profession of teaching as currently practised does not make high demand on initiative and intelligence. Teachers bridled by rigid programmes and bitten by mechanized tests find little

use for their heads. Mathematical ability shows little correlation with success in the normal school or in the field until the fourth year of teaching.

The steady improvement in the prognostic reliability of practice-teaching evaluations may be ascribed to the greater attention being paid from year to year to the essentials rather than to the superficialities of teaching and to the ability of students to manage as well as to instruct classes. While the correlation of practice-teaching with success in the field is lower than one would wish, it must be remembered that the mathematics of correlation are exceedingly rigorous, demanding a strict accountancy of each individual. Viewed in larger perspective the results are more heartening. The following table summarizes the results of the first three surveys:

Practice-teaching Mark	Positive Score in Teaching Efficiency
700 or over.....	89 per cent.
650 - 699.....	73 per cent.
600 - 649.....	44 per cent.

Of 21 failures reported in the 1941-42 survey as teaching on Letters of Standing 19 had negative and usually very low scores, one a slight and one a definite positive score. In connection with this difficult problem of prognostication it is interesting to note that the correlation of the normal school practice-teaching mark with teaching efficiency during the fourth year (.18) is exactly the same as the correlation of the inspectors' valuation during the first year with their valuation during the fourth. All of which goes to show that the training of an efficient teacher is a prolonged affair in which the normal school is but an intermediate step.

The results of these surveys also have a bearing on the question of teacher selection. The records of the normal schools go to show that each year students enter who are regarded at first as exceedingly poor prospects but who by dint of earnest application attain creditable standing by the end of the session and are usually graded as successful during their first year of teaching experience. In no educational year is change and maturation of personality so marked as in a normal school. There exists weighty evidence to the effect that any young man or woman who is reasonably intelligent, reasonably cultured, reasonably social-minded and sufficiently healthy mentally and physically to pass the medical examination can succeed as a teacher if whole-hearted interest is devoted to the work. The present entrance requirements of standing in nine Grade XIII papers and a successful medical examination constitutes a fairly effective screen. The candidates who entered on the wartime requirement of eight instead of nine Grade XIII papers have been about 10 per cent. less successful in normal school and about the same per cent. less successful in the field than those who had completed the full entrance requirements. The distinction is yet more marked in case of seven-paper entrants. If a Normal school staff after a year of careful observation and an inspector in his visits during a teacher's first year are unable to forecast with any marked degree of reliability the success of a teacher during the fourth year it is to be hoped that in this democratic nation no young man or woman strongly ambitious to become a teacher and who proves his fitness in open competition will find himself debarred by reason of any dictatorial, specious, but unproven, method of selection.

The influence of no other educational year is more humanizing and maturing in its effect than that of the normal school. Even though a graduate chooses to

follow another vocation he has received a training for parenthood, social understanding and the assumption of responsibility which will always stand him in good stead. The granting of credit for normal school training by the universities would seem but just and fair and would go far to relieve the tensions due to over-supply and shortage of teachers.

The Normal schools of the Province have been furnished from year to year with the reports on their students from the inspectors and with summaries of findings and have benefited largely and in many ways from these surveys. Appreciation is expressed to the Public and Separate School Inspectors and to Professors Long and Jackson whose generous co-operation has made this study possible.

H. E. AMOSS,
Director of Professional Training.

Toronto, June 21st, 1945.

SCHOOLS ATTENDED BY FRENCH-SPEAKING PUPILS

Teachers' Training and Qualifications

In 1943-44 there were 133 teachers-in-training at the University of Ottawa Normal School, 27 of whom were enrolled in the First Class course, and 106 in the Second Class course. As a result of the term and final examinations 25 students were awarded First Class certificates, and 100 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1944, and the progress made in this regard since 1929:—

	1929	1939	1941	1942	1943	1944
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,390	1,438	1,441	1,448	1,484
Number of above teachers holding I or II Class certificates.....	273	1,271	1,307	1,274	1,272	1,297
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	91.43	90.89	88.41	87.85	87.39

The slight decrease since 1941 in the percentage of First and Second Class certificated teachers is due to the abnormal situation caused by the war.

Approximately 150 new teachers are required each year to replenish the teaching staffs. Although the number of Normal School graduates has fallen short of these requirements for the past three or four years, it is confidently expected that, with the ever larger number of French-speaking students reaching the higher grades of the secondary schools and the increasing teachers' salaries, there will soon be an adequate enrolment of teachers-in-training at the University of Ottawa Normal School.

Secondary School Classes

In the following table are shown the enrolment totals of French-speaking students in the secondary schools of the provincial system for the period 1938-1944:—

Year	Grade					
	IX	X	XI	XII	XIII	Total
1938.....	327	182	155	143	32	839
1939.....	392	235	203	130	67	1,027
1940.....	440	310	172	132	48	1,102
1941.....	584	336	178	119	32	1,249
1942.....	531	336	189	101	30	1,187
1943.....	516	312	205	114	22	1,169
1944.....	644	384	215	142	33	1,418

The following table shows the number of French-speaking students enrolled in December, 1944, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

SCHOOL	GRADE					
	IX	X	XI	XII	XIII	Total
Alexandria High.....	23	7	4	3	1	38
Cornwall Collegiate and Vocational.....	86	34	14	6	140
Embrun High.....	33	20	12	12	77
Espanola Continuation.....	7	6	1	14
Hawkesbury High (for Fr.-sp. pupils).....	45	36	28	16	125
Hearst High.....	5	6	3	2	16
Iroquois Falls High.....	21	7	10	38
Kapusking High.....	24	13	9	4	50
Kirkland Lake Collegiate and Vocational.....	27	17	1	45
Lafontaine Continuation.....	12	13	7	3	35

Vankleek Hill Collegiate.....	13	7	9	2	31
Totals.....	644	384	215	142	33	1,418

NOTE:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were recently established in these schools.

There are, besides the 1,418 students reported above, some 3,200 Ontario French-speaking students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, Table No. 6 (A) (i), page 151, of this report, and in private schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting, the teachers' recommendations in respect to pupils who are candidates for the Secondary School Graduation Diploma.

The following are excerpts taken from a report on the advanced French classes of the secondary schools submitted by Mr. Henri Lemieux, B.A., B.Paed., High School Inspector:—

"All of the advanced French classes, which are conducted in twenty-two of the secondary schools of Ontario, were inspected during the year and several of them were visited a second time toward the end of the school year.

In September, 1944, advanced French classes were introduced in the Lafontaine Continuation School and in the Iroquois Falls High School. These classes will fulfil a long-felt need and will be a distinct advantage to the French-speaking pupils of those communities. The new classes were visited early in the year and were found to be operating quite satisfactorily.

As indicated in the preceding table, the total enrolment in the advanced French classes in December, 1944, was 1,418, distributed in the different grades as follows: 644 in Grade IX, 384 in Grade X, 215 in Grade XI, 142 in Grade XII, and 33 in Grade XIII. This represents an increase of 249 over the previous year. The largest increase occurred in Grade IX where the enrolment jumped from 516 last year to 644 this year. This is an encouraging sign which holds good promise of a larger enrolment in the other grades in succeeding years. It will be noticed that there is a rather large drop in enrolment from grade to grade. This is due partly to the fact that in certain schools the pupils, after Grade X, pass on to the Vocational or Commercial classes in which advanced French is

not taught, partly to the fact that in certain other schools the advanced French courses were recently established, and partly to the fact that some pupils leave school when they reach the age of 16. Constant efforts are being made to improve this situation and to convince both pupils and parents of the importance of complete secondary studies.

The work of the advanced French classes is proceeding satisfactorily. The standards of achievement and proficiency in advanced French are not yet of a sufficiently uniform character in the different schools throughout the Province. This is a goal which is gradually being attained through the use of adapted and more uniform methods of teaching. The need for a greater degree of uniformity in standards is felt more perhaps in the teaching of French Composition. The ability of the pupils to express their thoughts effectively and correctly in written form varies considerably from school to school. This matter is given close attention and means are being taken to obtain gradual and steady improvement.

Several of the school libraries contain a sufficient number of French books suited for the needs of the French-speaking students in supplementary and general reading. A number of libraries, however, do not yet contain an adequate number of such books although much progress has been made in that line in the past few years."

Elementary Schools

Age-Grade Distribution of Pupils

The tables on pp. 151-159, present a compilation of the French-speaking School Inspectors' Annual Age-Grade Reports for May, 1944.

Grade-Enrolment of Pupils in Elementary Schools

The following comparative table, for the years 1938, 1942, 1943, and 1944, shows the marked progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking pupils in all elementary schools:—

Separate and Public Schools

Grade	1938		1942		1943		1944	
	Num- ber	Per cent	Num- ber	Per cent	Num- ber	Per cent	Num- ber	Per cent
I.....	11,216	23.66	7,648	17.39	7,375	17.22	7,540	17.13
II.....	6,992	14.75	6,245	14.20	6,200	14.47	6,056	13.76
III.....	4,974	10.49	5,979	13.59	5,831	13.61	6,026	13.69
IV.....	5,548	11.71	5,842	13.28	5,514	12.88	5,678	12.90
V.....	5,828	12.30	5,275	11.99	5,292	12.36	5,104	11.59
VI.....	4,775	10.07	4,528	10.30	4,607	10.76	4,783	10.86
VII.....	3,764	7.95	3,747	8.52	3,560	8.31	3,837	8.71
VIII.....	2,913	6.15	3,191	7.25	3,112	7.27	3,315	7.53
IX.....	727	1.52	795	1.81	768	1.79	921	2.09
X.....	443	.93	471	1.07	398	.93	577	1.31
Auxiliary.....	217	.46	265	.60	171	.40	191	.43
Totals.....	47,397	100.00	43,986	100.00	42,828	100.00	44,028	100.00

NOTE:—The grade-enrolment for the year 1938 comprises some English-speaking sections of mixed schools in Northern Ontario which, prior to 1942, were included in the French-speaking Inspectors' Annual Age-Grade Reports.

A study of the above statistics reveals that: (1) The downward trend, which has prevailed for the last few years in the school enrolment, appears to have reached its lowest point in 1943; (2) The increase of 1,200 pupils, in the 1944 total enrolment over that of 1943, is due chiefly to the retention of a larger number of pupils in the higher grades of the elementary schools; (3) The percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.53, in 1944.

A Serious Problem

Although creditable results have been achieved in recent years, through the relentless effort of French-speaking teachers and inspectors, in bringing about a more normal promotion of the pupils from grade to grade and in persuading a larger number of boys and girls to complete the elementary school course, it is evident from the figures given below that much progress remains to be made in that regard.

ENROLMENT OF BOYS AND GIRLS IN GRADE I AND GRADE VIII CLASSES, MAY, 1944.

	Grade I		Grade VIII			
	Boys	Girls	Boys		Girls	
			Number	Per cent	Number	Per cent
Rural Schools.....	1,782	1,522	567	31.82	770	50.59
Urban Schools.....	2,219	2,017	923	41.59	1,055	52.31
All Schools.....	4,001	3,539	1,490	37.24	1,825	51.57

NOTE 1:—The percentages given above show the relation between Grade I and Grade VIII enrolments.

NOTE 2:—These figures are taken from Table No. 6 (A) (ii) and (iii), pp. 152 and 153 of this report.

Thus, it is shown that, out of 4,001 boys enrolled in the Grade I classes of rural and urban schools, only 1,490, or 37.24 per cent., are found in the Grade VIII classes. The loss is the greatest in the rural schools, where the Grade VIII enrolment is only 31.82 per cent. of the Grade I enrolment. Although the girls are completing the elementary school course in a relatively larger number than the boys, it is shown, however, that nearly half of those who begin school do not reach the Grade VIII level.

It may be argued, of course, that in order to derive exact conclusions in a study of this kind the 1937 enrolment figures for the Grade I classes should be compared to those of 1944 for the Grade VIII classes. This is impossible, however, because the 1937 figures as well as those for 1938 do not give the actual Grade I enrolment, due to the large number of repeaters who were found at that time in the Grade I classes. It was seen in a preceding table, on page 41, that the Grade I enrolment for the year 1938 was 11,216 pupils. Obviously, this number of pupils which included some 4,000 repeaters cannot be used as a basis. The 1944 enrolment of 7,540 pupils in Grade I classes appears quite normal and serves as a fairer basis for these calculations.

The French-speaking inspectors and Normal School masters, with whom this problem was discussed during the year, were asked to draw it to the attention of their teachers and pupils. A concerted effort is being made by all concerned to determine the main causes of this fast dropping enrolment in the senior grades of the elementary school and to find adequate means of remedying the situation. This is particularly urgent in the case of the boys attending rural schools. While home conditions and the need of help on the farm may account in some measure for early retirements from school, it may be found also that the present programme of studies and the school atmosphere as a whole should be modified to some extent in order to retain the boys' interest in school work. It is hoped that marked progress will be achieved in this connection in rural and urban schools within the next few years.

Pupils' Proficiency in French and English

In this section of the Minister's Report for the year 1937, the following words were written:

"The importance of a careful and systematic training of the children in the use of their mother-tongue by means of frequent and well selected oral and written exercises cannot be stressed too strongly throughout the elementary school course and more particularly in the lower grades of the school. Progress in the other subjects of study depends largely upon the pupils' proficiency in speaking, reading, and writing their mother-tongue clearly and accurately."

New books in French, albeit few in number because of war conditions, were since authorized or recommended for use in schools attended by French-speaking pupils. Other text-books were thoroughly revised. A more natural approach to French primary reading by means of appropriate oral language exercises, and the holding of a province-wide annual contest in the schools gave rise to a striking advance in the pupils' attainments in their mother-tongue. In brief, marked progress was made in French. As was expected and desired, a corresponding improvement in oral and written English was also observed from year to year in a large majority of the schools attended by French-speaking pupils. The few remaining exceptions will no doubt disappear with the employment of properly qualified teachers as soon as these are available for all the schools.

That there has been substantial progress made in English, not only in areas of mixed English-speaking and French-speaking population, but also in purely French-speaking communities of Ontario is evident from the examination results and the regular reports received from the inspectors. The following excerpts are indicative of the advance made. One inspector in Northern Ontario writes:

"In the course of the past six months the standing of the pupils in the various school subjects has been ascertained by means of a variety of oral and written tests. I have given those tests myself to gauge the pupils' proficiency in both oral and written English particularly. Those tests took different forms: English conversation (names of familiar objects, actions, qualities and a few relational words) in Grade II; reading in Grade III; reading in Grades IV and V accompanied by oral tests in comprehension; oral and written tests in composition and written tests in spelling in the senior grades along with written tests in comprehension. This was the basis adopted by the Committee of Enquiry in 1925-27.

The urban schools are still ranking among the best of my inspectorate, but, where in 1927 not a single rural school of this area was singled out as doing better than average work in English, the year 1944 witnesses gratifying results indeed in the very great majority of the rural schools of my inspectorate.

The regular gradation in the transition from French to English as the pupils advance in the classes is well applied and results in natural transition from the known to the unknown. Better preparation in the junior grades leads to a wider scope of knowledge, vocabulary, etc., in the mother-tongue, and, from there, to English in all its aspects. The holding of regional teachers' meetings where model lessons in English are given by French-speaking teachers to French-speaking pupils is by no means a negligible incentive."

An inspector located in Eastern Ontario reports as follows on one of his schools:

"This school is located in an entirely French-speaking area where the pupils have no contact with English-speaking people. The standard of proficiency in the French subjects is satisfactory. The pupils are trained in good speech habits in their mother-tongue. This year the pupils show a better comprehension of English; they express themselves more fluently in complete sentences and they possess a larger vocabulary. This progress in English may be attributed to a good training in the lower grades in the use of the pupils' mother-tongue and to a systematic teaching of English conversation."

Another inspector from the Ottawa Valley states:

"Despite the many exigencies to which all schools have been subjected during these war years, the progress made in both the French and English language subjects has, on the whole, been most satisfactory.

The greater emphasis that is now being placed on French conversation and oral expression in the primary grades has not only paved the way to more rapid progress in intelligent reading in the immediately successive grades, but it also has served to prepare these younger children to a more natural and enjoyable approach to English conversation in the next higher grades.

"Evidence of such improvement in both the English and French language subjects is noted in practically all schools. It is particularly visible, however, in those schools where there has been a fair permanency in the teaching staff. . . ."

There is no desire, of course, to create the impression that perfection has been reached in the educational development of schools attended by French-speaking pupils. While there is still room for improvement, it seems only fair to pay a tribute at this time, both as a commendation and an incentive, to the French-speaking teachers and inspectors for the successful effort which they have made generally throughout the province to advance the pupils' proficiency in the languages and in the other subjects of study.

Provincial Contest

ELEMENTARY SCHOOL SECTION

The finals of the seventh annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 13th, 1944. After winning preliminary tests in their own schools and inspectorates, twenty-four contestants—one boy and one girl from each of the twelve French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships by L'Association canadienne-française d'Éducation d'Ontario, were as follows:—

1st boy: Fernand Labelle, 14, St. Joseph School, Sturgeon Falls;

1st girl: Micheline DesRoches, 12, St. Pierre School, Ottawa;

2nd boy: Guy Gougeon, 12, St. Jean-Baptiste School, Ottawa;

2nd girl: Rachel Piché, 12, St. Charles School, Timmins.

SECONDARY SCHOOL SECTION

The second province-wide contest among the Grade XII and Grade XIII French-speaking students was held during the year. Preliminary contests were held in four regional centres and were followed by a final competition in Ottawa at the same time as the elementary school contest, on April 13th. The two provincial winners, who were also awarded valuable scholarships by L'Association canadienne-française d'Éducation d'Ontario, were the following:—

Rolland Lavigne, 17, Rockland High School;

Pauline Demers, 17, Notre-Dame du Rosaire Convent, Ottawa.

Correspondence Courses

In June, 1944, ended the second school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. Thus far, the lessons for pupils of Grade I and Grade II only were available.

In September, 1944, the courses for French-speaking pupils of Grade III and Grade IV were added and the enrolment during the school year 1944-45 was 266 pupils, divided as follows: Grade I, 84; Grade II, 95; Grade III, 47; Grade IV, 40. A second French-speaking teacher, Miss Marie-Anne Caron, was appointed to the Correspondence School staff.

The lessons for pupils of Grade V and Grade VI, which have been prepared by Inspector Adélarde Gascon, M.A., B.Paed., will be ready for distribution in September, 1945.

It is evident from the reports received that this service is highly appreciated by the French-speaking population of Ontario. Besides rendering invaluable service to a large number of isolated families and to sick or crippled children, who, otherwise, would lack schooling facilities, the development of these correspondence courses will prove of great value in revising the programme of studies and in helping to prepare the necessary text-books for elementary schools attended by French-speaking pupils.

"L'Association de l'Enseignement Français de l'Ontario"

The provincial association of French-speaking teachers and inspectors held its fifth annual convention in Ottawa, on April 13th and 14th, 1944. Dr. J.-Ovide Proulx, principal of Rockland High School, was elected president for the year 1944-45.

"L'Ecole ontarienne", the Association's school magazine, presented in its three regular issues of the year a variety of interesting articles on the theory and practice of pedagogy.

In June, 1944, l'Association de l'Enseignement Français de l'Ontario was incorporated into the newly-formed Ontario Teachers' Federation.

Establishing a French Basic Vocabulary

At the annual conference of French-speaking inspectors and Normal School masters, held in the spring of 1944, it was decided to assemble and rate approximately 5,000 French words which would be considered essential, or at least useful, to a Grade VIII French-speaking pupil. This basic list of French words, once properly classified for the various grades of the elementary school, could serve as material for the French readers, spellers, composition books, etc., which might be developed for schools attended by French-speaking pupils.

The group was divided into eleven committees, and each committee requested the assistance of grade teachers to examine approximately 100 pages of "Le Petit Larousse Illustré". The selection of words was made by the opinions technique. All the words selected were classified into three categories, under the headings of *Classes primaires*, *classes moyennes*, *classes supérieures*, to show that they are appropriate for use in one of these three units of the elementary school.

To date this first part of the work has been completed. It is proposed now to have the whole list of words scrutinized anew by a committee of experienced teachers, who will also examine it in the light of similar word lists which have been developed in France and in Belgium.

Due to the fact that this project is breaking new ground in Ontario French education, it is felt that sufficient time and attention should be devoted to it in order that the results may be accurate and valuable. Normal School masters, inspectors and teachers are to be highly commended for their splendid collaboration. It is confidently expected that all concerned will feel richly rewarded when the proposed French basic vocabulary will be available for classroom work and for the preparation of text-books.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, July 7th, 1945.

AGRICULTURAL CLASSES

Elementary Schools

Reports for the school year ending June 30th, 1944, were received from 3,210 schools of which 482 were urban. Grants as a refund of expenditure were claimed by 2,637 schools as compared with 2,596 last year. School gardens were reported from 1,110 schools as compared with 871 last year. These facts indicate that interest in agricultural instruction is being well maintained in most inspectorates. However, it is evident when figures for 1937 are considered that there has been a marked decrease in the number of schools reporting, in the number of school gardens, and in the number of certificated teachers.

Changes in courses introduced in September 1937, in Grades I to VI and in September 1938, in Grades VII and VIII, provided that Agriculture was optional in Grades VII and VIII, instead of in Grades V, VI, VII and VIII. The courses in Science in all grades include topics in Agriculture. Hence, in many schools the optional courses in Agriculture are not now taken. Agricultural topics of the science courses are taught but no report is returned to the Department. In the interests of maintenance of agricultural instruction the optional courses for Grades V to VII had definite advantages particularly in the ungraded schools. Scarcity of labour during the war years has been responsible for the reduction in the number of school gardens. Discontinuance of summer schools since 1939 has prevented an increase in the number of certificated teachers. In spite of these difficulties, through the interest and co-operation of school boards and inspectors, nearly half the total number of elementary schools submitted reports in 1944 indicating that the importance of agricultural instruction is still recognized.

“Improvement of Rural School Grounds” is an important feature of the work in many areas. A special report from fourteen representative inspectors in the fall of 1944 showed that in 1,014 schools concerned 400 have improved school grounds and that, since 1939, 40 of these have received special awards in competition. Nearly 500,000 seedling trees from the Forestry Branch were received in 1944 for distribution to pupils for home and forestry plot planting.

The scope and effectiveness of the instruction varies greatly and is dependent on the interest and knowledge of the teacher, and the co-operation of the trustees and members of the community. In many areas where there is keen local interest the teacher with Normal School training only is doing good work. Nearly seventy-five per cent. of teachers in ungraded schools are from rural areas and they should have some knowledge of farming and farm conditions. Where there is a personal interest in the subject these teachers are giving good service. However, renewed interest and expansion of the elementary school programme cannot be expected until summer schools are again available to give teachers special training and inspiration. A book entitled “Suggestions for Teachers of Agriculture in Elementary Schools” is in preparation and when published will materially assist teachers in their work.

School Fairs were conducted in a number of inspectorates. In the districts and in some counties, separate fairs are held under the direction of local com-

Courtesy Ont. Dept. of Agriculture

mittees of teachers and trustees, the Agricultural Representative and the Inspector. In other areas a junior department is provided as a part of the programme of the local fall fair. In the fourteen inspectorates referred to in a preceding paragraph 22 separate school fairs were held. Junior Departments for school exhibits were provided at 30 fall fairs.

Secondary Schools

Agricultural Science

In the fall of 1944 Agricultural Science was taught in 27 Collegiate Institutes, 82 High Schools and 52 Continuation Schools, a total of 161, compared to 153 last year. Because of changes in teachers the subject was discontinued in two Continuation Schools. The subject was re-introduced in one Collegiate Institute and introduced in four High Schools and five Continuation Schools. Both Lower and Middle School courses were being taken in 109 schools. The number of teachers employed was 205 of whom 91 held the Specialist Certificate and 67 were graduates of the Ontario Agricultural College. Thirty-five teachers of Science were granted permission to teach Agricultural Science for the school year 1944-45. There is a definite demand for Agricultural Science in many secondary schools and the number taking the work will be increased as soon as more certificated teachers are available.

Departments of Agriculture

In addition to Agricultural Science thirty schools are now giving additional time to Agriculture under Regulations for Departments of Agriculture, (Circular Agric. 6, Part II). Under these Regulations it is provided that between fifteen and twenty per cent. of the time in Grades IX and X be given to practical subjects. Sixteen of the above schools offer the complete programme including Agriculture and Shop Work for boys and Home Economics for girls.

The increase from twelve to thirty schools in the fall of 1944 was due to the introduction of a "Revised Schedule of Grants" approved by the Minister in August and to meetings with some twenty-one school boards. Members without exception expressed approval of the plan to increase the emphasis on practical subjects in Grades IX and X.

The Regulations provide for a grant of 75 per cent. on capital expenditure in providing and furnishing an agricultural classroom and storeroom. There are also annual grants to boards where the courses are established and further grants for accommodations and experimental plots; for equipment and materials; for teachers' salaries; for work during the summer by the principal in promoting attendance and by the teacher in supervising home projects; for the provision of hot lunches; for the use of the school property as a community centre and for the co-ordination of Shop Work and Home Economics with the agricultural programme. An excellent beginning has been made in all schools in which this work was introduced. Many enquiries concerning this programme are being received and these indicate that a number of additional schools will introduce the programme in 1945.

Practical activities are stressed in the courses to a greater extent than in Agricultural Science. A colony type poultry house must be erected at the school for use in keeping laying birds during the winter and rearing chicks in the spring. One or more colonies of bees should be kept at the school. The

courses are to be developed to meet local needs. They include extension of the agricultural topics of Agricultural Science for Grades IX and X and topics related to the type of farming in the community. Special emphasis is given to practical activities during the school year. Home projects of an economic nature are stressed and visits of inspection made by the teacher during the summer months. The schools in which the department programme is taken are indicated by (D) after the name in the list of secondary schools forming a part of this report.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools and the normal schools.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4		
1914.....	264	208	56
1926.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1942.....	3,472	978	Indefinite
1943.....	3,299	871	Indefinite
1944.....	3,210	1,110	Indefinite

Figures prior to 1942 are based on the number of schools qualifying for grants. For 1943 and 1944 the figure covers the schools where the courses were taught. Grants were claimed for 2,637 of these schools in 1944.

The following table shows the certificates held by teachers engaged in the work for the years given:

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1941.....	1,956	94	236	17	2,303

1944.....	1,157	58	123	10	1,348

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 156 schools under the Regulations for Public and Separate Schools. The Lower School courses are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: General Mercer, McMurrich, Perth Avenue.

Agricultural Science was taught during the year in the secondary schools listed below: Under (a) are schools in which Lower School courses only are taken, and under (b) both Lower and Middle School Courses. Schools in which Departments of Agriculture have been established have (D) after the name:

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Runnymede, St. Marys (D), Seaforth, York Memorial. Total 11.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee (D), Orillia, Picton, Port Arthur, Renfrew (D), Scarborough, Smith's Falls, Stamford (D), Strathroy (D). Total 16.

High Schools

(a) Bracebridge, Cobalt, *Cochrane (D), Dundas, Durham, Essex, *Gore Bay, *Harriston, Markham, Maxville, Meaford, Merritton, Mount Forest, New Liskeard, Niagara, Orangeville, Port Credit, *Preston, Tilbury, Tweed, Waterford. Total 21.

(b) Alexandria, Alliston, Amherstburg, Arthur (D), Athens (D), Beamsville (D), Blenheim (D), Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville (D), Dunnville, Elmira (D), Fergus, Fort Frances, Grimsby, Hagersville (D), Haileybury, Harrow (D), Havelock, Iroquois, Kemptville (D), Kincardine (D), Kingsville (D), Lakefield, Leamington, Listowel (D), Lucan, Madoc, Markdale, Midland, Milton (D), Mitchell (D), Morewood, Nepean, Newburgh, Newcastle, Norwich (D), Norwood, Oakville, Petrolia, Port Elgin, Port Perry (D), Ridgetown (D), Saltfleet, Shelburne, Simcoe (D), Smithville, Stirling (D), Streetsville, Sydenham (D), Trenton, Uxbridge, Waterdown, Watford, Whitby (D), Williamstown, Winchester. Total 61.

Continuation Schools

(a) Ailsa Craig, Arkona, *Bath, Bothwell, *Burgessville, Chatsworth, *Clifford, Eganville, Elgin, Fordwich, Forest Hill Village, Grand Valley, *Kars, *Kinmount, Milverton, Minesing, Mount Albert, New Hamburg, Seeley's Bay. Total 19.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton (D), Drumbo, Florence, Ilderton, Inglewood, Lynden, Lyndhurst, Merrickville, Mindemoya, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, Orono, Pelham (D), Port McNicoll, Princeton, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley (D), Woodville. Total 33.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....	1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1941.....	27	82	59	168
1942.....	27	81	51	159
1943.....	26	78	49	153
1944.....	27	82	52	161

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students.

*Introduced Agriculture in September 1944.

Some time is now being given to Science and Agriculture at the University of Ottawa Normal School. Students who have taken four years of Agriculture in an approved school during their Secondary School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

Summer Schools

As mentioned previously in this report the discontinuance of summer schools has greatly reduced the number of teachers with special certificates in Agriculture with a resultant reduction in the number of schools teaching the subject. Resumption of summer school activities is desirable at the earliest possible date.

NORMAN DAVIES,

Inspector of Agricultural Classes.

Toronto, August 15th, 1945.

AUXILIARY CLASSES

Teachers' War Service

No enlistments for war service were reported in 1944. Captain George Charlton who left a Handicraft Class in Kitchener early in the war has been reported as receiving the surrender of a town in Germany. Mr. Edward Monkman has rejoined the staff of the Church Street School, Toronto, after having served with the Royal Canadian Air Force. Mr. Edgar Paquette, after returning to his opportunity class in St. Louis de Gonzague School following his discharge from the Army, accepted the position of Probation Officer to the Juvenile Court newly established in Sudbury.

Urban Organization

Surveys were conducted in accordance with instructions and at the request of the school boards in Dunnville, Kingston and Owen Sound. As a result of these surveys and those completed in previous years twenty-five new classes were opened as follows:

Opportunity Classes:	Brockville.....	2
	Callander.....	1
	Kingston.....	1
	London.....	1
	Sudbury.....	1
Handicraft Classes:	Toronto.....	7
	Hawkesbury.....	1
Hard-of-Hearing Classes:	York Township.....	1
Oral Classes:	Hamilton.....	2
	London.....	1
	Toronto.....	2
Partial Classes:	Hanover.....	1
	S.S. 5 McKim.....	1
	Kitchener Separate School..	1
Speech Correction and Lip Reading Classes:	Hamilton.....	1
	Windsor.....	1

Auxiliary Classes are set up after a survey of the academically and physically handicapped pupils has been made by officials of the Auxiliary Classes Branch. When a class has been organized, the continuation of the survey becomes the problem of the local school authorities to provide current information year by year on the number of pupils who require individual teaching with special materials.

In Ontario this annual re-survey is carried on in two ways. Some Boards of Education such as Kitchener, Ottawa, Toronto, York Township and East York Township employ a psychologist and assign to him, among other duties, that of conducting an individual test on all pupils who are retarded. In other school systems the survey is conducted by the Auxiliary Class teacher who is relieved of her classroom duties for sufficient time to administer the necessary individual examinations.

The actual details of the annual re-survey of handicapped pupils will vary considerably. In the smaller school systems, the pupils to be examined may be chosen from Grades V to VIII if they show retardation of two years or more and from Grade I to IV if they are one-and-one-half years retarded. The Age-Grade Table showing the average age of Ontario pupils for any month in the school year is the usual standard. These data are contained in Form A. C. 7 which is available on request. In the school systems where a psychologist is employed, it is the usual practice to administer a group test of intelligence or learning aptitude and to re-test by an individual examination those pupils with low scores, or those whose results show a marked difference from their classroom performance, or those whose chronological age is much below the average for the grade.

Where group tests have been administered in one or more grades of the elementary school and the results have been checked by individual examinations a very considerable amount of information is available for use in educational counselling of both the elementary and secondary school fields.

During the year the Townships of York and East York have allocated the duties of administering individual and group tests in their elementary schools to one of their auxiliary class teachers.

Rural Organization

Surveys of the indicated rural inspectorates were carried out by Miss DeLaporte and myself in conjunction with the inspectors concerned. On account of gasoline and tire rationing all but two of the surveys were curtailed and limited to one week or less. In addition to the full or partial surveys listed, approximately one hundred other pupils were examined by the resident inspector and reported to the Auxiliary Classes Branch where suggestions were prepared and forwarded to the teacher concerned.

*Complete Surveys.

Four pieces of research into the problems of the education of the academically and physically handicapped have been reported during the year, which appear to be worthy of inclusion in this report. Summaries are given below.

The Open-Air School

An Open-Air School is an organization set up jointly by a Health Board and a School Board for children who are delicate, anaemic or undernourished. A

school programme is interlocked with a health programme of exercise, nutrition and rest. The ordinary school programme is varied to provide three lunches, and a long rest period in the middle of the school day.

The "Open Window" type describes the school which operates during the regular school year from September to June. The term "Forest School" refers to a school which is conducted in a park in the open air from May to October and which is provided with shelter against inclement weather.

The usual method of measuring the success of an Open-Air School is to record gains in weight and health. This has always been sufficient to justify the project. Heretofore, little attention seems to have been given to the measurement of pupil progress, probably because open-air schools are primarily a health project and secondarily an educational organization.

To provide data on the educational accomplishment of pupils in Open-Air Schools, Miss L. H. DeLaporte, Assistant Inspector of Auxiliary Classes, conducted a testing programme to measure the educational gains made by pupils in attendance. Miss DeLaporte used two forms of the Metropolitan Achievement Tests, one at the beginning and another at the end of a four-month instructional period. A group intelligence examination was administered by psychologists of the local school board. Complete data on 180 pupils were assembled as age-scores for silent reading, vocabulary, arithmetic fundamentals and problems, spelling and language.

The testing and re-testing showed that 170 of the 180 pupils made achievement scores appropriate for their age level. Nine pupils attained scores within five months of their age level. This indicates that these 180 delicate or mal-nourished pupils made normal progress in spite of the curtailment of instructional time.

The pupils made the usual health gains. The total gain in weight for this group was actually 1,170 pounds. The average expected gain in weight for normally healthy pupils computed from health charts would be 619 pounds 2 ounces.

The average educational gain made in the four-month period was 4.7 months. Very substantial gains were made by 109 pupils. This indicates that the improved health of pupils attending an open-air school was accompanied by increased efficiency in school work.

SUMMARY OF EDUCATIONAL GAINS IN AGE-SCORES BY 180 PUPILS

Hard-of-Hearing Class—Second School—East York Board of Education

Sight Saving Class—Second School—East York Board of Education

A Speech Survey

During the period September to December inclusive, a survey of Speech Defects was carried out in one large elementary school system. The results shown in the summary are typical of any exhaustive survey, in that approximately ten per cent. of the pupils were found to have defective speech and that approximately one-quarter of these are classed as serious or major defects.

It should be noted that in the speech summary, a small fraction show ordinary errors in enunciation and pronunciation while the far greater number show defects which probably can be traced to physical, emotional, social and environmental causes or to maturation. In any case, the school and the teachers concerned are faced with a major problem of speech correction.

An example of a letter substitution in speech which may also be classified as Infantile Speech follows. A child says "That's a yubyee yittee yake to fim in". for "That's a lovely little lake to swim in".

Note (1) substitution for letter "l" in all positions.

(2) substitution for letter "s".

Unless these substitutions are corrected, the child's difficulty in reading and spelling may be enhanced because he does not reproduce phonetic sounds in the normal way. The same thing is true of other types of speech defects.

The experience of the Auxiliary Class inspectors and teachers shows that an excessively large number of pupils continue their speech defects unless they are trained out of them by specially qualified and interested teachers. It is known that some children grow out of their minor speech defects but not usually until after they have shown some bad effects. The results of this survey show that there is need for speech training for many pupils enrolled in the schools.

SUMMARY OF SPEECH DEFECTS FOUND AMONG AN ELEMENTARY
SCHOOL ENROLMENT OF 6,686 PUPILS

Cleft Palate.....	6	0	6
Aphasia.....	2	0	2
Foreign Accent.....	0	7	7
Spastic Paralysis Speech.....	4	0	4
Totals.....	162	519	681

Surveys of Hearing

A modern survey of hearing involves the use of an audiometer equipped with ten to twenty head-phones. A record supplies the sounds to be heard by the pupils taking the test. Numbers or sounds heard by the pupils through the ear-phones are recorded on a form in the order in which they are given. Each ear is tested separately.

Cases are found where pupils make little record of the numbers, or muddle them badly. Such pupils should be re-tested once and in some cases twice.

The data from the survey audiometer test are considered together with the observations of the classroom teacher, any observable speech defects, any subject difficulties, and rough tests of hearing ability, before submitting the pupil to tests on a clinical audiometer. The services of an otologist are then necessary to determine if the pupil should be sent to an oral class for the deaf or a hard-of-hearing class.

In the York Township Public Schools and in the Windsor Public Schools, surveys such as are described above have been conducted for 14,070 pupils. Approximately 3,000 pupils were checked a second time and 801 or 5.7 per cent were reported as failing on the test. In the case of York Township the seriously deaf or hard-of-hearing are being checked again by an otologist before any decision is made as to placement in an oral or a hard-of-hearing class.

In the Windsor Survey 99 out of a total of 4,876 pupils appear to need a medical examination to decide whether or not they should be placed in special classes.

The report of a test on a clinical audiometer is valuable to speech, hard-of-hearing, and oral class teachers because the hearing loss is expressed in decibels. Since speech sounds may be classified into high, middle or low vibration frequencies the teacher may concentrate her lessons in speech and lip-reading where it is most needed if the medical report includes a statement of hearing loss in decibel units.

A Follow-Up Study of Graduates of a Handicraft Class

Data were collected on the employment of 280 graduates of Handicraft Classes by Mr. A. McLean, Principal of the Warren Park Handicraft School, York Township.

The location of the present employment of the individuals studied indicates that the graduates do not under ordinary conditions migrate to any extent. According to geographic location they are divided as follows:

(1) In the Armed Forces.....	114
(2) Employed outside Canada.....	1
(3) Employed in another province.....	2
(4) Employed in Ontario (outside Toronto area).....	4
(5) Employed in Toronto and suburban area.....	159
Total.....	280

The types of employment in which these former pupils are engaged confirm previous findings that the majority of graduates of special schools find work in factories and as craftsmen. The occupations of these boys are as follows:

Occupations of 280 Graduates of a Handicraft Class

1. Services—Navy.....	16
Army.....	89
R.C.A.F.....	9
—	114
2. General Factory Employment.....	42
3. Aircraft Factory.....	27
4. Sheet Metal Work.....	26
5. Machine Operators.....	21
6. Apprentices (miscellaneous).....	17

7. Machine woodworking.....	15
8. Owners of small businesses.....	12
9. Electrical Work.....	11
10. Retail clerks.....	11
11. Farm work.....	10
12. Machinist apprentices.....	10
13. Bakeries.....	8
14. Truck drivers.....	8
15. Auto mechanics.....	7
16. Shippers.....	7
17. Clerical work.....	6
18. Plumbing apprentices.....	5
19. Welding.....	5
20. Railway Employment.....	5
21. Miscellaneous jobs.....	45
Total.....	412

NOTE:—The graduates in the Armed Forces appear to have been counted twice and in a few cases more than one job is reported for one person.

Data on job turn-over indicate that approximately two-thirds of the graduates try not more than two positions before they find permanent employment. A study of the boys with court appearances shows that delinquency and poor home conditions are closely associated; and that during the period of attendance at a Handicraft School there is a marked reduction in delinquency.

Miscellaneous Activities

In addition to the duties of inspecting classes and conducting surveys, the usual lectures on Auxiliary Education were given to the students at each of the Normal Schools.

The in-service education of teachers of special classes was carried out by means of circular letters, by pamphlets on subjects of current interest, by articles for the professional magazines and by attendance at group meetings, conventions and conferences within and outside the province. For the holders of temporary certificates, the Teachers' Reading Course was continued with an enrolment of approximately seventy teachers.

In all cases where these were requested, appearances were made before school boards to explain the Auxiliary Classes Act and Regulations.

By permission of W. J. Gage & Co. magnatyped editions of the Junior Arithmetics for Grade 5 and Grade 6 were issued for the use of pupils with severe loss of vision in Sight Saving Classes and Units.

Pamphlets entitled "A Report on a Kinaesthetic Method", "A Supplementary Book List for Sight Saving Classes and Units", "The Education of the Home-Bound Pupil" and "Opportunity Units, Their Organization and Operation" were issued and distributed during the year. They represent the co-operative effort of the teachers, principals and inspectors of special classes.

C. E. STOTHERS,
Inspector of Auxiliary Classes.

Toronto May 30th, 1945.

Statistical data relative to this report may be found on pp. 146-150.

SCHOOL ATTENDANCE

The present generation will in a few years furnish the rulers of the country. It is the duty of the authorities to see that every child is given an opportunity to get an education to fit him for the future. The present regulations permit a child to start to school at the age of three years, and to continue until he is twenty-one. However, he cannot be compelled to attend before he is eight years of age or after he is sixteen.

Table No. 1—Enrolment

	1941-42	1942-43	1943-44	Increase or Decrease
Public Schools.....	426,183	425,335	433,494	8,159 I
Separate Schools.....	99,258	102,182	99,361	2,821 D
High Schools and Collegiate Institutes.....	63,582	67,563	66,041	1,522 D
Continuation Schools.....	8,986	9,115	8,471	644 D
Vocational and Special Industrial Schools—				
Day Classes.....	28,793	31,801	31,433	368 D
Night Classes.....	33,388	28,641	29,546	905 I
	660,190	664,637	668,346	3,709 I

From the above table it will be seen that the trend of school enrolment in the Province is again upward, the net increase for 1943-44 being 3,709 over the previous year. This is chiefly due to the fact that the enrolment in the Public Schools increased by 8,159. The only other increase was in the night classes of the Vocational schools where 905 more students were enrolled this year. This increase may be attributed to the fact that many engaged during the day in industrial occupations were taking advantage of the opportunity to further their education. In all other types of schools there was a decreased enrolment.

The number of Public Schools in 1942-43 was 6,149 and in 1943-44, 6,085. This decrease is due to the policy of the Department in closing the very small schools and transporting the pupils to larger centres. In this way the supply of teachers is better distributed and the pupils are given the advantages to be found in a larger school. The number of Separate Schools remains the same—820.

Table No. 2—Percentage Attendance

Class of School	1940-41	1941-42	1942-43	1943-44
City Schools.....	92.5	92.7	91.6	91.8
Town and Village Schools.....	92.5	94.7	91.4	91.5
Ordinary Rural Schools.....	89.3	89.6	89.6	88.3

Other reasons.....	440,161	5.62	5.54	4.50	4.73
Total Days Lost.....		8,754,858	8,338,886	9,961,625	9,304,145
The above losses are classified—					
Lawful.....		6,529,268	6,111,368	7,442,875	7,258,305
Unlawful.....		2,225,590	2,227,518	2,518,750	2,045,840
Percentage Attendance.....		91.3	91.7	89.9	90.8

An analysis of the above report reveals some interesting facts. Throughout Ontario during the year there were several epidemics of mumps, measles and influenza with the result that the loss for illness rose to 67.64 per cent. of the total. Home help accounted for 10.09 per cent. which is the lowest since 1939-40. The winter was practically free of storms and this is shown in the exceptionally low loss of 1.50 per cent. The loss for truancy is less than one-half of one per cent. The loss due to privation is the lowest since 1939-40 explainable by the fact that there is work for everyone. Irregular closings are attributed to a wide variety of causes—funerals, teacher's illness, fall fairs to name only a few. Of the total days lost, 7,258,305 were lawful absence while 2,045,840 were unlawful or not according to the regulations. These consisted chiefly of losses due to home help, parental neglect, truancy and privation. In spite of the losses the percentage attendance for the year was 90.82.

Table No. 8—Summary of Attendance Officers' Reports

	1940	1941	1942	1943
School Children's Employment Certificates issued.....	1,343	1,318	1,382	1,043
Home permits issued.....	1,885	2,938	2,717	2,053
Employment certificates issued.....	4,871	9,416	12,792	12,544
Cases brought before magistrates.....	614	709	820	1,113

This year there was a decrease of 1,251 in the number of employment certificates issued. As was intimated in a previous report, many of the certificates were for a short period only. School children's employment certificates are valid for not more than six weeks in a term, are issued only in cases of emergency and cannot be renewed in a term. Home permits are often for short periods only and cover emergencies in the home. In the number of employment certificates issued there are many duplicates as every change in employment means a new certificate. While no certificates are needed during holidays and before and after school hours, many are issued as a convenience to the employer as the Attendance Officer is often in a better position to know a child's age. Many students to whom home permits and employment certificates are granted are required to attend either part-time classes or night school. Quite a number to whom employment certificates are granted later return to school.

			60,751	60,979		
	491	4,916	137,429	135,491		

The enrolment in Collegiate Institutes, High Schools and Continuation Schools decreased by 2,166 during the year. In the Vocational Schools the enrolment increased by 228 making a total decrease of 1,938 for all secondary schools in 1943-44. The number of Continuation Schools decreased to 193 and the number of teachers in the secondary system, now numbering 4,916, is 17 less than last year.

R. D. KEEFE,
Director of School Attendance.

Toronto, May 10th, 1945.

THE SCHOOL FOR THE DEAF

I have the honour to submit the report of the Ontario School for the Deaf for the year 1944-45.

Attendance

Enrolment by months:—

	Boys	Girls	Total
April, 1944.....	104	118	222
May.....	104	119	223
June.....	104	119	223
September.....	125	136	261
October.....	125	136	261
November.....	125	136	261
December.....	125	139	264
January, 1945.....	121	137	258
February.....	120	135	255
March.....	120	135	255

Average enrolment for year—248

During the months of April, May and June, 1944, day-classes of the Ontario School for the Deaf were maintained in Toronto, Hamilton and London, with a total enrolment of 57. The operation of these classes was transferred to the respective Boards of Education in September, 1944.

Only twelve pupils left school during the year:—

17 years—2 pupils
16 " —2 "
15 " —3 "
14 " —1 pupil
12 " —1 "
10 " —1 "
9 " —1 "
8 " —1 "

The five youngest are attending other schools and the seven oldest are working.

While the school was being operated in temporary quarters in the City of Belleville, it was necessary to refuse pupils admission after they were sixteen. As we now have adequate accommodation in residences and classrooms, it has been possible to revert to former regulations permitting pupils to remain in school until they are twenty-one years of age, if they are making satisfactory progress and have not completed the course of study. These facts explain why so few pupils left the school in June 1944.

Age of Admission

Thirty-five new pupils were admitted, their ages on admission being:—

5 years.....	8 pupils
6 ".....	6 "
7 ".....	5 "
8 ".....	5 "
9 ".....	1 pupil
10 ".....	4 pupils
11 ".....	1 pupil
12 ".....	3 pupils
16 ".....	2 "

All new pupils over eight years of age had attended other schools before being admitted to the Ontario School for the Deaf.

The Ontario Institution for the Education of the Deaf and Dumb, now The Ontario School for the Deaf, was formally opened on October 20th, 1870, nearly seventy-five years ago. One of the greatest advances made in the education of the deaf child during these seventy-five years is the reduction in the age of admission. According to Miss Guthrie, the writer of an article appearing in *The Volta Review*, January, 1945, children were not admitted in 1870 to American schools for the deaf until they were ten or twelve years old. In Massachusetts fourteen was the minimum entrance age. Mr. Talbot of Columbia Institution, Washington, is quoted as saying in 1869: "If asked to name some age as a proper guide for admission, I should say from eleven to thirteen."

One of the pioneers in advocating earlier admission was Alexander Graham Bell, who opened a private school and admitted children as young as four and a half.

This year the Horace Mann School for the Deaf in Boston, Massachusetts, celebrated the seventy-fifth anniversary of its founding. It was the first day-school for the deaf established on this continent. Speaking in Boston at the time of the anniversary celebration, Dr. Clarence D. O'Connor, Superintendent of the Lexington Avenue School for the Deaf, New York, and President of The American Association to Promote the Teaching of Speech to the Deaf, paid tribute to the teachers of the Horace Mann School for the great impetus that was given and is being given to-day to the teaching of speech to the deaf in the United States and for demonstrating the practical proof of the importance of the early training and education of young deaf children.

The same trends are evident in Great Britain and it would seem that soon we should admit some four-year-olds who have sufficient development, physically and mentally, to make their living in a residential school possible.

Methods of Instruction

During the seventy-five years this school has been operating, major changes have taken place in the methods of instruction as the pendulum has swung from the manual to the oral system.

Dr. Coughlin, Superintendent, recommended in 1907 that oral classes be organized. In urging this change he quoted figures showing that in 1893 there were 8,304 deaf pupils in United States schools, of whom 2,056 or 24.7% were taught orally. In 1905 there were 11,344 pupils, of whom 5,733 or 50.5% were taught orally. From 1905 to 1945 the percentage of children in oral classes has continued to increase. Statistics are published annually in the January number

AGE-GRADE TABLE—September 15, 1944

of the American Annals of the Deaf. According to the latest published figures of 17,753 deaf pupils in American schools 12,831 or 72% are taught orally. Some states are more progressive than others in this respect. 501 pupils are in attendance in the State of Massachusetts, all of whom are taught orally and no deaf teachers are employed. There are 1,921 deaf pupils in the State of New York, of whom 1,652 or 86% are taught orally while 95% are instructed by this method in the State of Pennsylvania.

The children who are now taught by manual methods in some American schools are thus described by the late Professor Pintner of Columbia University in his book, *Psychology of the Physically Handicapped*, published in 1941:

"In most schools having more than one method of instruction, pupils who are less intelligent, the least promising in the eyes of the teachers and the most difficult to handle are relegated to manual classes."

In another chapter of the same book he states:

"There is a well known tendency in those schools, where the manual method is still employed, to allow pupils who can make little progress in speech and lip-reading or in their studies generally to transfer to the manually taught classes."

Return to O. S. D. Buildings and Grounds

The most significant event during the last school year was the provision made by the Minister of Education, for our return to the buildings and grounds which had been occupied by the Royal Canadian Air Force from July, 1941, to July, 1944. The moving was partially completed and the buildings were ready for occupancy for the opening of school on September 20th. Pupils, teachers and other employees greatly appreciate the larger classrooms, dormitories and playing space.

The drill hall built for use by the airmen and left on the property will furnish a gymnasium for the boys and girls. A building for this purpose has been needed ever since the opening of the school in 1870. In recent months both boys and girls have learned to play basketball, a game which has proved very popular with the deaf.

As the officers of the air force lived in our junior residence, a dining-room and kitchen were set up in the basement for their use. This equipment has been made available for the young deaf children, making it possible for them to have all meals in their own residence. Parents have expressed their thankfulness for the provision made for their boys and girls in this way. It will assist in persuading parents to send five- and possibly four-year-old children to school.

Changes in Teaching Staff

When school reopened in September Miss Ford, Directress of Professional Training, moved into the apartment in the junior residence as house-mother. Miss L. Burnside, a teacher in the senior school, succeeded Miss Ford as house-mother in the boys' residence, while Miss C. Maloney, another teacher in the senior school, resumed her former position with similar duties in the girls' residence.

Mrs. G. Wegg and Miss P. Stafford resigned, the former on account of marriage and the latter to accept a position in a secondary school. Two new teachers, Misses M. Kellar and M. Ewing, who had had successful experience in public schools, were appointed for work last September and two former teachers of the deaf, Mrs. N. Bradford and Mrs. V. Sheffield, accepted temporary positions.

Grading of Pupils

In many American schools for the deaf beginners are classified as first grade, second year pupils as second grade, the grading continuing in this way until so-called graduation in grade thirteen.

Recently the school paper of the Minnesota School for the Deaf contained the following paragraph:

"The plan in vogue in the Minnesota School for a number of years provides for first-year pupils to be in a beginning class. The second year they are in the first grade. The grading is then similar to public school grading, i.e., there are grades one through twelve. Our complete course covers a period of thirteen years."

In the system used in Ontario our pupils graduate in grade ten, but as the first three years are preparatory, grade ten is comparable with grade thirteen in the Minnesota School.

Owing to the difficulties encountered in grading deaf pupils on the basis used with hearing children, some schools have discontinued using the term grade in their classification.

Slow-Learning Deaf Children

Schools for the deaf as well as schools for the hearing admit pupils who learn very slowly, if at all. In both types of schools it is necessary to exclude children if they are incapable of making any progress. It would seem that in a very large school with special facilities some provision might be made for the most backward. The largest residential school in North America is in the State of Illinois. In a recent number of the Illinois Advance, the school paper, the following editorial appeared:

"The sub-normal deaf child cannot do the work of the class. As between the school for the feeble-minded and the school for the deaf, what choice are we to make in the placing of slow-learning deaf children? Schools for the deaf are not equipped to instruct children who are unable to perform simple daily routines and move about without need of constant supervision. These children can best be provided for within the organization of a school for the feeble-minded."

It is evident from the above article that schools for the deaf, regardless of size, find it necessary to exclude many feeble-minded children.

Respectfully submitted,

W. J. MORRISON,
Superintendent.

Belleville, May 11th, 1945.

Dental Report for the School Year 1944-45

Dentist

Medical Report for the School Year 1944-45

From April 1st, 1944, to March 31st, 1945, there were 213 admissions to the School Hospital, including one case of tonsillectomy, one appendectomy, 2 fractured forearms.

All new pupils were vaccinated, given diphtheria toxoid and scarlet-fever toxin, if they had not been given them at home.

All children up to twelve years of age were given pertussis vaccine.

Some fifteen children were referred to Dr. Chant for eye examination.

R. W. TENNANT,

Physician.

Mental Ratings of New Pupils

Intelligence Quotient	No. Pupils	Intelligence Quotient	No. Pupils
Untested (Language difficulties, etc.)....	7	80 to 90.....	7
Below 50.....	1	90 to 110.....	8
50 to 70.....	4	110 to 130.....	5
70 to 80.....	2	Total.....	34

Of the 243 pupils tested over the past five years, the ratings are as follows:

Below 50.....	8	110 to 120.....	29
50 to 70.....	22	120 to 130.....	16
70 to 80.....	23	130 to 140.....	12
80 to 90.....	50	Above 140.....	2
90 to 110.....	81	Total.....	243

While a graph of these results generally conforms to the normal curve, it is skewed to the left. This is due in part, at least, to blind children having, in general, handicaps other than blindness which show themselves in their mental ratings. The thirty pupils who are rated 120 and over were also given the Stanford Achievement test, which corroborated the findings in their Intelligence Test ratings. The tests used for intelligence test ratings were the Samuel P. Hayes adaptation of Terman's Condensed Guide for the Stanford Revision of the Binet-Simon Intelligence Tests.

A Minuet, by senior girls, Ontario School for the Blind

Symphony Orchestra, Ontario School for the Blind

This report is skewed to the right owing largely to the late age of entrance. This is best illustrated in Grade 1, where the majority of children are 9 years and over. A second reason is that low grade mentals are carried in regular classes. This is especially noticeable in Grade 7, where fifteen out of twenty pupils are 16 years or over. Thirteen of these fifteen are definitely dull normal and lower. Outside of these two factors, the rate of promotion is normal.

Student Awards in Music and Academic Work

At the Stratford Musical Festival this year the O. S. B. madrigal ensemble choir won the Stratford Beacon-Herald Trophy for the ninth consecutive time; the O. S. B. male chorus (under 21 years) and the Ladies' Choir (under 21 years) each won a first place.

To honour the memory of members recently deceased the Brantford Rotary Club this year instituted six memorial scholarships in academic work and music, as follows:

Dr. C. D. Chapin Memorial Scholarship—General Proficiency in Grade 8, \$5.00.

Allen E. Cuthbertson Memorial Scholarship—General Proficiency in Grade 9, \$5.00.

Flt. Lt. Ian Dowling Memorial Scholarship—General Proficiency in Grade 10, \$10.00.

Lt. Charles Waterous Memorial Scholarship—General Proficiency in Grade 11, \$10.00.

Thomas Makusker Memorial Scholarship—Proficiency in English, Grade 11 and 12, \$10.00.

Theodore R. Hamilton Memorial Scholarship—Progress during the year, \$10.00.

"High Flight"

This title, borrowed from John Gillespie Magee's war poem, has been adopted by the student body as the name of their school magazine. The first issue was published in February of this year. It was published in ink print and upwards of 400 copies were sold to parents and interested friends.

War Work and Student Givings

Both students and staff continue to be regular donors at the Brantford Blood Donor Clinic,—having given 130 donations to date. The teaching staff continues to be 100 per cent. purchasers of war bonds. The Senior Girls' Club gave \$6.00 to the Navy League, and the Senior Boys' Club \$5.00 to the Navy League, \$10.00 to the Brant Sanatorium, and \$3.00 to White Gift Sunday. The sewing and knitting classes made 86 articles for various war and social services. The Junior Red Cross, from monies earned through salvage collection, donated \$5.00 to the I. O. D. E. Soldiers' Book Campaign, \$20.00 for overseas parcels, and \$25.00 to Prisoner of War parcels.

The Girl Guide Troop assisted in the sale of war stamps, and in local day nursery help.

The Junior Red Cross in Grade V earned and distributed \$23.70 for patriotic purposes.

Sunday School Collection, amounting to \$15.75, was sent to Dr. Robert McClure for his work in China.

Grades 7 and 8, through the "Save the Children Fund," "adopted" Neville Magnier, a five year old French refugee in England. During the year, they sent \$25.00 of their own spending money to this small boy, and corresponded with him, and are intending to continue the "adoption."

Library Report

The Braille Library now consists of about 1,100 volumes, 590 of these being fiction suitable for senior students, and 250 for junior. The remaining volumes are devoted to such subjects as geography, history, science, philosophy and religion. About 100 volumes have been added during the year. Many Braille books printed in England are temporarily out of print, due to war conditions. Since English books can be obtained within the British Empire at one-third of the list price, most of our books come from that source. There are 50 books in the talking-book library, varying from one record to 24 records per book. Three talking-book machines are provided to enable the students to "read" these books.

Report of Ophthalmologist

The class entering this year have much poorer visual acuity than usual,—there being five girls and two boys who have completely lost the sight of one or both eyes. Five boys and one girl have light perception only. The remainder have limited vision varying in ability to count fingers at from two to twenty feet.

Diseases Causing Blindness	Female	Male	Total
1. Congenital Causes (Other than cataract).....	3	2	5
2. Congenital Cataract.....	5	3	8
3. Congenital Glaucoma.....	1	3	4
4. Sympathetic Ophthalmia and Uveitis.....	3	1	4
5. Keratitis.....	2	1	3
6. Fundus Lesions including optic atrophy, congenital rhinitis and choroiditis.....	0	6	6
7. Myopia.....	0	1	1
Totals.....	14	17	31

An interesting observation is the high percentage of cases of congenital origin,—seventeen out of a class of thirty-one being the result of some hereditary eye disease. Ophthalmia neonatorum, which used to be in the front rank as a major culprit producing blindness, is falling far behind in the list, and in three cases of keratitis in this year's group, only one can be classed as definitely due to ophthalmia neonatorum.

A careful examination and study was made of all other pupils in the school. Advice was given as to the care and use of the eyes. A number of pupils required a correction in their glasses. In some cases, it was necessary to make suggestions as to dietary and other changes.

Total.....	111 cases
Pupils receiving 3 doses of diphtheria toxin-antitoxin.....	8
Pupils vaccinated.....	3

Over the years, great emphasis has been placed on preventive measures, such as vaccination, Wasserman testing, annual physical examinations, dental and eye care, administering of diphtheria toxin-antitoxin, and whooping cough serum, good diet and a daily physical health programme. These have all shown increasingly good results. The present student body is fairly rugged, and seems to be building up a good resistance to the common and ordinary run of disease.

The fact that a trained nurse is on constant duty throughout the school term is an invaluable aid—in fact, a practical necessity—in caring for blind children. They are particularly good patients, and always very co-operative.

G. H. RYERSON,
Bursar.

Throughout the year the help staff have been faithful to their tasks, although working at times under-staffed.

The teaching staff have been loyal, co-operative and efficient.

I have the honour to be, your obedient servant,

H. J. VALLENTYNE,
Superintendent.

History of the School

In 1870, the Province of Ontario purchased a site adjoining the western limit of the city for the Ontario School for the Blind. The buildings and beautifully wooded grounds cover an area of approximately 50 acres. The school was opened in May, 1872 with eleven pupils. At first the institution was administered along with prisons and asylums by the Department of the Provincial Secretary and combined the functions of a home for the adult blind and a school for blind students. In 1917, the Ontario Institution for the Blind (O. I. B.) was transferred to the Department of Education and became the Ontario School for the Blind (O. S. B.). The Department appointed Dr. W. B. Race, Headmaster of the Sault Ste. Marie Collegiate Institute, as the first Superintendent and Principal. All the adults were removed, and the school became in every sense of the word a resident school for the blind, where students were in residence for nine months of the year, going home for the usual school holidays.

Dr. Race organized the school along lines much the same as other elementary schools in Ontario, with one year of High School work, and special work in crafts, arts and music.

STUDENT BODY

Any child may attend the Ontario School for the Blind who is of school age, with less than 10 percent vision, and who is not otherwise physically or mentally handicapped in such a way to bar him from school attendance. The school population divides itself roughly into three groups—about thirds—those who are totally blind, those who have light perception, and those who can see up to the limit of ten percent. The seeing students act as guides to the sightless students in all school activities, including extra-curricular activities, and going outside to church, theatre and public assemblies. The School serves the Province of Ontario and the three Prairie Provinces. The school population at present is 162,—of whom forty come from the Prairie Provinces.

COURSE OF STUDY

Academic Department. This Department covers the work of our elementary schools and secondary schools up to the completion of Grade 12. The only elementary studies that are omitted are drawing and art colour work. In the secondary school, literary and factual options are chosen, rather than mathematics and science. However, Braille text books are available in both these subjects and junior classes are conducted in both. Indeed, some blind people have taken honour courses at University in both these subjects. Modern languages taught at the Ontario School for the Blind are Spanish and French.

Music Department. A great deal of attention is given to the study of music,—piano, vocal, organ, orchestral instruments and choral work. As an aesthetic outlet, music is invaluable to the blind person,—barred as he is from the pursuit of certain other artistic endeavours. All musical credits are obtained through the Toronto Conservatory of Music.

Piano Tuning, Household Science and Manual Arts. Piano Tuning is taught by a thoroughly capable instructor, and many of the graduates earn their livelihood after graduation by tuning pianos. The girls are taught cooking, sewing, knitting, weaving and other allied crafts, and the boys study reed-furniture making, caning, the making of rubber mats,—and are given training in the assembling of nuts and bolts, locks and hinges.

Principal H. J. Vallentyne and a few of his pupils

PHYSICAL INSTRUCTION AND HEALTH

The programme in Physical Instruction and Health allows one full period every day for every child. This is taken out of doors, as much as possible, in hikes, ice skating, field and track sports, camping, etc. Only in inclement weather, do they work indoors in the gymnasium. Near the close of the school year, there is an Annual Field Day. Every child in the school takes part in the preliminary competitions for this event. Finalists strive for cup honours on Field Day, and field and track events are interspersed with obstacle races, shoe races, and sack races, in which all can compete, and where the non-athletic type has a chance to win.

Each child's weight and height is measured monthly and charted for health scores. A graduate nurse is on full time duty at the school. The Medical Health Officer calls daily and visits those—if any—in the school hospital. The ophthalmologist examines every child once a year, and as many times oftener as the child or school requires. The school sends all the students to the dentist once a year for a general check-up, and necessary work is done. Each student's health record is charted on his personal history card, which shows the result of his physical growth over the years of his school life,—giving annual eye examinations, annual, complete medical examinations, and a pictured record of dental work done, together with a record of all illnesses up to the end of his school life. In passing, it might be well to mention that this card also shows his pre-school history, and also a post-school record, together with a personal snap shot.

EXTRA-CURRICULAR WORK

In extra curricular activities, the school has an opportunity to provide a richer education and a finer training than in the regular school work. The Ontario School for the Blind does very considerable work in dramatics. Over the past years, perhaps the best productions were Oliphant Downs' "Why the Chimes Rang," and Gwendolyn Seiler's "The Princess and the Swine-herd,"—which last was given at London, and raised approximately a thousand dollars for the Queen's Fund. Again, dramatics are combined with music, in the production of several operettas, the most outstanding of which have been George Tootel's "Tangles," and Edward German's "Merrie England." The latter was given in the wooded grounds of the school, where a natural embankment was used for the Thames, and 200 foot winze was constructed to "float" Queen Elizabeth's barge on to the stage.

For ten years, the students of the school have participated in and won honours at the Stratford Musical Festival. To gain a place in this Festival Choir gives a very impelling motive to choral work.

All students are given an opportunity through the year of attending concerts in the Columbia Community Concert Series, given by world famous artists. The same applies to meetings of the Brantford Women's Canadian Club.

Many times during the year, entertainment groups are sent out to churches and other organizations in Brantford and the outlying districts and these give from one or two numbers to a full concert programme.

STUDENT ORGANIZATIONS

Among the student organizations are Brownie and Cubs, Guides and Scouts, the Merry Makers' Club and the Vallentyne Club. These last two organizations are the senior girls' and senior boys' clubs, respectively. These Clubs meet weekly throughout the year. Their activities are made up of debates, public speaking forums, dancing, skating, and other social functions, and week-end camps at the end of the school year. These two senior Clubs collaborated last year in producing the first School journal, "High Flight," which was an ink print and was sold to the children's parents and friends.

The school motto is, "The Impossible is Only the Untried."

PUBLIC LIBRARIES

I have the honour to submit the report of the Public Libraries Branch for the year 1944, in which are included statistics covering the operations of the public libraries of the province during 1943, together with a statement of the legislative grants paid in 1944, and the operation of the Department of Education Travelling Libraries in the same year.

A comparison of the public library statistics given below with those prepared in 1939 indicates that, generally speaking, little progress has been made in the development of library service during the intervening years. Evidence, not only of this lack of progress but also of a somewhat desperate attempt merely to maintain the *status quo*, increases as I resume my visits to the various libraries after my absence from the inspectorship. The province has never been adequately covered by library service, yet I have to report that there are actually fewer libraries in operation to-day than there were five years ago. It is true that the decrease is only two, but that there should have been a reduction where an increase was needed is in itself a significant comment upon the general situation. Further, of the 493 libraries now listed, only 233 are free public libraries, that is to say, organizations which are supported by a municipal appropriation which may be regarded as assured income. The remaining 260 are library associations continuing the principle of the mechanics' institute library and supported chiefly, not by the community as a whole, but by membership fees.

The total expenditure of the people's libraries in 1943 was, in round figures, \$1,600,000, as against \$1,300,000 of the depression year 1938. It is quite clear that this slight increase must be totally inadequate to meet the much higher present costs of operation, so that, financially, the libraries are in worse case than they were during the depression. This state of affairs is emphasized when we note that the present total book stock of 3,700,000 volumes shows an increase of no more than 250,000 during the five years, despite the fact that libraries are not discarding as they should and are endeavouring to keep pace with the demand by continuing to circulate many thousands of books which are in a deplorably bad physical condition.

It is interesting to observe that the circulation of books, which dropped sharply upon the outbreak of war, has now returned to a point almost exactly level with 1938, when conditions of unemployment resulted in putting such a heavy burden upon the service. But of even deeper significance than increasing use is the greater discrimination and the growing public demand for better and more thoughtful books which most libraries are now reporting.

Evidence might be multiplied to demonstrate the depressed state of the library as compared with other public services but perhaps enough has been said to point the truth of the matter.

I can report with confidence that, in the main, library management has not been at fault so much as lack of financial support. The majority of our libraries have long striven and are continuing to strive valiantly to assume and maintain their place—most essential in a democracy—as an integral factor in the educational system. That they have not been more than partially successful and

that they have not made progress comparable to that of other services is clear to the management itself and apparent to all thoughtful observers. The means have not been forthcoming. Nor do I believe that an adequate state of effectiveness can be in any way achieved until such time as we may greatly increase the body of professionally trained people employed in the service and add so materially to its financial support, both municipal and legislative, as to raise the library budget above its present level of bare subsistence.

A. MOWAT,

Inspector of Public Libraries.

Toronto, 7th April, 1945.

Statistical data relative to this report may be found on pp. 255–263.

PUBLIC RECORDS AND ARCHIVES

Although another year of war, 1944 has shown an increase in activity in this Department. Visitors and researchers have received attention from the staff, covering a wide range of subjects and much information has been sent far afield by mail.

The work of preparing material for use of the public proceeds steadily. Recently all newspapers were checked and listed both alphabetically and chronologically and some have been bound, while maps and manuscripts are constantly being made available.

Visitors

An interesting visitor was Mr. Hugh Paget, B.A. (Oxon.), Representative of the British Council in Jamaica and Chairman of the Archives Committee of the Institute of Jamaica, who wished to study our organization and methods.

We have also been pleased to welcome groups of school children, accompanied by their teachers, from outside as well as within the city.

Acquisitions

Armstrong, S. J., Toronto; picture of Parliament Buildings, Toronto, decorated in honour of the Heroes of Paardeberg, November 5, 1900.

Buchner, Miss Orrena, Toronto; sketch of the history of the House or Haus family.

Crouse, Charles C., Oshawa; Genealogical Notes on Perry, Freeman, Rogers, Way, McTaggart, Demarest, Marsh, Campbell and Young families; also, Return of Loyalists quartered at St. Johns, Canada, March 1, 1781, (under Major Nairne) and Pensions.

Pamphlet—Annis Annals, 1638—1931.

Elliott, the late Dr. Jabez B., Toronto; package of Marshall Spring Bidwell letters, 1834—1847.

Gladman, Victor Lionel; copies of letters of his great grandfather and of George Gladman, official of Hudson's Bay Co.

Heath, W. H., Chief Geographer of Ontario; Dawson's map of the Dominion of Canada, 1872.

Hebb, Andrew, Newmarket; bound volume of The Newmarket Era, February 5th, 1892, to January 12th, 1894.

Mason, Rev. R. S., Richmond Hill; Photostat copy of advertisement calling for tenders for Hamilton-Port Dover highway, October 6, 1842.

McMillan, Mrs. E. J., Toronto; two daguerrotypes, (1) Joseph Hough and his wife, Elizabeth Devenish, of Scarboro' Township and (2) Joseph and Mary Jane Hough, son and daughter of Joseph Hough.

Peel County map by Charles Unwin and A. B. Scott, showing mills, roads, post offices, schools, etc.

Rutherford, Frank S., Toronto; copy of The Brussels Post, Brussels, Ont., December 3, 1875.

Sawdon, Herbert H., Tottenham; Schomberg and its Schools.

Simcoe County Women's Institutes, Historical Research Committee; History of the Scotch Settlement (West Gwillimbury) from Pioneer Days, by Mrs. John Sutherland, Bradford.

Ward, Miss Aileen, Toronto; reprint from Dalhousie Review of "In Memory of Uncle Tom."

Woodhouse, Roy, Hamilton; Photograph of sign from building at Burlington Beach.

Historical Exhibit

The interest of the teachers and pupils in our historical exhibit continues, as may be judged from the following comments which we have received:

From Richmond Continuation School.

The school enjoyed the historical exhibit especially the copies of early newspapers and the patent with the attached beeswax seal. The senior pupils enjoyed the "refresher course", as it really was, in the position of Bishop Strachan and William Lyon Mackenzie in the educational and political fields respectively.

From Woodstock Collegiate Institute.

All history students had the exhibit explained to them in a class period. Many returned after four o'clock to see it again. I think that those who had taken the course in Canadian History got most out of it; those taking the course this year have not reached the 1800-1840 period.

I like the idea. Would it be possible to increase the number of exhibits, so as to cover four or five main periods of Canadian History? A reporter from the local newspaper was at the school when the exhibit was there. I am enclosing his write-up.

From Winchester High School.

The pupils of the High School here have enjoyed the historical exhibit and on their behalf I wish to thank you for so kindly lending it to us.

I think it an excellent exhibit and it has done much to arouse an interest in Canadian History. Thank you.

From Grand Valley Continuation School.

This exhibit was much appreciated and enjoyed by my History classes and also by the other students in the school.

May I particularly thank you for sending it in time for our Young People's Citizenship meeting. Unfortunately, the weather was very unfavourable and so out of a usual attendance of 60 to 70 we had only 17. Those who were present were very much interested and several others have since asked for an opportunity to see some of the exhibits. This has delayed the return by a couple of days. The old land grant patent and the copy of the Colonial Advocate seemed to be of particular interest.

I wish also to express my own personal thanks and appreciation for a very helpful and interesting exhibit.

From Belleville Collegiate Institute and Vocational School.

To-day we returned the Canadian History exhibit, for which the other three teachers of Canadian History and I wish to express our sincere thanks. The pupils in my three Canadian History classes, as well as my two Grade XII and my Grade XIII were intensely interested in the exhibit.—If you will lend it to us next year, we will be very grateful.

From Cornwall Collegiate Institute.

The students in the Canadian History classes found the documents both interesting and instructive. We were able to use some of them in our displays the night of Open House and found the general public particularly intrigued by the list of the first students in our school.

I hope in the future that the services of the Archives may be extended still more; they are, indeed, valuable.

From Humberside Collegiate Institute, Toronto.

I wish to express the appreciation of this school for the excellence of the exhibit and the service you are rendering. All our Grade X classes saw the exhibit. Many pupils were so interested as to return after school to make further examination of the material. Printed material, such as proclamations, our teachers found very suitable for classroom use. Again let me thank you for splendid service.

H. McCLUNG,
Provincial Archivist.

June 11, 1945.

MUSIC

The following statistics show the percentage of classrooms in the Elementary schools of Ontario providing a regular course in music, under the supervision of qualified music teachers. These figures are based upon reports from schools applying for the special music grants on June 30th, 1944.

	1944	1943	1942	1941	1940	1939	1938	1937
Cities.....	100	98.3	98.3	98.7	100	100	97.7	95
Counties.....	72.8	69.8	72.6	78	77.4	73	64.7	51.5
Districts.....	38	47.5	51.2	52.7	52	45	41.7	28.6
Separate (English).	32.6	35	39	35	27.7	26.3	21	30
Total.....	72	69	71.3	71.8	71	68	62.2	55.5

NOTE: The remainder of the Elementary schools offer some music instruction under the direction of the regular teachers.

The number of Secondary schools offering a course in music is as follows:—

	1944	1943	1942	1941	1940	1939	1938
Collegiate Institutes.....	65	64	66	67	57	52	17
High Schools.....	120	113	115	120	112	94	51
Continuation Schools.....	120	115	126	134	123	115	53
Total.....	305	292	307	321	292	261	121
Percentages.....	71	68	71	74	68	60	28

NOTE: Several Vocational schools also offer a music course. No special music grant is provided for this type of school.

Music Teachers

The number of qualified music teachers and supervisors reported as being engaged in the schools during 1944 is as follows:— In Elementary schools only, 412; In Secondary schools only, 171; In both types of schools, 110; total number of teachers 693. Of these, the following held temporary permits only:—

	1944	1943
Elementary.....	87	55
Secondary.....	37	26
Total.....	124	81

Many of the music teachers holding Departmental certificates are only partially qualified, and will require further attendance at the summer courses.

French-Speaking Schools

All French-speaking schools are under the personal supervision of Mr. Joseph Beaulieu, Mus. Bac., Assistant Provincial Supervisor of Music, and these schools have continued to show satisfactory progress. School choirs have been formed in the majority of schools, and classroom singing has improved through the use of graded song-books made available during the year. Supervisors have been appointed in four centres.

Music in the War Effort

The children have been encouraged to find in music an expression of their loyalty and devotion to Canada and the Empire. Not only in connection with Empire Day observance, but throughout the year, special emphasis has been placed on the singing of patriotic and Empire songs. Music has also been actively employed in the pupils' efforts in behalf of the Victory Loan Campaigns.

Matriculation Music

Music is one of the optional subjects in Grade XIII. This consists of either a school course or extra-mural music represented by certificates from certain accredited music schools and conservatories. Since Secondary school music has been for the most part confined to Grades IX and X, it will be some time before any considerable number of pupils will be prepared to choose this option, but, in 1944, pupils from the following schools wrote the Departmental examination in Grade XIII music—Malvern Collegiate Institute, Toronto; Cobourg Collegiate Institute; Belleville Collegiate Institute; Kingston Collegiate Institute.

Music Festivals

A large number of music festivals were held in 1944. Transportation problems caused the temporary dropping of some rural festivals where children had to be brought to a central hall from long distances, but most festivals were continued on a reduced scale, and several new ones introduced to serve smaller areas.

Sound Films

Three music sound-films were added to the Department Library which now contains twenty subjects dealing with music. Music lends itself to presentation by visual as well as aural means and the music films are among the most useful in the Library. The aggregate number of screenings for the music films during 1944 was 1,002, viewed by 52,915 adults and 89,508 children. The corresponding figures for 1943 were 514; 7,805; and 74,622.

Radio

During January, February and March a great many schools listened to a series of twelve weekly broadcasts "Music for Young Folk" sponsored by the Department. These programmes were carried on a network covering the entire Province of Ontario and three Quebec stations. The Provincial Supervisor of Music prepared and gave the commentary. The music was supplied by the Toronto Symphony Orchestra and smaller instrumental and vocal groups. Many valuable comments and suggestions were received from the participating schools, and these will be embodied in plans for future series.

Publications

The following literature was prepared by the office of the Provincial Supervisor of Music—High Road of Song, Elementary Grades

Hymns for Schools

Schedule of Music Options, Grade XIII

Suggestions for Teachers, Grade X

Suggestions for Teachers, Grade XIII.

Respectfully submitted,

G. R. FENWICK,
Provincial Supervisor of Music.

TRADE-SCHOOLS

I beg leave to present the report of the operations of The Trade-Schools Regulation Act for the year 1944.

The Legislature of the Province of Ontario in 1938 passed The Trade-Schools Regulation Act in order to rectify abuses, which had reached extensive proportions, relative to the sale of Trade-School Courses to the public through privately operated institutions. There is ample evidence that the Act is regulating, controlling, and correcting these abuses and is receiving the fullest approval from the public in general as well as that of the operators of reputable schools. The latter realize the advantage of being freed from the onus resulting from former unethical actions of certain institutions, which have now been eliminated. The list of trade-schools, originally designated under the Act, has been extended by Orders-in-Council under Clause 12(k) as necessity for regulation demanded. During the year all privately operated Business Schools and Colleges have been included and without doubt schools giving other courses, not now specified, will be required to secure registration as public demand may require for fuller protection. The request for inclusion of certain courses does not always come from the public. The operators of many schools have favoured the extension in order to secure the advantages of supervision and regulation under the Department of Education. The courses now specified as requiring to be registered under the Act are as follows:—

- | | |
|---|--|
| 1. Advertising. | 21. Landscape Gardening. |
| 2. Aeroplane Construction and Operation. | 22. Machine Shop Practice. |
| 3. Air Conditioning and Refrigeration. | 23. Mechanical Dentistry. |
| 4. Broadcasting Practice. | 24. Painting and Interior Decoration |
| 5. Business and Office Practice. | 25. Photography. |
| 6. Civil Service Occupations. | 26. Plastics. |
| 7. Commercial and Industrial Art. | 27. Printing and Bookbinding. |
| 8. Concrete Construction. | 28. Pulp and Paper Making. |
| 9. Dairy, Poultry and other Farm Work. | 29. Radio and Wireless Communication. |
| 10. Detective and Secret Service Work. | 30. Railway Station Agents and other Rail-
way Occupations. |
| 11. Diamond Drilling. | 31. Salesmanship. |
| 12. Diesel and other Internal Combustion
Engines. | 32. Sheet Metal Work. |
| 13. Dress and Garment Designing, including
Millinery. | 33. Sound Projection and Motion Picture
Operation. |
| 14. Electric and Acetylene Welding. | 34. Speech and Oratory. |
| 15. Foot Correction. | 35. Stationary and Marine Engineering. |
| 16. Foundry Practice. | 36. Telegraphy. |
| 17. Hand, Machine and Power Machine Sew-
ing Operation. | 37. Television. |
| 18. Hotel Management and other Hotel, Cafe,
and Hostess Occupations. | 38. Theoretical and Industrial Chemistry. |
| 19. Industrial and Business Management. | 39. Theoretical and Industrial Electricity. |
| 20. Journalism and Story Writing. | 40. Theoretical and Practical Engineering. |
| | 41. Woodworking and Cabinet Making. |

Administration of The Trade-Schools Regulation Act by this Branch of the Department of Education includes the following:—

- (1) Approval of courses offered by a Trade-School and their length.
- (2) Approval of forms of contracts used by a Trade-School.

- (3) Approval of advertising material and radio script to be used by the Trade-School.
- (4) Approval of the accommodation and equipment provided by the Trade-School. This must comply with the local requirements for fire, sanitation and safety.
- (5) Approval of fees to be charged.
- (6) Approval of qualifications of staff.
- (7) Approval of admission qualifications of students.
- (8) Adjusting settlement of claims made by either the school or the student.
- (9) Advising students regarding the nature of the courses offered by schools and where each may be obtained.
- (10) With the assistance of the Attorney-General's Department, enforcing penalties incurred for non-compliance with The Trade-Schools Regulation Act.
- (11) Collecting the necessary annual fees and surety bonds required to be furnished by schools and salesmen.
- (12) Arranging for the submission of such annual financial and other reports required by the Act in connection with applications for registration.
- (13) Issuing certificates of registration to such schools as have been approved.
- (14) Issuing certificates to all approved salesmen of courses.
- (15) Approval of the requirements of the school in granting certificates and diplomas to students.
- (16) Approval of Text-books used and charges made to students for same.
- (17) Acting as an arbitration officer in adjusting disputes arising between students and the school management.
- (18) Determining the extent of competition which may arise between Trade-Schools and Industry where competitive manufacture of goods and services may be involved.
- (19) Furnishing the public with reports regarding the reliability and dependability of schools where inquiries are made about them.
- (20) Co-operating with Better Business Bureaus, Boards of Trade, Manufacturers' Associations, the Press, and Trade-School Departments operating in other Provinces of the Dominion of Canada and in the United States, to extend and strengthen the controls which the Trade-Schools Regulation Act was intended to secure.

There continues to exist the most cordial relationship between the Department and these registered schools. Each school is most anxious to improve and develop the courses of study so as to render the best service possible to the public. The long experience which many of these schools have had in planning courses and handling large groups of students is a most valuable asset to the educational work of this Province. The Department appreciates this service and on the other hand the schools value highly the recognition and approval given by the Department to registered schools. It is a strong factor in creating greater confidence with the public as to the reliability of such schools.

The following schools have been registered during the year 1944 under The Trade-Schools Regulation Act:—

M. C. C. Schools Limited, Winnipeg.
 International Correspondence Schools Canadian Limited, Montreal.
 International Accounts Society, Chicago and Toronto.
 Shaw Schools Limited, Toronto.
 Shaw Beaches School.
 Shaw East Toronto School.

Shaw Riverdale School.
Shaw Danforth School.
Shaw Central School.
Shaw Deer Park School.
Shaw Dovercourt School.
Shaw Oakwood School.
Shaw High Park School.
Shaw North Toronto School.
Shaw Kingsway School.
Shaw Parkdale School.
Toronto School of Design, Toronto.
Alexander Hamilton Institute, Toronto.
Speedwriting School of Canada, Hamilton.
British Institute of Engineering Technology, Toronto.
Reilly Institute, Toronto.
Newspaper Institute of America, New York City.
National Radio Institute, Washington.
Teresa Designing School, Toronto.
General Welding Works, Toronto and Sudbury.
Capitol Radio Engineering Institute, Washington.
Northern Institute of Technology, Toronto.
Wells Academy, London.
Branches: Aylmer Business College, Aylmer.
Central Business College, Goderich.
Central Business College, Stratford.
Guelph Business College, Guelph.
Petrolia Business College, Petrolia.
Wells Academy, Kitchener.
Woodstock Business College, Woodstock.
The Kingsway College, Toronto.
Letchford Studio of Fashion Careers, Toronto.
Galasso School of Designing, Toronto.
Lincoln Institute of Canada, Toronto.
Washington School of Art, Washington.
Weller Secretarial College, Toronto.
Chicago Vocational Training Corporation, Winnipeg and Edmonton.

GUIDANCE

I beg leave to present the report of the Guidance Branch from its inception on July 1, 1944 until December 31, 1944.

Every school child from the time he is first faced with the necessity of making decisions and choices that will affect his future, vitally needs help in understanding his own talents, in selecting the school course that will best develop those talents, and finally in choosing, training for, and entering the occupation for which he is best fitted. The purpose of guidance is to give this help.

Although informal guidance has been a commendable feature of our schools for many years, it has been generally recognized that the scarcity of trained personnel and the lack of time allotted to guidance have prevented schools from doing effective guidance work. However, steps have been taken in the last few years by a number of communities and schools to lay the foundation for adequate guidance programmes. Directors were appointed in the cities of London, Hamilton, and St. Catharines. In addition many secondary schools have had teacher-counsellors who have been devoting varying amounts of time to different phases of the work. In September, 1944, a full programme of guidance was established in Lawrence Park Collegiate Institute, Toronto. Under a Director of Guidance, steps were taken for the establishment of cumulative records, files of occupational and educational information, interviewing offices, counselling, and all other fundamentals. Mention should also be made of the splendid preparatory work in guidance being done in the schools of Simcoe, Brantford, Galt, Peterborough, Welland, Owen Sound, and in some secondary schools in Toronto.

Our schools are diversified. They vary greatly in size, type and the kind of community they serve. Consequently an outline of the organization in one may or may not apply in its entirety to another. Each school must organize its programme with due regard to the available facilities and the particular and peculiar needs of its pupils. In spite of the variations in organizational details, there are, however, certain basic fundamentals in each "real" programme. Four of these basic principles follow:

1. *Study of Individual Pupils.* This involves bringing together into one record all the information necessary for an understanding of each pupil. This means that the study must be continuous and must begin at the time the pupil enters kindergarten or the primary class. Certainly this requires cumulative records which follow the pupil from class to class and from school to school.

2. *Study of the Occupational World.* Through the obligatory course in Grade IX "Occupations", pupils are given accurate and up-to-date information on educational and occupational opportunities. Through books, pamphlets, films, radio programmes, plant visits, vocations nights, talks by outside speakers, files of occupational and educational information, pupils will receive valuable assistance. A careful organization of this phase of the work will refute the criticism that students are making choices based on mere whims and fancies.

3. *Assistance to Pupils transferring from School to School or to The World of Work.* Frequently teachers can be heard stating that a certain pupil is not doing well because he has moved around so much from school to school. A problem faces us every time a pupil changes from one school to another. It is particularly true that the adjustment from elementary school to secondary school is difficult. The adjustment from any school into the world of work is even more difficult.

4. *Teacher-counsellors.* It is essential that schools have teacher-counsellors to co-ordinate the work and to make it effective. Teacher-counsellors should take training and must also be given a sufficient allotment of time to do the work.

Some schools have developed certain phases to a high degree of efficiency while other schools are just laying the groundwork. Generally speaking it is evident that far greater emphasis is being placed on the dissemination of occupational and educational information than upon the analysis of pupil abilities and capabilities. This is gratifying because it indicates a realization that guidance is not testing, and testing is not guidance. Furthermore, this approach is sound. It means the immediate development of services which do not require highly specialized training.

The study of the occupational world has received considerable attention. The fact that 25% of our secondary schools are providing instruction in "Occupations" in grades above Grade IX is most encouraging. Furthermore, many elementary schools are teaching "Occupations" in Grades VII and VIII.

The Ontario Department of Education, in co-operation with the Canadian Broadcasting Corporation, presented a series of five School Radio Broadcasts in Guidance during November and December over a network of eleven Ontario stations. Each broadcast, which contained a playlet and a talk, was one half-hour in length. Over twenty-five per cent. of our secondary schools had classes listen to the broadcasts.

In all the work of gathering and distributing occupational information, the Vocational Guidance Centre has rendered valuable assistance. The text-notebooks have been helpful in classroom work. The occupational monographs have given accurate and up-to-date information. The subscription service has brought to many schools material which has been invaluable to principals and teacher-counsellors. A rapid expansion of the Vocational Guidance Centre can be expected.

Organized guidance programmes will not be set up over night. It will require time to get adequate cumulative records in operation, to assemble occupational and educational information, and to train teachers and teacher-counsellors. However, sufficient progress has been made to indicate that a firm foundation is being laid. With the splendid support of Principals and Inspectors, with the sympathetic understanding of teachers everywhere, with a growing realization of the true nature of guidance by parents and pupils, and with a frank eagerness for guidance by the general public, the work already started will inevitably go forward in 1945.

H. R. BEATTIE,

Director of Guidance

Toronto, July 11, 1945.

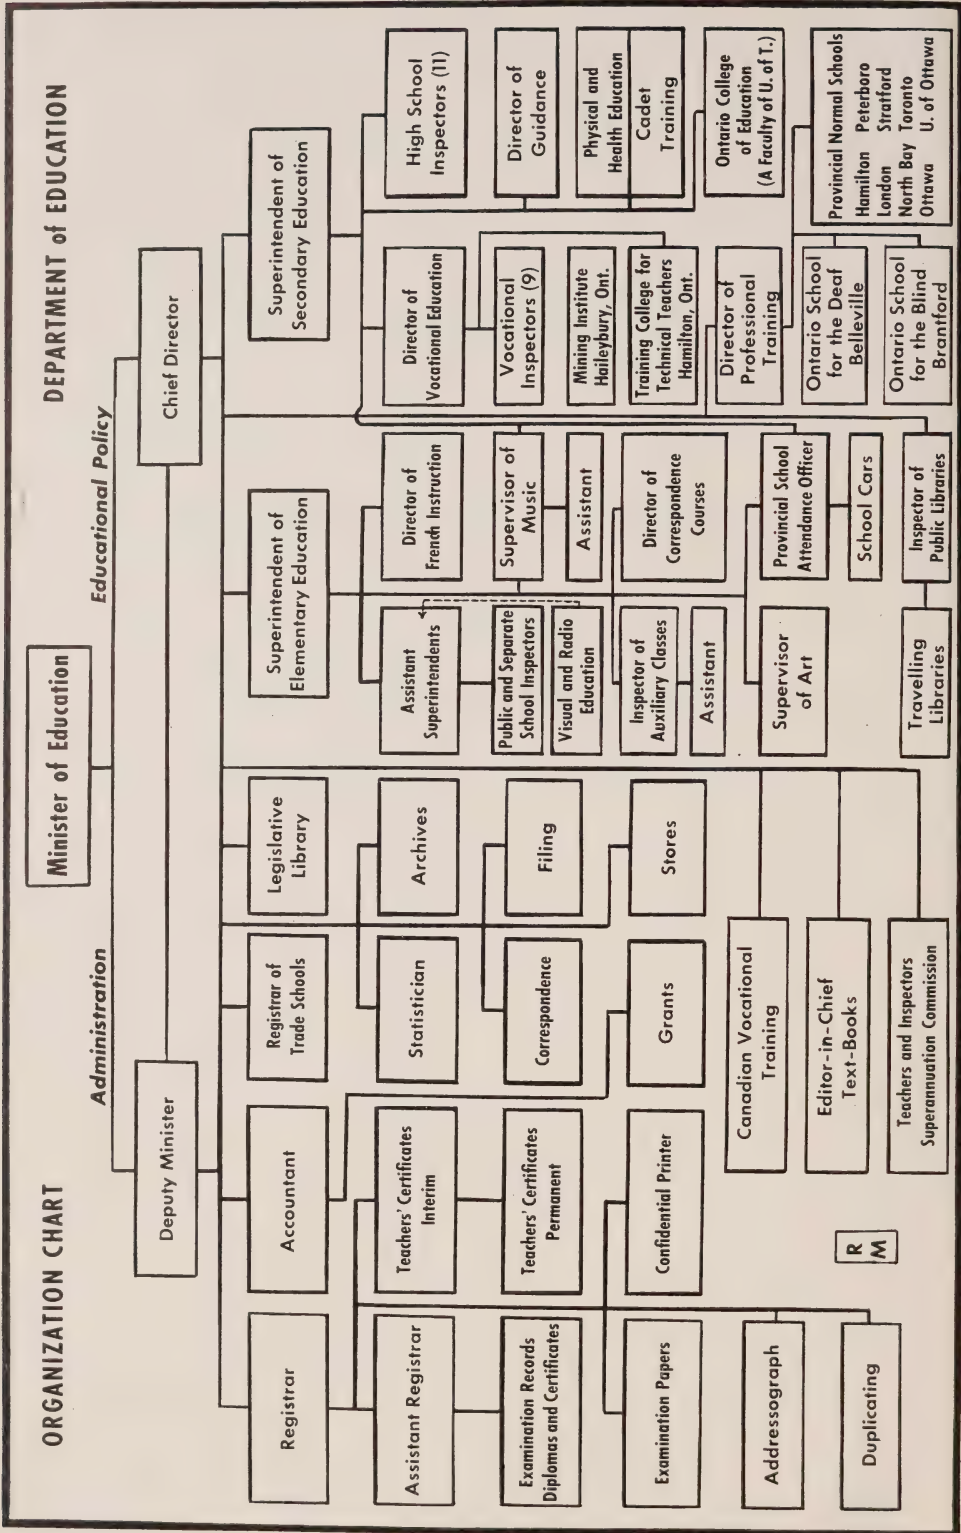

PART II

GENERAL STATISTICS

of

THE PROVINCIAL
SCHOOL SYSTEM

A. M. CAMPBELL,
Statistician.

GRAPH 1

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 75% of these pupils live in Northern Ontario, and 15% of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment (Net)—The number of pupils who have attended school during the year, excluding all duplications.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are seven of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, with stops of about 5 days at certain stations. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. Emphasis is placed on English, writing, spelling and arithmetic. The present enrolment approximates 250, and comprises 15 nationalities. The Department pays all costs.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

SCHOOL YEAR AND HOLIDAYS

Sept. 5th, 1944, to June 29th, 1945

PROVISIONS OF THE SCHOOL ACTS

The school year shall consist of two terms, the first of which shall begin on the first Tuesday of September following Labour Day and shall end on the 22nd day of December, and the second of which shall begin on the 3rd day of January and end on the 29th day of June.

When the 3rd day of January is a Friday, the schools shall not be opened until the following Monday, and when the 29th day of June or the 22nd day of December is a Monday, the schools shall be closed on the preceding Friday.

Every Saturday, every public holiday, the week following Easter Day, and every day proclaimed a holiday by the authorities of the municipality in which the teacher is engaged, and every day upon which a school is closed under the provisions of The Public Health Act, or the regulations of the Department of Education shall be a school holiday.

HOLIDAYS

The following are the holidays in the schools during the school year 1944-45:

- (1) Thanksgiving Day.
- (2) Remembrance Day—November 11th.
- (3) December 23rd to 31st, inclusive—part of Christmas vacation.
- (4) The first two days of January—part of Christmas vacation.
- (5) Easter holidays—March 30th to April 8th—both days included.
- (6) Victoria Day—May 24th.
- (7) The Anniversary of the King's Birthday.
- (8) Summer vacation—June 30th to September 3rd, both days included.

DATES OF OPENING AND CLOSING OF SCHOOLS

The following are the dates of the opening and closing of the High, Continuation, Public and Separate Schools:

Open.....	September 5th	Close.....	December 22nd
Reopen.....	January 3rd	Close.....	March 29th
Reopen.....	April 9th	Close.....	June 29th

NUMBER OF TEACHING DAYS

In the High, Continuation, Public and Separate Schools, the number of teaching days is as follows:

September.....	19	January.....	21
October.....	22	February.....	20
November.....	22	March.....	21
December.....	16	April.....	16
	—	May.....	22
	79	June.....	21
			—
			121
		Total.....	200

P.S.: As the exact dates of the Anniversary of the King's Birthday and Thanksgiving Day have not yet been proclaimed, the deduction has not been made from the above. The total number of teaching days for the academic year will be 198.

Number of teaching days for calendar year 1944 — 199; for calendar year 1945 — 198.

Totals—Secondary.....	454e	468	174*		117*	22	108	145
Grand Totals.....	7,355	6,012	5,566	184	117	22	108	6,012

*Included in elementary section.

a 22 of these are composite schools included with collegiate institutes and high schools.

b All previously included with collegiate institute boards, high school boards and boards of education.

c There are 24 high school districts without schools.

d In addition, there are 7 railway school cars.

e The 22 composite schools are counted once only in totals.

*In addition there are 7 school cars distributed as follows: Kenora 1, Nipissing 1, Rainy River 1, Thunder Bay 1, Sudbury 3.

†There are, in addition, 5 senior auxiliary schools (Hamilton 2, Toronto 3) and 2 navigation schools (Collingwood and Kingston). These latter are open part of the year only.

‡18 schools having commercial departments only, formerly counted as composite, are now treated as purely academic.

IV—CLASSIFICATION OF ONTARIO SCHOOLS BY CLASSROOMS, 1944-45

NOTE:—Urban schools in this table are limited to those in cities, towns and incorporated villages. Large suburban schools are considered rural.

In the secondary schools, laboratories and shops are considered rooms.

No. of Rooms	Elementary			Secondary			Grand Total

A In all Provincially-Controlled Schools.

B Commencing with 1943-44 the net enrolment is used. Previously the May enrolment figure was used. Large suburban and semi-urban enrolment is contained in the urban figure.

C Covers the school year

D This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture, but excludes Itinerant Music Teachers.

E This includes Third Class, District, Permanent Ungraded, and Temporary.

F Included with Public Schools.

G Combined in Elementary Schools.

FINALISTS IN THE 25th ANNUAL PROVINCIAL PUBLIC SPEAKING CONTEST

This contest is conducted by the Ontario School Trustees' and Ratepayers' Association to encourage public speaking in Ontario elementary schools. The province is divided into the districts of Kemptville, Belleville, Toronto, Hamilton, Chatham and Guelph. Finalists meet at Convocation Hall, University of Toronto, during Ontario Educational Association week. In this year the Kemptville district was not represented.

The Grolier Society of Toronto has generously given each year to the winner a set of the Book of Knowledge, and the Samuel Farmer shield, donated in 1936 by Mr. Samuel Farmer, now a life-member of the O.E.A., goes for a year to the school represented by the winner. If any school is fortunate enough to win the shield three years, it becomes the property of the school. To date only one school, S.S. 26 King, York County, has won it twice.

TABLE 36—EVENING VOCATIONAL SCHOOLS—Classification of Students by Subjects of Study, 1944-45

I. ACADEMIC

A—CULTURAL

1. English for New Canadians.....	415	10. Conversational French.....	68
2. Conversational English.....	30	11. Spanish.....	292
3. Reading.....	182	12. Russian.....	43
4. Literature.....	286	13. German.....	31
5. Poetry Appreciation.....	28	14. Music Appreciation.....	42
6. Composition and Spelling.....	480	15. Choral Music.....	22
7. Grammar.....	302	16. Script Writing.....	34
8. Public Speaking.....	120	17. Radio Dramatics.....	23
9. French.....	473		

B—PRACTICAL

1. Arithmetic.....	805	5. Calculus.....	1
2. Algebra.....	650	6. General Mathematics.....	23
3. Geometry.....	444	7. Shop Mathematics.....	735
4. Trigonometry.....	204	8. Mechanics.....	1

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Home Nursing.....	172	4. Dressmaking.....	6,552
2. Meal Preparation and Serving.....	1,869	5. Tailoring.....	27
3. Nutrition and Dietetics.....	421	6. Pattern Making and Design.....	281

B—COMMERCE

1. Writing.....	120	8. Business Forms.....	229
2. Stenography.....	3,023	9. Office Routine.....	185
3. Typewriting.....	5,410	10. Bookkeeping.....	1,454
4. Transcription.....	110	11. Salesmanship.....	7
5. Business Correspondence.....	143	12. Junior Business Machines.....	93
6. Journalism.....	120	13. Industrial French.....	95
7. Business Machines.....	612		

C—ART, DRAFTING, AND DESIGN

(a) Pure Art:			
1. Painting and Drawing.....	56	6. Art Methods.....	41
2. Colour Study.....	316	7. Oil Painting.....	51
3. Still Life Drawing.....	206	8. Water Colour.....	23
4. Life Drawing.....	308	9. Teacher's Art Course.....	15
5. General Art.....	23		
(b) Applied Art:			
1. Lettering and Show Cards.....	212	4. Fashion Drawing and Design.....	194
2. Commercial Art.....	58	5. Photography.....	105
3. Illustrating.....	169		
(c) Industrial Drafting and Design:			
1. Drafting (General).....	931	5. Tool and Die Design.....	40
2. Blue Print Reading.....	152	6. Sheet Metal Drawing.....	23
3. Architectural Drawing.....	249	7. Electrical Drawing.....	15
4. Machine Drawing and Design.....	480	8. Horological Drafting.....	16

D—CRAFTS

1. Arts and Crafts.....	39	7. Rugs.....	17
2. Leather Working.....	265	8. Weaving.....	62
3. Cabinet Making.....	298	9. Toy Making.....	18
4. Pattern Making.....	34	10. Chip Carving.....	18
5. Printing.....	183	11. Glass Blowing.....	10
6. Glove Making.....	22		

E—SCIENCE AND ENGINEERING

(a) Science:			
1. Physics.....	103	4. Chemistry for Nurses.....	86
2. Chemistry.....	324	5. Electricity.....	950
3. Industrial Chemistry.....	100	6. Electronics.....	33
(b) Engineering:			
1. Applied Mechanics.....	20	3. Diesel Engines.....	32
